Serial Verb Constructions
Explorations in Linguistic Typology

General Editors
Alexandra Y. Aikhenvald and R. M. W. Dixon
Research Centre for Linguistic Typology, La Trobe University

This series focuses on aspects of language that are of current theoretical interest and for which there has not previously or recently been any full-scale cross-linguistic study. Its books are for typologists, fieldworkers, and theory developers. They are also designed for use in advanced seminars and courses. The next two volumes will be on complementation and grammars in contact.

1 SERIAL VERB CONSTRUCTIONS IN TYPOLOGICAL PERSPECTIVE 1
Alexandra Y. Aikhenvald

1 General remarks 1
2 Defining serial verb constructions 4
3 Composition and semantics of serial verb constructions 21
4 Formal properties of serial verb constructions 37
5 Productivity of serialization, and functions of serial verb constructions 45
6 Which verbs are likely to occur in serial verb constructions? 47
7 Several kinds of serial verb constructions in one language: iconic motivation 50
8 Properties of serializing languages, and the diffusion of serial verb constructions 52
9 Summary, and prospects for further study 55
10 Overview of the volume 57
Appendix. Approaches to serial verb constructions and terminological issues 58
References 60

2 ON SERIAL VERB CONSTRUCTIONS IN CANTONESE 69
Stephen Matthews

1 Introduction and background to Cantonese 69
2 Defining properties 72
3 Argument sharing 74
4 Properties of serial constructions 76
5 Lexicalization and grammaticalization 79
6 Wordhood and contiguity 81
7 Productivity of serialization 82
8 Typological considerations 84

Preface

Serial verb constructions (sometimes called just serial verbs) as a grammatical phenomenon have been in the focus of linguistic analysis for a fair time. However, no one has so far attempted a book-length cross-linguistic typological study of the phenomenon, which would provide a comprehensive analytic framework, based on a wide range of languages of different typological profiles and genetic affiliations. The purpose of this volume is to fill the gap.

The volume includes a typological introduction, followed by revised versions of fifteen of the sixteen presentations from the International Workshop 'Serial verb constructions', held at the Research Centre for Linguistic Typology, La Trobe University, 9–14 June 2003. An earlier version of Chapter 1 had been circulated to the contributors, to ensure that the detailed studies of serial verb constructions in individual languages were cast in terms of a common set of typological parameters. This is the second monograph in the series Explorations in Linguistic Typology, devoted to volumes from the International Workshops sponsored by RCLT.

Linguists interested in gaining a brief overview of the most relevant parameters for serial verb constructions are advised to first read Chapter 16, and then turn to Chapter 1 for a more detailed exposition of relevant analytical problems and the discussion of parameters for the classification of serial verbs—including division into symmetrical and asymmetrical, their formal properties, and their wordhood. Not all of these parameters are new—but the way in which they are systematically discussed and applied provides an original perspective and presents a comprehensive view of serial verb constructions worldwide.

The week of the workshop was an intellectually stimulating and exciting time, full of discussions and cross-fertilization of ideas. All of the authors have first-hand experience of intensive, fieldwork-based investigation of languages, as well as in dealing with linguistic typology, historical comparative issues, and problems of areal diffusion. The analysis is cast in terms of basic linguistic theory—the cumulative typological functional framework in terms of which almost all descriptive grammars are cast—and avoids formalisms (which provide reinterpretations rather than explanations, and come and go with such frequency that any statement made in terms of them is likely soon to become inaccessible).

Languages from West Africa, East Asia, and Oceania are known for their serial verbs. In view of the considerable number of extensive studies of verb serialization in Creole languages and their relative typological uniformity, it seemed
unnecessary to include a special chapter on Creoles in this volume. Instead, the volume covers languages from the areas where verb serialization is not as pervasive and not as widely known—New Guinea, northern Amazonia, Mexico, and especially North America.

It is our hope that this volume will provide a consolidated conceptual and analytic framework covering the major parameters for serial verbs as part of the phenomenon of multiverb structures. It lays the foundations for further typological cross-linguistic work on serial verb constructions, their nature, and development. The chapters follow a unified typological approach. All this contributes to the reliability and comparability of the inductive generalizations attempted throughout the volume.

We thank all the authors for taking part in the Workshop, for getting their papers in on time, and for revising them according to the recommendations of the editors.

We owe a special dept of gratitude to Siew Peng Condon, Executive Officer of RCLT, for organizing the Workshop in a most efficient and caring manner, and to Perihan Avdi and Adam Bowles for assisting with the preparation of this volume.

This volume owes its existence to the vision and care of Professor Michael Osborne, Vice-Chancellor and President of La Trobe University. He sponsored the establishment of RCLT within La Trobe’s Institute for Advanced Study, and specified that its activities should include an annual International Workshop with stringent quality control. Professor Osborne opens each Workshop, launches our volumes, and every year hosts a convivial dinner for the participants.
Notes on the Contributors

Alexandra Y. Aikhenvald is Professor and Associate Director of the Research Centre for Linguistic Typology at La Trobe University. She has worked on descriptive and historical aspects of Berber languages and has published, in Russian, a grammar of Modern Hebrew (1990). She is a major authority on languages of the Arawak family, from northern Amazonia, and has written grammars of Bare (1995, based on work with the last speaker who has since died) and Warekena (1998), plus A Grammar of Tariana, from Northwest Amazonia (Cambridge University Press, 2003), in addition to essays on various typological and areal features of South American languages. Her monographs, Classifiers: a typology of noun categorization devices (2000, paperback reissue 2003), Language contact in Amazonia (2002), and Evidentiality (2004) were published by Oxford University Press. She is currently working on a reference grammar of Manambu, from the Sepik area of New Guinea. 

Address: Research Centre for Linguistic Typology, La Trobe University, Victoria 3086, Australia; e-mail: a.aikhenvald@latrobe.edu.au

Felix K. Ameka teaches in the Department of African Languages and Cultures, Leiden University, and is a Research Associate in the Language and Cognition Group, Max Planck Institute for Psycholinguistics, Nijmegen, The Netherlands. His main interests are in language description, typology, semantics, pragmatics, anthropological linguistics, and ethnography of communication with special reference to West African languages. He has several publications on these topics. Currently he is working on the documentation of the language and culture of Likpe (Ghana) and (with James Essegbe) preparing a modern comprehensive grammar of Ewe. He is Editor-in-Chief of the Journal of African Languages and Linguistics.

Address: Department of African Languages and Cultures, University of Leiden, Postbus 9515, NL-2300 Leiden, The Netherlands; e-mail: f.k.ameka@let.leidenuniv.nl

Azeb Amha is a post-doctoral researcher at the Institut für Afrikanistik, University of Cologne (Germany) and the Department of African Languages and Cultures, Leiden University (The Netherlands). She works on Omotic languages, and is interested in typological/areal as well as historical and comparative studies. Currently she is writing a grammar of Wolaitta (with Gerrit Dimmendaal) and is documenting Zargulla, an endangered Omotic language.
Address: Institut für Afrikanistik, Universität zu Köln, Meister-Ekkehart-Strasse 7, D-50923, Köln, Germany

Anthony Diller's research interests focus on Thai and related languages. Publications include over fifty articles and contributions to standard reference works, including The World's Writing Systems, edited by P. T. Daniels and W. Bright (1996), and the International Encyclopedia of Linguistics, second edition (2004), edited by W. Frawley, both published by Oxford University Press. Until recently he coordinated Thai and Lao language teaching at the Australian National University, where he was Founding Director of the National Thai Studies Centre. As a Fellow of the Australian Academy of the Humanities, he has been active in foreign language education policy.

Address: Department of Linguistics, University of Sydney, NSW 2006, Australia; e-mail: adiller@iprimus.com.au

Address: Institut für Afrikanistik, Universität zu Köln, Meister-Ekkehart-Strasse 7, D-50923, Köln, Germany; e-mail: gerrit.dimmendaal@uni-koeln.de

R. M. W. Dixon is Professor and Director of the Research Centre for Linguistic Typology at La Trobe University. He has published grammars of a number of Australian languages (including Dyirbal and Yidiny), in addition to A Grammar of Boumaa Fijian (University of Chicago Press, 1988), A New Semantic Approach to English Grammar (Oxford University Press, 2005), and The Jarawara language of southern Amazonia (Oxford University Press, 2004). His works on typological theory include Where have all the Adjectives Gone? and other Essays in Semantics and Syntax (1982) and Ergativity (1994). The rise and fall of languages (1997) expounded a punctuated equilibrium model for language development; this is the basis for his detailed case study Australian languages: their nature and development (2002).

Address: Research Centre for Linguistic Typology, La Trobe University, Victoria 3086, Australia; no e-mail
**Notes on the Contributors**

Alexandre François is carrying out research on several languages of Vanuatu, most of which are endangered, as a member of the French research team Langues et Civilisations à Tradition Orale (Lacito-CNRS, Paris). He has published *Araki: A disappearing language of Vanuatu* (Pacific Linguistics, 2002), and *La sémantique du prédicat en mwotlap, Vanuatu* (Peeters, 2003). His fields of interest include the typology of verbal aspect and modality, polysemy and semantic change, phraseology, and discourse pragmatics. His current project is to investigate the linguistic history and the oral tradition of the Banks and Torres islands (Vanuatu).

*Address:* Lacito-CNRS, rue Guy Môquet, F-94801, Villejuif, France; *e-mail:* Alexandre.Francois@vjf.cnrs.fr

John Hajek is an Associate Professor in the School of Languages at the University of Melbourne. His research interests include language typology, phonetics/phonology, Romance linguistics, and the languages of Southeast Asia and Melanesia. He is currently working on the description of Austronesian and non-Austronesian languages spoken in East Timor, and has recently co-authored *Tetun Dili, A Grammar of an East Timorese Language.*

*Address:* French and Italian Studies, University of Melbourne, Victoria 3010, Australia; *e-mail:* j.hajek@unimelb.edu.au

Birgit Hellwig currently works as a post-doctoral fellow in the Endangered Languages Documentation Programme at La Trobe University (Melbourne) and SOAS (London), where she prepares an annotated text corpus, a dictionary, and a comprehensive reference grammar of Goemai. She has a background in African linguistics, and she has worked extensively on Goemai since 1998. Her interests lie in the coding of semantic information in grammar, in the relationship between semantics and pragmatics, and in contact linguistics.

*Address:* ELDP, School of Oriental & African Studies, Thornhaugh Street, Russell Square, London WC1H 0XG, United Kingdom; *e-mail:* bh21@soas.ac.uk

Andrew Ingram is a Research Fellow at the Research Centre for Linguistic Typology at La Trobe University. He is currently writing a comprehensive description of Dumo. He has also conducted research on other languages of Papua New Guinea and is the author of *Anamuxra: A language of Madang Province, Papua New Guinea* (in press with Pacific Linguistics) as well as journal articles and book chapters on Papuan languages.

*Address:* Research Centre for linguistic Typology, La Trobe University, Victoria 3086, Australia

Christa Kilian-Hatz currently holds a prestigious Heisenberg Stipend at the Institut für Afrikanistische Sprachwissenschaften at the University of Frankfurt am Main. Her interests lie in the areas of grammaticalization, ideophones, and linguistic description and documentation of Baka (Adamawa-Ubangi) and Khwe...
(Central Khoisan). She is the author of several collections of texts in Baka and Khwe, and of a comprehensive grammar of Baka. She is currently completing a dictionary and a comprehensive grammar of Khwe.

Address: Institut für Afrikanische Sprachwissenschaften, Johannes Wolfgang Goethe Universität, Dantestraße 4-6 3 Stock, D-60054 Frankfurt am Main, Germany; e-mail: C.Kilian-Hatz@em.uni-frankfurt.de

Frantisek Lichtenberk has undertaken fieldwork in Papua New Guinea and the Solomon Islands. Publications include A grammar of Manam, 'On the gradualness of grammaticalization', 'Reciprocals without reflexives', 'The possessive-benefactive connection', 'To list or not to list: writing a dictionary of a language undergoing rapid and extensive lexical changes'. Work in progress includes a dictionary and a grammar of Toqabaqita.

Address: Department of Applied Language Studies and Linguistics, University of Auckland, Private Bag 92019, Auckland, New Zealand; e-mail: f.lichtenberk@auckland.ac.nz

Stephen Matthews studied Modern and Medieval Languages at Trinity Hall, Cambridge and pursued doctoral studies in Linguistics at the University of Southern California. He is currently Associate Professor in Linguistics at the University of Hong Kong. Specializing in language typology and the grammar of Sinitic languages, he is a co-author of Cantonese: a Comprehensive Grammar and the author of several other studies of Cantonese.

Address: Department of Linguistics, The University of Hong Kong, Pokfulam, Hong Kong; e-mail: matthews@hkucc.hku.hk

Willem de Reuse (Ph.D., University of Austin, 1988) is Assistant Professor (Research) at the University of North Texas, Denton. He previously taught at the University of Chicago and at the University of Arizona. He has carried out extensive field research and published on Lakota, Siberian Yupik Eskimo, and Western Apache of Arizona. He is a consultant to the Apache tribes of Arizona, and has completed a pedagogical grammar of Apache. He is currently engaged in writing a comprehensive reference grammar of Western Apache, as well as in the compilation of the first scientific dictionary of that language.

Address: 422 Magnolia St, Denton, TX, 76201, USA; e-mail: rwd0002@unt.edu

David B. Solnit is associated with the Sino-Tibetan Etymological Dictionary and Thesaurus (STEDT) project at University of California, Berkeley, for which he is working on a Handbook of Comparative Karen. His publications include Eastern Kayah Li: Grammar, Texts, Glossary (University of Hawai‘i Press, 1997) and descriptive and historical articles on Karen, Tai-Kadai, and Hmong-Mien languages. He has taught at Cornell University and the University of Michigan, and has conducted field research in northern Thailand and southern China.
