# **The tectonics of the Arkansas river region, Colorado, USA**

**Thesis submitted by**

**Hui Cao BSc, MSc CUGB (Beijing)**

**in August 2011**

**for the degree of Doctor of Philosophy**

**in the School of Earth and Environmental Sciences**

**James Cook University, Australia**

## STATEMENT OF ACCESS

I, the undersigned, the author of this thesis, understand that James Cook University will make it available of use within the University Library and, by microfilm or other means, allow access to other users in other approved libraries.

All users consulting this thesis will have to sign the following statement:

*In consulting this thesis, I agree not to copy closely or paraphrase it in whole or in part without the written consent of the author; and to make proper public written acknowledgement for any assistance that I have obtained from it.*

Beyond this, I do not wish to place any restrictions on access to this thesis.

## STATEMENT OF SOURCES

### *DECLARATION*

*I declare that this thesis is my own work and has not been submitted in any form for another degree or diploma at any university or other institution of tertiary education. Information derived from the published and unpublished work of others has been acknowledged in the text and a list of references is given*

## **STATEMENT ON THE CONTRIBUTION OF OTHERS**

Prof. T. H. Bell provided supervision, guidance and editorial assistance for this body of work. Funding for this study was provided by a China Scholarship Council and James Cook University Scholarship. The samples collected from Colorado in this study were originally prepared and acquired by Tom Lee. Chris Fletcher provides the microstructural data of New Mexico for Section D. The contribution for Section D of Chris Fletcher is around 40%.

## ACKNOWLEDGMENTS

Firstly and most importantly I would like to thank Professor Tim Bell for his seemingly boundless energy and enthusiasm in his role as supervisor. Tim created a fantastic research environment within the SAMRI group at James Cook University. Many thanks are due to my colleagues in SAMRI for providing a very stimulating and enjoyable workplace. My Thanks also go to Dr. Mike Rubenach for all his help. In particular, I would like to thank Afroz Shah, Ahmed Abusharib, Asghar Ali, Clement Fay, Chris Fletcher, Ioan Vasile Sanislav, Jyotindra Sapkota, Mark Rieuwers, Raphael Quentin de Gromard and Shyam Ghimire with whom I enjoyed countless lively discussions about various aspects of geology. Field trip assistance and suggestions from Tom Lee and Prof. Christine S. Siddoway are gratefully acknowledged. Chris Fletcher is thanked for providing the data in Northern New Mexico, and he is the co-author of Section D.

The staff at the Advanced Analytical Centre at James Cook University provided superb technical assistance in data collection. In particular, I would like to thank Dr Kevin Blake for his support on the electron microprobe. Darren Richardson is thanked for his help in preparing thin sections.

Funding for this project was provided by a China Scholarship Council and James Cook University Scholarship.

I would also like to thank my mum and my dad for their constant support and encouragement throughout my stay in Townsville. Finally, I would like to thank to my wife, for her love, patience and inspiration she has given to me during the course of this work.

## Table of Content

Introduction and Thesis Outline.....	3
SECTION A.....	6
Abstract.....	7
1 Introduction.....	7
2 Geological Setting.....	9
3 FIA Data and Interpretation of the FIA Succession.....	10
4 Samples and dating method.....	11
5 Results and Interpretation.....	13
6 Discussion.....	14
7 Conclusions.....	15
References.....	16
Figures and tables.....	21
SECTION B.....	37
Abstract.....	38
1. Introduction.....	38
2. Geological Setting.....	39
3. Structural relationships.....	40
4. FIA measurements.....	41
5. FIA data.....	42
6. Asymmetry of overprinting foliations relative to each FIA set.....	42
7. Interpretation.....	43
8. Discussion.....	46
References.....	47
Figures and tables.....	51
SECTION C.....	74
Abstract.....	75
1 Introduction.....	75
2 Regional Geology.....	76
3 FIAs.....	78
4 Axial planes of folds and schistosity data.....	79
5 Interpretation.....	80
