Psychological Wellbeing as a Consequence of Situational Elements in the New Labour Market

Thesis submitted by

Duncan McIntyre

23rd June 2005

This thesis was submitted in partial fulfilment of the requirements for the Degree of Doctor of Psychology in the School of Psychology, James Cook University

Statement of Access to Thesis

I, the undersigned author of this work, understand that James Cook University will
make this thesis available for use within the University Library and, via the Australian
Digital Theses network, for use elsewhere.
I understand that, as an unpublished work, a thesis has significant protection and the
Copyright Act and;
I do not wish to place any further restriction on access to this work.
Signature Date

Electronic Copy

, the undersigned, the author of this work, declare that the electronic copy of this thesis
provided to the James Cook University Library, is an accurate copy of the print thesis
submitted, within the limits of the technology available.
Signature Date

Declaration

I declare that this thesis is my own work and l	nas not been submitted in any form for
another degree or diploma at any university or	r other institution of tertiary education
Information derived from the published or unp	published work of others has been
acknowledged in the text and a list of reference	ces is given.
	
Signature	Date

Acknowledgments

Academic

First and foremost I would like to thank my supervisor, Dr. Kingsley Tonkin for his academic guidance, exhaustive revisions and for helping me to negotiate mood-troughs along the way. I would also like to thank Professor Ed Helmes for his backdrop of support (and for keeping the faith), and Dr. Peter Creed who provided the inspiration for the project. I also take this opportunity to acknowledge Ms Rochelle Doherty (Secretary to the School of Psychology), who provided many words of encouragement, complete with photocopy codes and paper along the way.

Professional

I would also like to acknowledge the support of management at my various places of work. Specifically, I would like to thank Mr Brian Small & Ms Sandra Macdonald (*Centrelink*) and Ms Susan Carr (*ATODS*) for without their approval of periodic part-time work arrangements my thesis journey would have been even more difficult. I also take this opportunity to thank all the call centre operators who participated in the research.

Personal

I would like to thank my families for their support and encouragement, my folks for checking on me, and my sister, who from the other side of the world kept calling and sending cards encouraging and supporting my journey – love you Nic. Above all, I would like to thank my confidant and partner, the woman who believed in me, and who encouraged my determination with love and support – love you Mims.

In loving memory of

Sister Elizabeth Julian of the Divine Compassion - my Grandma

TABLE OF CONTENTS

ABSTRACT	xiv
CHAPTER ONE: IMPLICATIONS FOR THE NEW LABOUR MARKET	1
1.1 OVERVIEW	1
1.2 THE NEW LABOUR MARKET	1
1.2.1 Scientific Management	
1.2.2 Scientific Management of 'White-Collar' Work	
1.2.3 Customer Service In The New Labour Market	
1.2.4 Investment in call centre business	5
1.3 CALL CENTRE OPERATIONS	5
1.3.1 The call centre operator work role	6
1.4 DEMANDS OF THE CALL CENTRE OPERATOR WORK ROLE	8
1.4.1 Mental Demands of Call Centre Work	
1.4.1.1 Information handling	
1.4.1.2 Cognitive fatigue	
1.4.1.3 Temporal and contextual factors affecting task performance	10
1.4.2 Electronic performance monitoring in call centres	
1.4.2.1 Supervisory relations in the call centre	12
1.4.2.2 Teamwork within call centres	
1.4.2.3 Quantitative versus qualitative performance expectations	
1.4.3 Physical Demands of Call Centre Work	
1.4.3.1 Working with Visual Display Terminals	
1.4.3.2 Vision, hearing and voice disorders associated with call work	
1.4.4 Emotional Labour in the Call Centre	
1.4.4.1 Emotional labour in customer service work roles	
1.4.4.2 Emotional labour in the call centre operator work role	
1.4.4.3 Emotional dissonance in call centre work	19
1.5 WITHDRAWAL BEHAVIOUR: ABSENTEEISM, TENURE PROJECTIONS	
AND TURNOVER	21
1.5.1 Absenteeism	
1.5.2 Intention to Quit	
1.5.3 Turnover	
1.5.3.1 Turnover in Australian call centres	
1.6 CHAPTER ONE SUMMARY	24
CHAPTER TWO: MODELS OF PSYCHOLOGICAL WELLBEING	26
2.1 OVERVIEW	26
2.2 DEFINITIONS OF PSYCHOLOGICAL WELLBEING	26
2.2.1. Context-Free Psychological Wellbeing	27
2.2.1.1. Psychological distress	
2.2.1.2. Life satisfaction	
2.2.2 Job-Related Psychological Wellbeing	
2.2.2.1. Job satisfaction	30

ABSTRACT

Approximately four thousand call centres employ more than 160,000 people in Australia, yet relatively little attention has been paid to how this type of work influences the wellbeing of those who do it – despite substantially higher absence frequencies and turnover rates relative to other industries. Utilising a survey design, the present study compared two situational elements models in their prediction of context-free and job-related psychological wellbeing in two samples of public sector call centre operators. The replicated findings were that the situational elements relating to the importance of clarity for how to derive social value and meet the expectations of the work environment were most predictive of psychological distress, life and job satisfaction. While the availability of money was also predictive of life satisfaction, situational elements relating to Job Scope were important to the prediction of job satisfaction. The addition of Job Scope variables found that Warr's (1987) model of Principal Environmental Influences was a stronger predictor of job satisfaction than Jahoda's (1981) Access to Categories of Experience (ACE) model. Therapeutic recommendations for job re-design required enrichment rather than simplification of call work.
