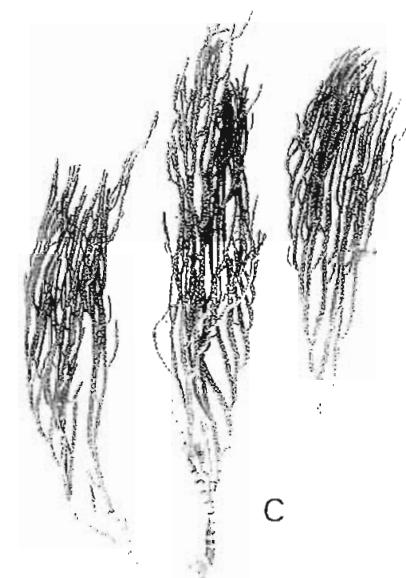

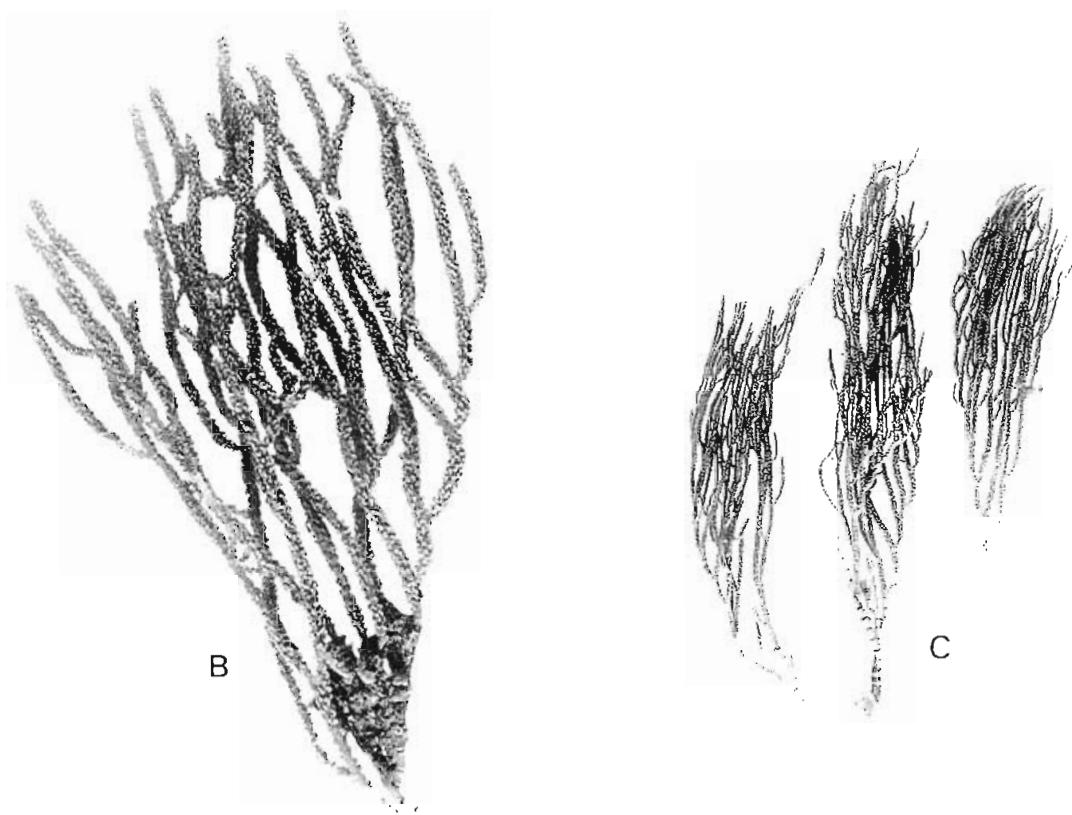

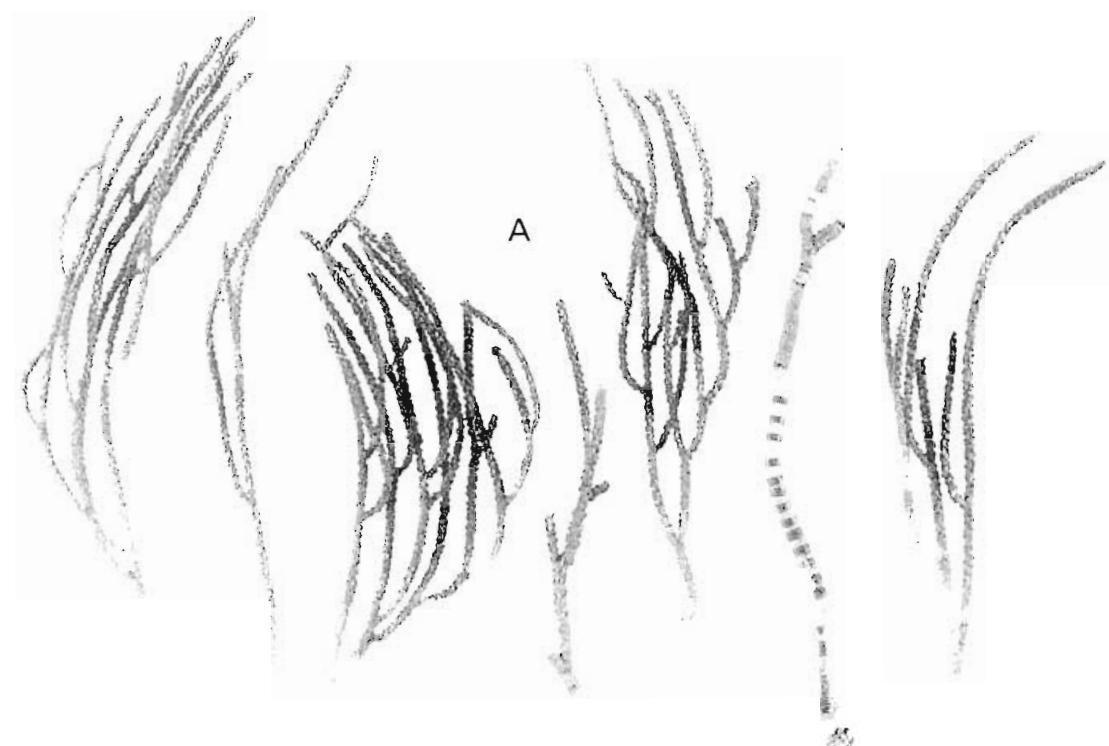

Fig. 124. A,B. *Sphaerokodisis flabellum* (Thomson & Mackinnon, 1911): (A). Lectotype, natural size; (B). AM G15297, natural size; C. *Sphaerokodisis tenuis* (Thomson & Rennet, 1931), AM G15600, natural size x 0.5.

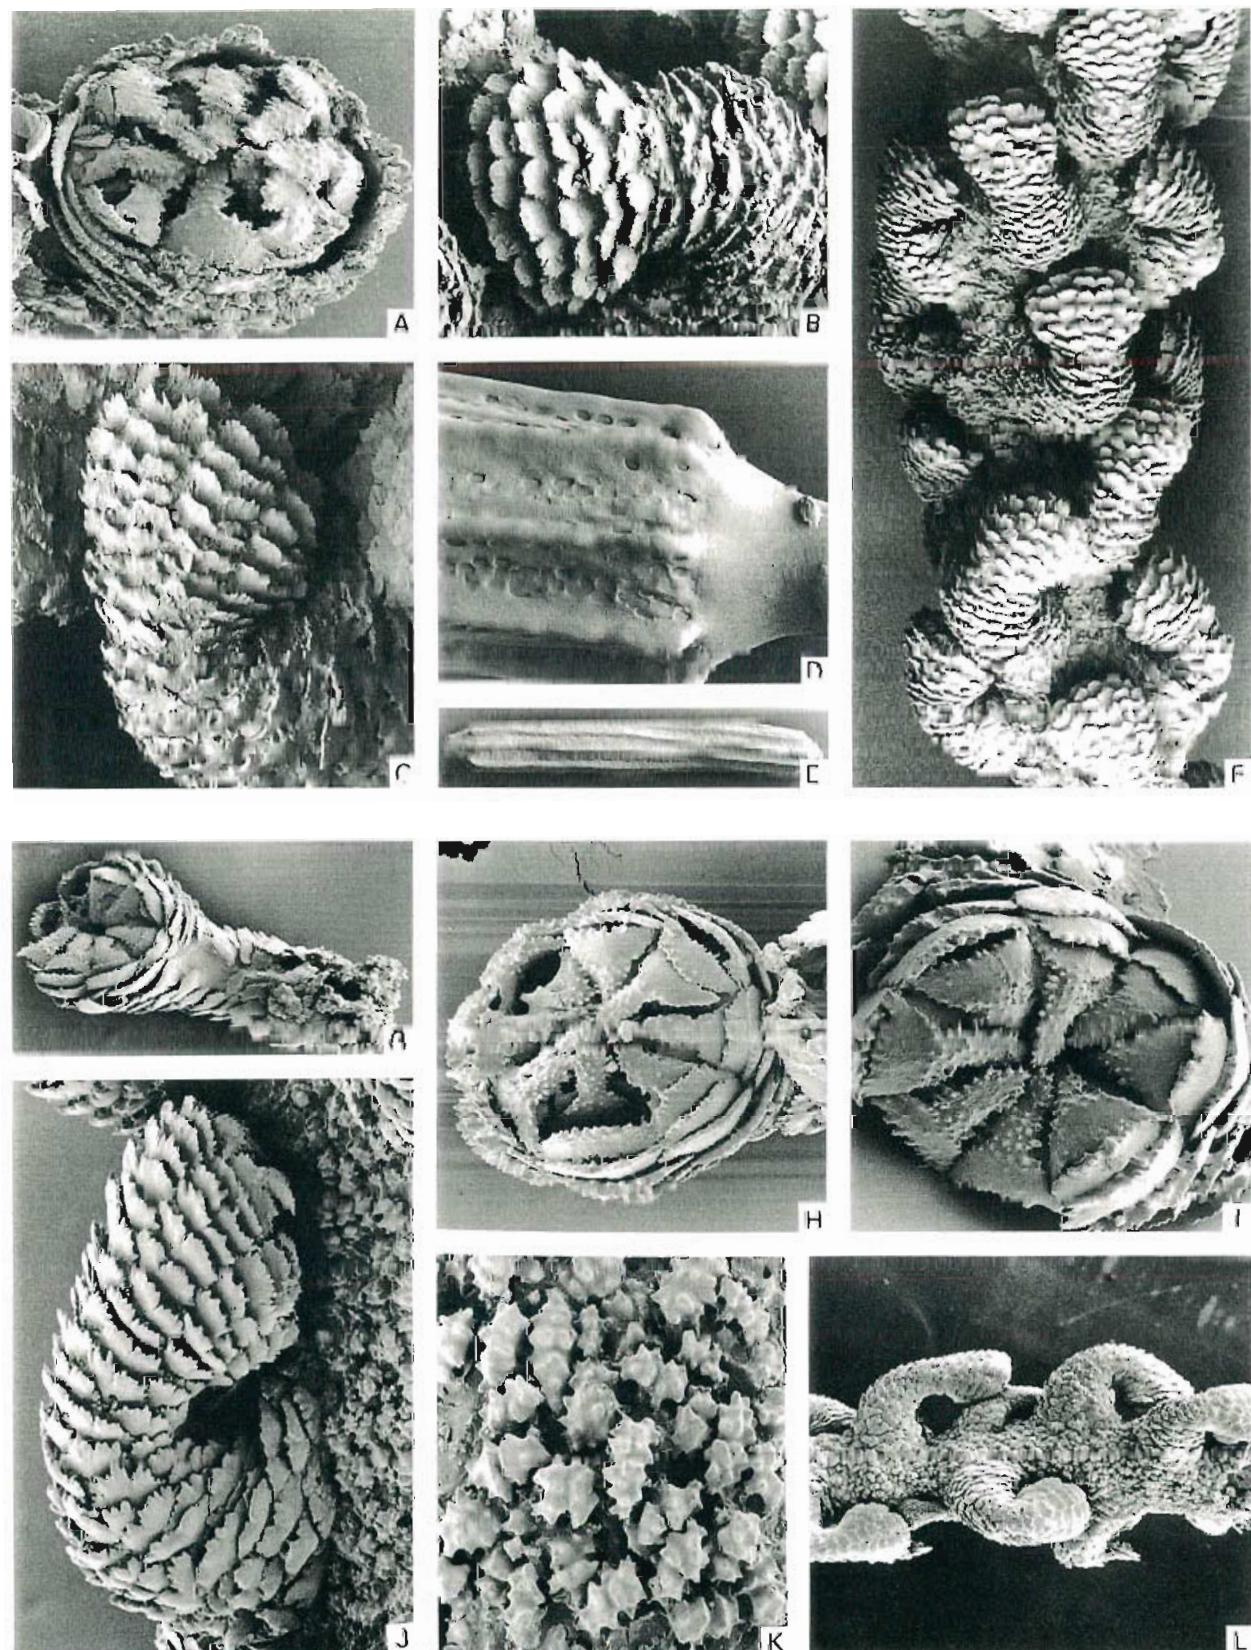

Fig. 125. *Sphaerokodisis flabellum* (Thomson & Mackinnon, 1911). A-F. Lectotype: (A-C). Polyps; (D-E). Axial internodes; (F). Twig fragment. G-L. AM G5679: (G-J). Polyps; (K). Coenenchyme; (L). Twig fragment.

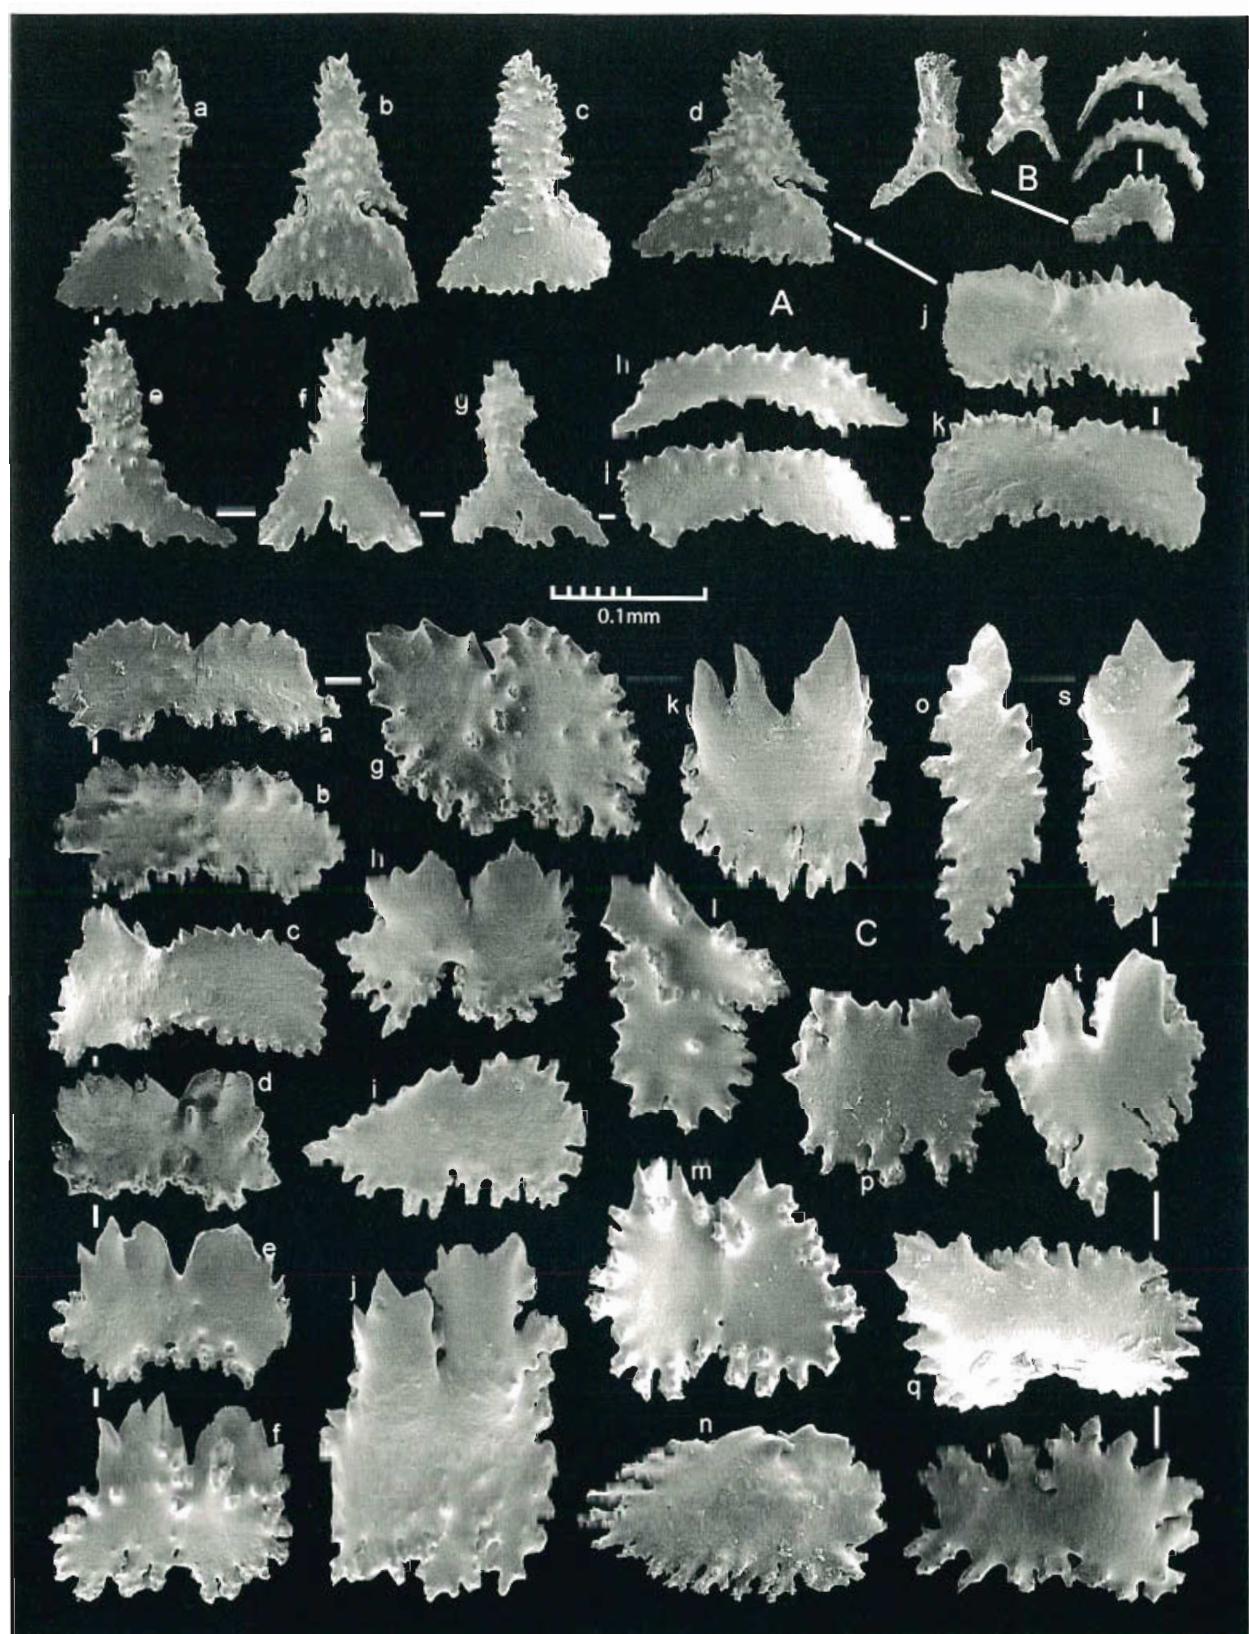

Fig. 126. *Sphaerokodisis flabellum* (Thomson & Mackinnon, 1911), lectotype, sclerites: A. Anthopoma; B. Tentacles; C. Polyp body.

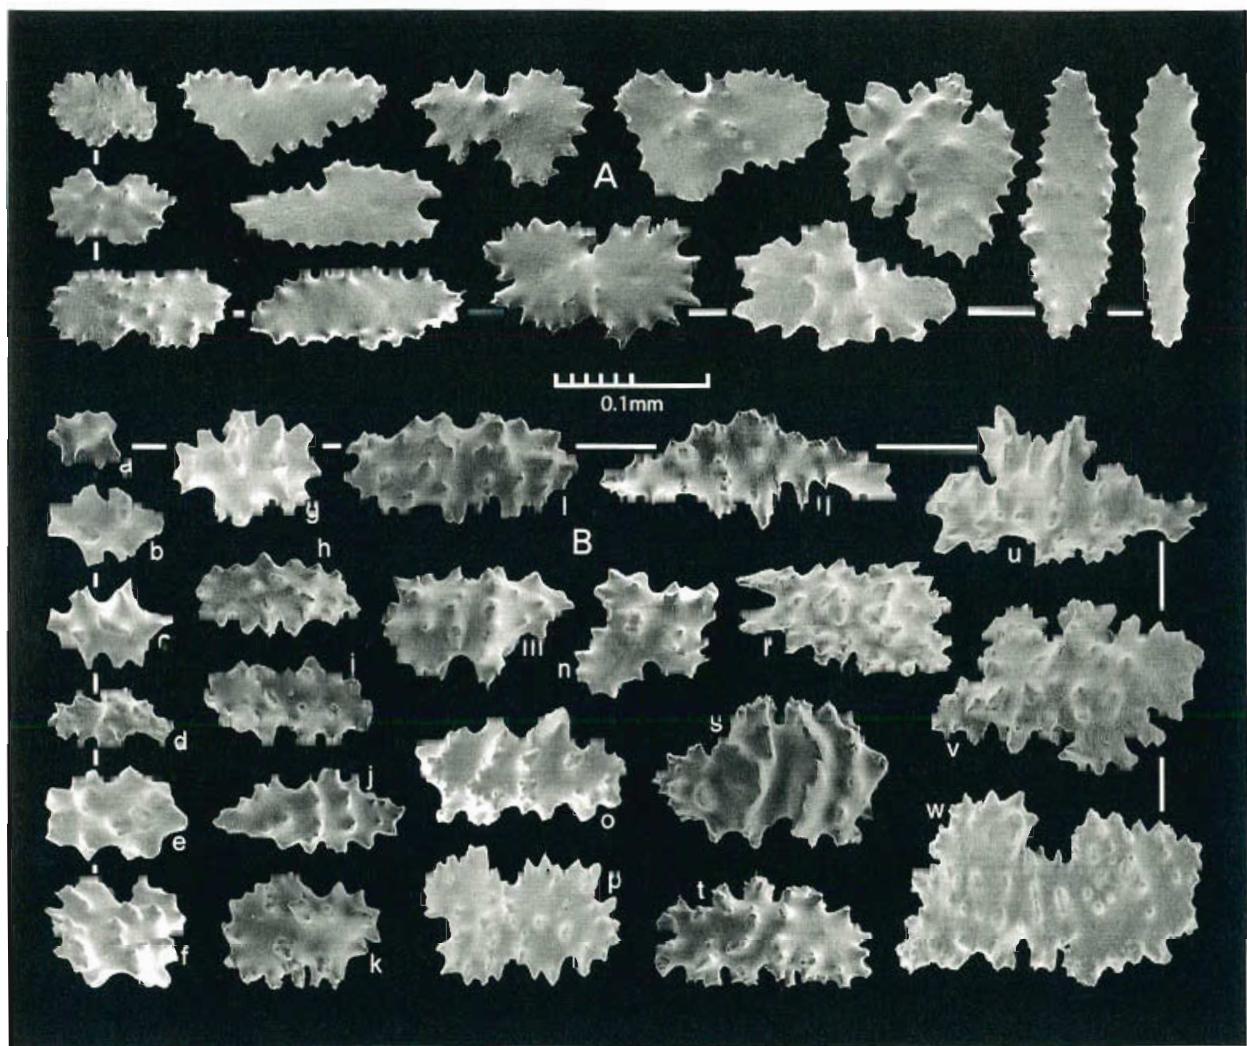

Fig. 127. *Sphaerokodisis flabellum* (Thomson & Mackinnon, 1911), lectotype, sclerites: A. Polyp/twig adaxial juncture; B. Branch coenenchyme.

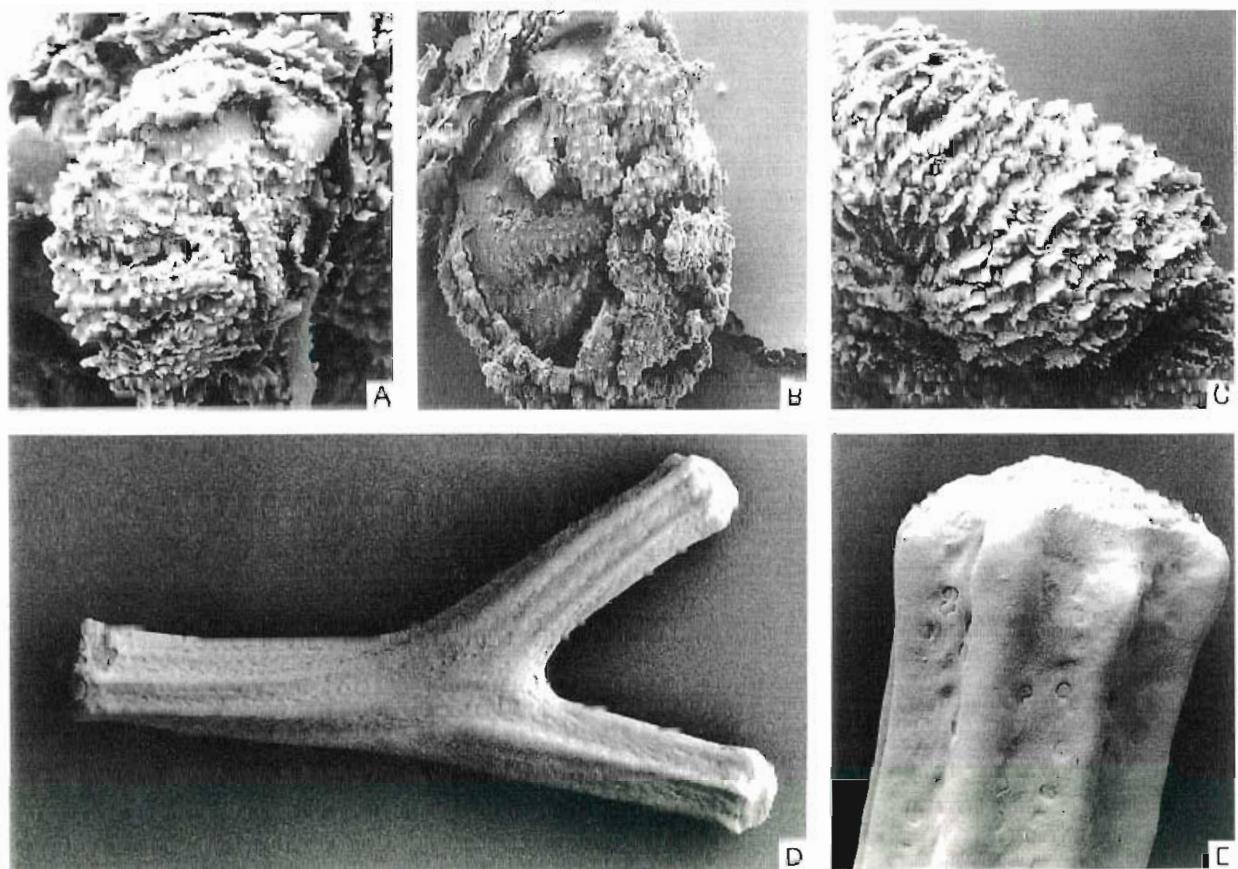

Fig. 128. *Sphaerokodisis tenuis* (Thomson & Rennet, 1931), holotype: A-C. Polyps; D-E. Axial internodes.

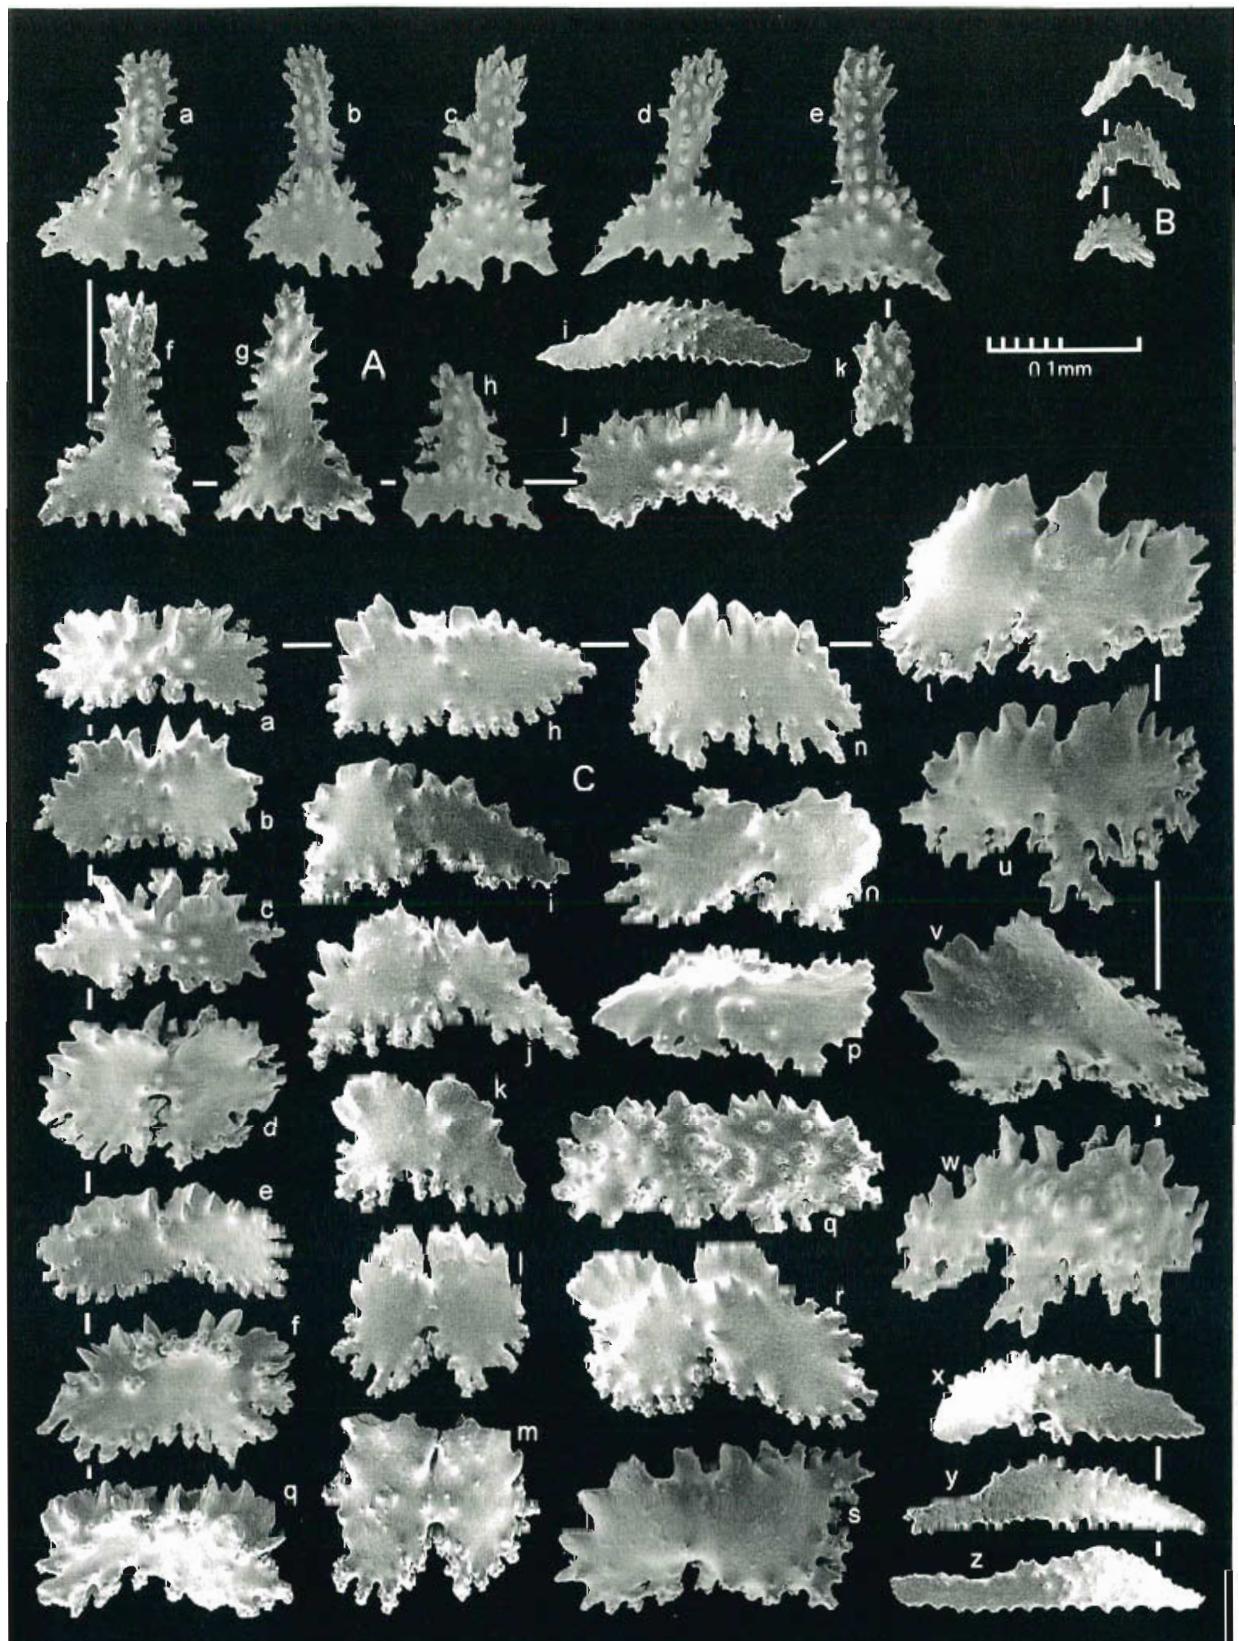

Fig. 129. *Sphaerokodisis tenuis* (Thomson & Rennet, 1931), holotype, sclerites: A. Anthopoma; B. Tentacles; C. Polyp body.

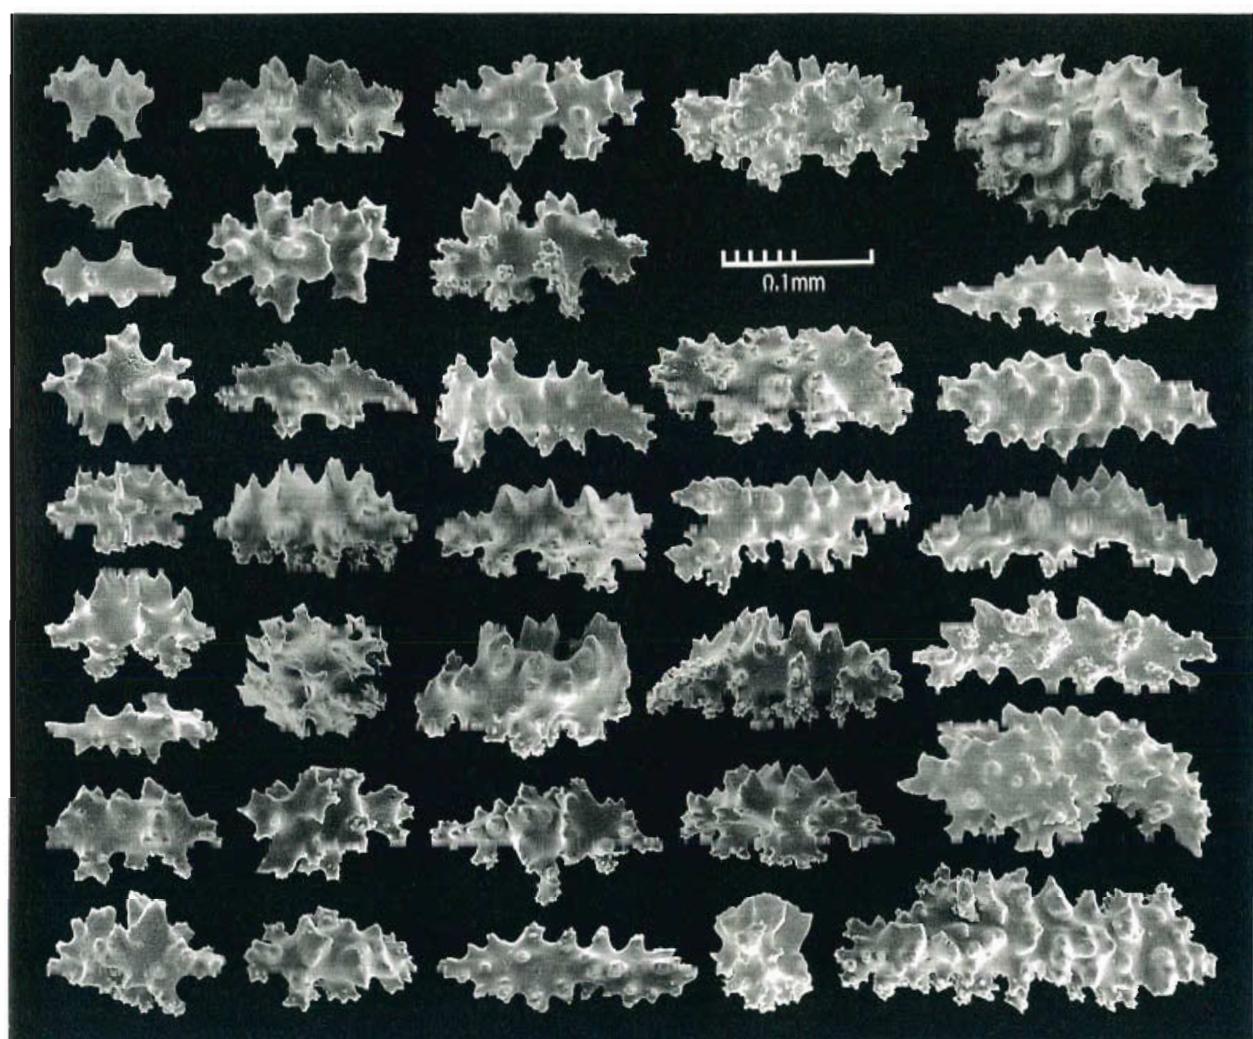

Fig. 130. *Sphaerokodisis tenuis* (Thomson & Rennet, 1931), holotype, sclerites: Branch coenenchyme.

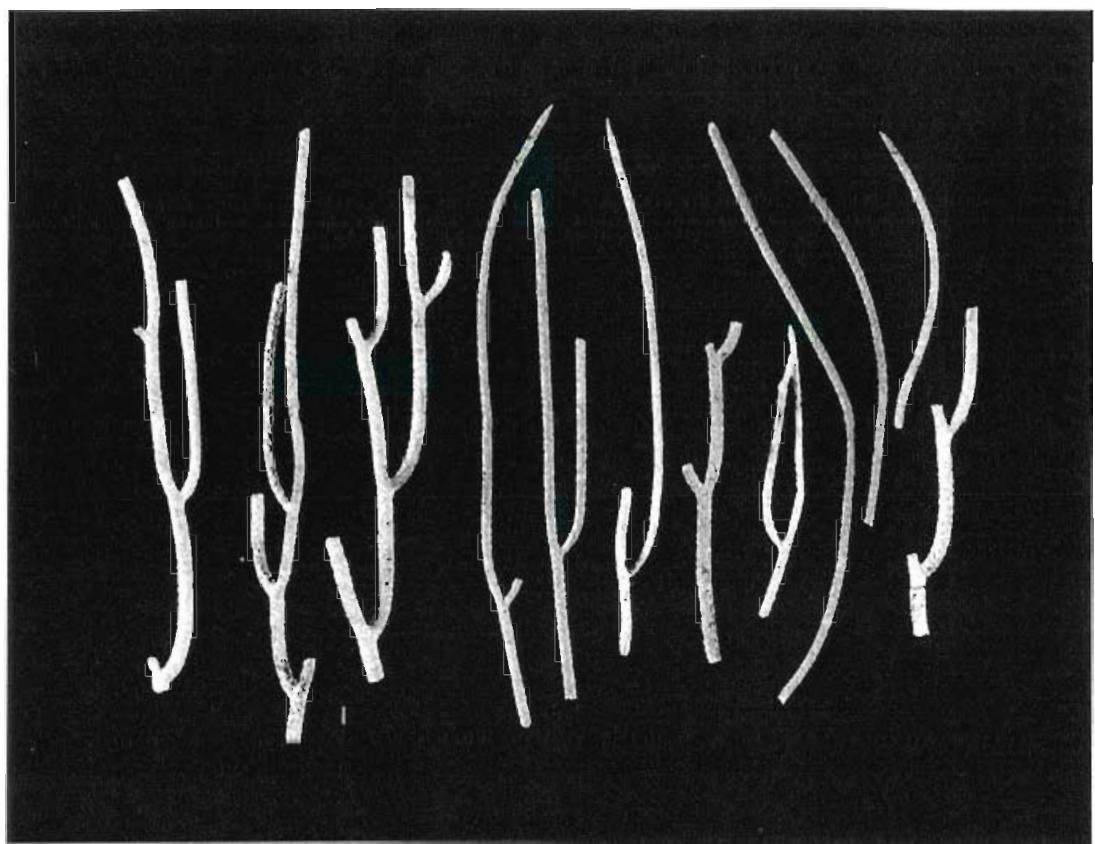

Fig. 131. *Sphaerokodisis australis* (Thomson & Mackinnon, 1911), fragments of the syntypes, all natural size.

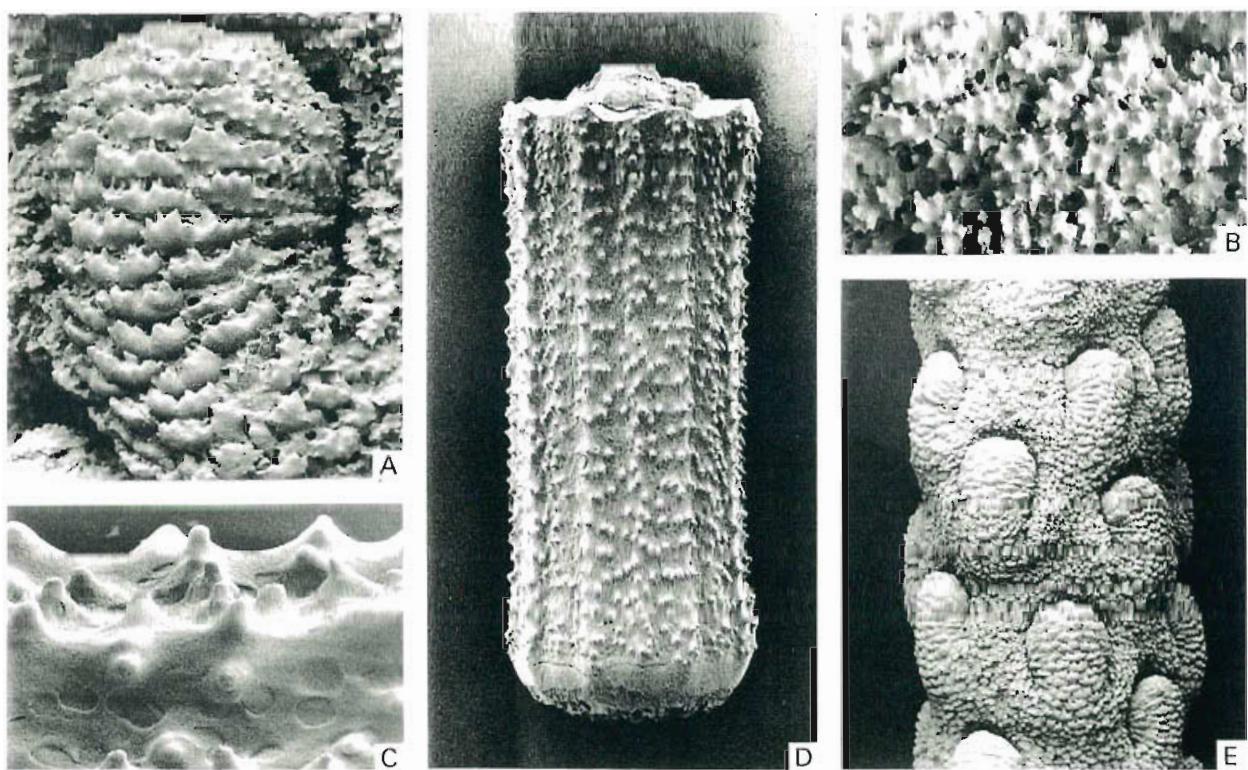

Fig. 132. *Sphaerokodisis australis* (Thomson & Mackinnon, 1911), syntype: A. Polyp; B. Coenenchyme; C-D. Axial internodes; E. Twig fragment.

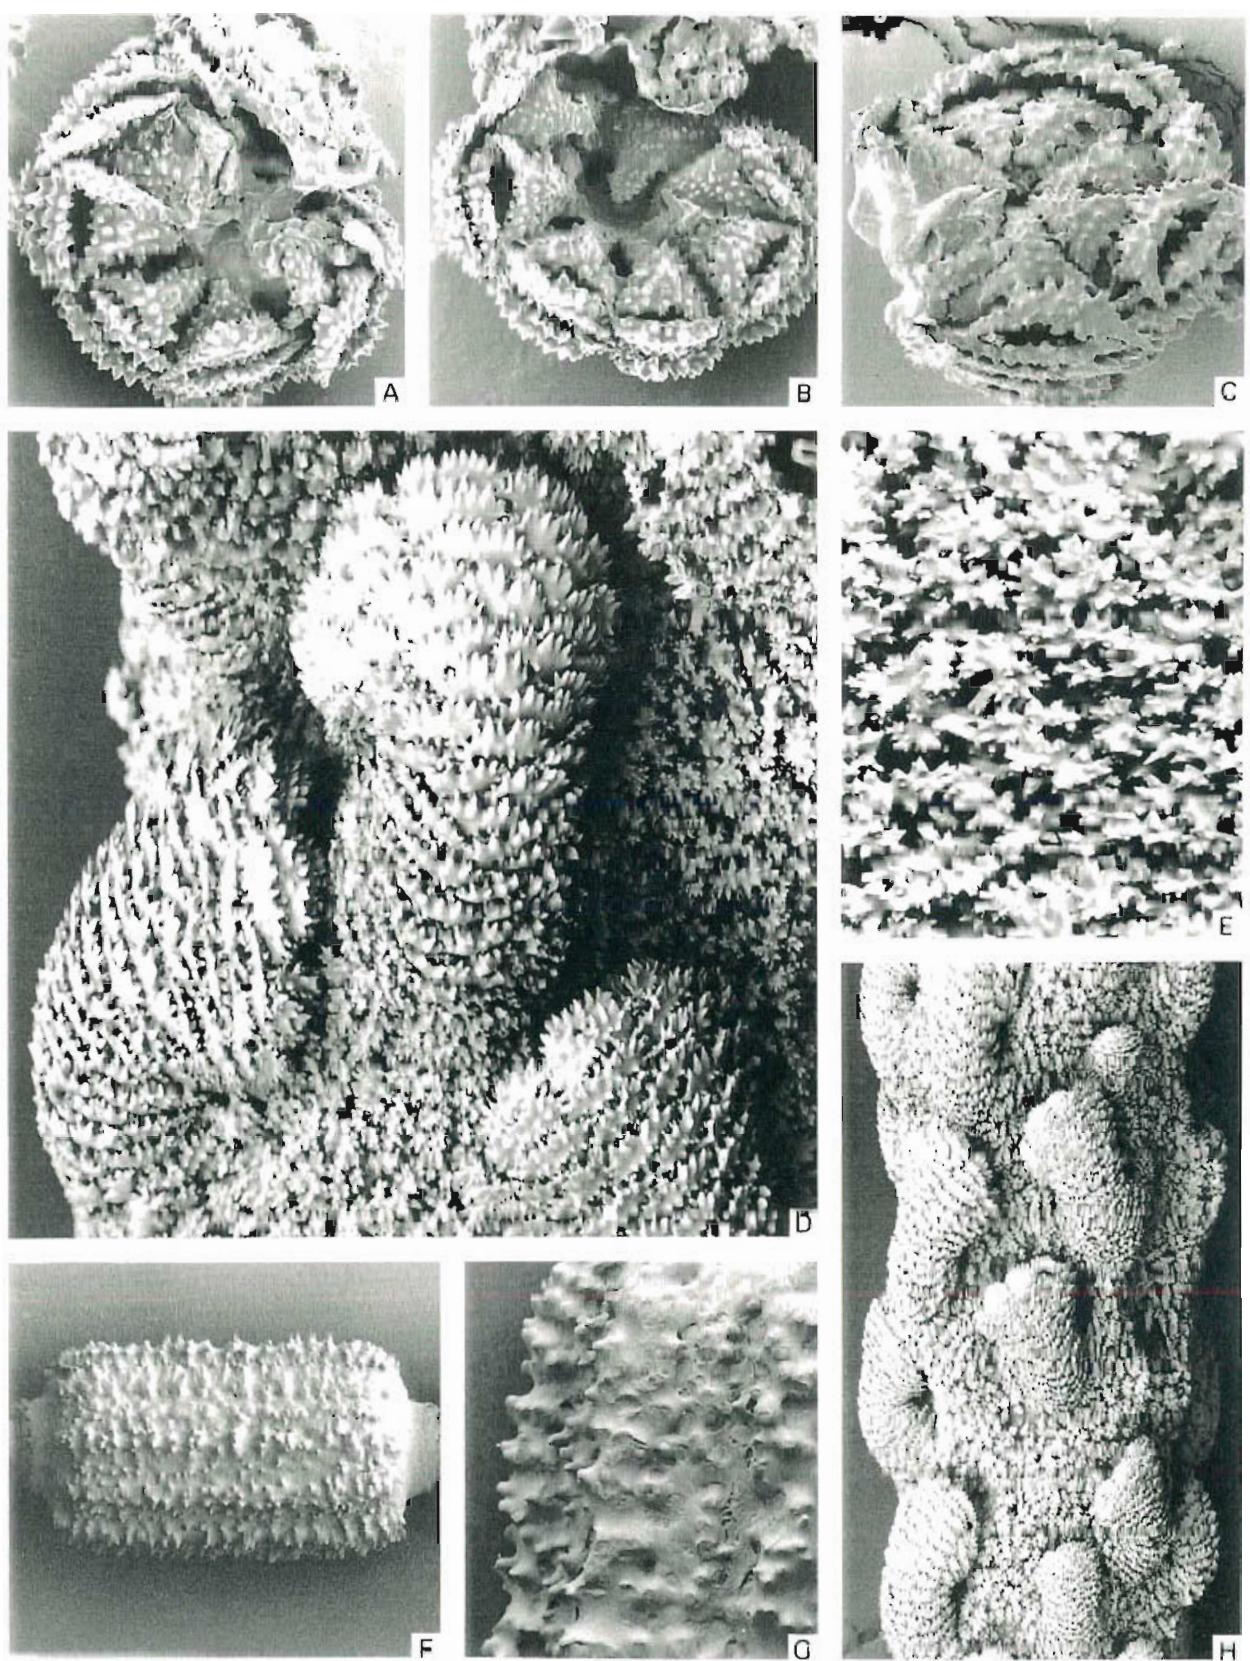

Fig. 133. *Sphaerokodisis australis* (Thomson & Mackinnon, 1911). A-B, D-H. NTM C2397: (A-B, D). Polyps; (E). Coenenchyme; (F-G). Axial internodes; (H). Twig fragment. C. AM E2127, polyp.

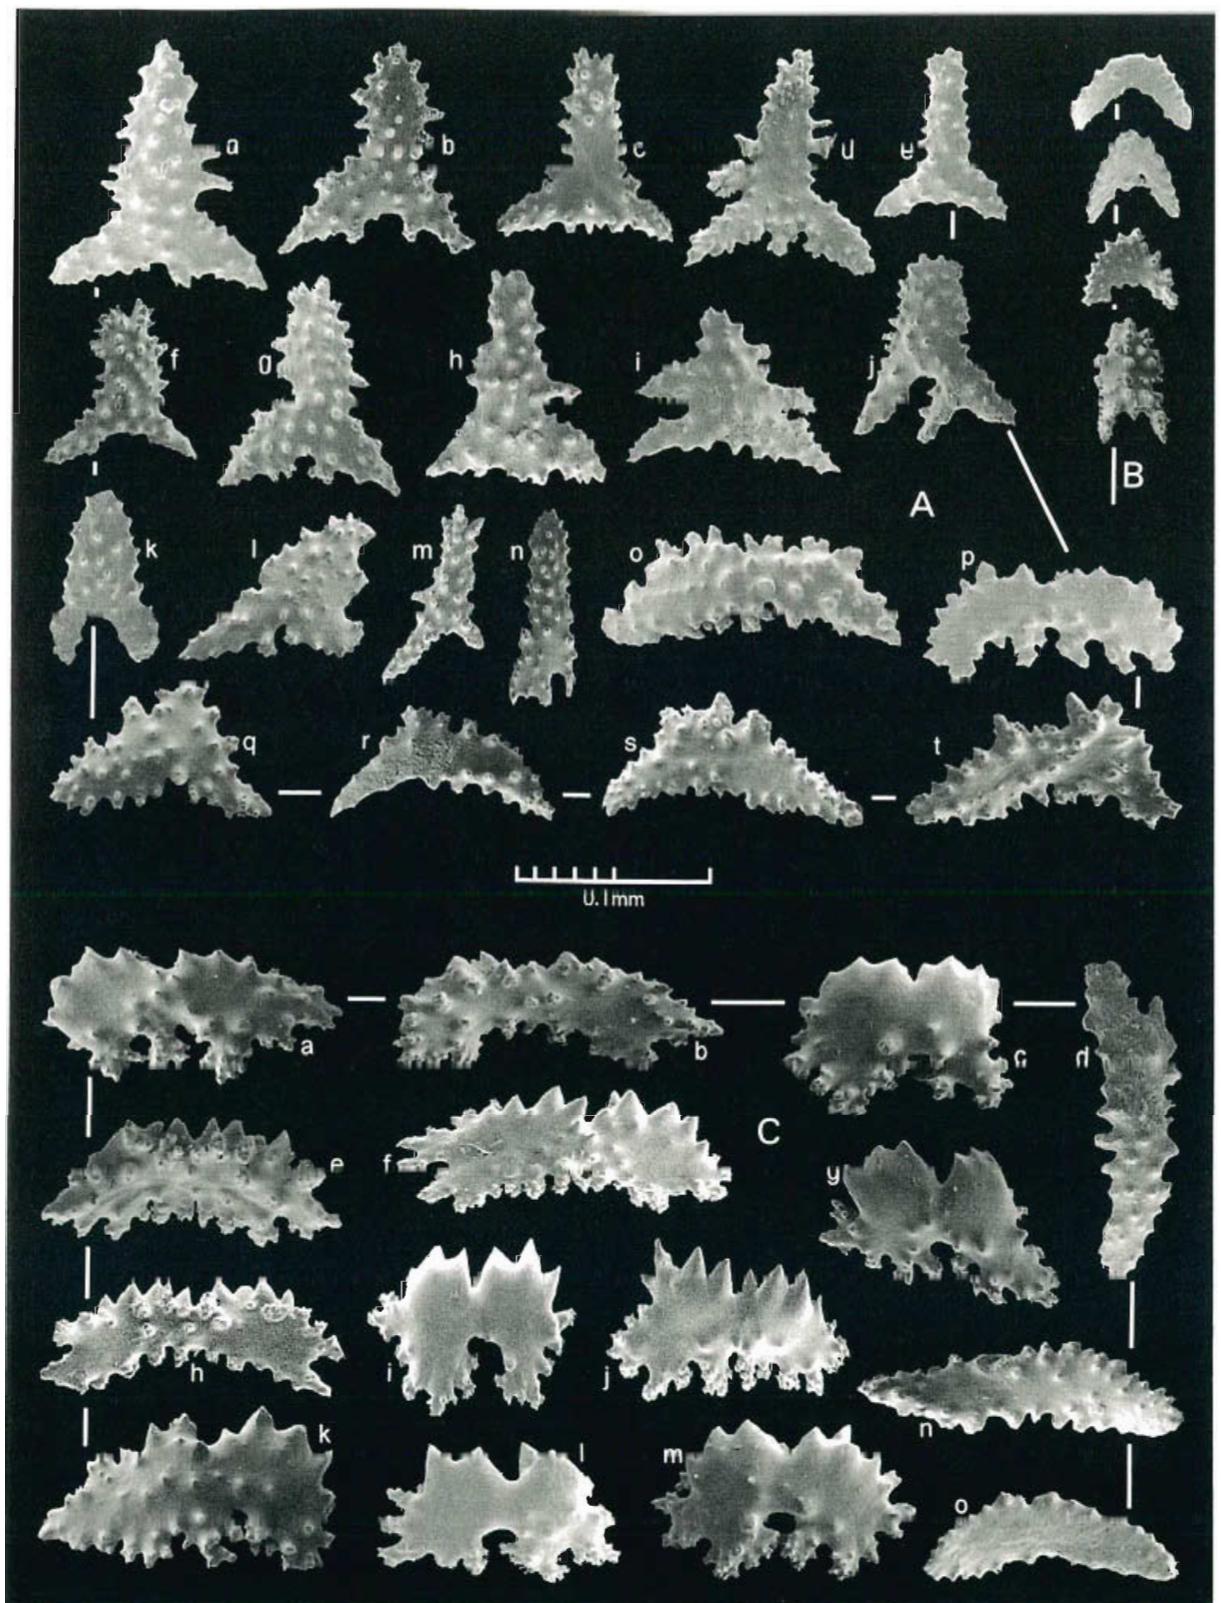

Fig. 134. *Sphaerokodisis australis* (Thomson & Mackinnon, 1911), syntype, sclerites: A. Anthopoma; B. Tentacles; C. Polyp body.

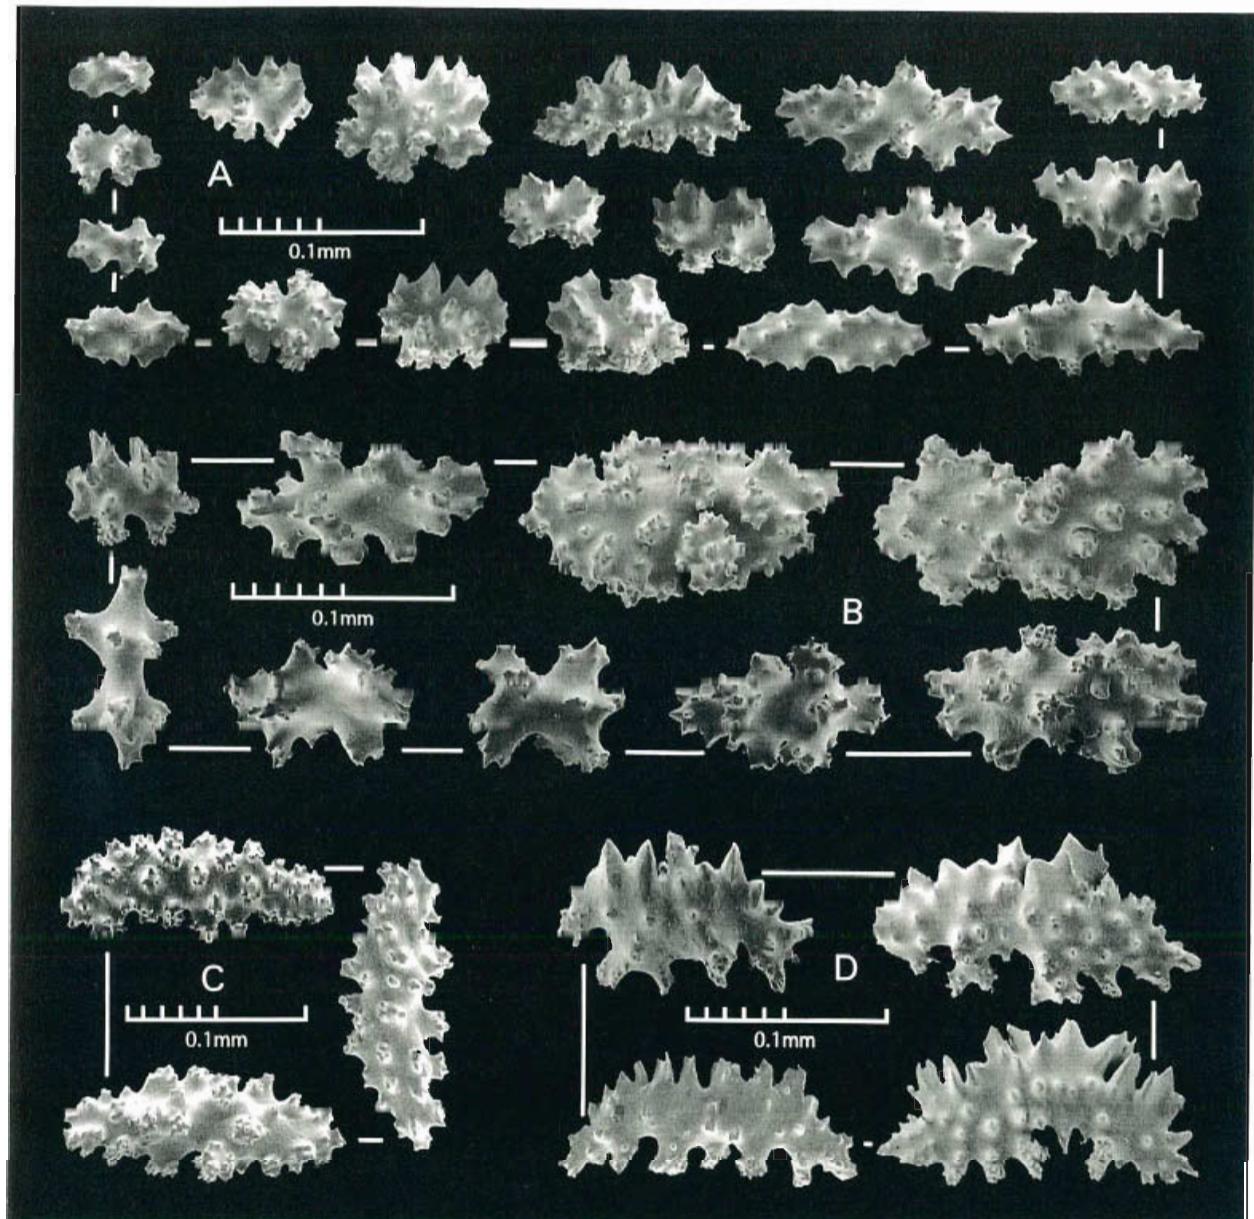

Fig. 135. *Sphaerokodisis australis* (Thomson & Mackinnon, 1911), sclerites: A. Syntype, branch coenenchyme; B. NTM C2397, stem coenenchyme; C. NTM C2397, branch coenenchyme; D. AM G11638, polyp body.

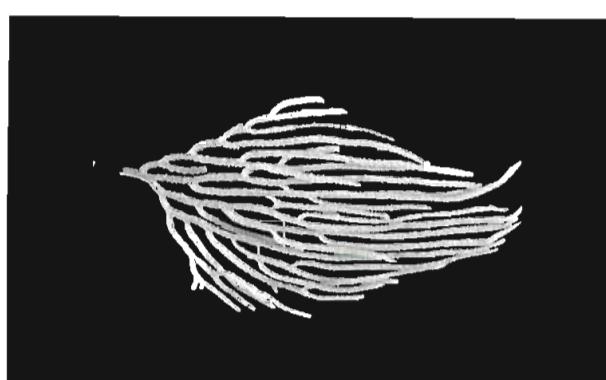

Fig. 136. *Sphaerokodisis australis* (Thomson & Mackinnon, 1911), NTM C2397, natural size x 0.5.

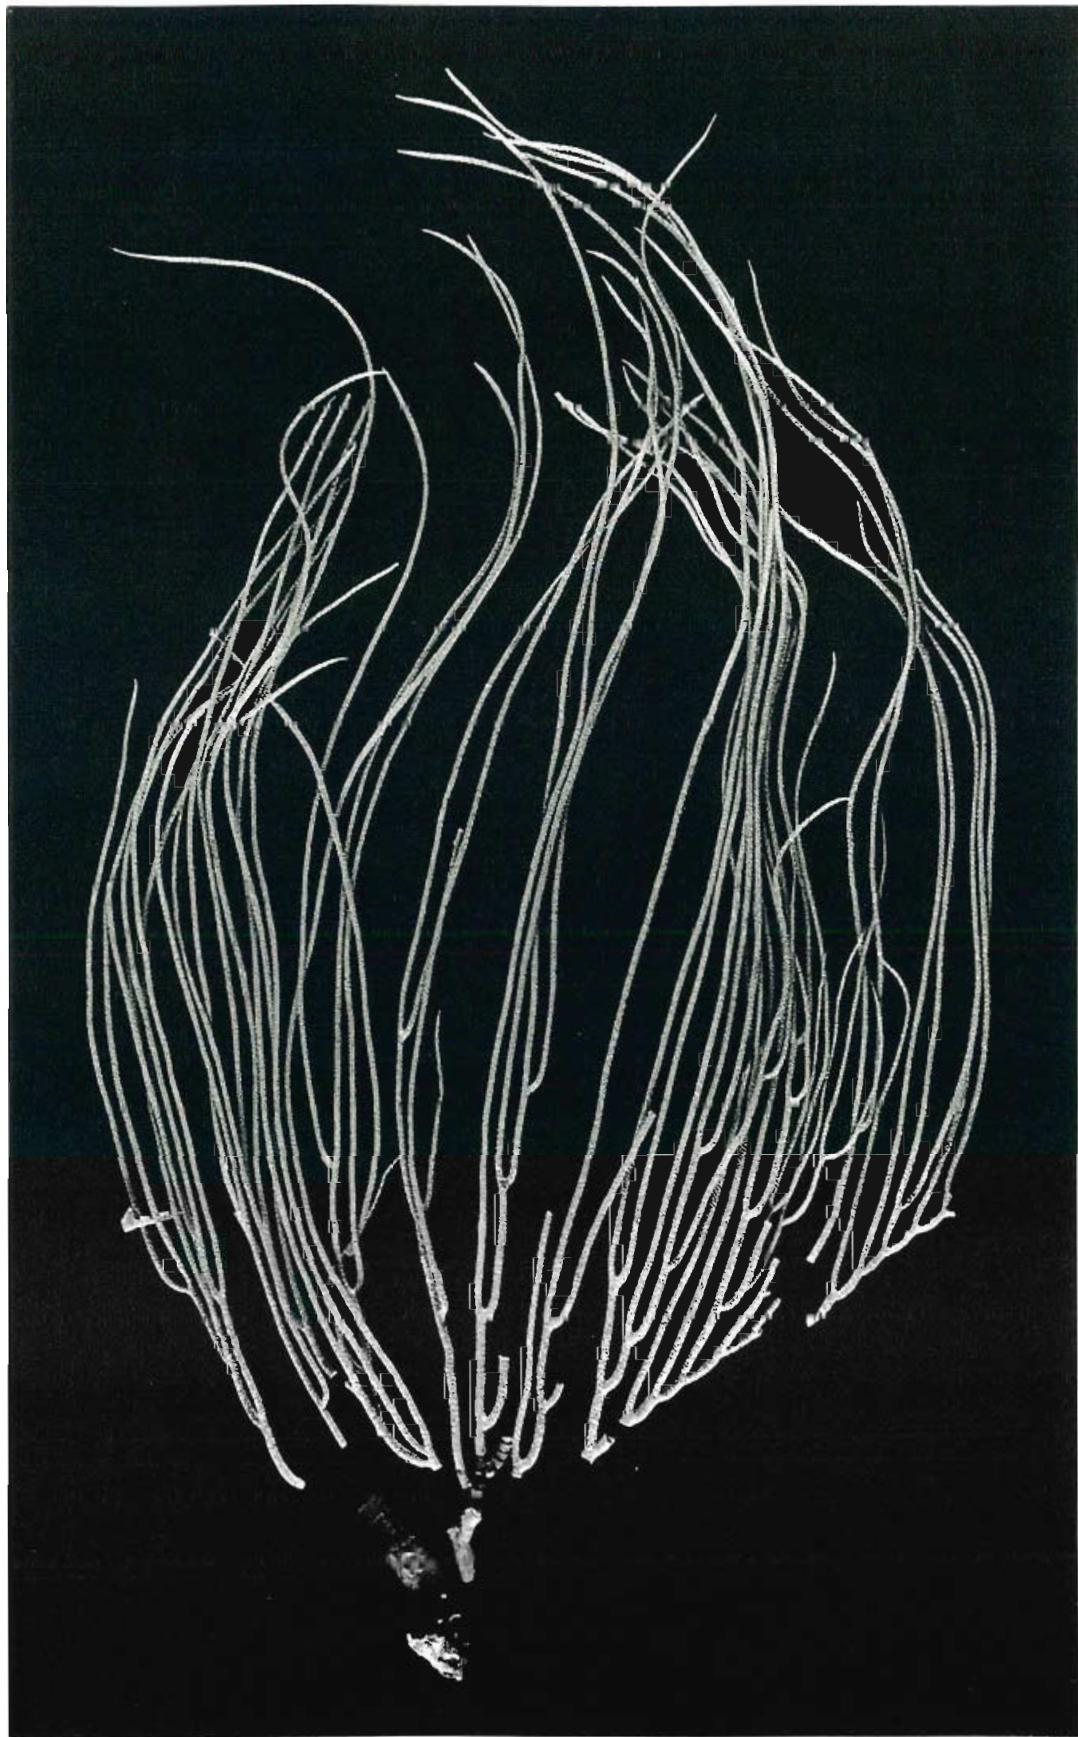

Fig. 137. *Sphaerokodisis australis* (Thomson & Mackinnon, 1911), AM E2127, natural size x 0.6.

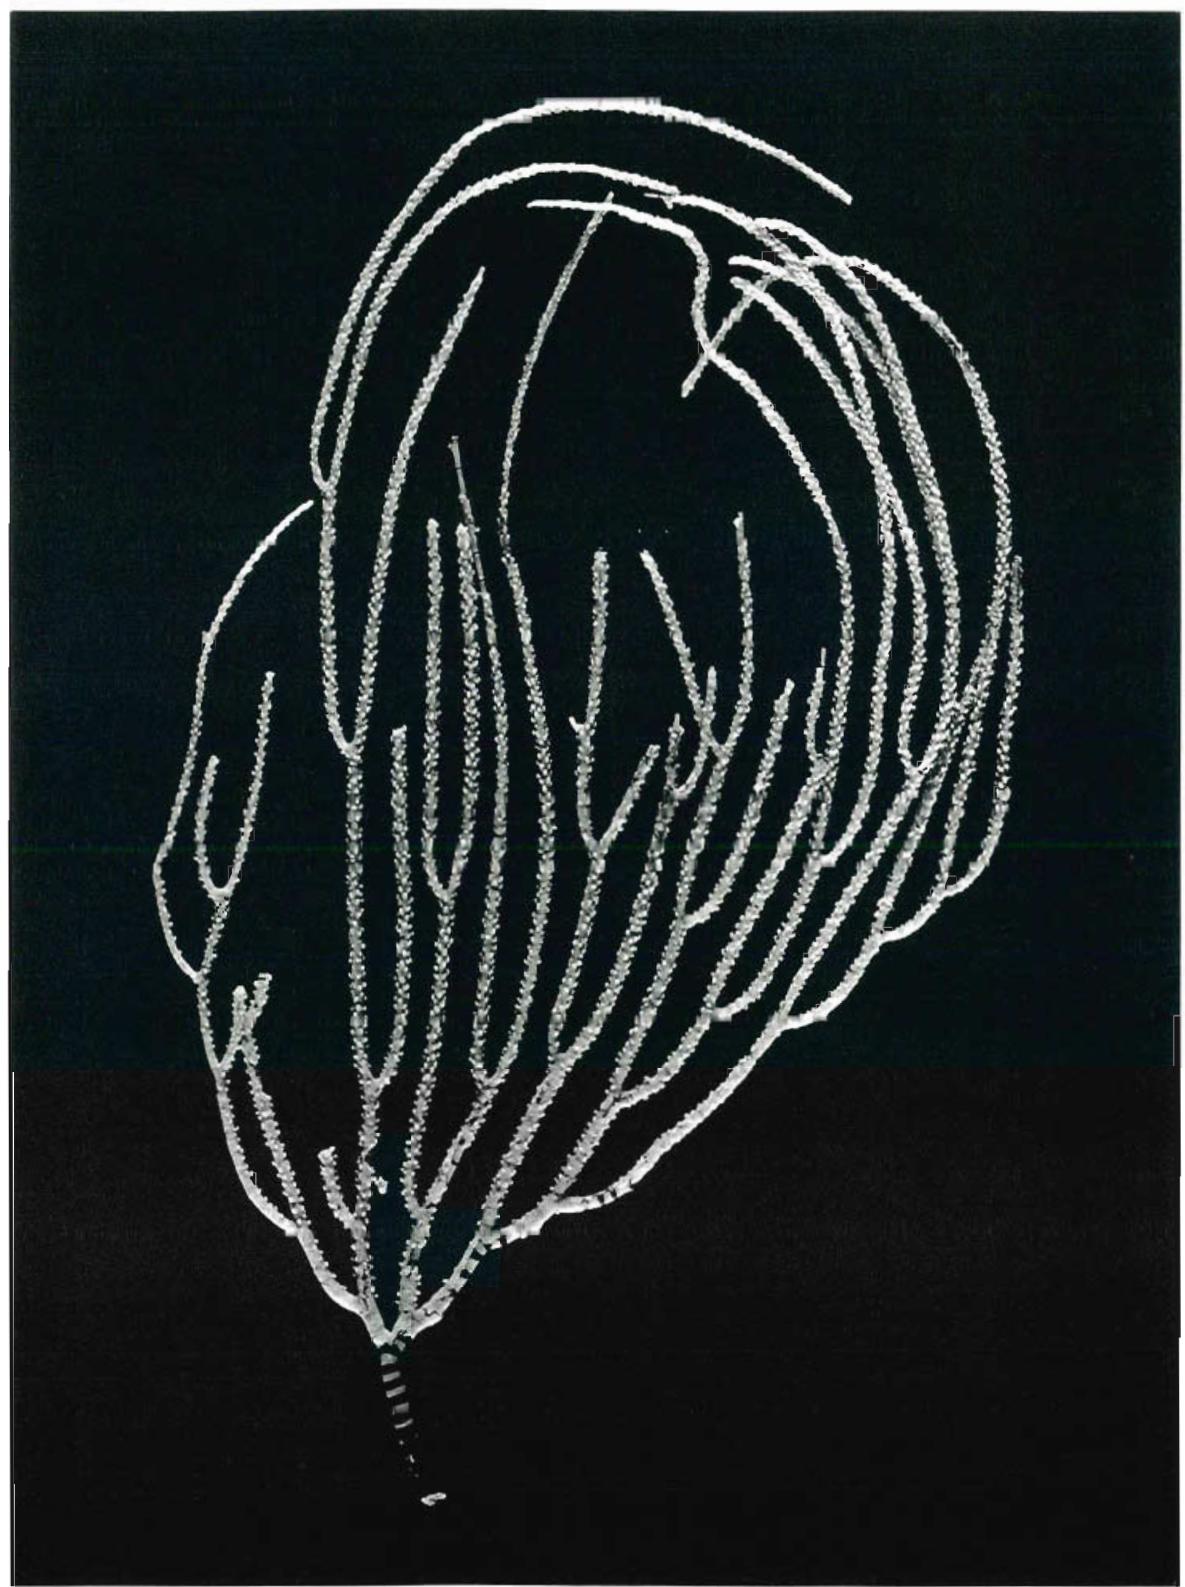

Fig. 138. *Jasminisis zebra* n.sp., holotype, natural size.

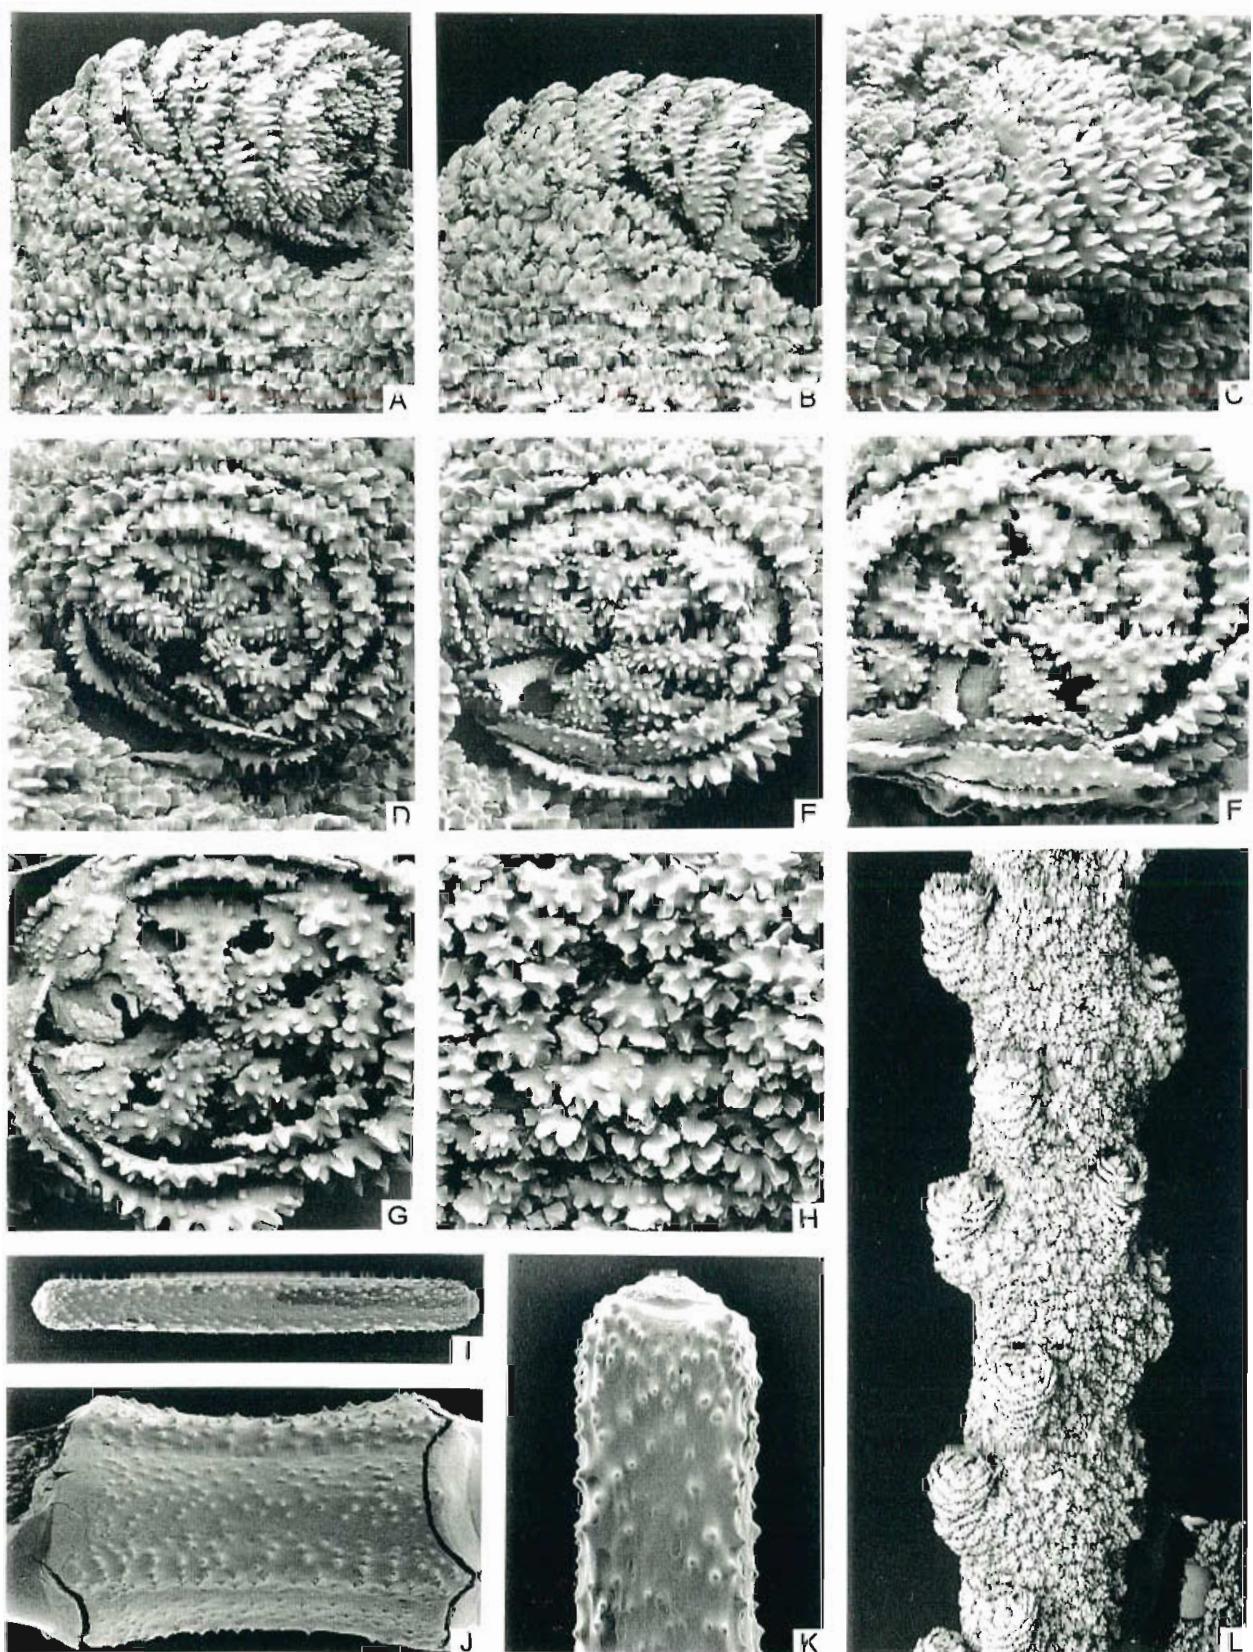

Fig. 139. *Jasminisis zebra* n.sp., holotype: A-G. Polyps; H. Coenenchyme; I-K. Axial internodes; L. Twig fragment.

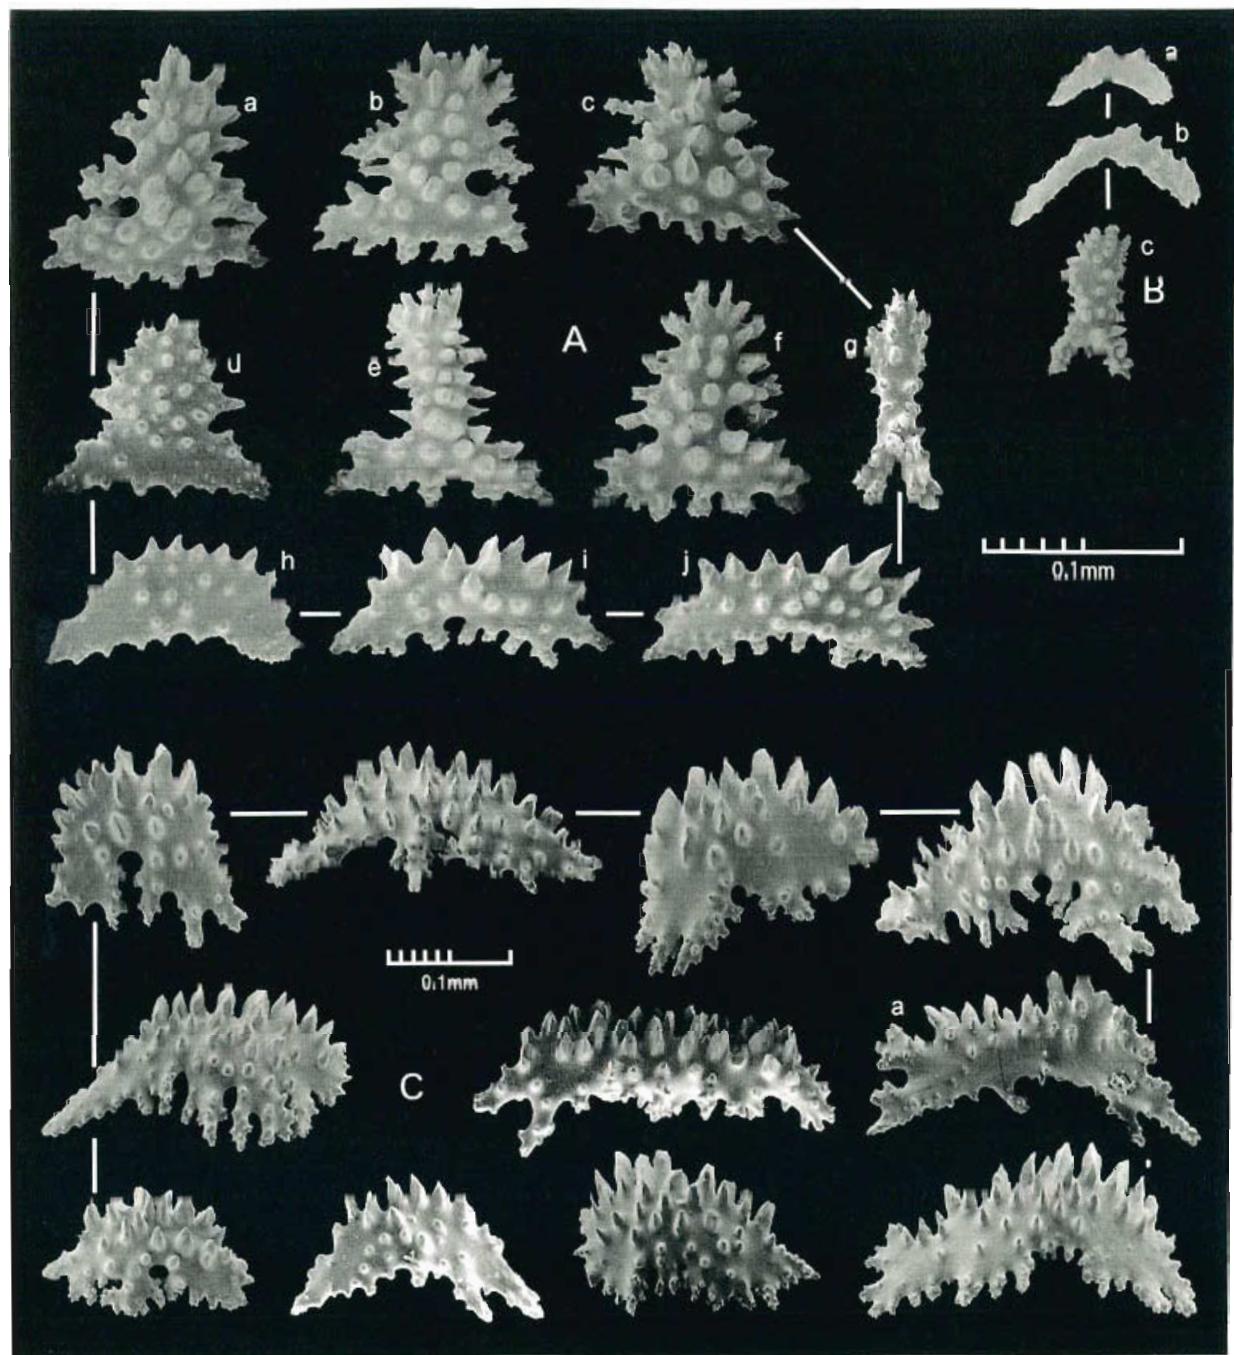

Fig. 140. *Jasminisis zebra* n.sp., holotype, sclerites: A. Anthopoma; B. Tentacles; C. Polyp head.

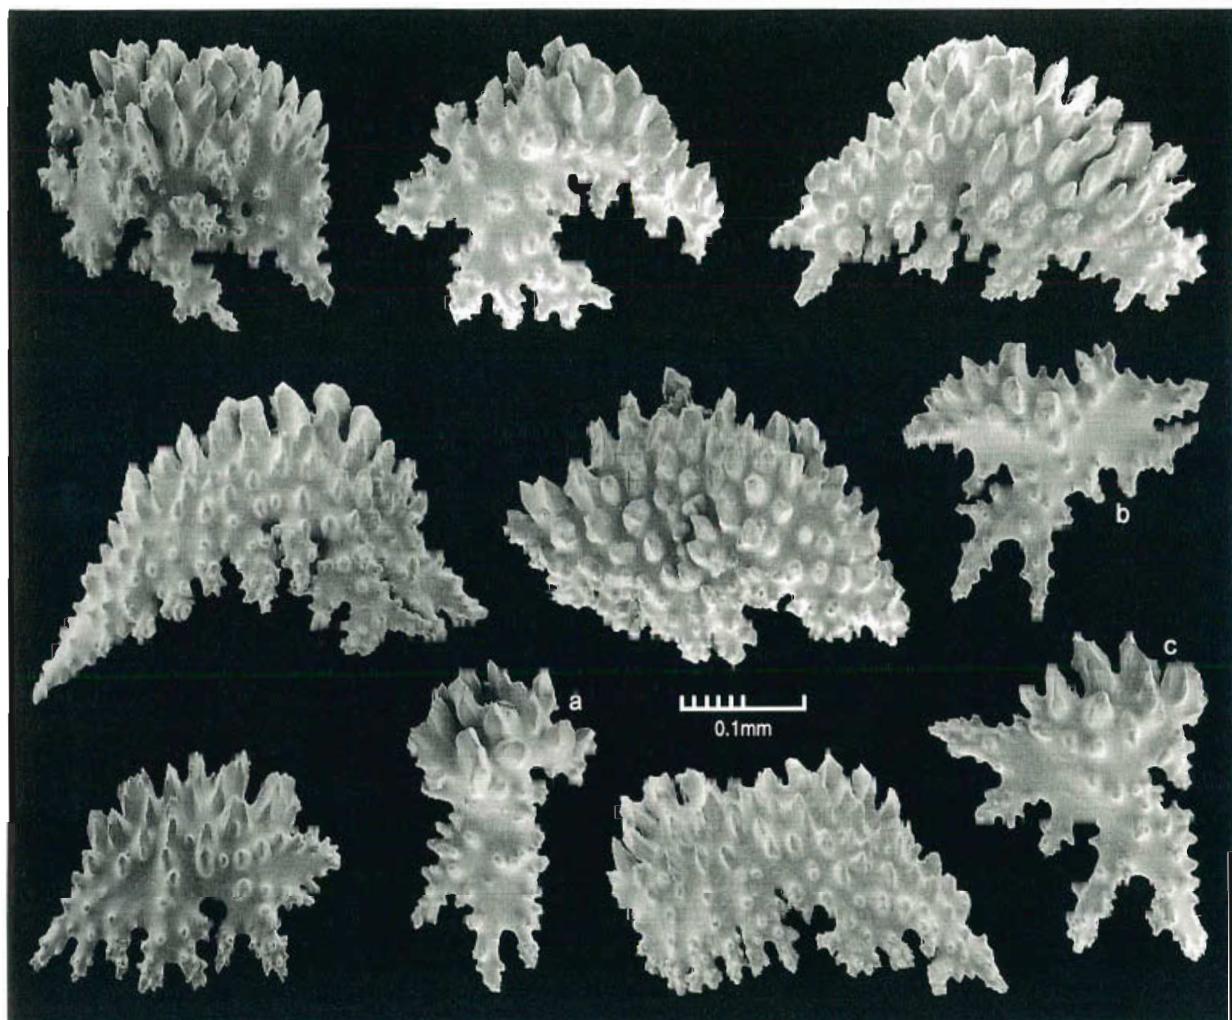

Fig. 141. *Jasminisis zebra* n.sp., holotype, sclerites: Polyp base.

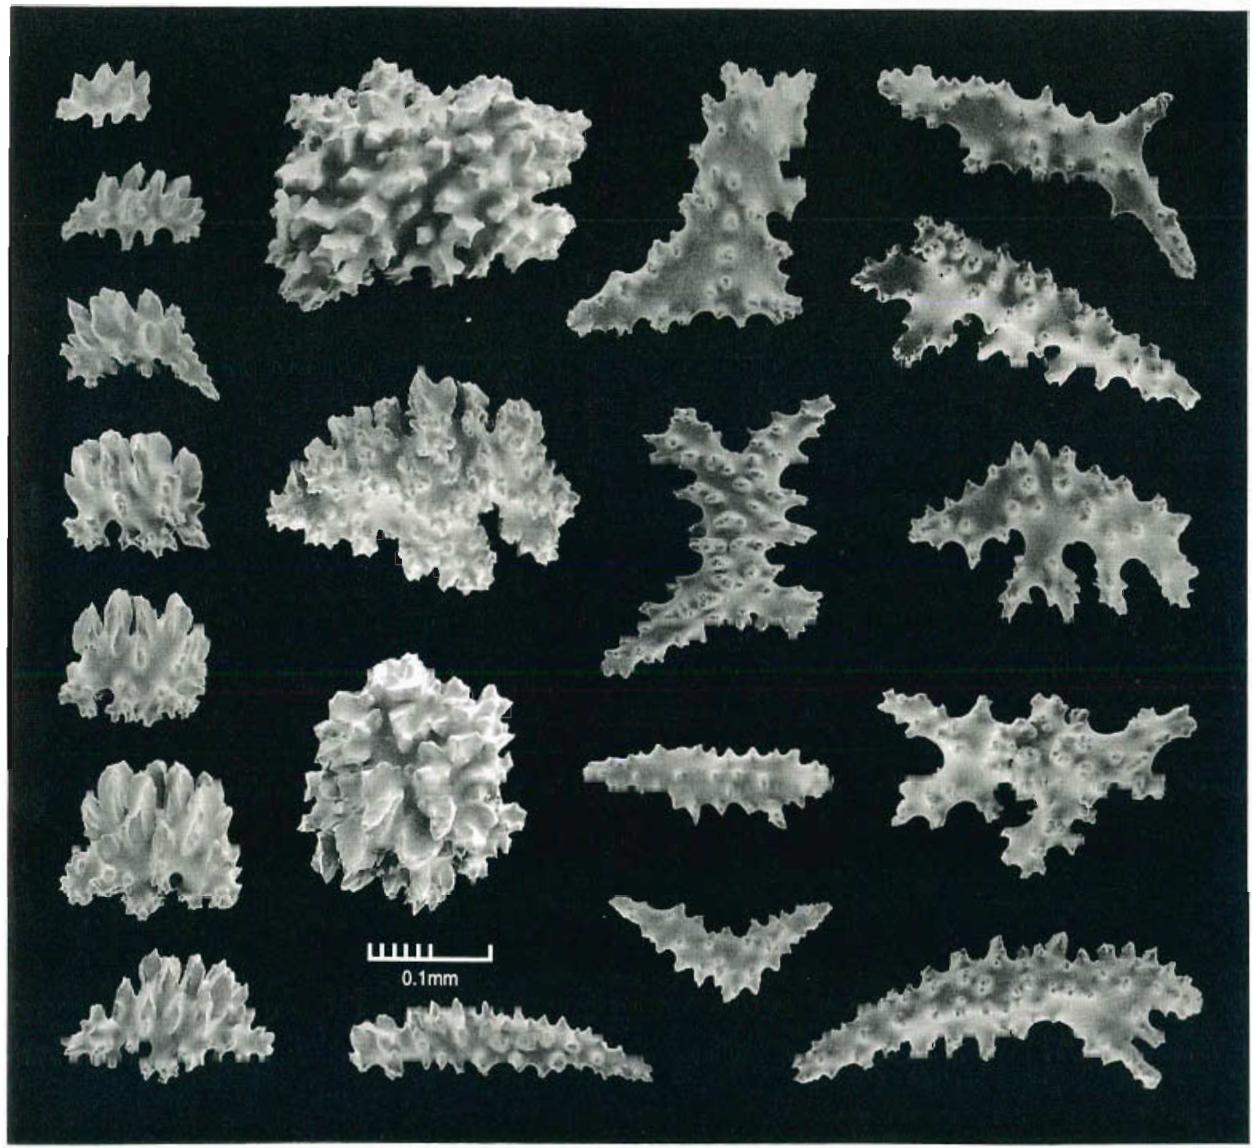

Fig. 142. *Jasminisis zebra* n.sp., holotype, sclerites: Twig coenenchyme.

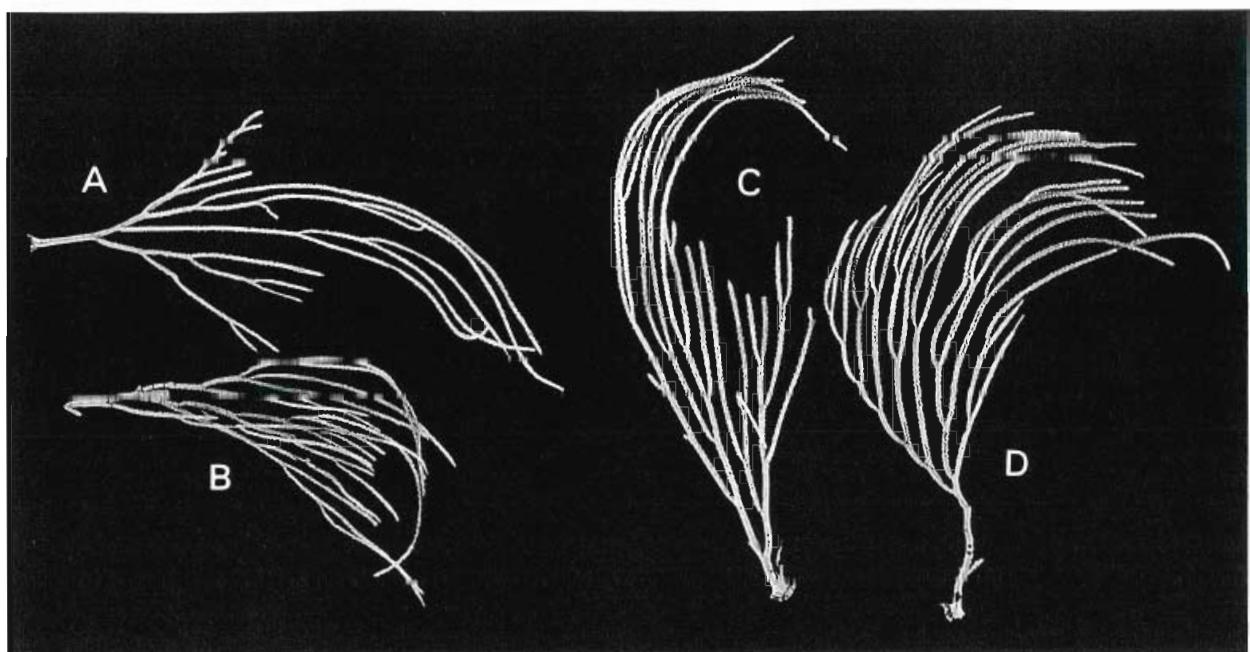

Fig. 143. *Jasminisis zebra* n.sp., paratypes: A. AM G15599; B. AM G15601; C. AM G15602; D. AM G15603.
All natural size x 0.4.

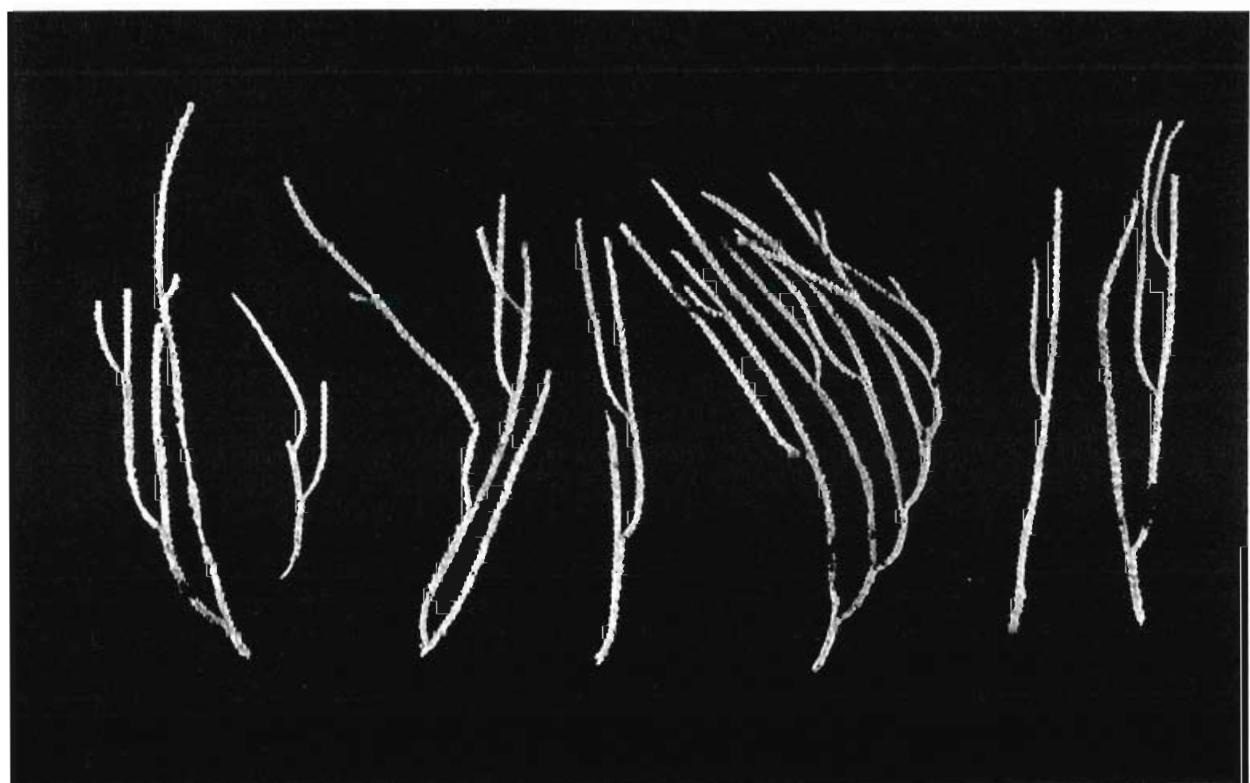

Fig. 144. *Jasminisis zebra* n.sp., paratype, AM G12017 fragments, natural size.

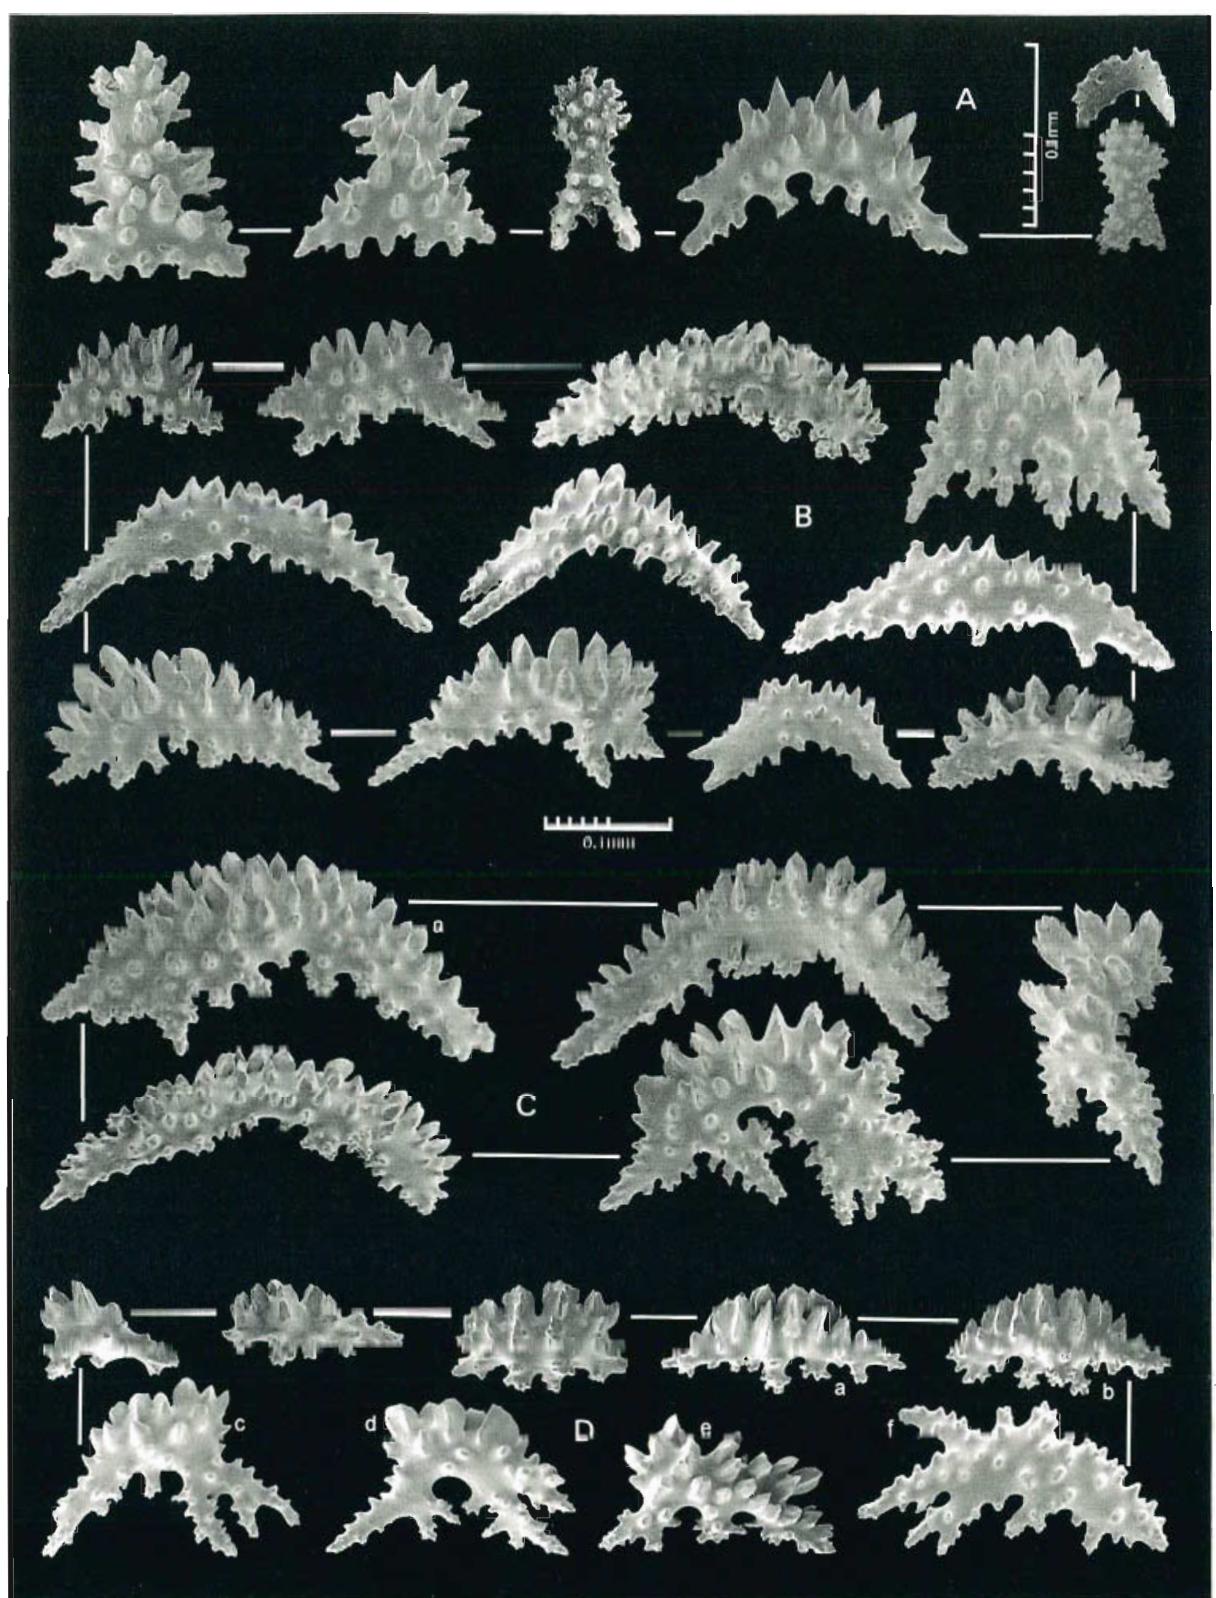

Fig. 145. *Jasminisis zebra* n.sp., paratype, AM G12017, sclerites: A. Anthopoma; B. Polyp head; C. Polyp base; D. Coenenchyme.

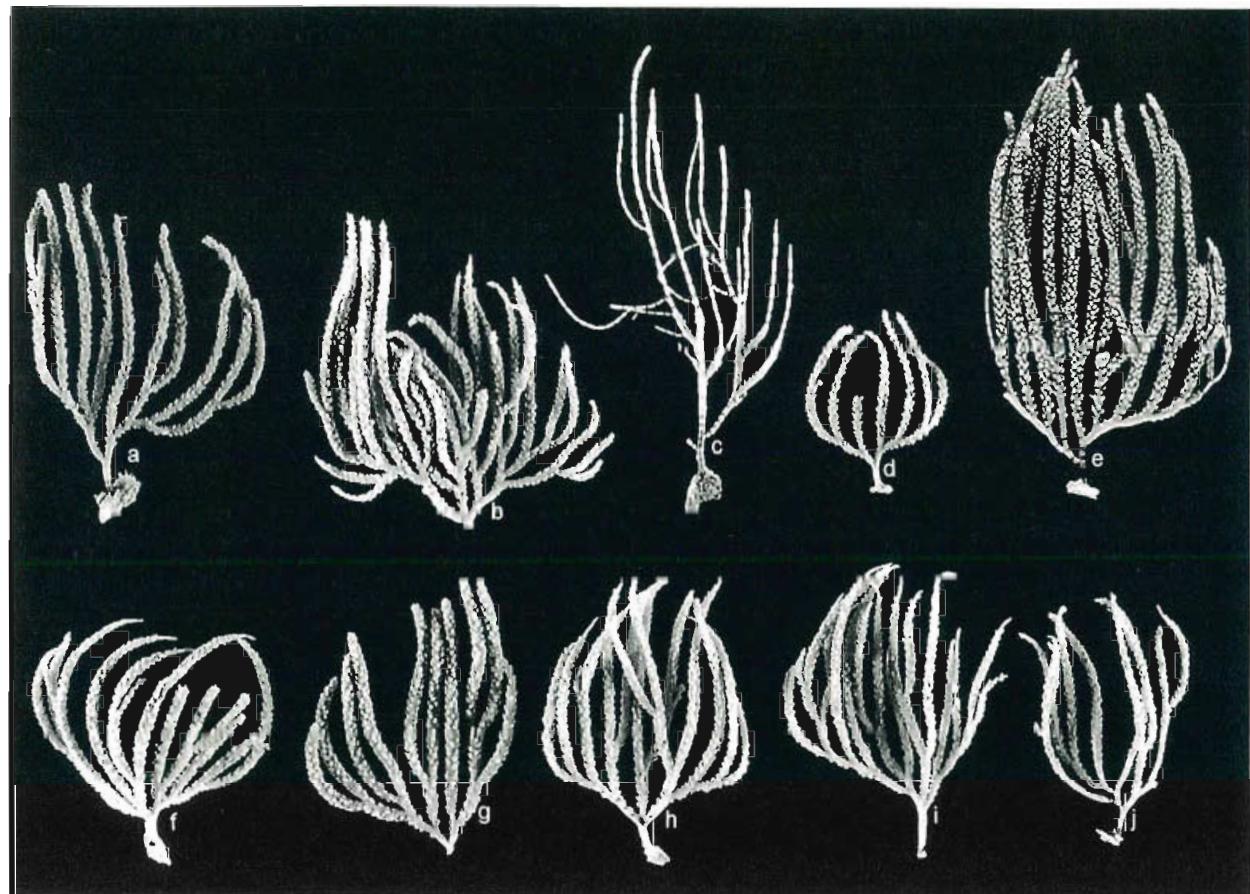

Fig. 146. *Jasminisis candelabra* n.sp., part of type series: A. Holotype; B-D, F-J. Paratypes, AM G15591 (part); E. Paratype, AM G8017.

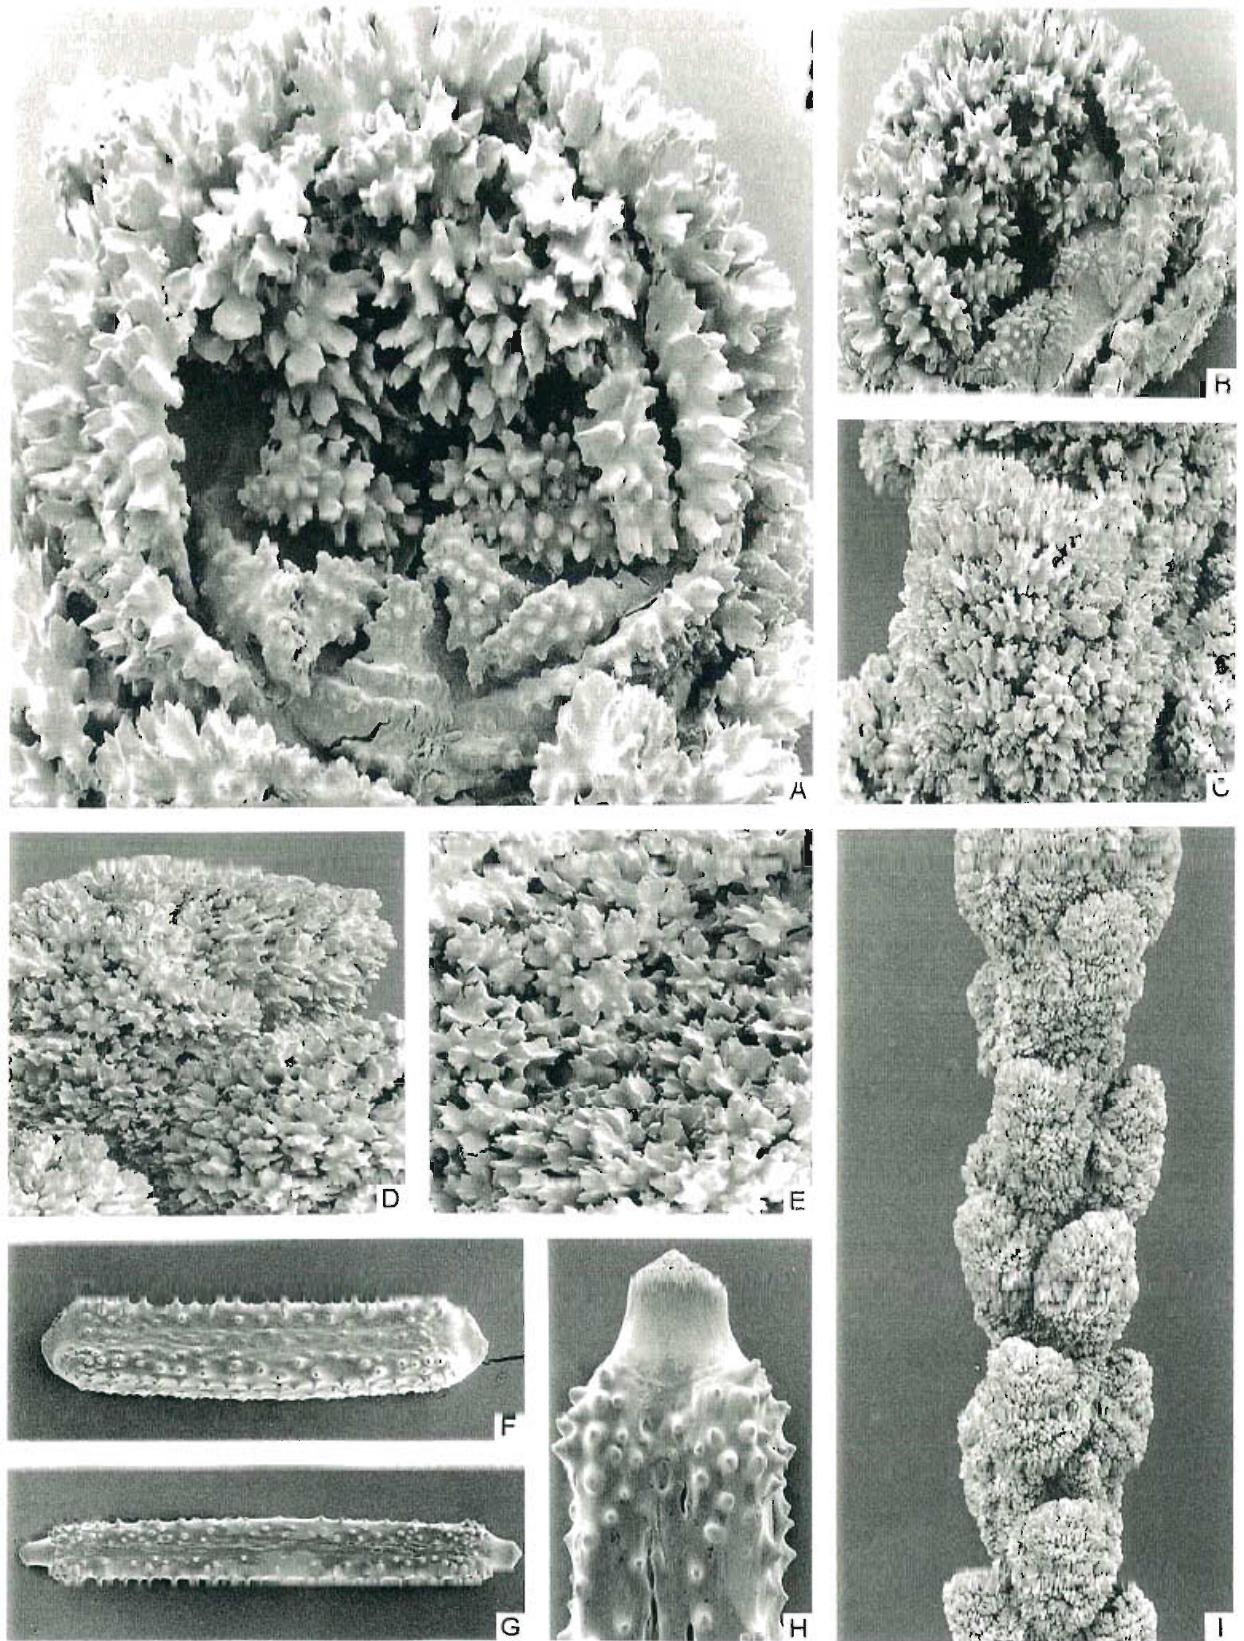

Fig. 147. *Jasminisis candelabra* n.sp., holotype: A-D. Polyps; E. Coenenchyme; F-H. Axial internodes; I. Twig fragment.

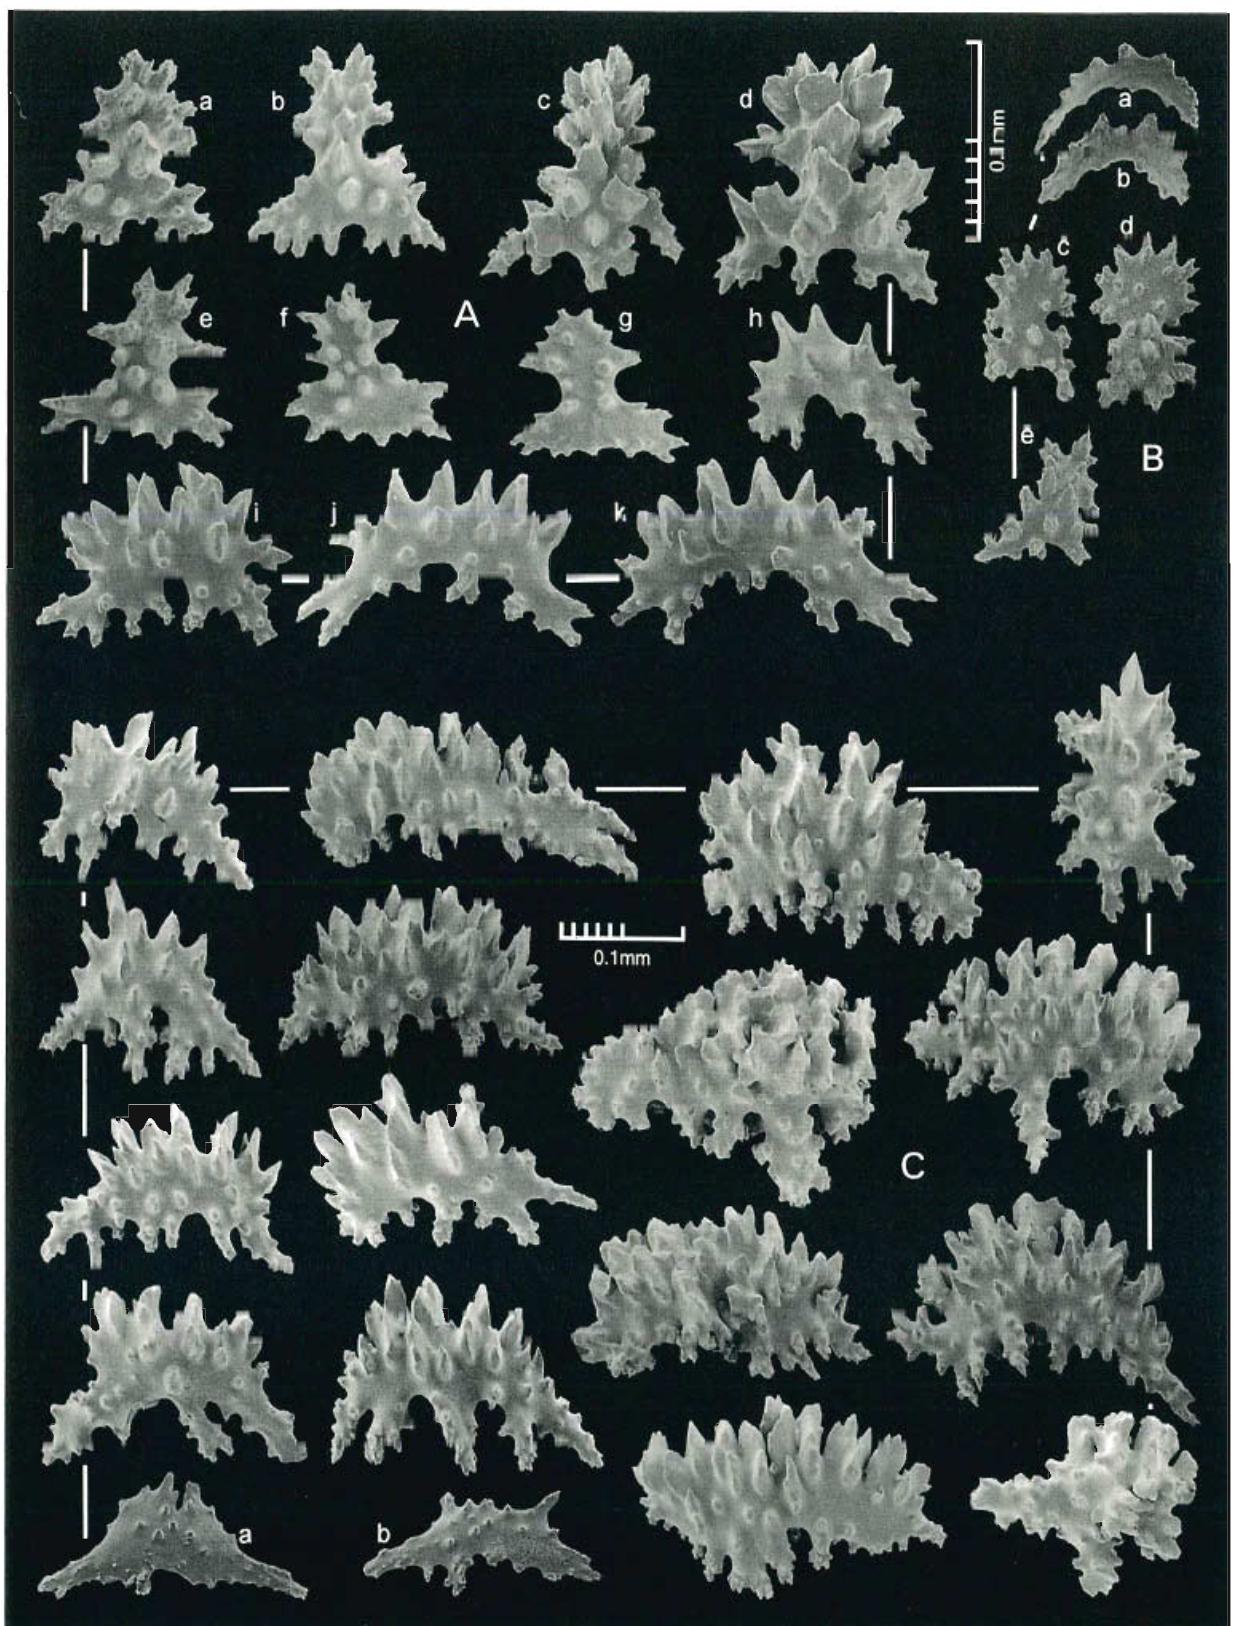

Fig. 148. *Jasminisis candelabra* n.sp., holotype, sclerites: A. Anthopoma; B. Tentacles; C. Polyp body.

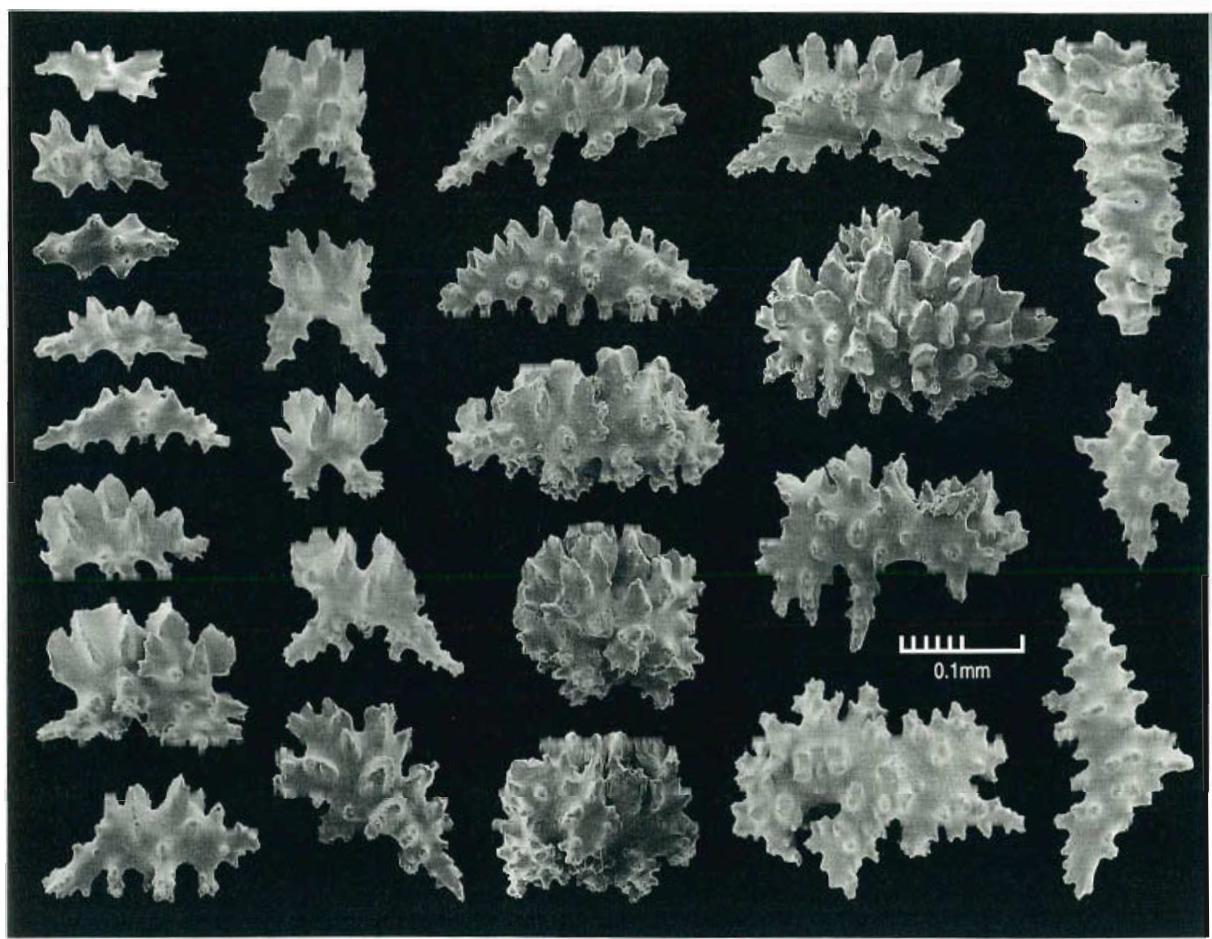

Fig. 149. *Jasminisis candelabra* n.sp., holotype, sclerites: Branch coenenchyme.

Fig. 150. *Jasminisis deceptrix* n.sp., holotype, natural size.

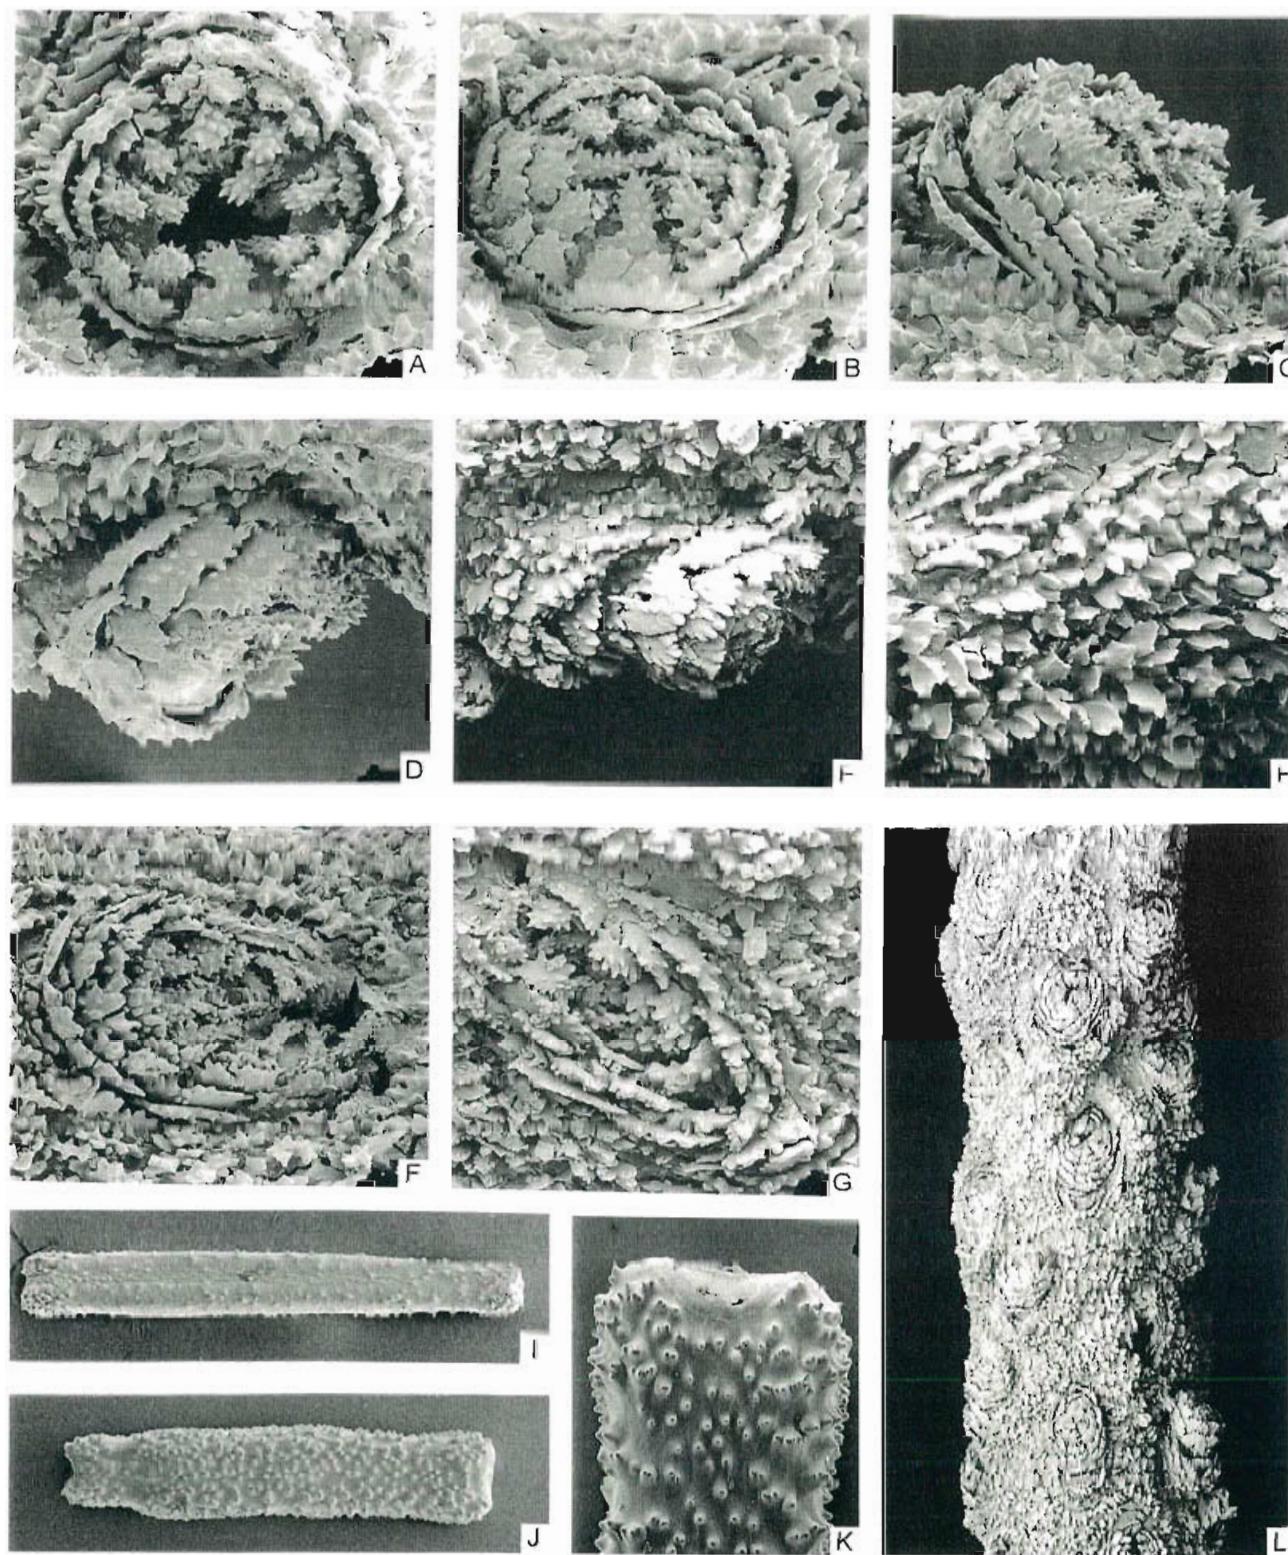

Fig. 151. *Jasminisis deceptrix* n.sp., holotype: A-G. Polyps; H. Coenenchyme; I-K. Axial internodes; L. Twig fragment.

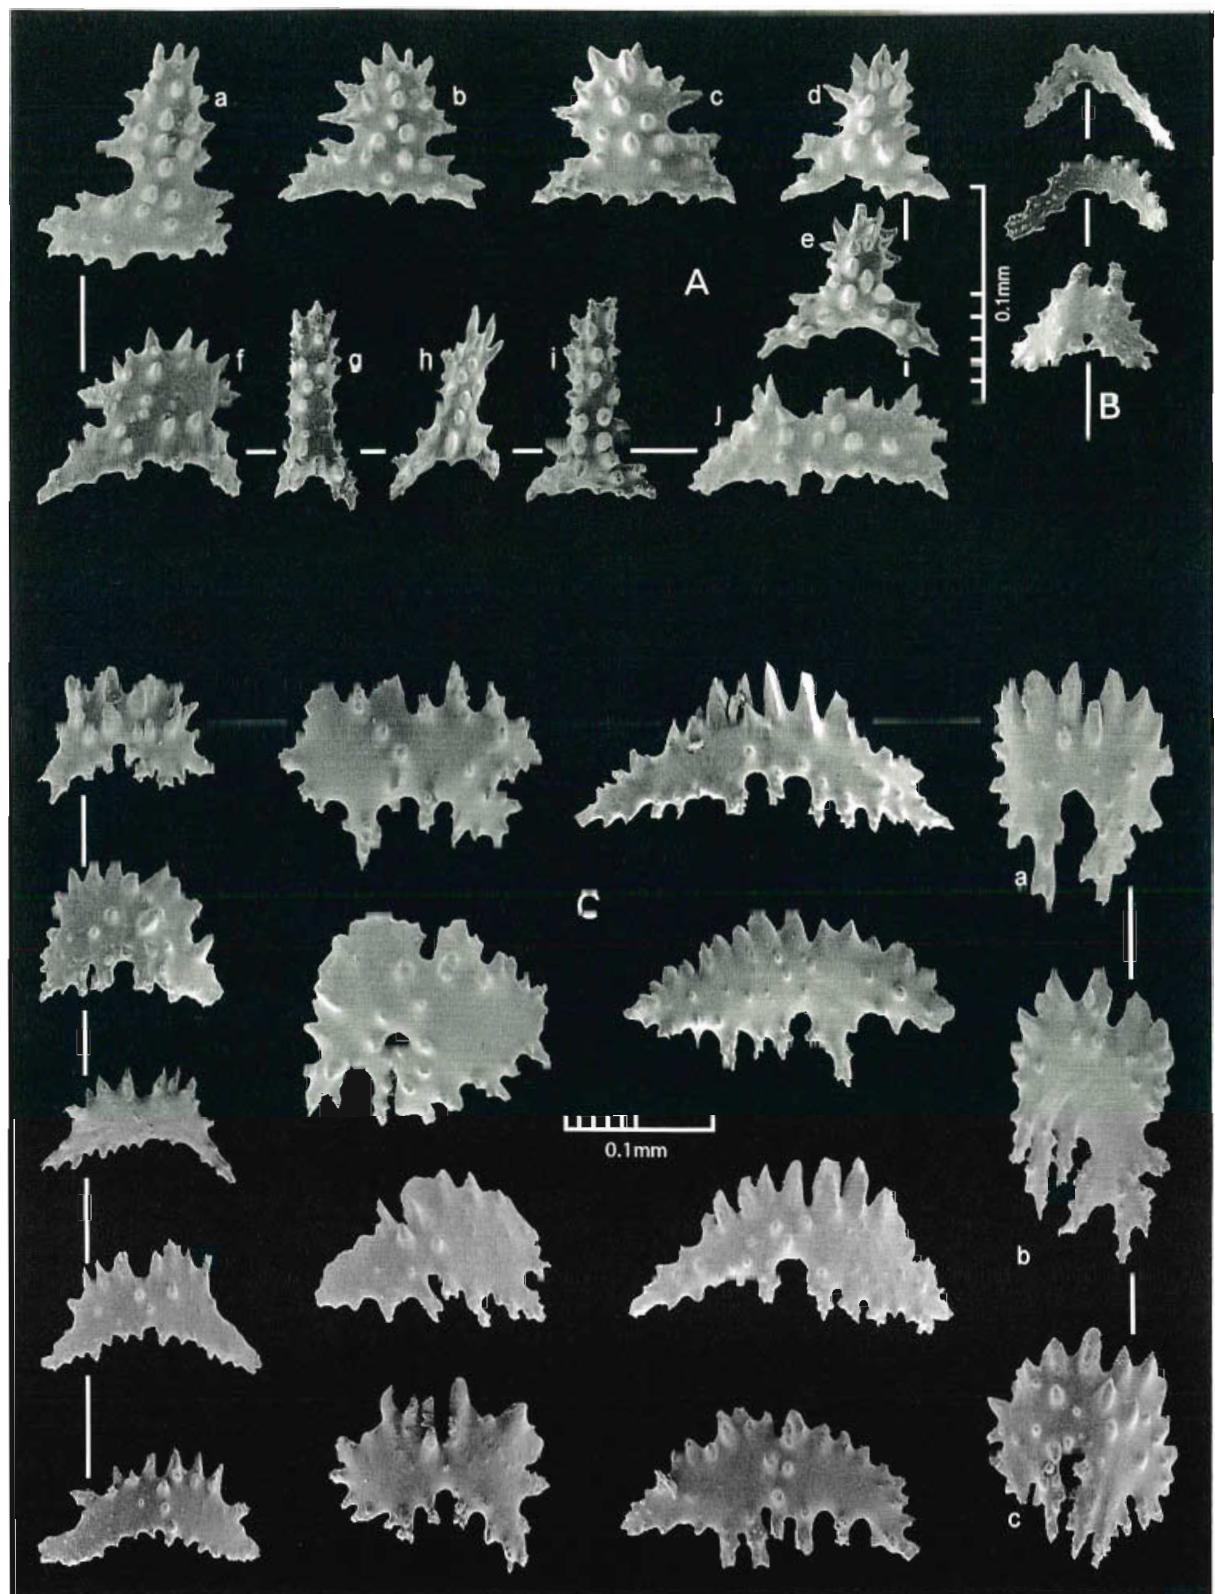

Fig. 152. *Jasminisis deceptrix* n.sp., holotype, sclerites: A. Anthopoma; B. Tentacles; C. Polyp head.

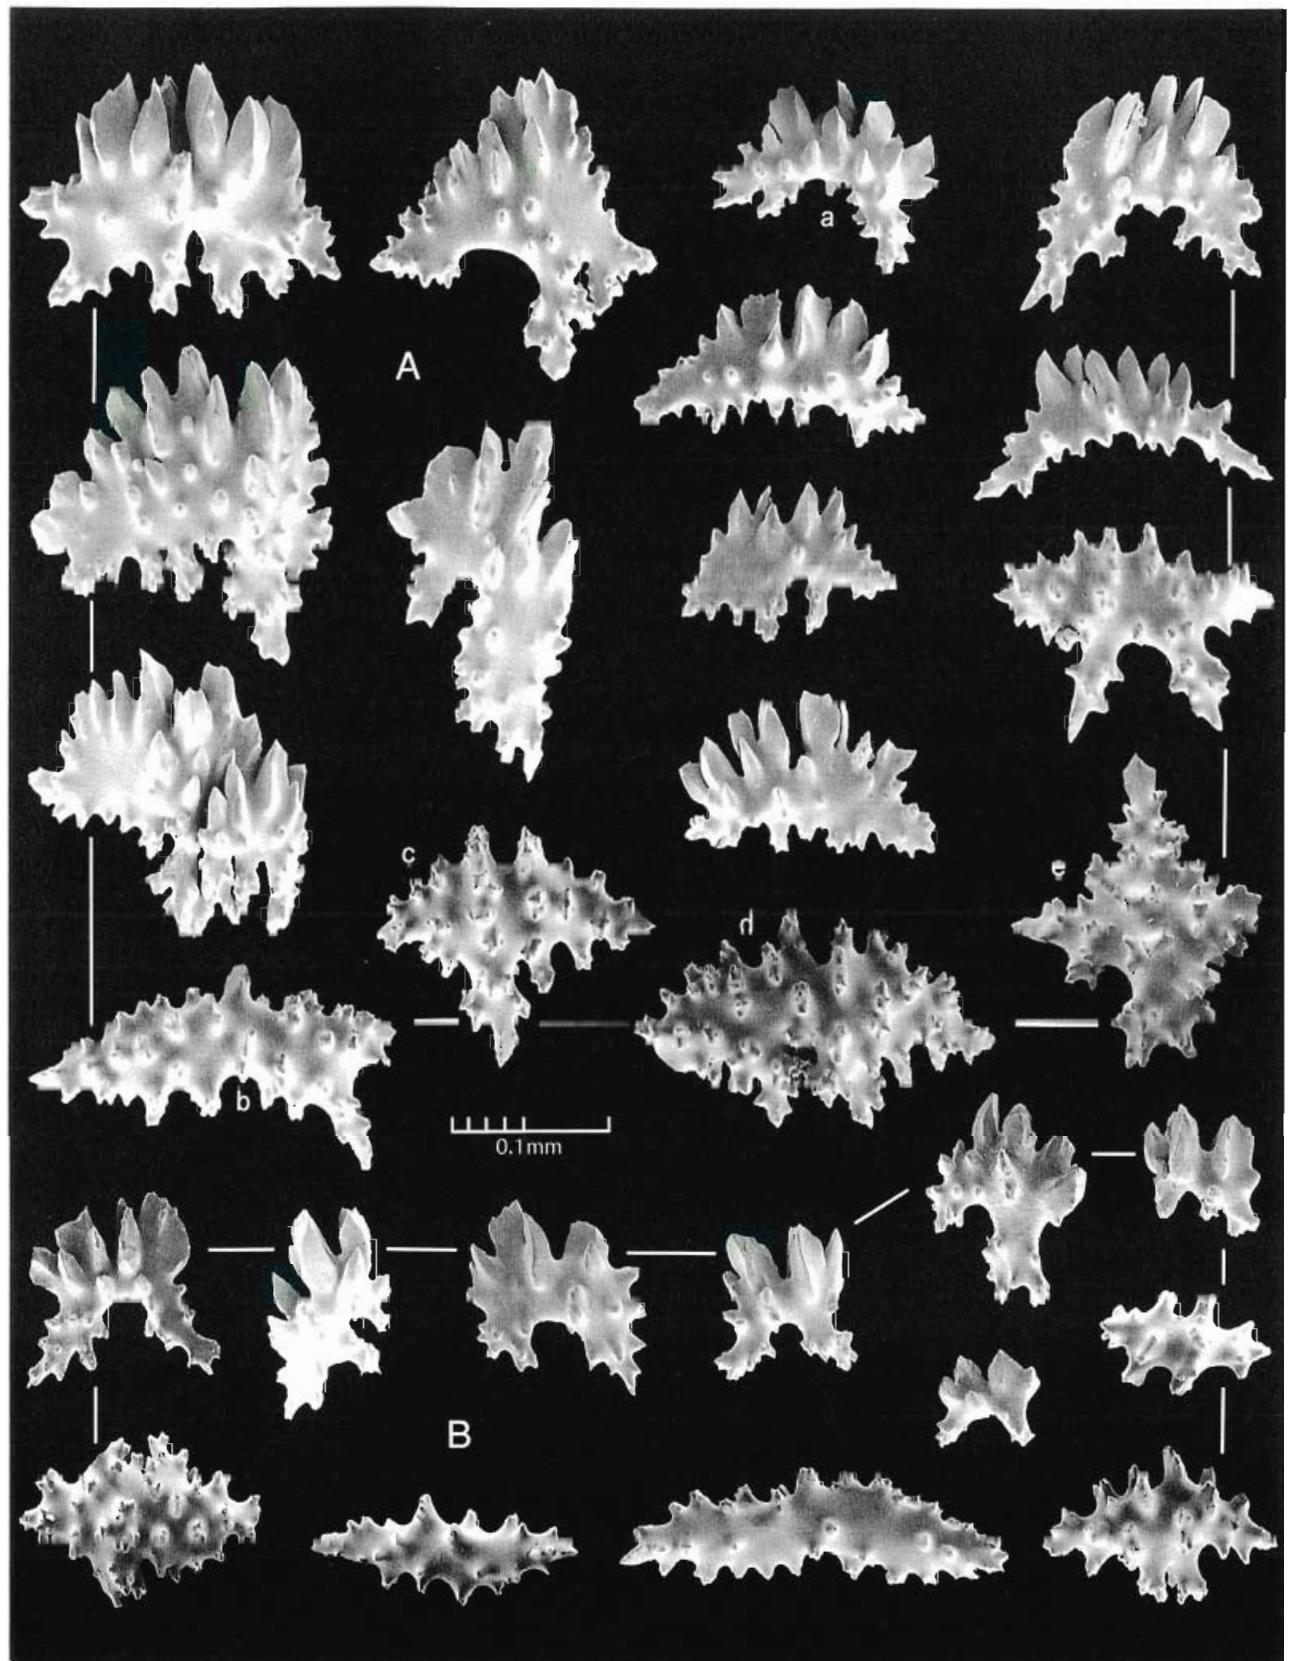

Fig. 153. *Jasminisis deceptrix* n.sp., holotype, sclerites: A. Polyp base; B. Branch coenenchyme.

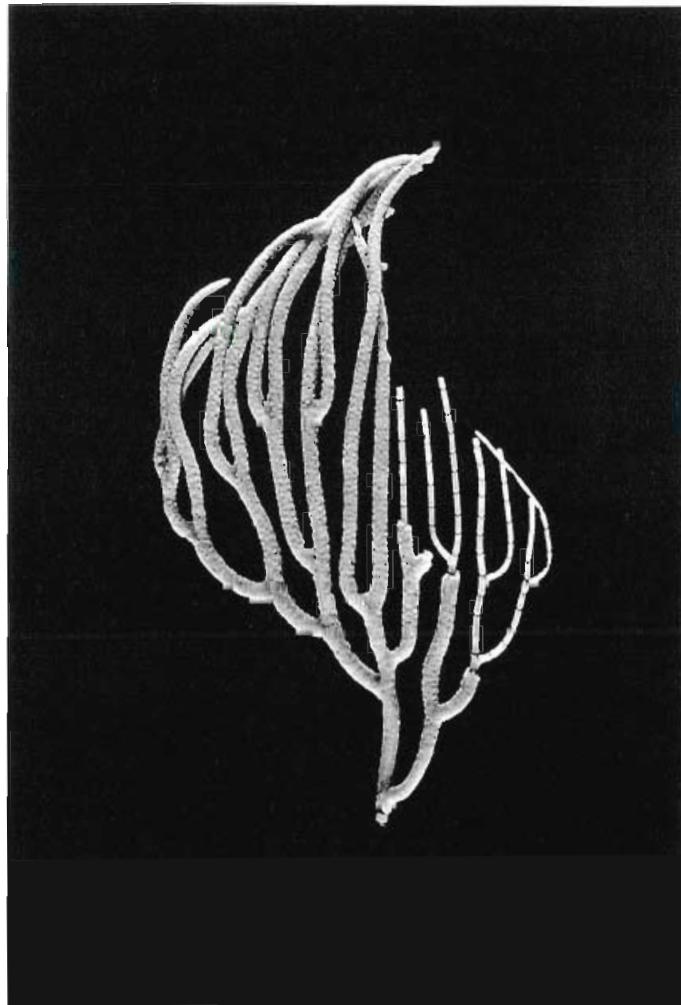

Fig. 154. *Jasminisis deceptrix* n.sp., paratype, AM G8016, natural size.

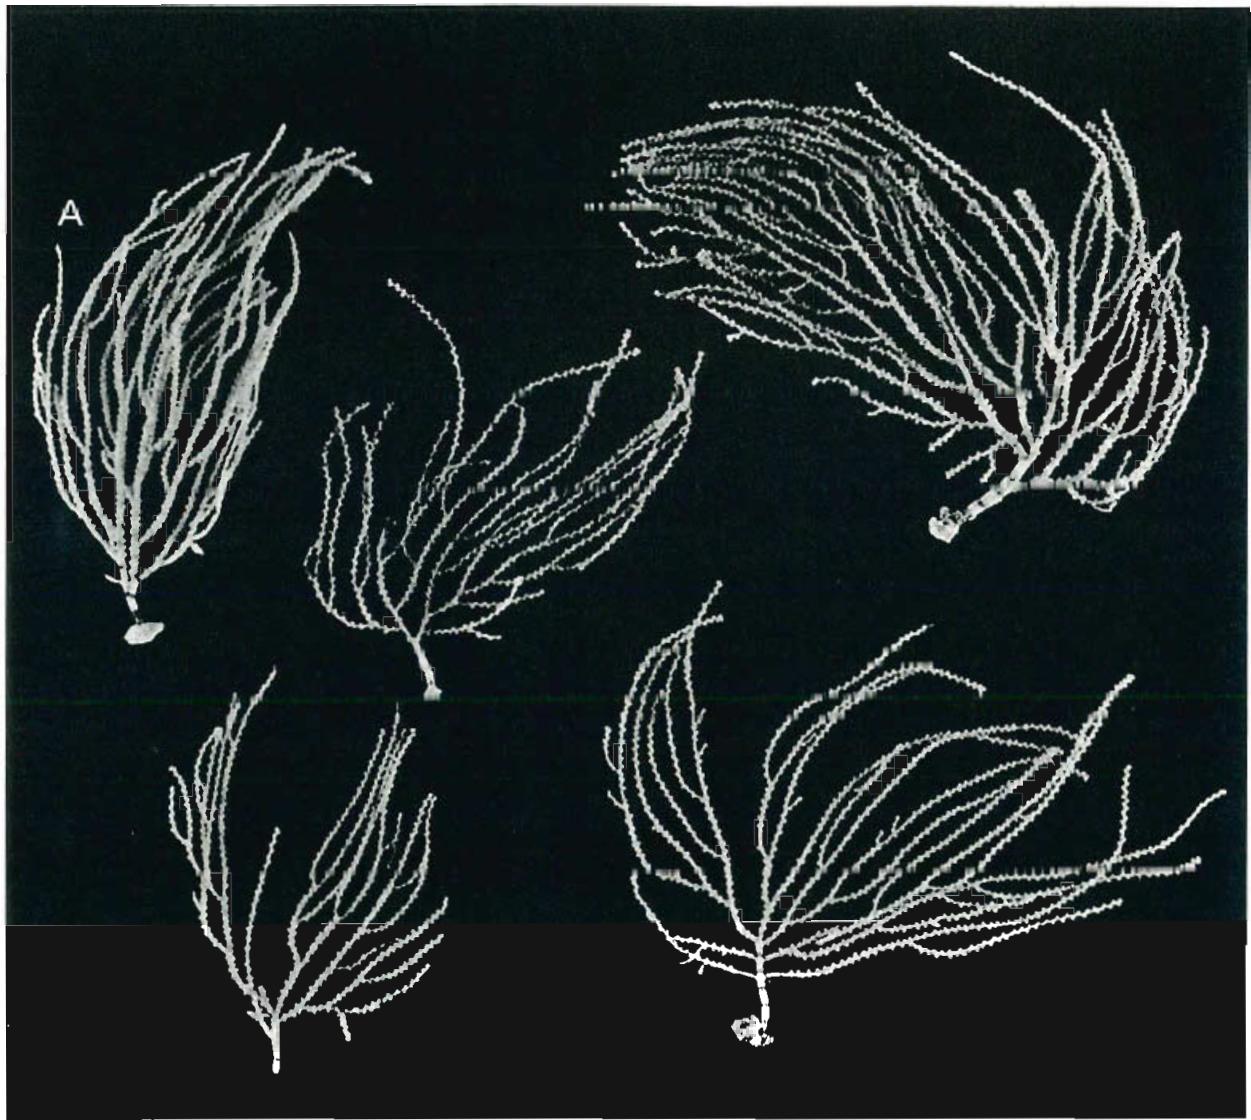

Fig. 155. *Jasminisis cavatica* n.sp., type series: A. Holotype. All natural size.

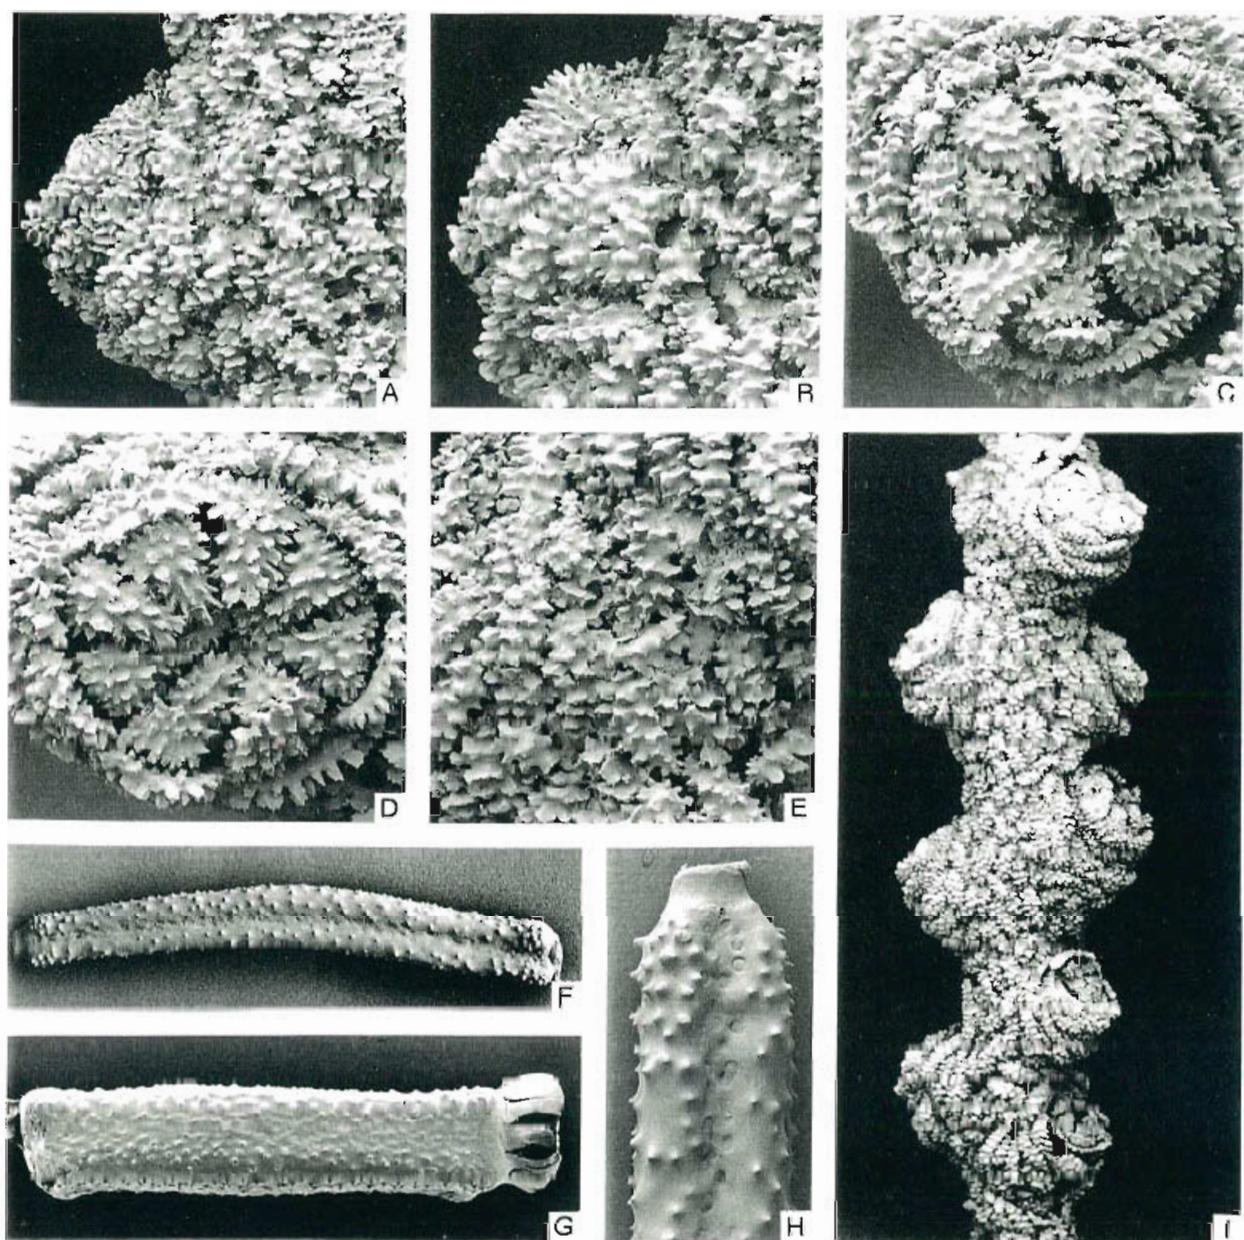

Fig. 156. *Jasminisis cavatica* n.sp., holotype: A-D. Polyps; E. Coenenchyme; F-H. Axial internodes; I. Twig fragment.

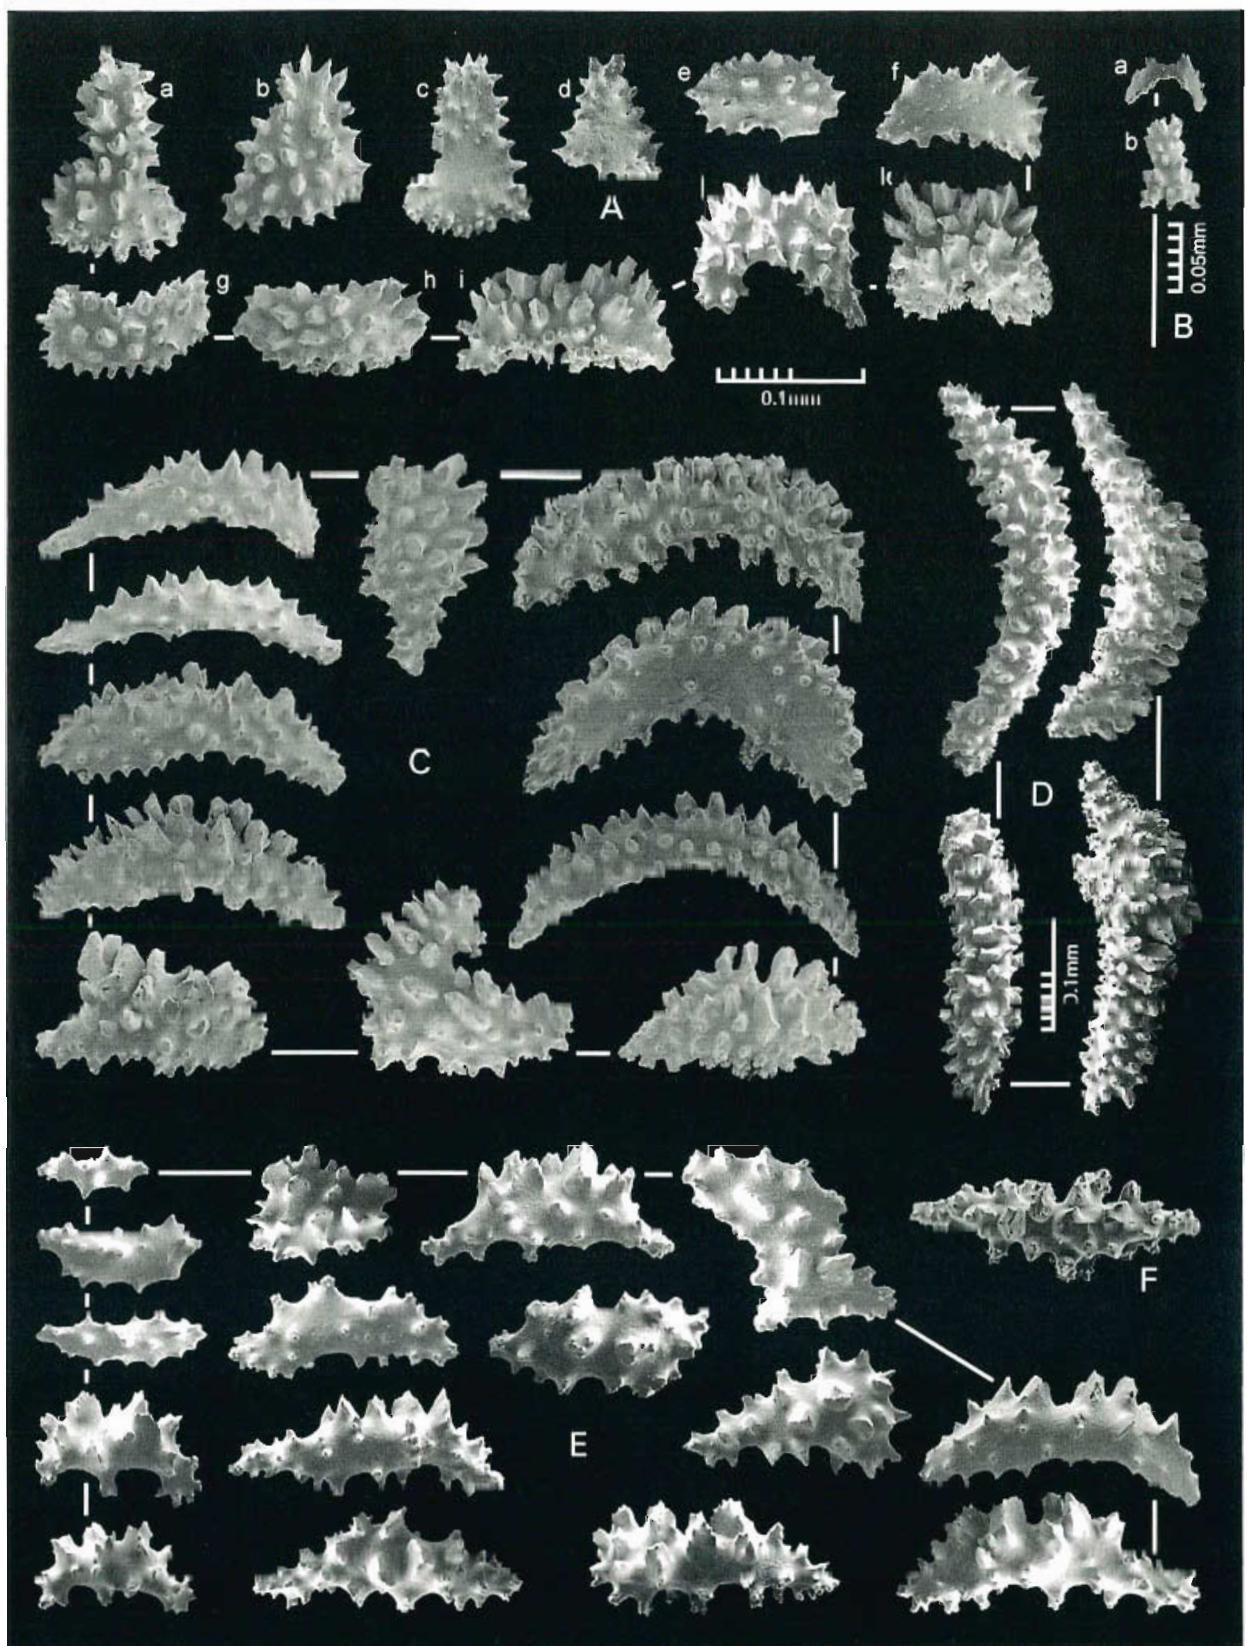

Fig. 157. *Jasminisis cavatica* n.sp., sclerites: (A-E). Holotype: (A). Anthopoma; (B). Tentacles; (C-D). Polyp body; (E). Branch coenenchyme. F. Paratype, NTM C917, surface coenenchyme.

Fig. 158. *Ktenosquamisis bicamella* n.sp., holotype, natural size.

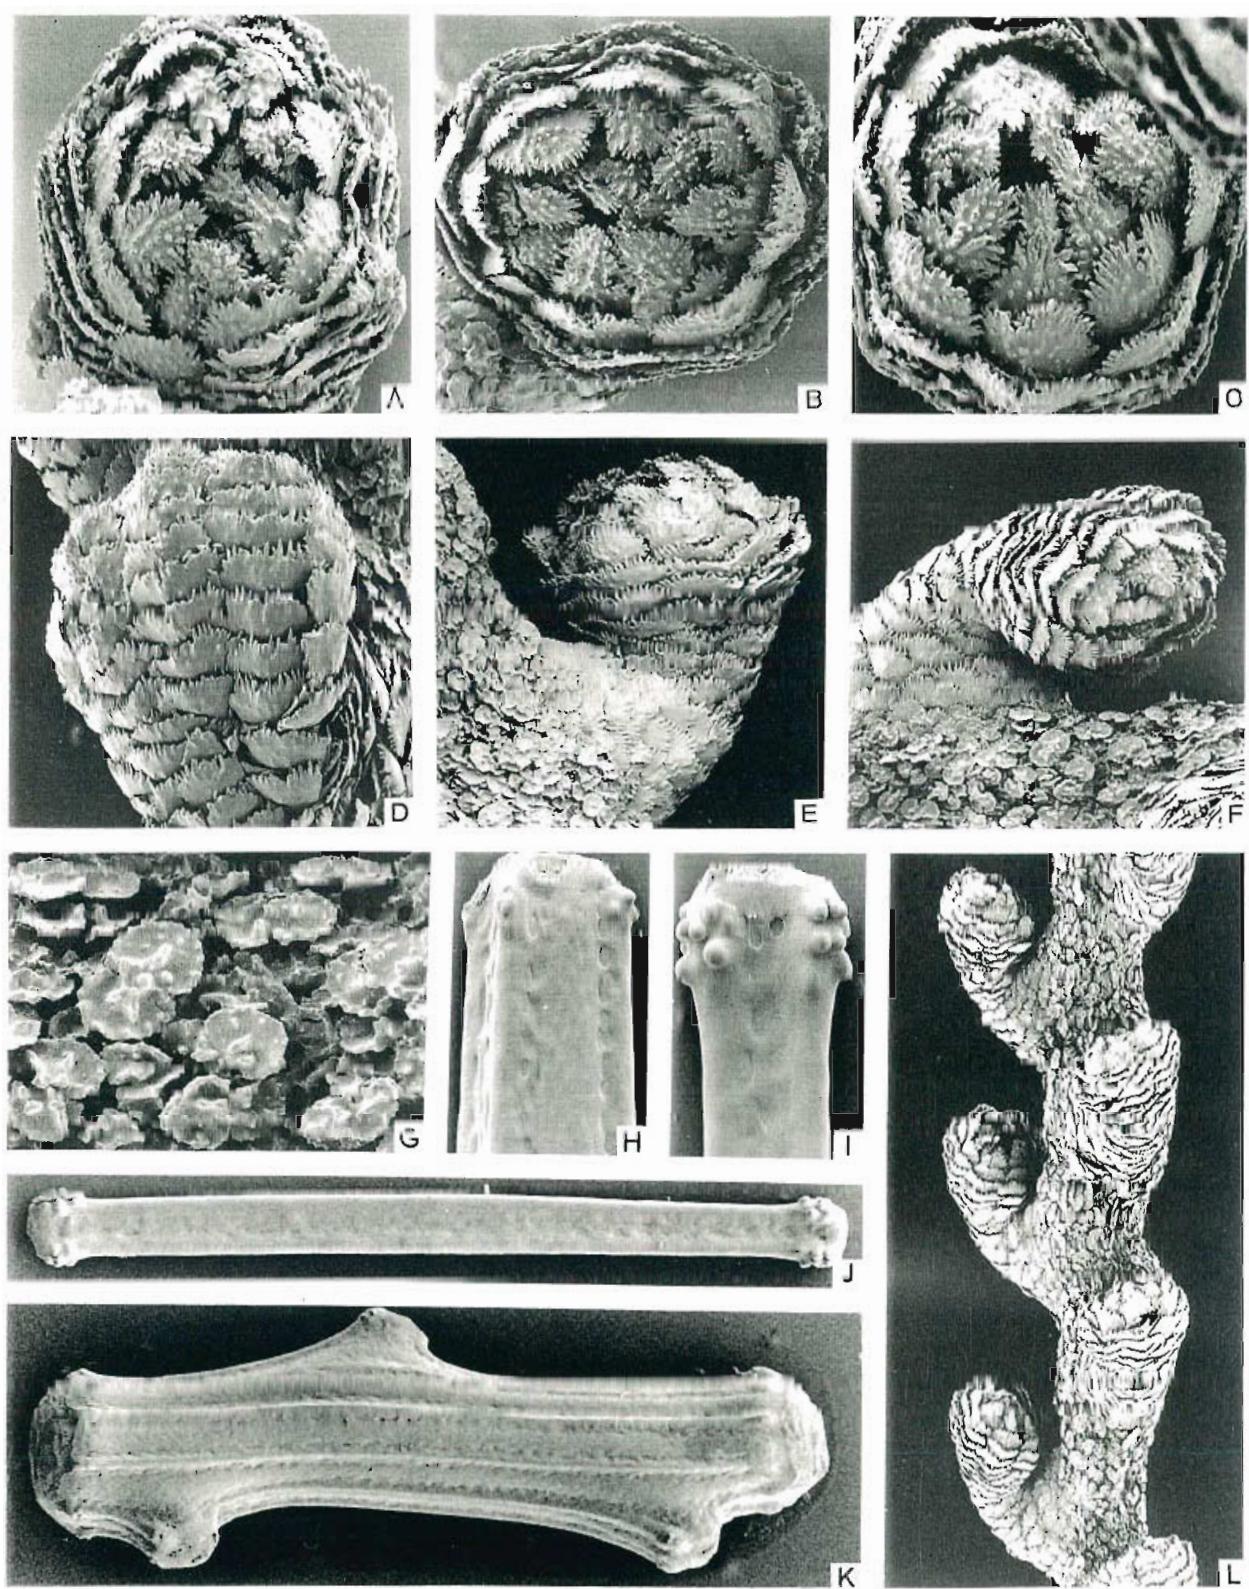

Fig. 159. *Ktenosquamisis bicamella* n.sp., holotype: A-F. Polyps; G. Coenenchyme; H-K. Axial internodes; L. Twig fragment.

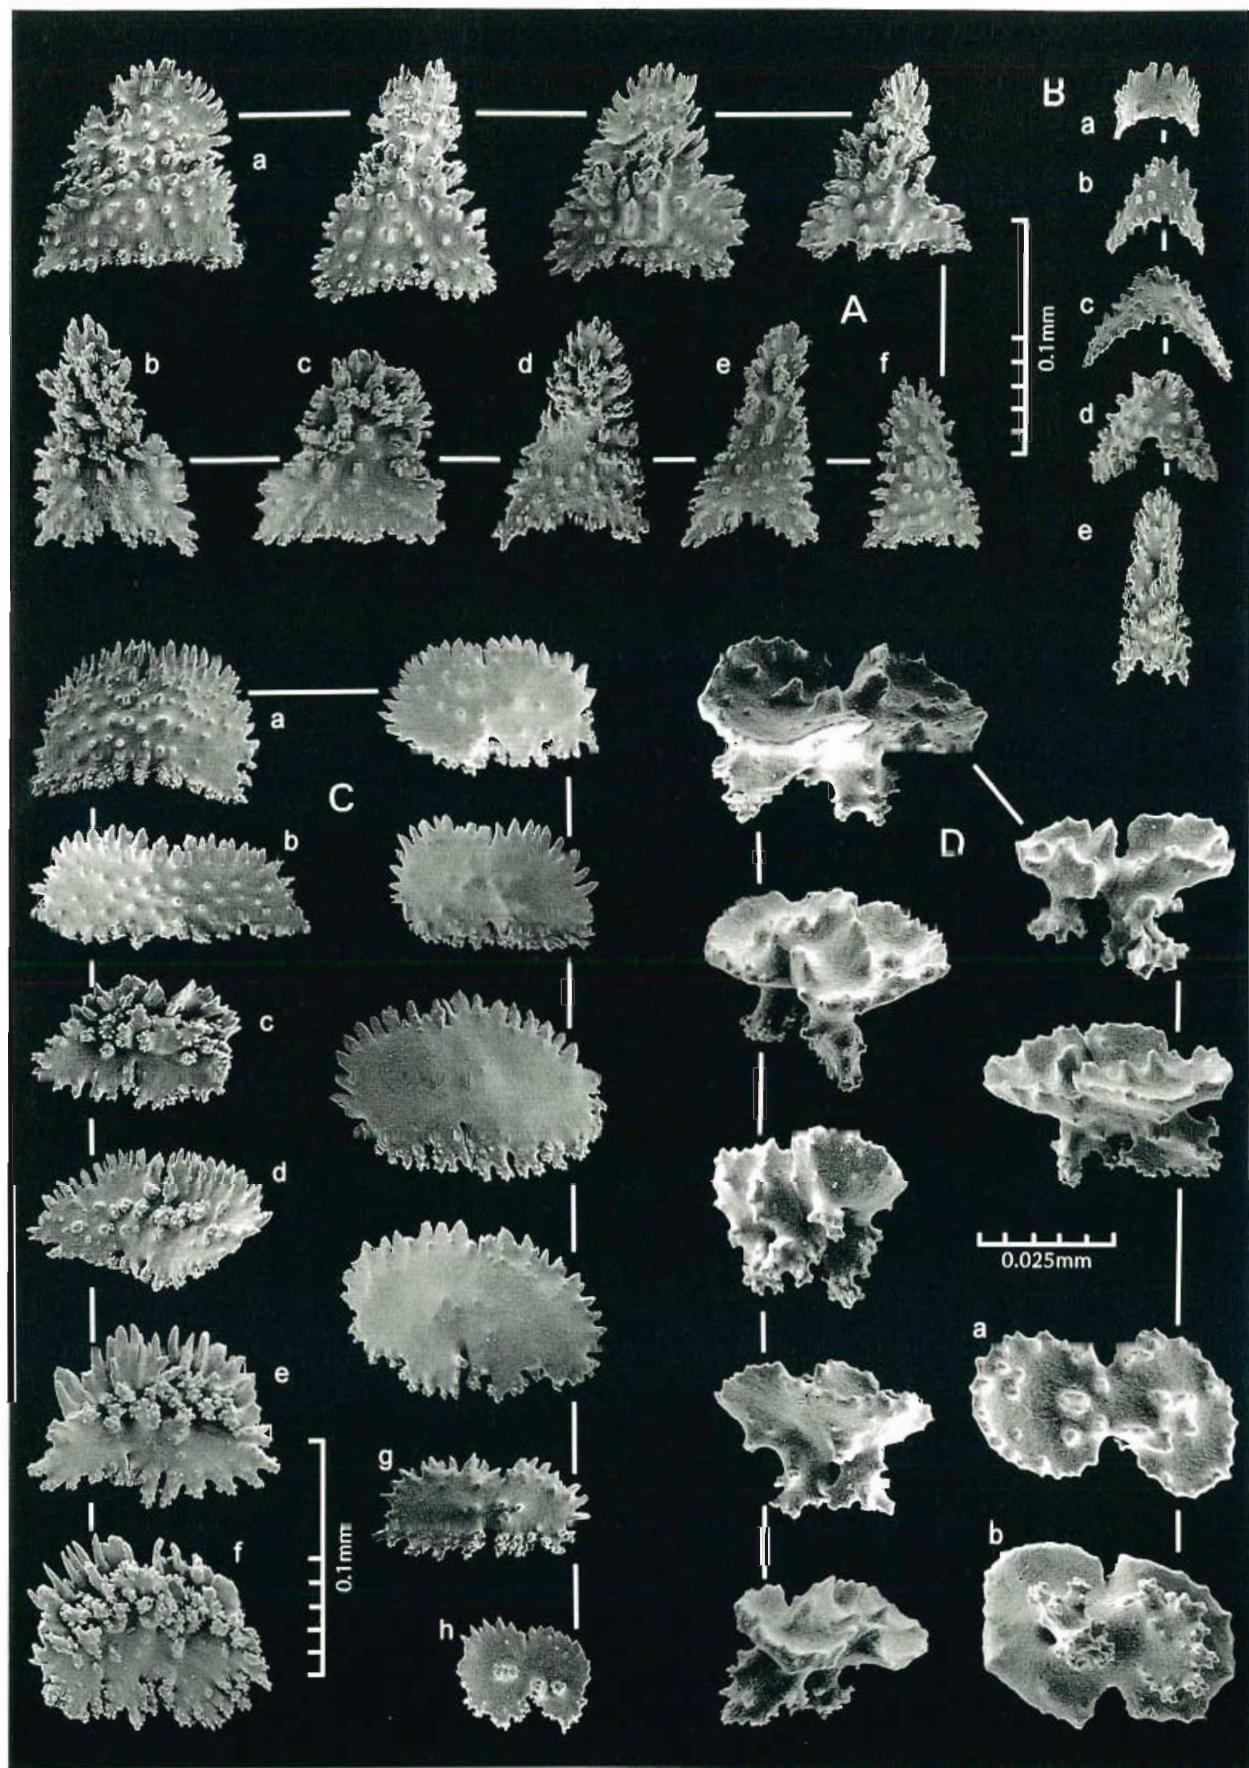

Fig. 160. *Ktenosquamisis bicamella* n.sp., holotype, sclerites: A. Anthopoma; B. Tentacles; C. Polyp body; D. Coenenchyme.

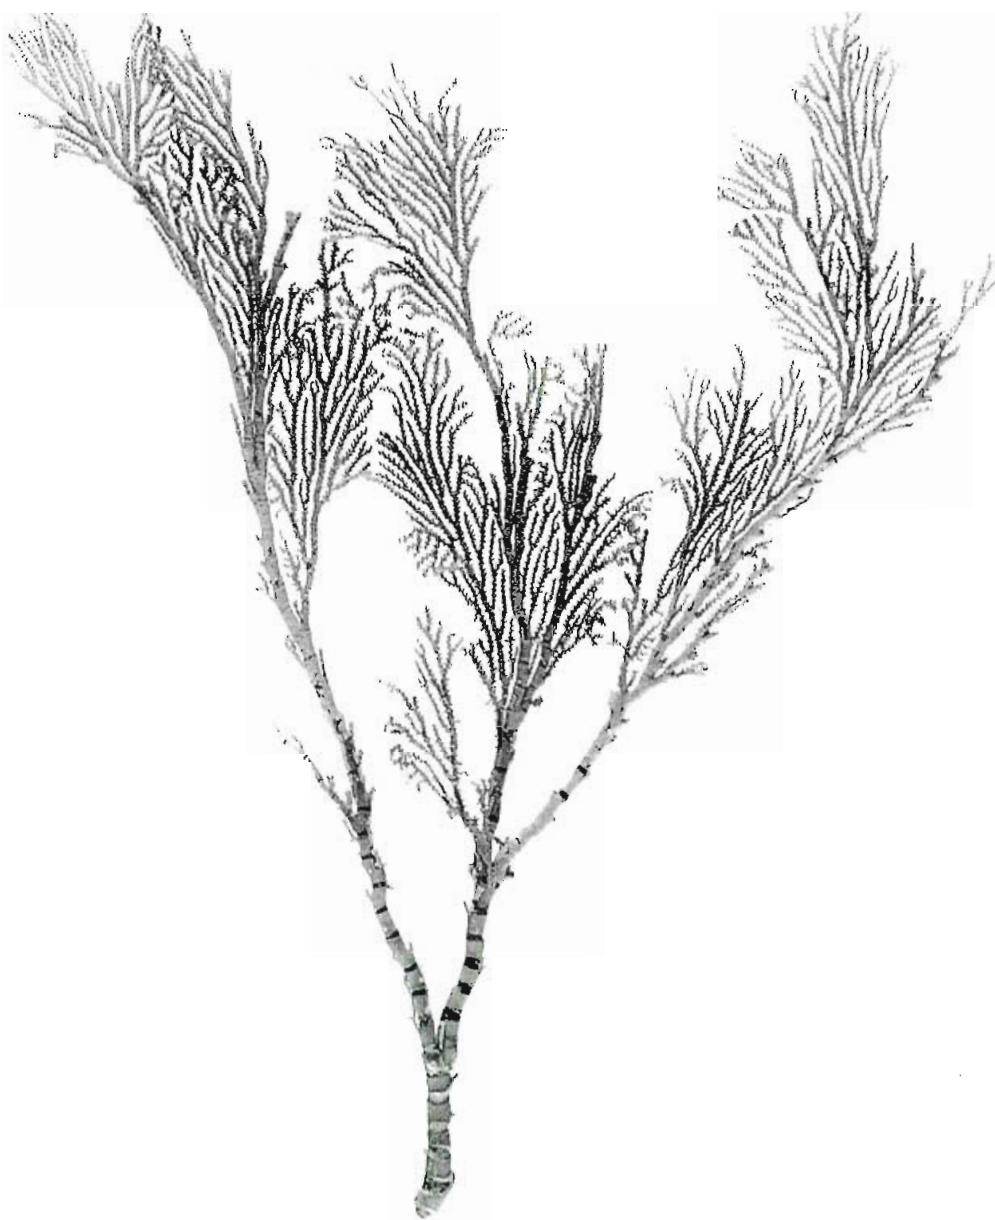

Fig. 161. *Myriozotisis heatherae* n.sp., holotype, natural size.

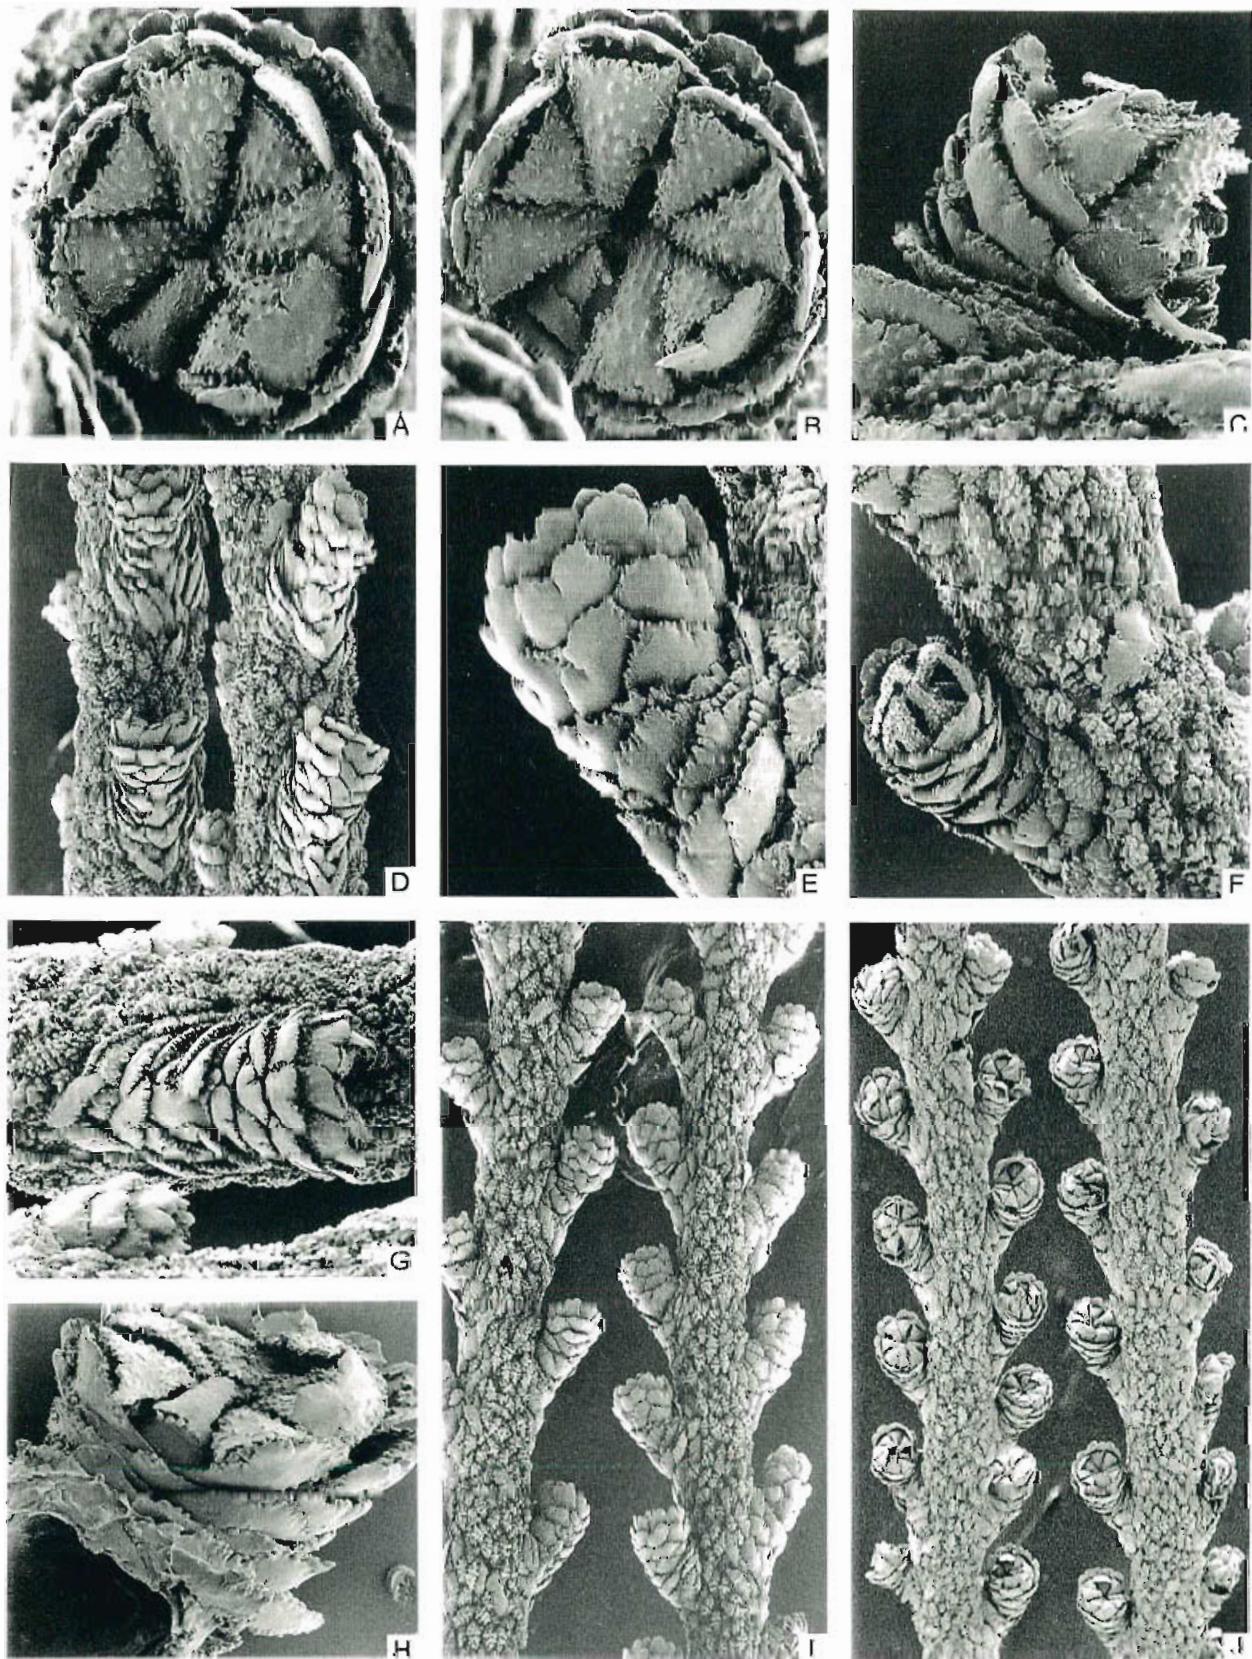

Fig. 162. *Myriozotisis heatherae* n.sp., holotype: A-H. Polyps; I-J. Twig fragment.

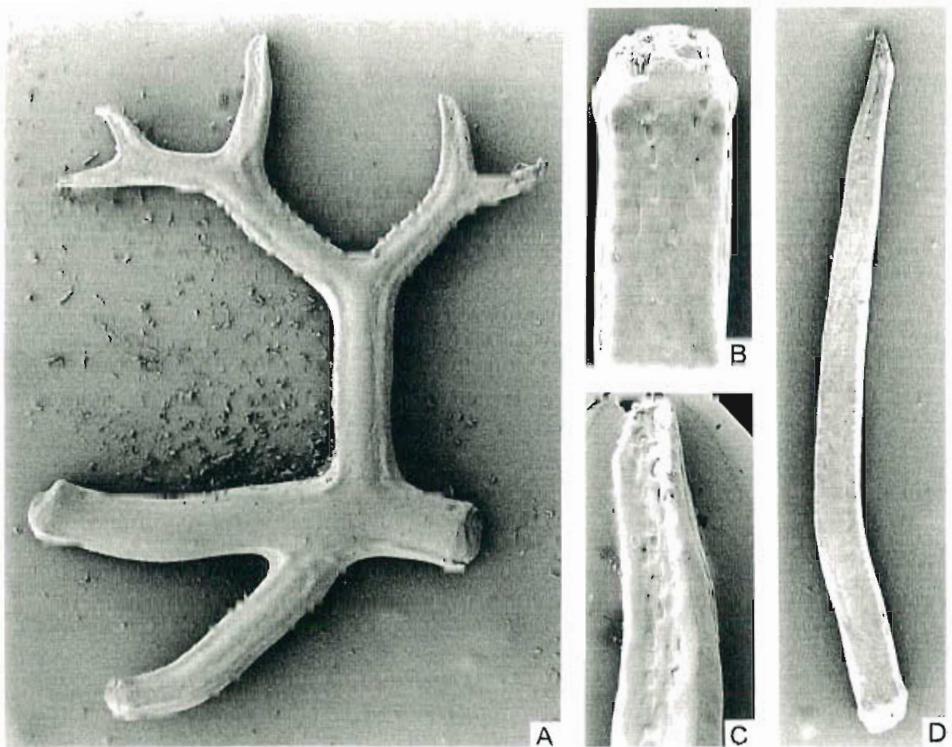

Fig. 163. *Myriozotisis heatherae* n.sp., holotype: A-D. Axial internodes.

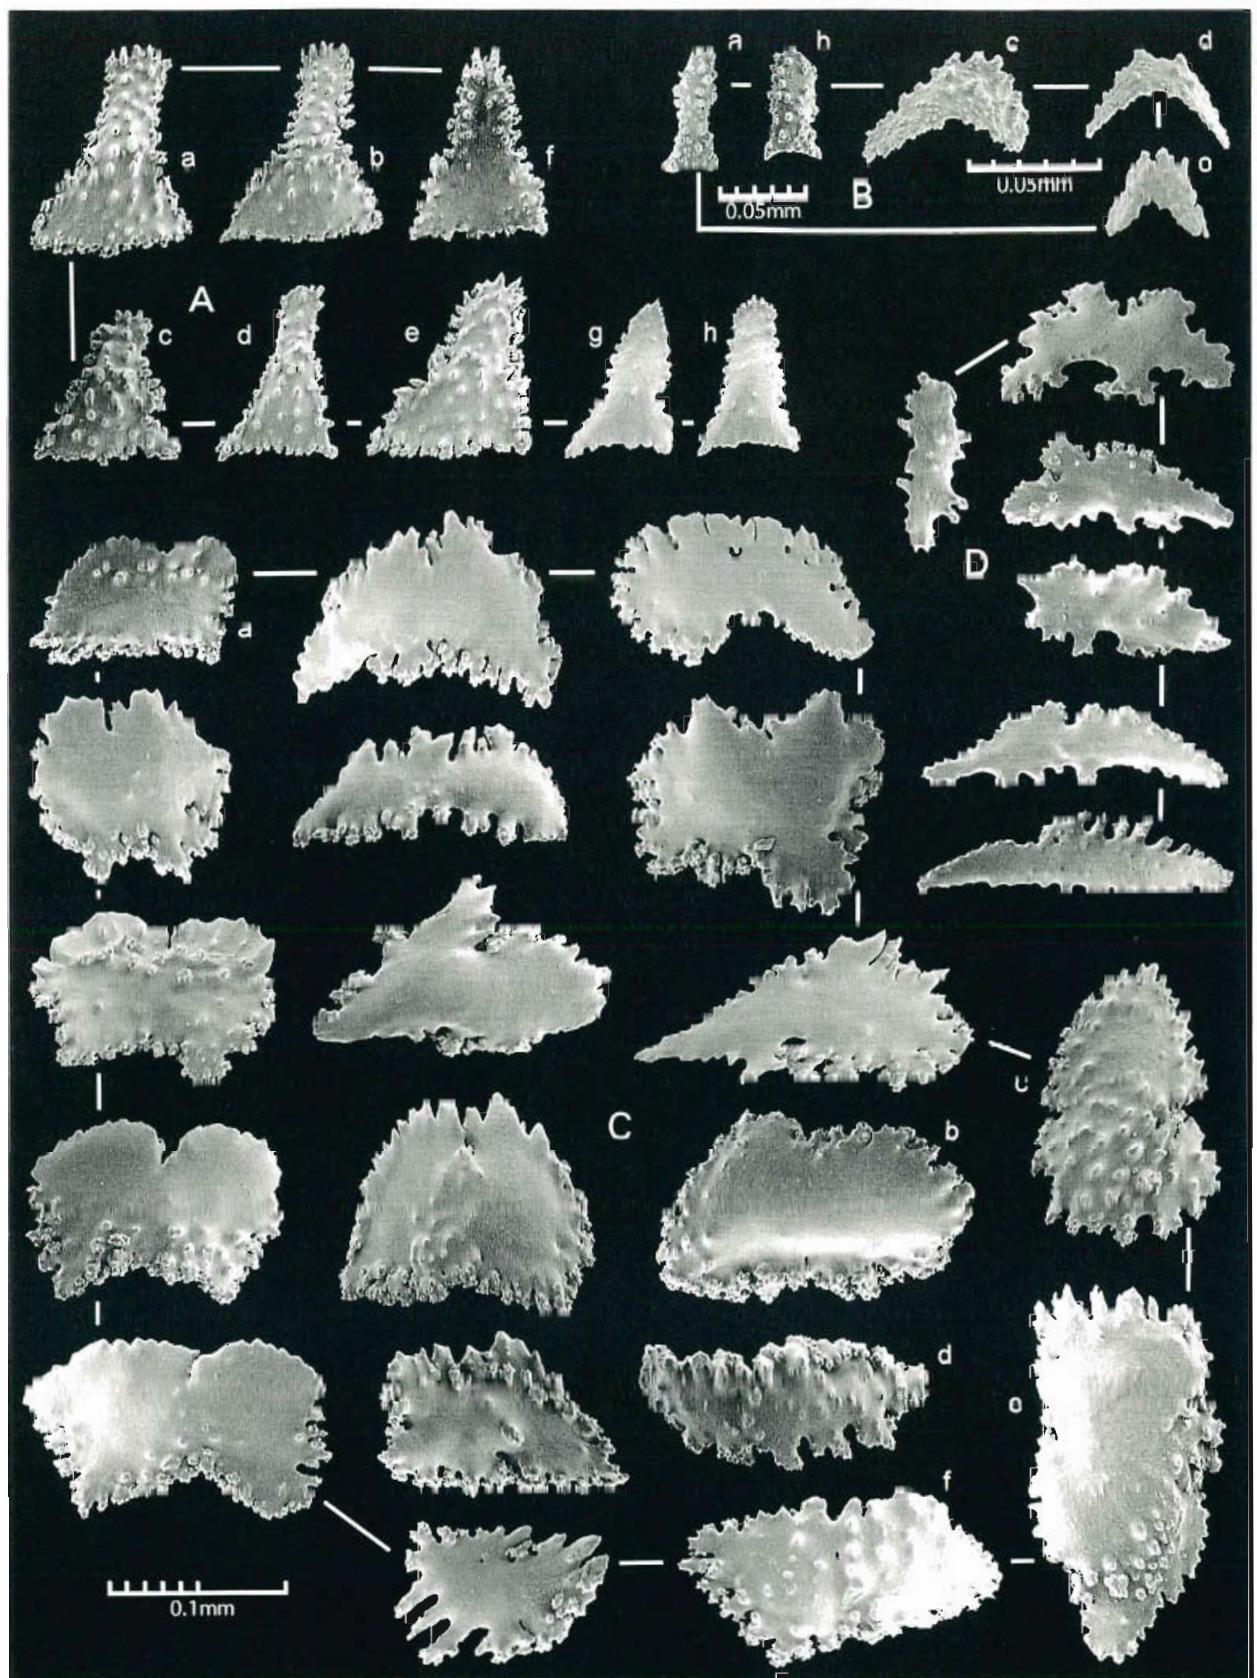

Fig. 164. *Myriozotisis heatherae* n.sp., holotype, sclerites: A. Anthopoma; B. Tentacles; C. Polyp body; D. Adaxial polyp sclerites.

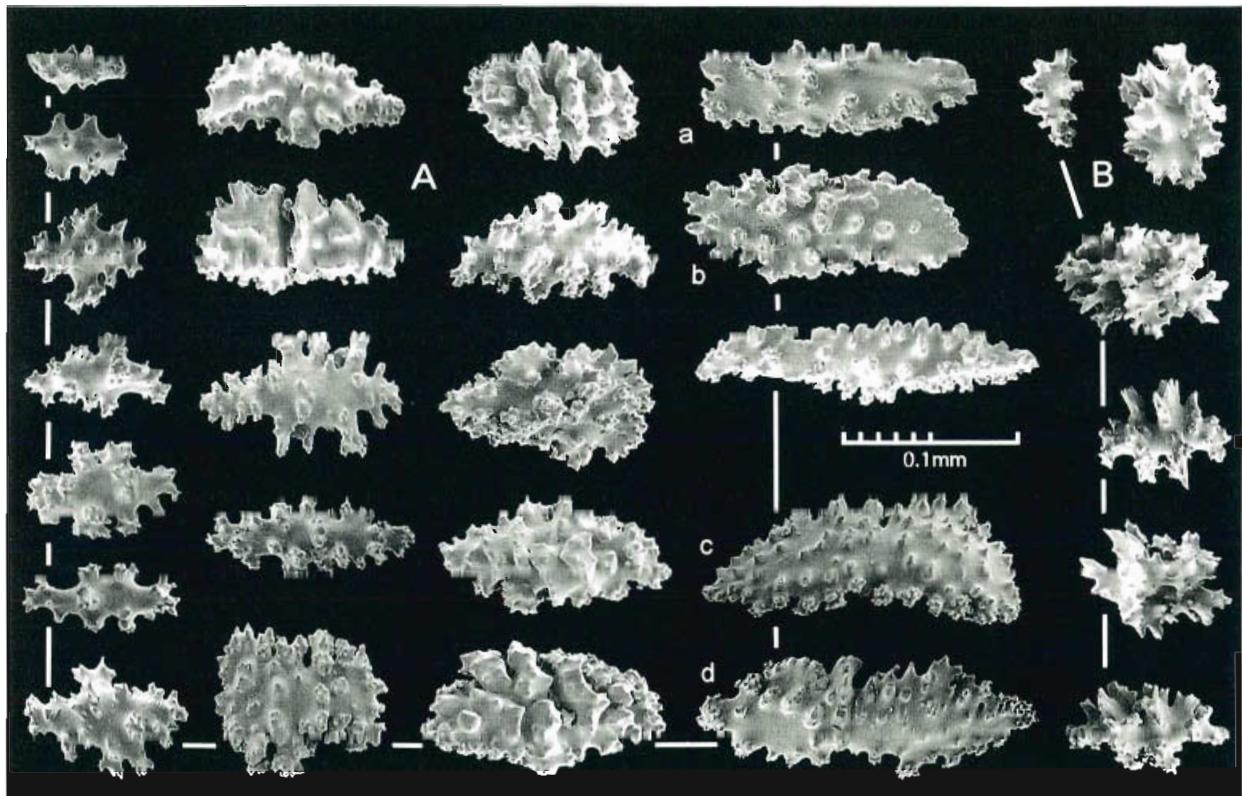

Fig. 165. *Myriozotisis heatherae* n.sp., sclerites: A. Holotype, twig coenenchyme; B. Paratype, QM G301210, basal stem coenenchyme.

Fig. 166. *Myriozotis spinosa* n.sp., holotype, natural size.

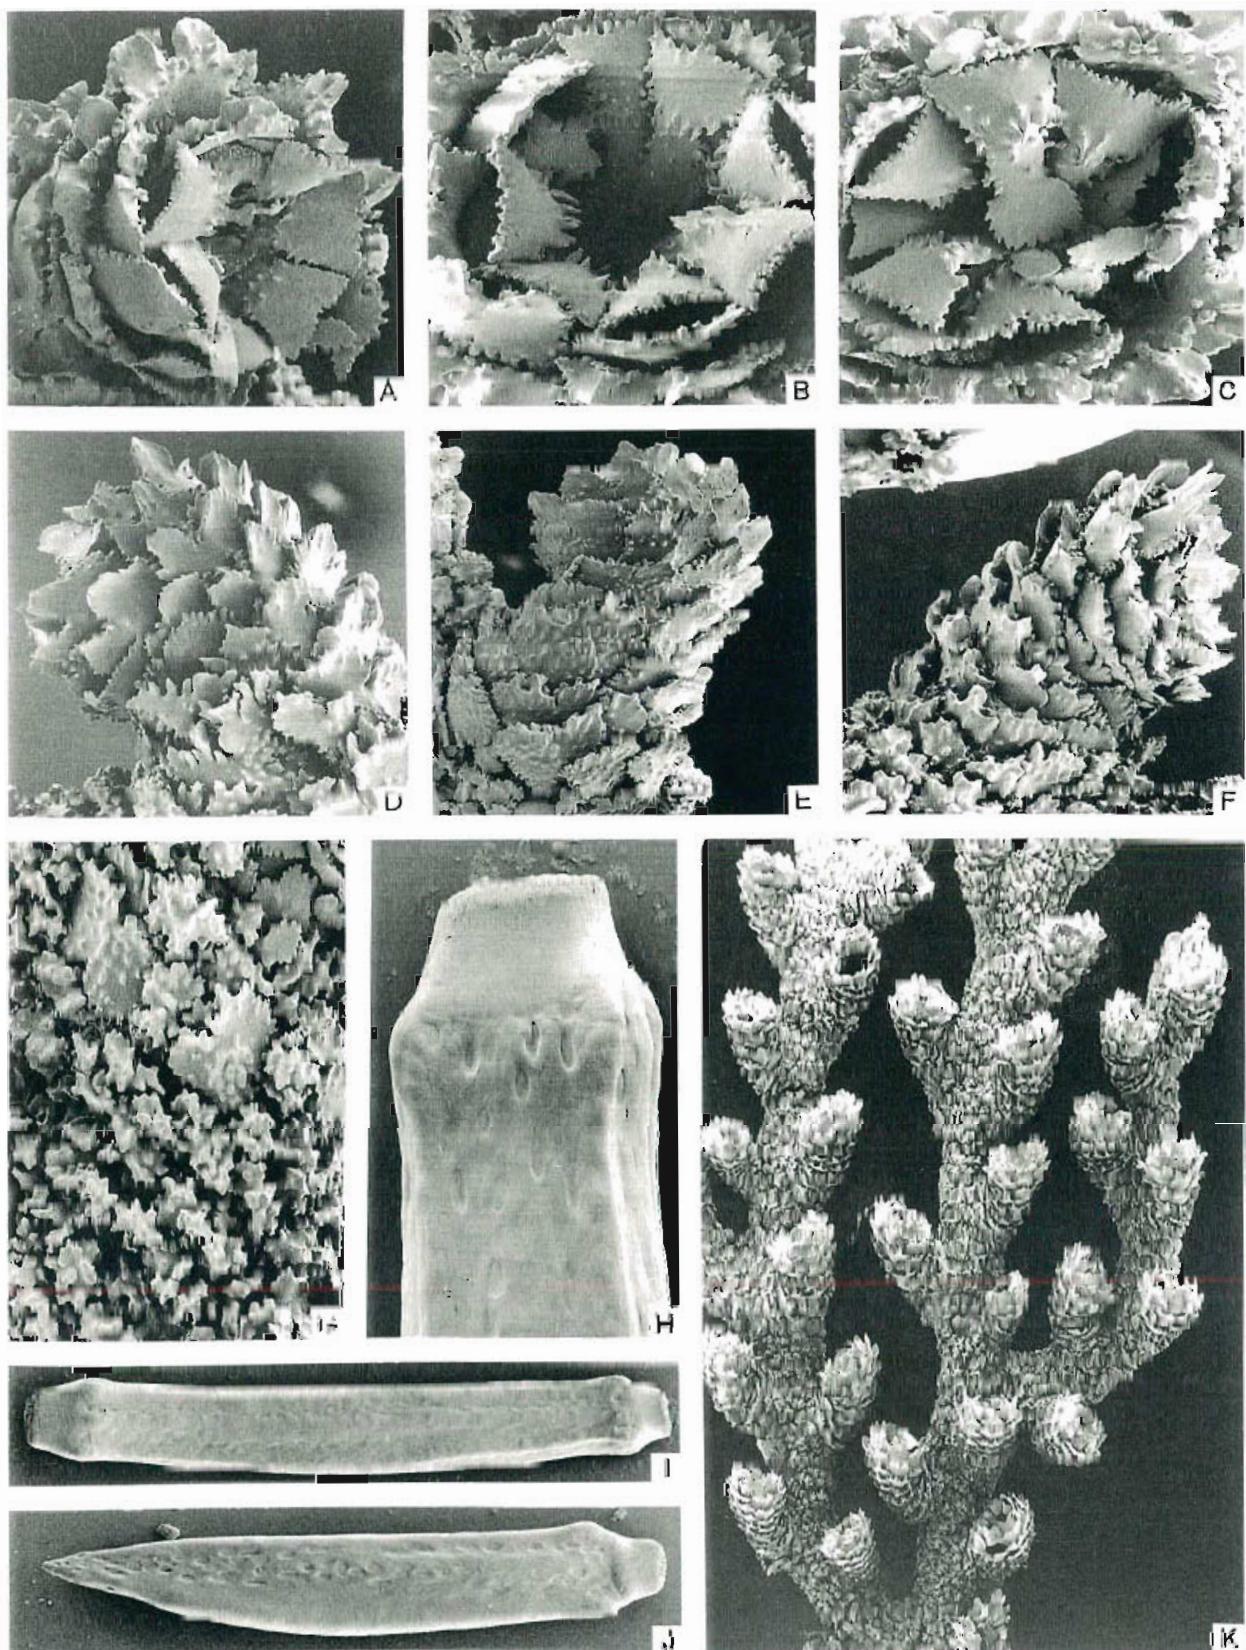

Fig. 167. *Myriozotisis spinosa* n.sp., holotype: A-F. Polyps; G. Coenenchyme; H-J. Axial internodes; K. Twig fragment.

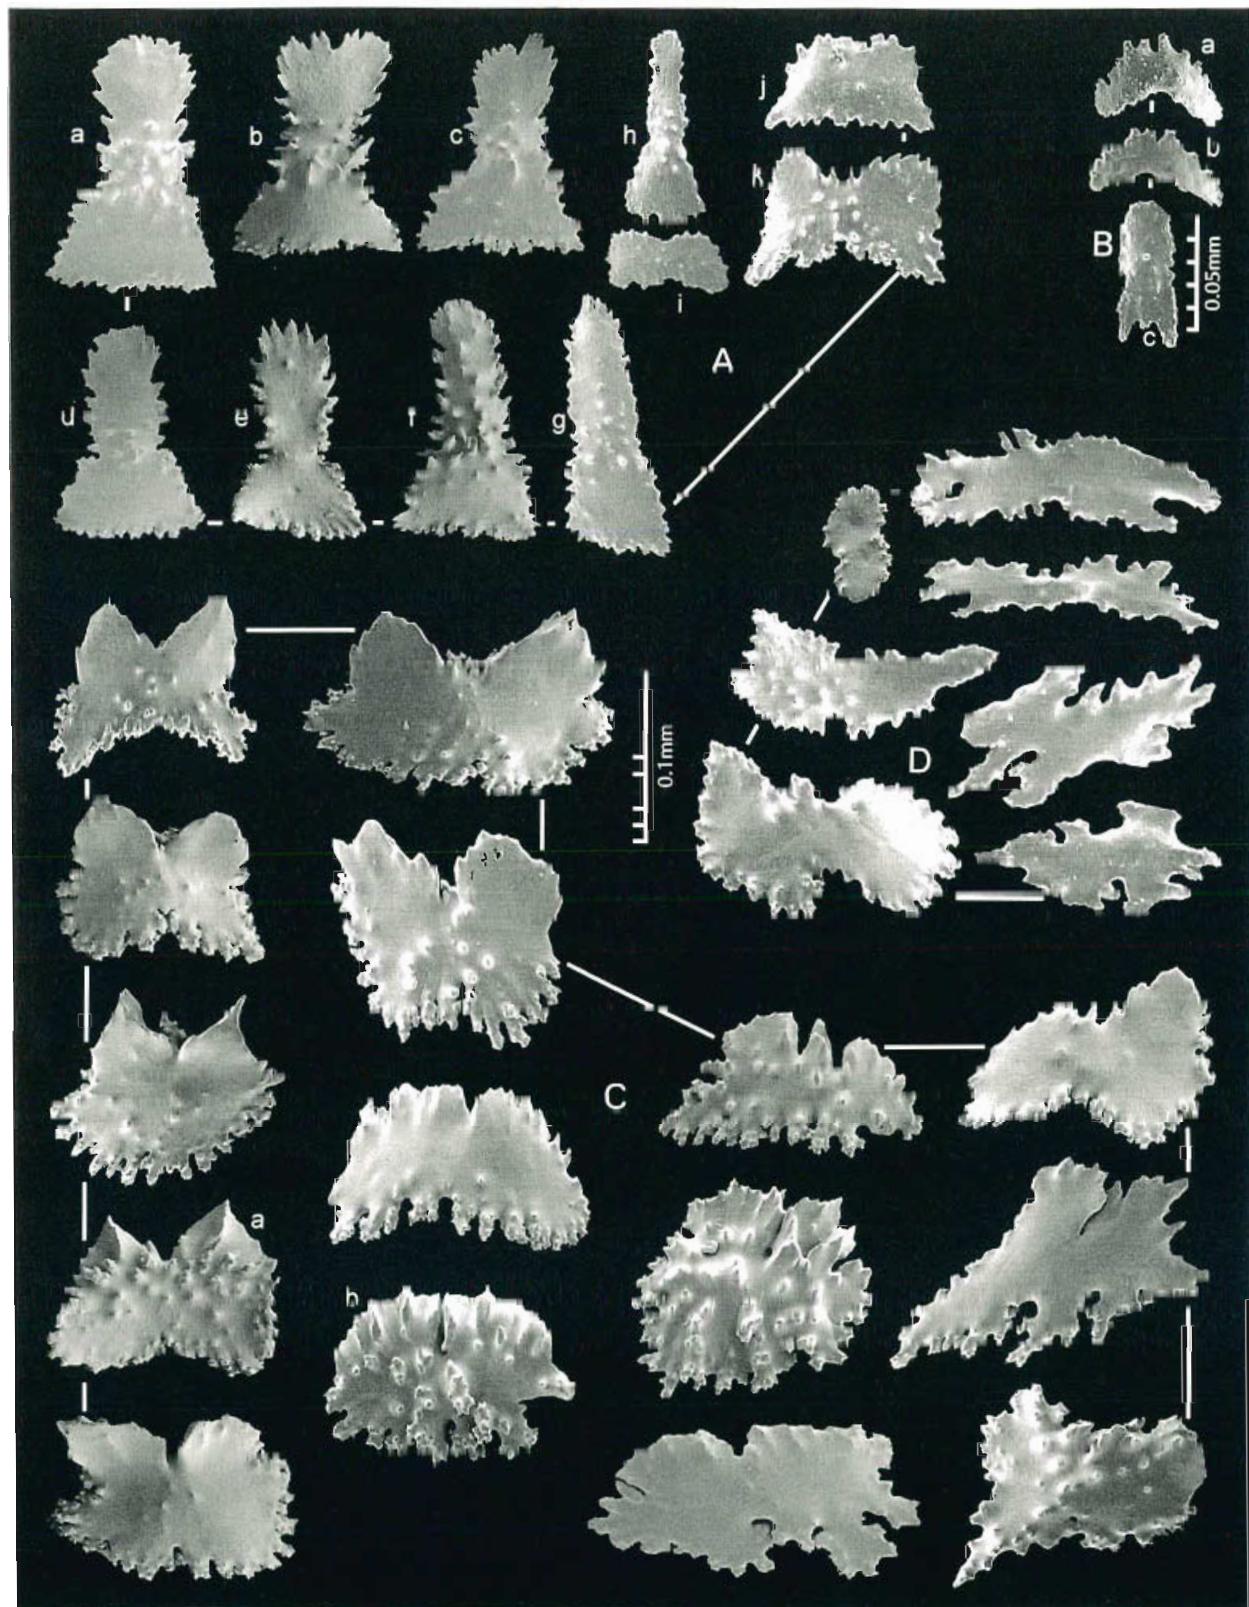

Fig. 168. *Myriozotisis spinosa* n.sp., holotype, sclerites: A. Anthopoma; B. Tentacles; C. Small polyp body scales; D. Adaxial polyp platelets.

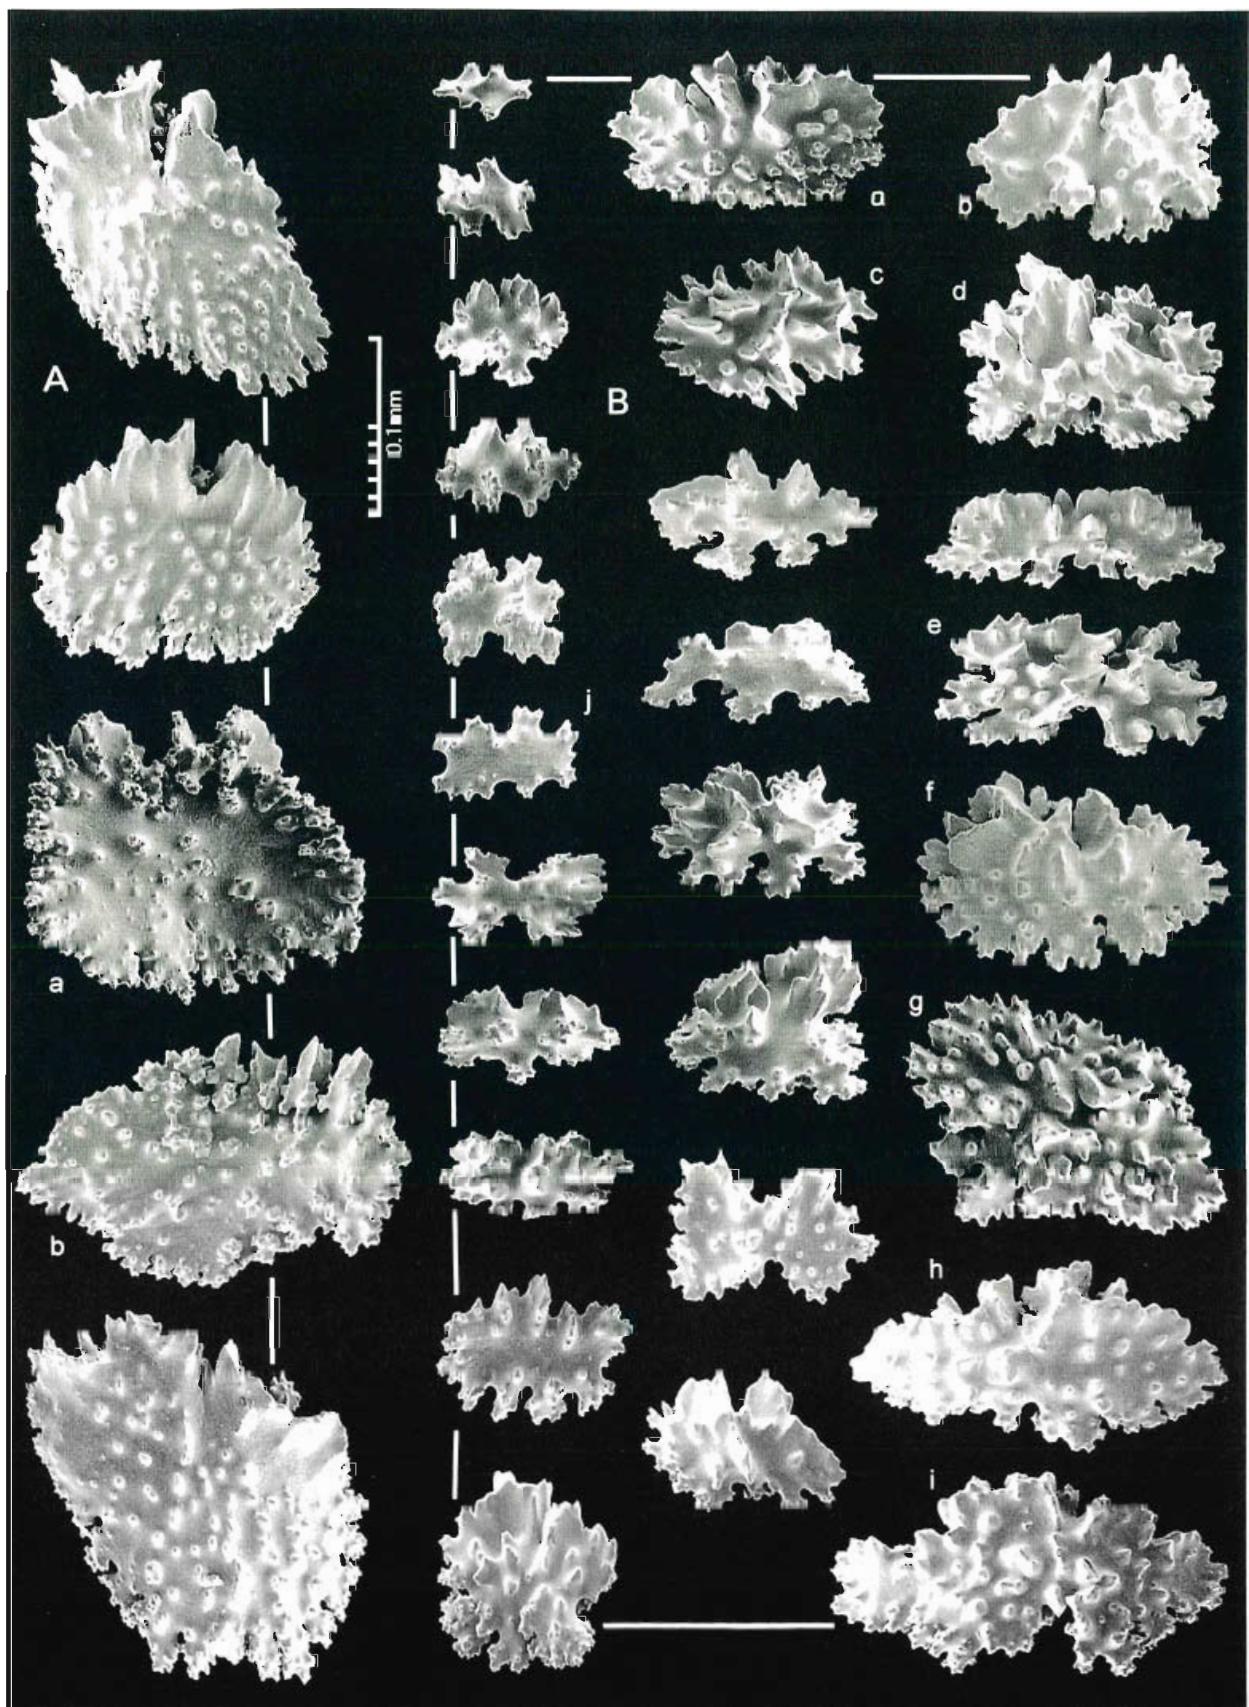

Fig. 169. *Myriozotisis spinosa* n.sp., holotype, sclerites: A. Large polyp body scales; B. Twig coenenchyme.

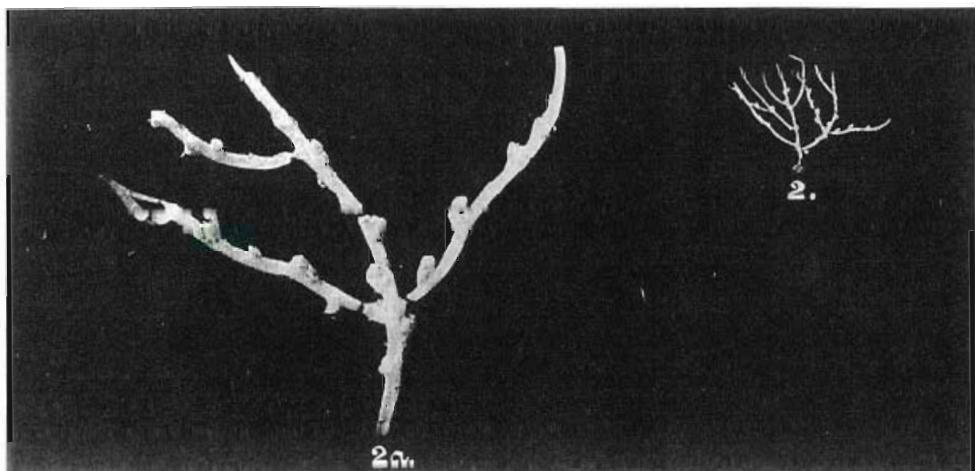

Fig. 170. *Iotisis alba* (Nutting, 1910). Reproduction of Nutting's pl. IV of the holotype of *Mopsea alba*. 2. Colony, natural size. 2a. Branch, natural size x 5.

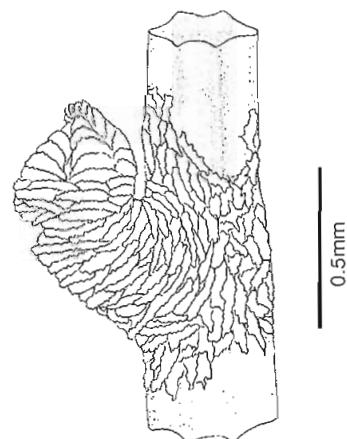

Fig. 171. *Iotisis alba* (Nutting, 1910), holotype: Polyp.

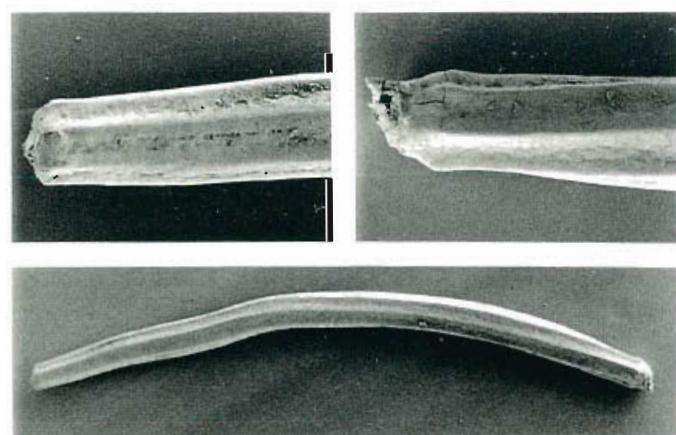

Fig. 172. *Iotisis alba* (Nutting, 1910), holotype: Axial internodes.

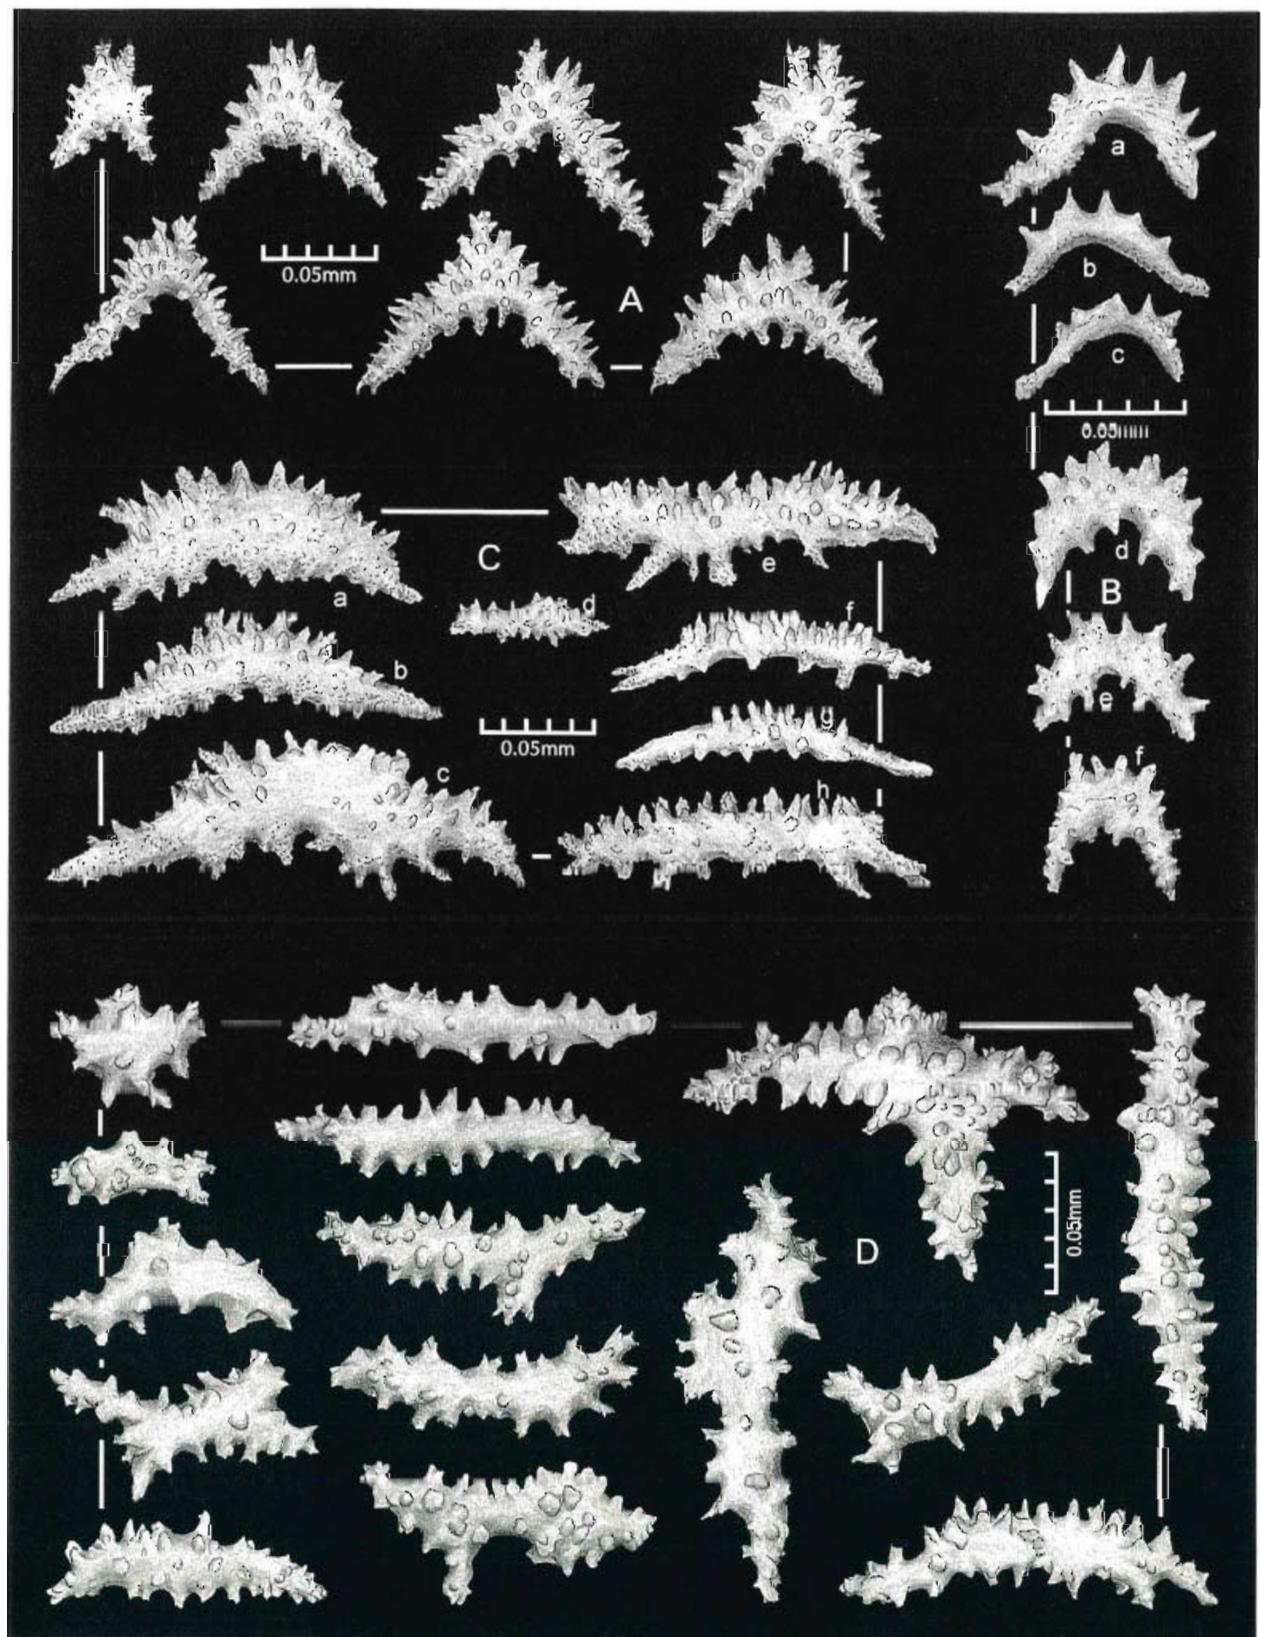

Fig. 173. *Iotisis alba* (Nutting, 1910), holotype, sclerites: A. Anthopoma; B. Tentacles; C. Polyp body; D. Branch coenenchyme.

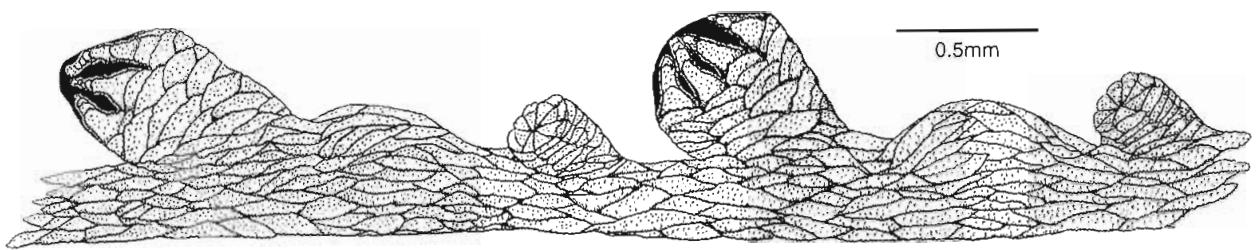

Fig. 174. *Peltastisis uniserialis* Nutting, 1910, holotype fragment.

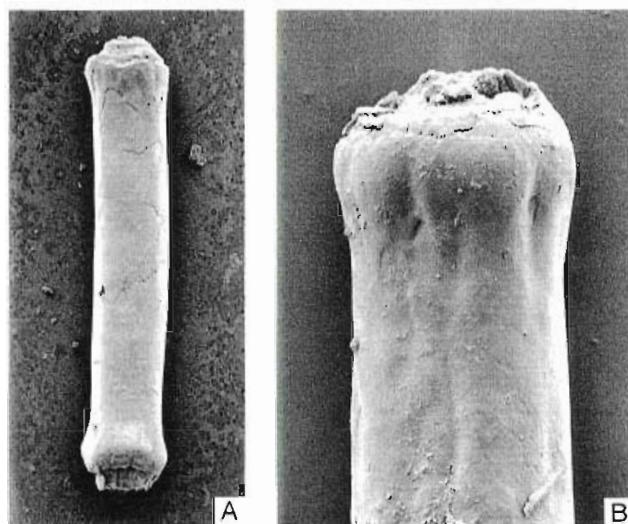

Fig. 175. *Peltastisis uniserialis* Nutting, 1910, holotype:
A-B. Axial internodes.

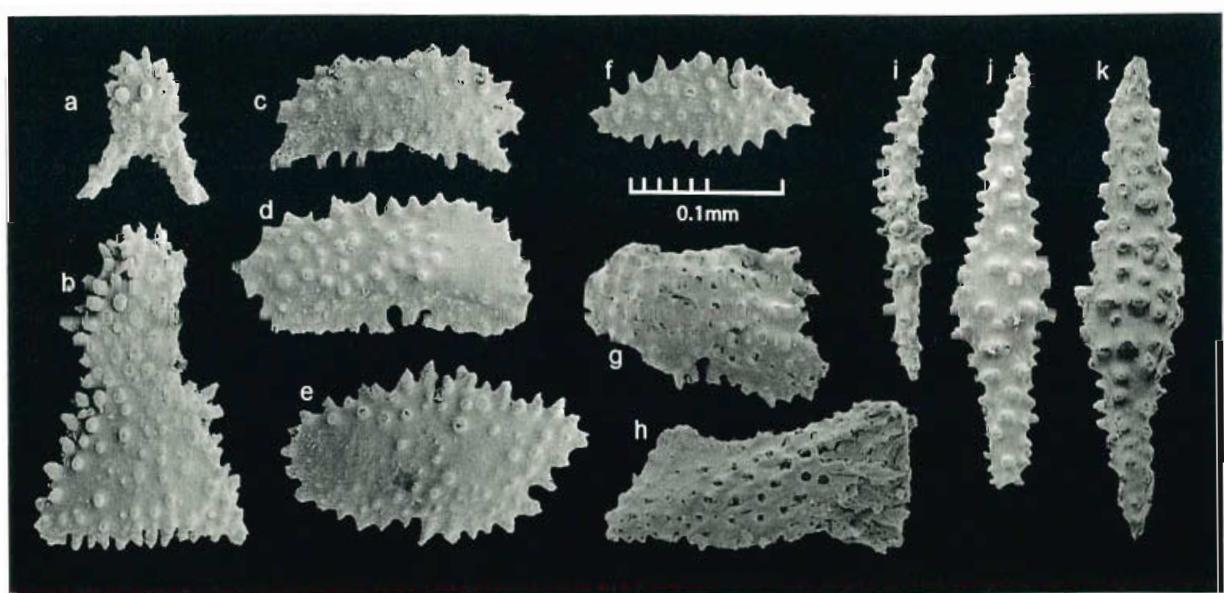

Fig. 176. *Peltastisis uniserialis* Nutting, 1910, holotype, sclerites.

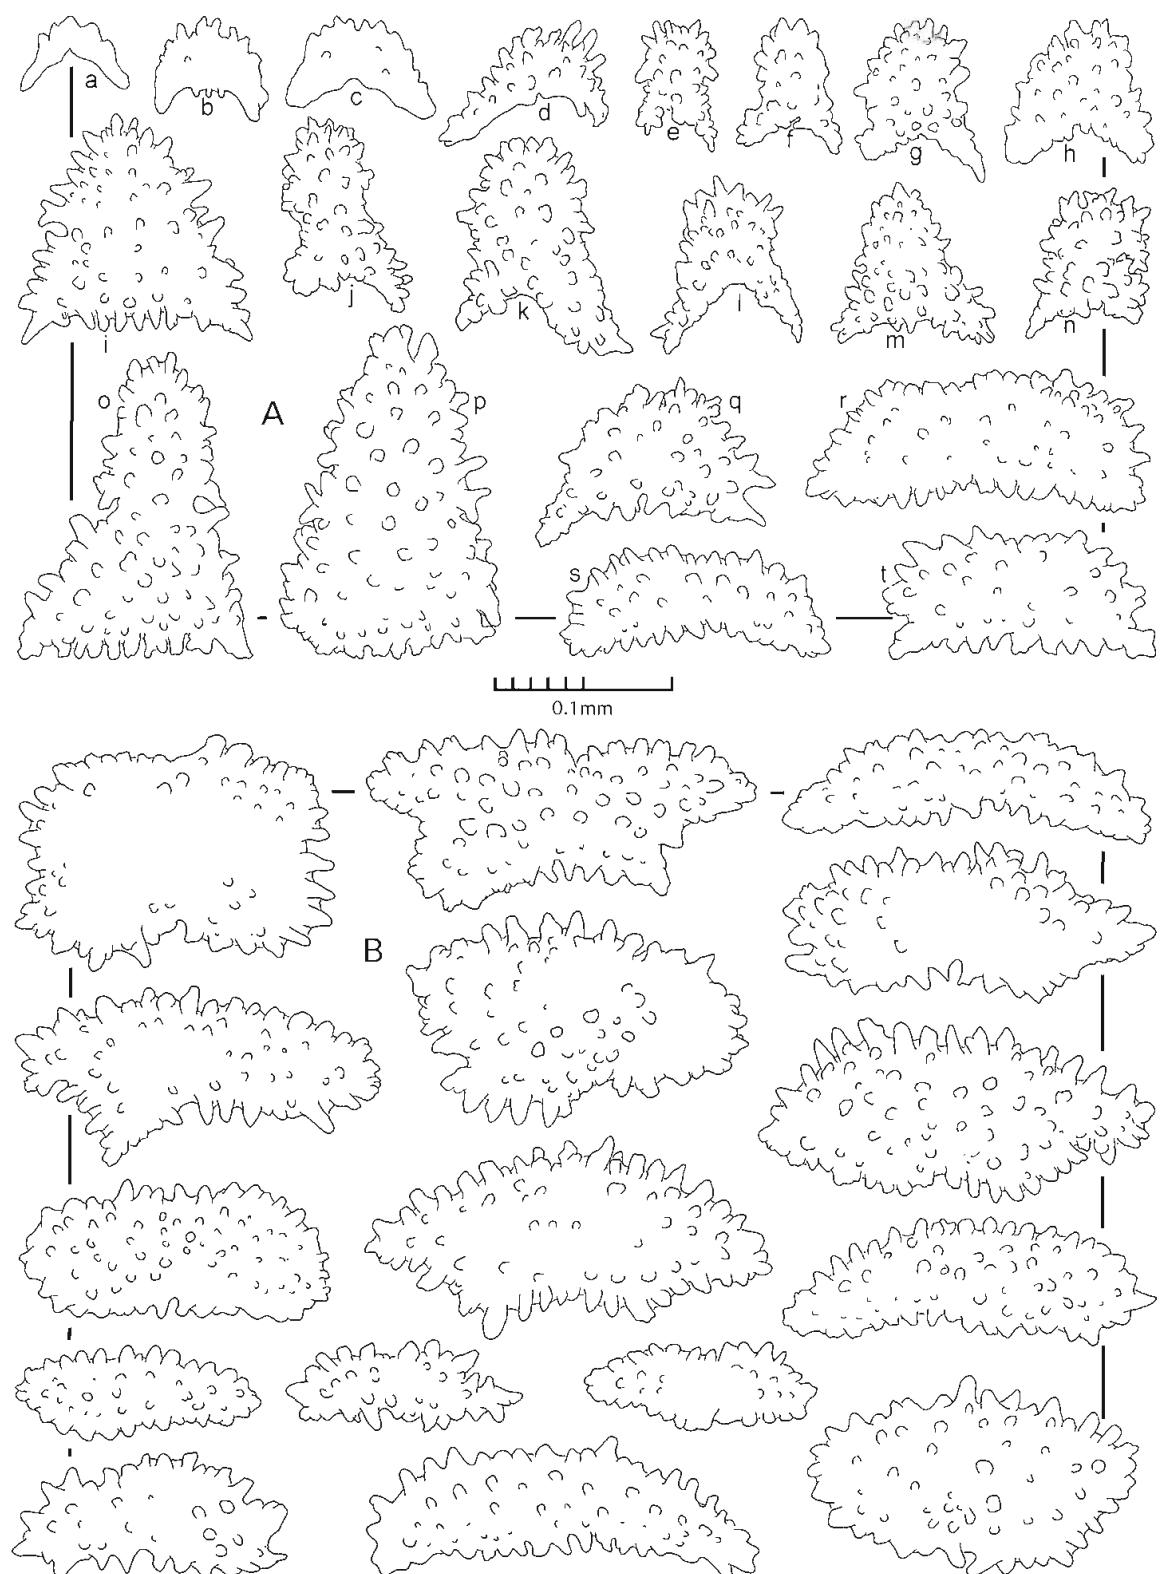

Fig. 177. *Peltastisis uniserialis* Nutting, 1910, holotype, sclerites: A. Anthopoma; B. Polyp body.

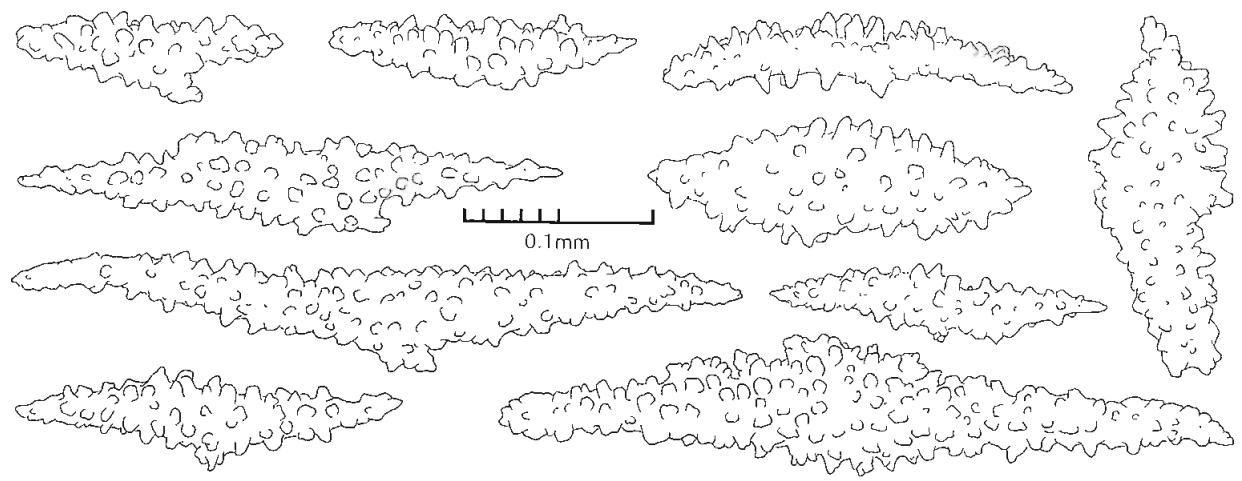

Fig. 178. *Peltastisis uniserialis* Nutting, 1910, holotype, sclerites: Coenenchyme.

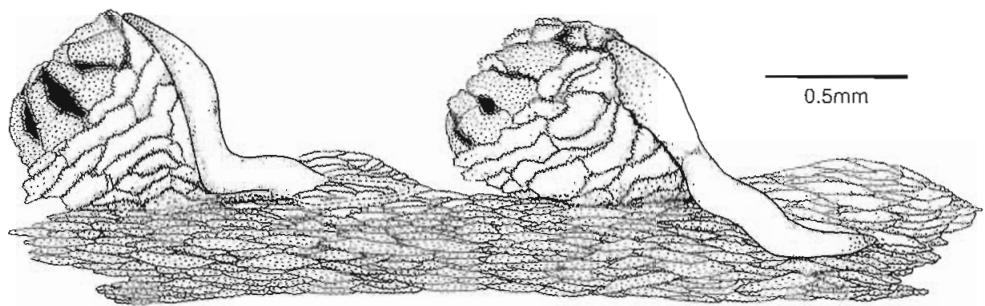

Fig. 179. *Peltastisis cornuta* Nutting, 1910, part of holotype fragment.

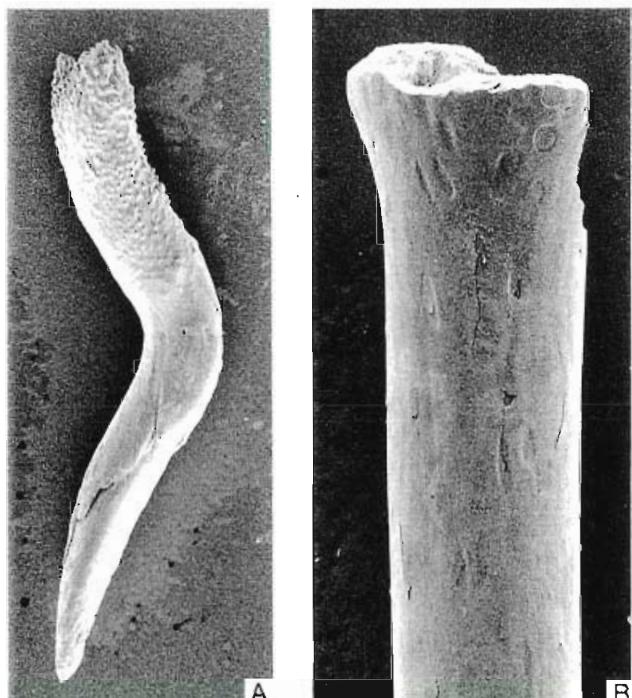

Fig. 180. *Peltastisis cornuta* Nutting, 1910, holotype:
A. Large abaxial polyp sclerite; B. Axial internode.

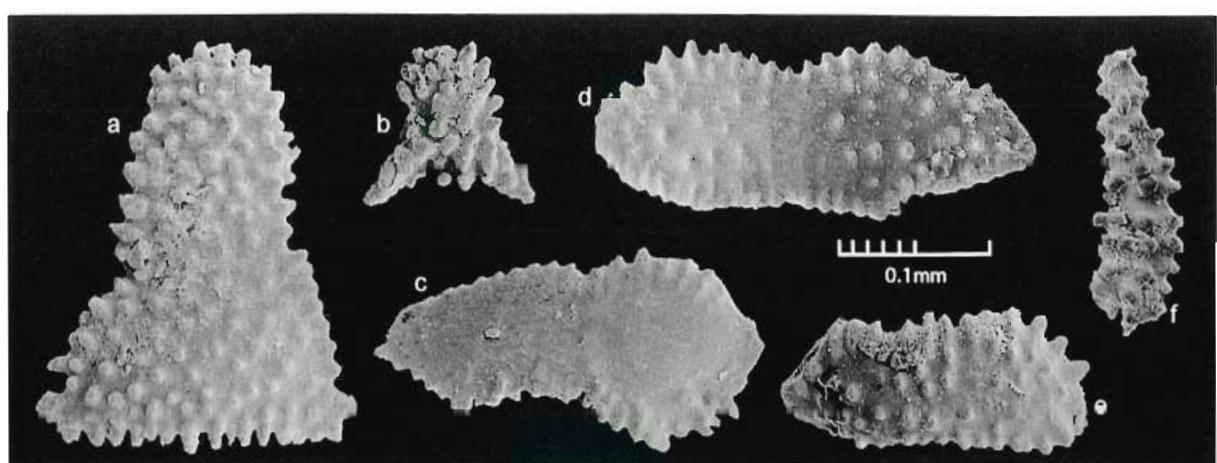

Fig. 181. *Peltastisis cornuta* Nutting, 1910, holotype, sclerites.

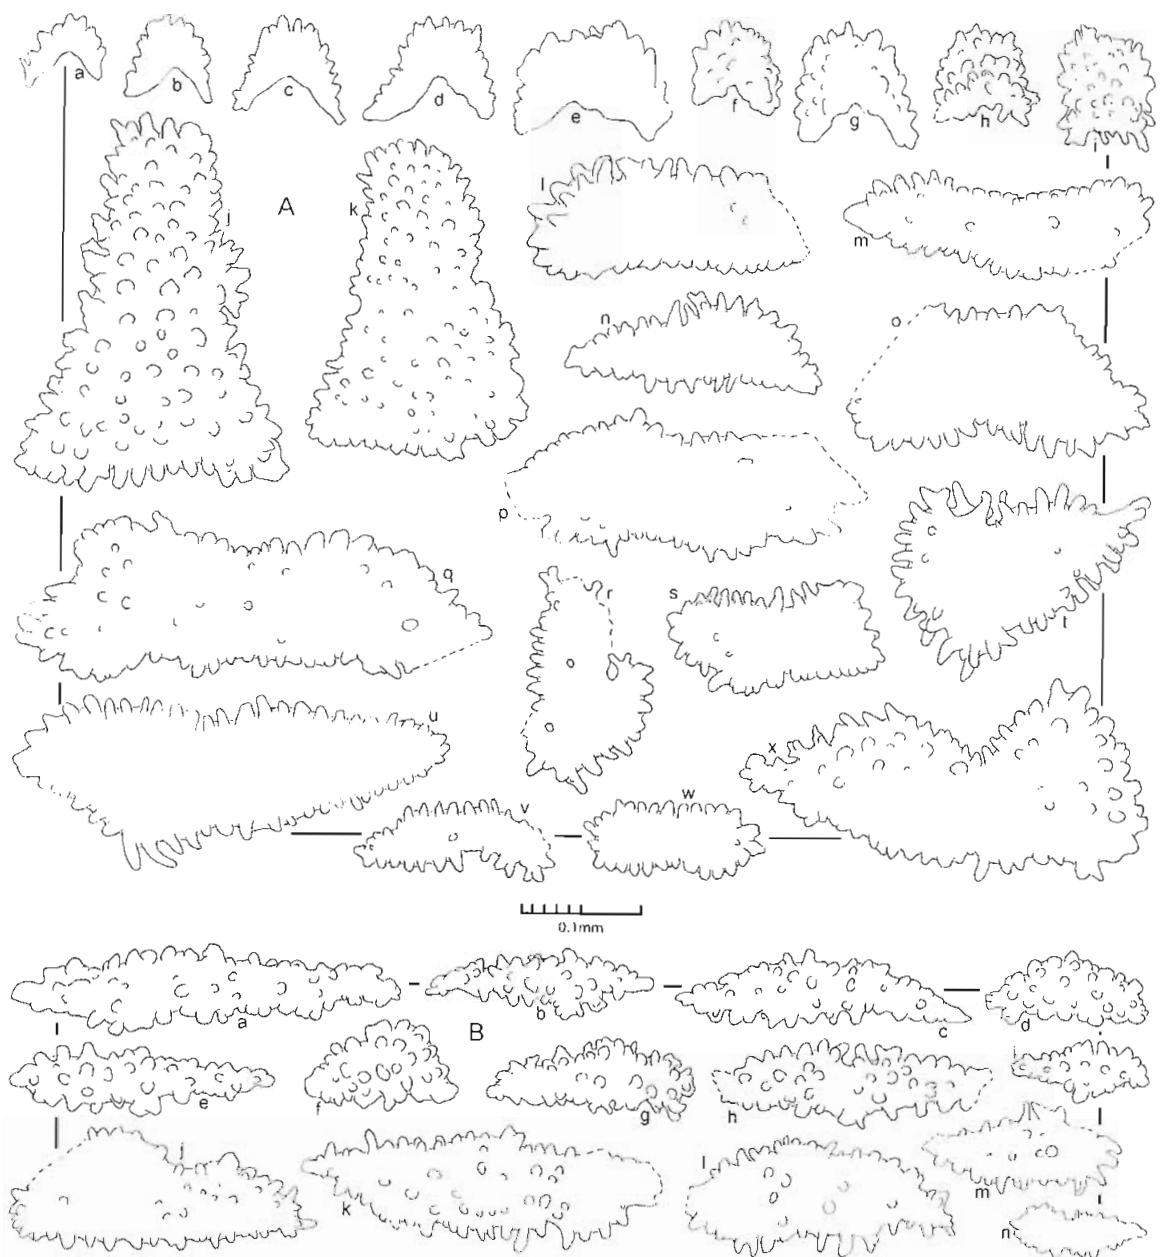

Fig. 182. *Peltastisis cornuta* Nutting, 1910, holotype, sclerites: A. Polyp; B. Coenenchyme.

Fig. 183. *Lissopholidisis furcula* n.sp., holotype, natural size.

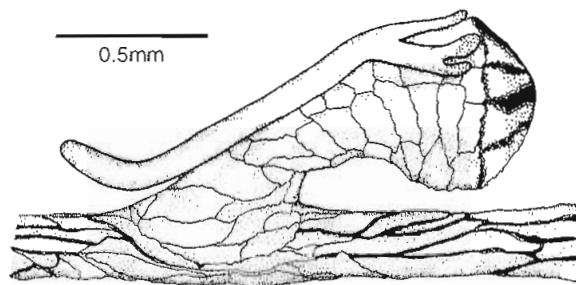

Fig. 184. *Lissopholidisis furcula* n.sp., holotype: Polyp, abaxial stay not cradling the head.

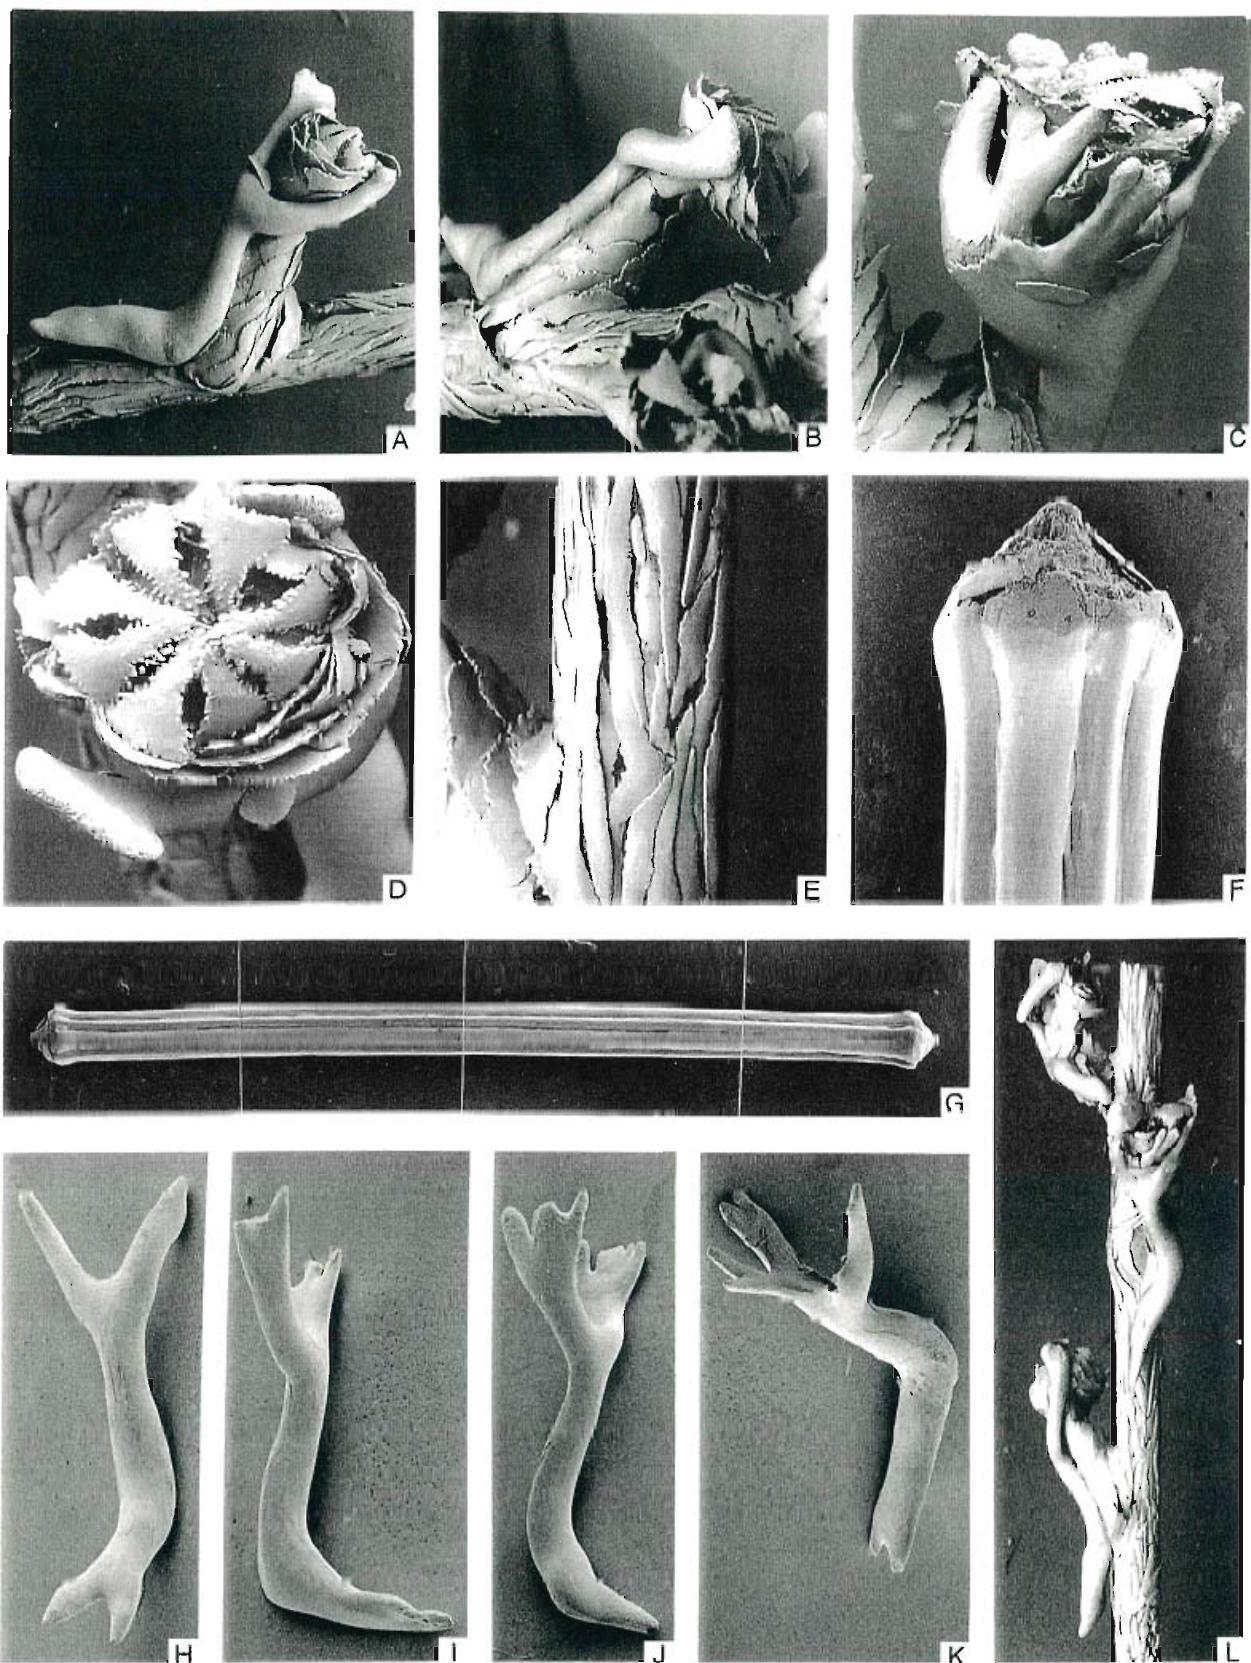

Fig. 185. *Lissopholidisis furcula* n.sp., holotype: A-D. Polyps; E. Coenenchyme; F-G. Axial internodes; H-K. Large abaxial polyp sclerites; L. Twig fragment.

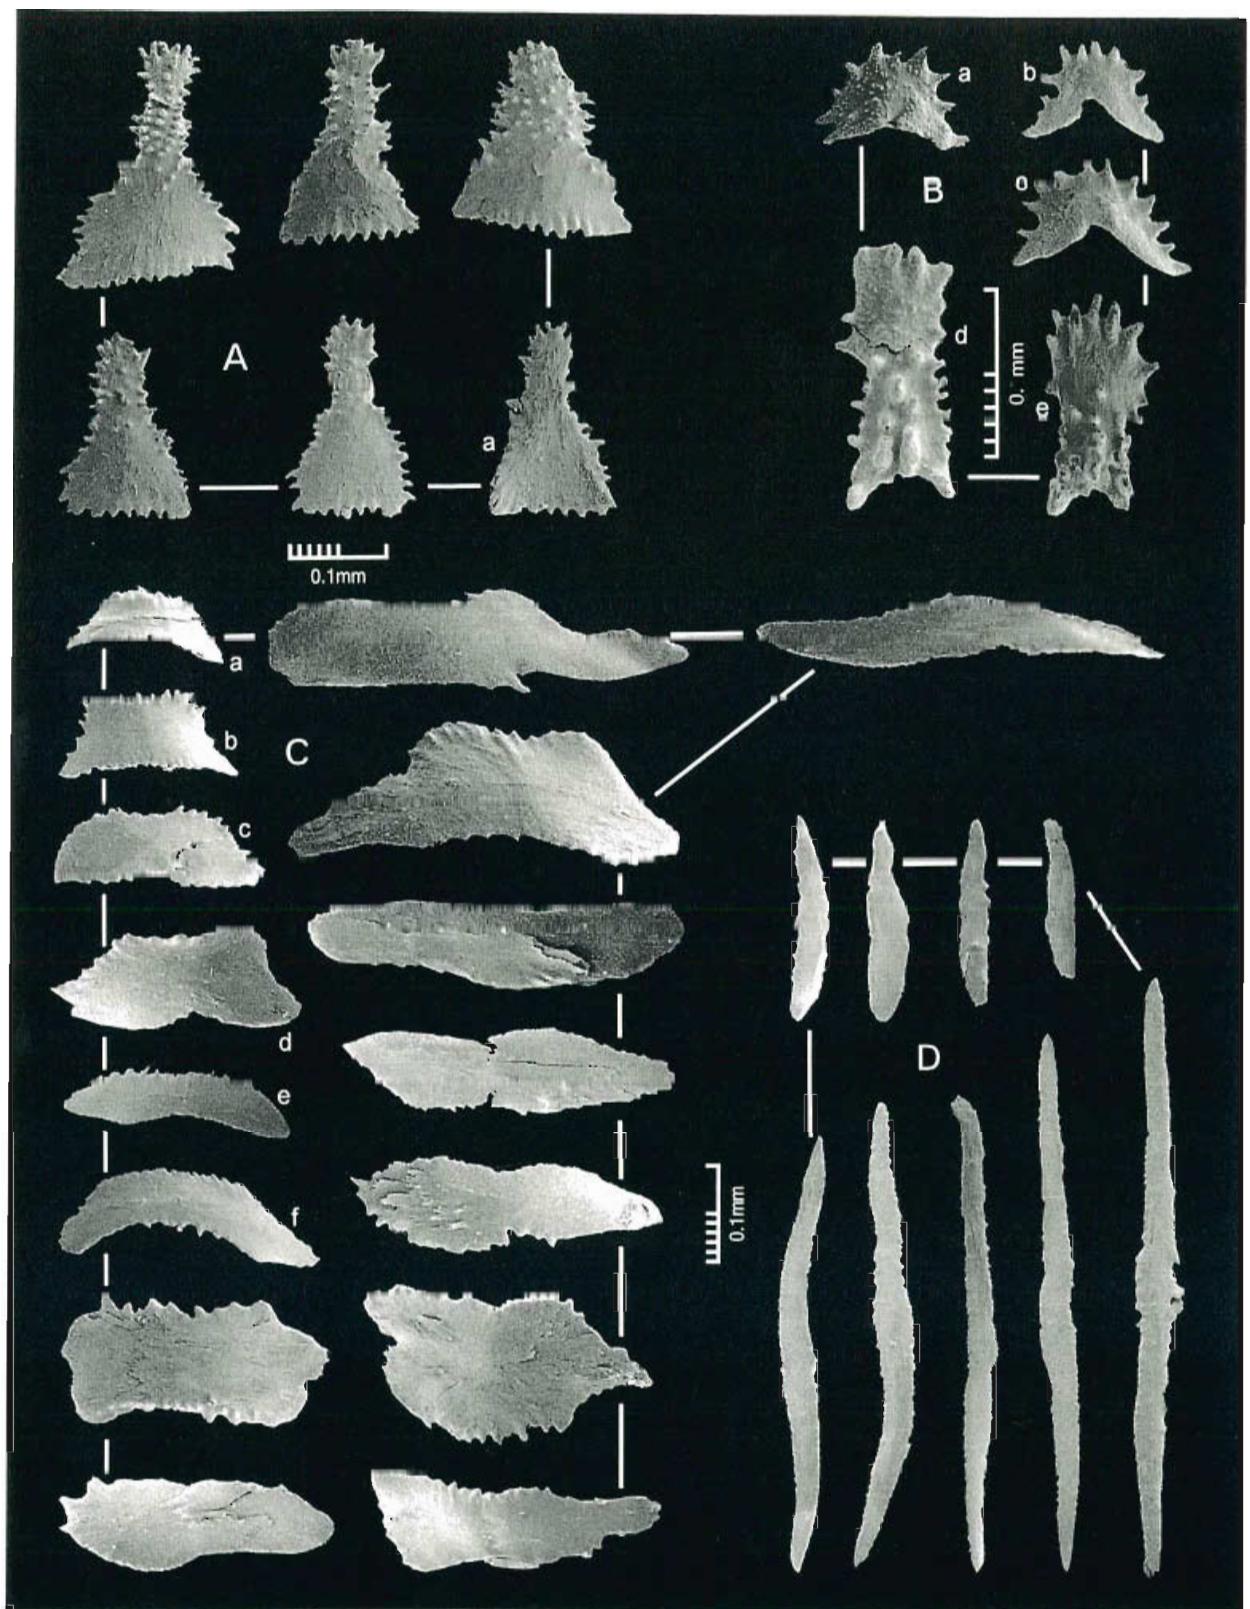

Fig. 186. *Lissopholidisis furcula* n.sp., holotype, sclerites: A. Anthopoma; B. Tentacles; C. Polyp body; D. Stem coenenchyme.

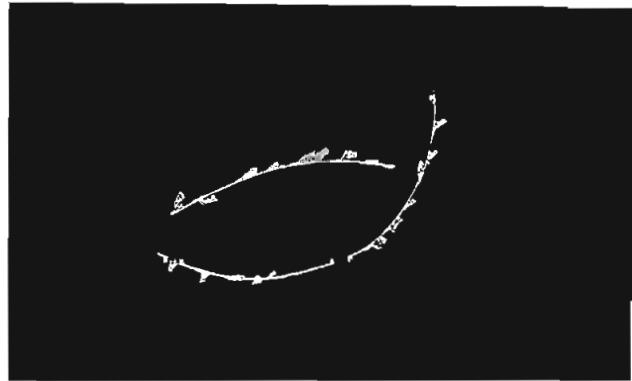

Fig. 187. *Lissopholidisis ampliflora* n.sp., holotype, natural size.

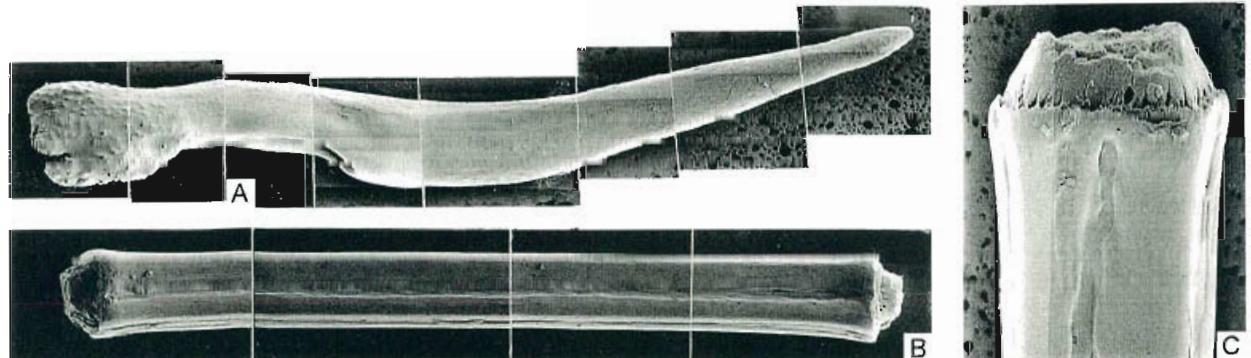

Fig. 188. *Lissopholidisis ampliflora* n.sp., holotype: A. Large abaxial polyp sclerite; B-C. Axial internodes.

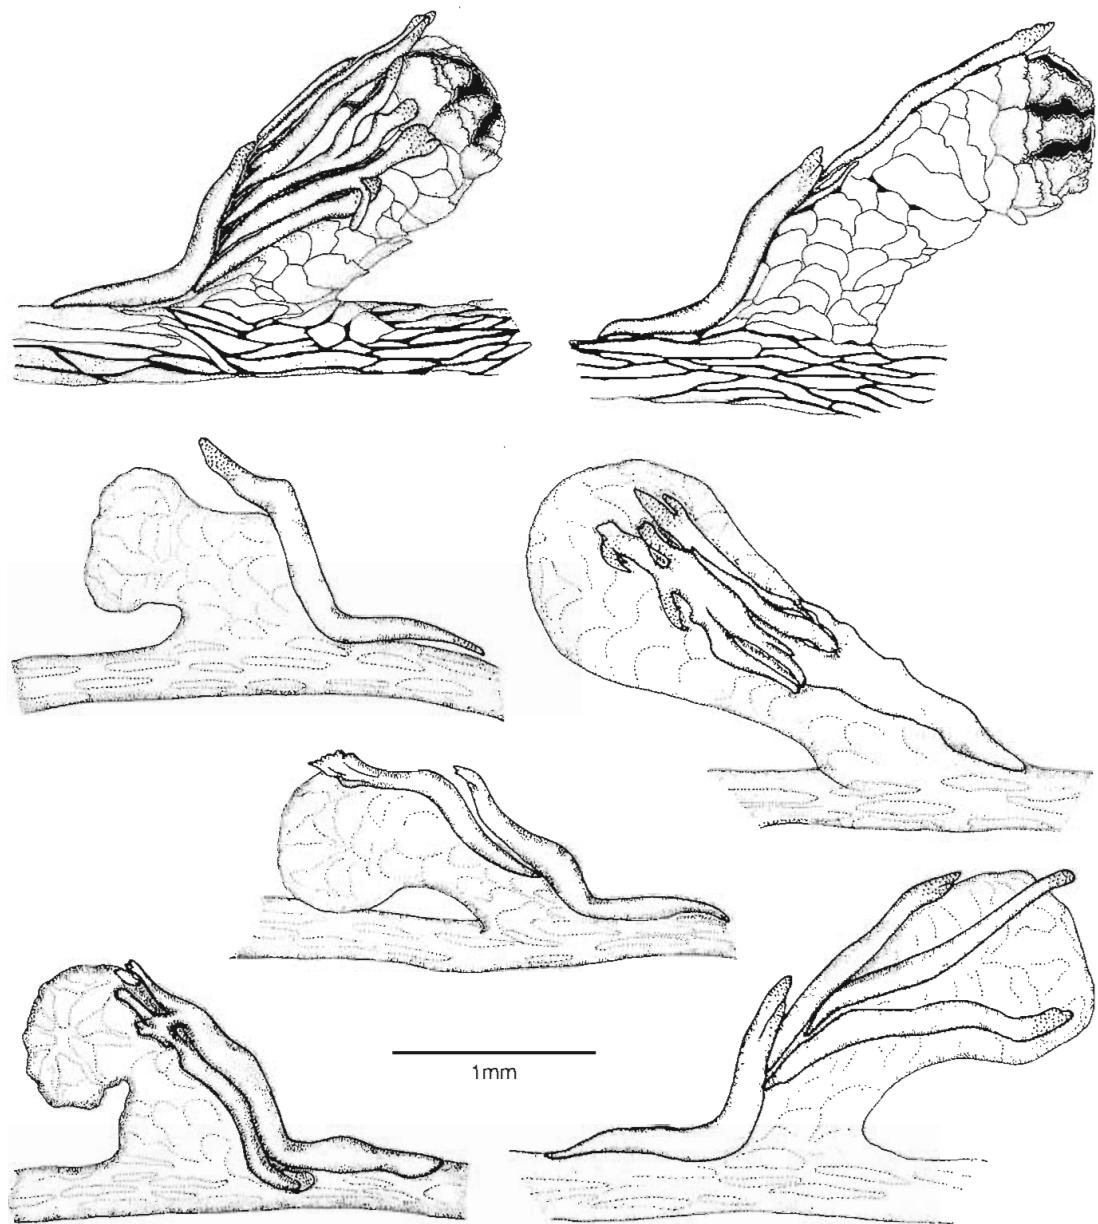

Fig. 189. *Lissopholidisis ampliflora* n.sp., holotype: Polyps.

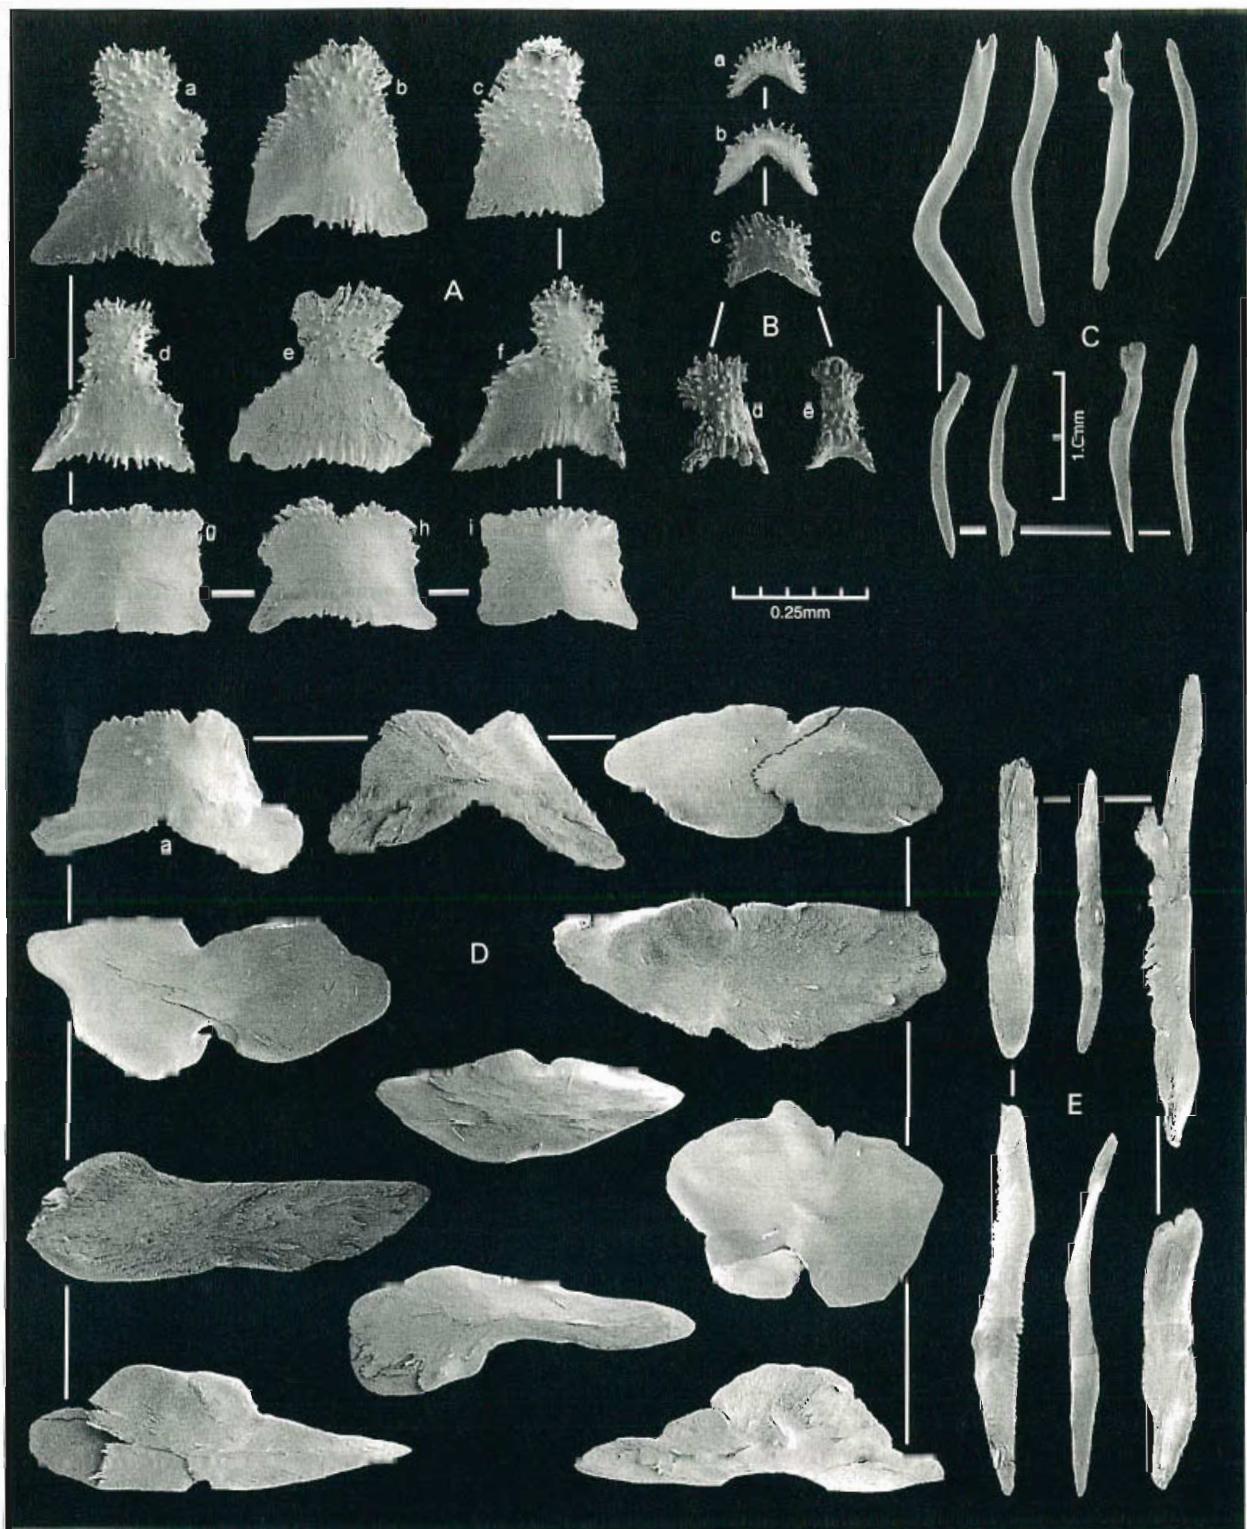

Fig. 190. *Lissopholidisis ampliflora* n.sp., holotype, sclerites: A. Anthopoma; B. Tentacles; C. Abaxial polyp stays; D. Polyp body; E. Coenenchyme.

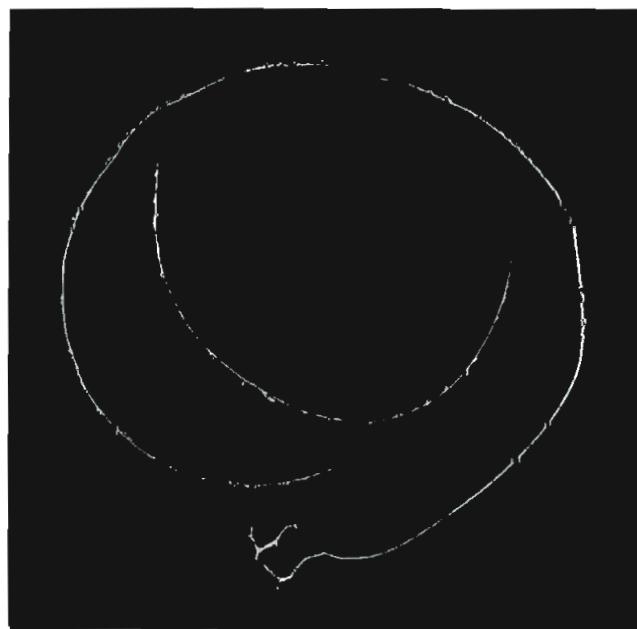

Fig. 191. *Lissopholidisis nuttingi* (Grant, 1976), holotype, natural size.

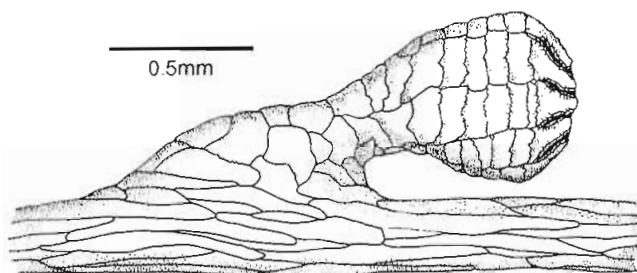

Fig. 192. *Lissopholidisis nuttingi* (Grant, 1976), holotype: Polyp.

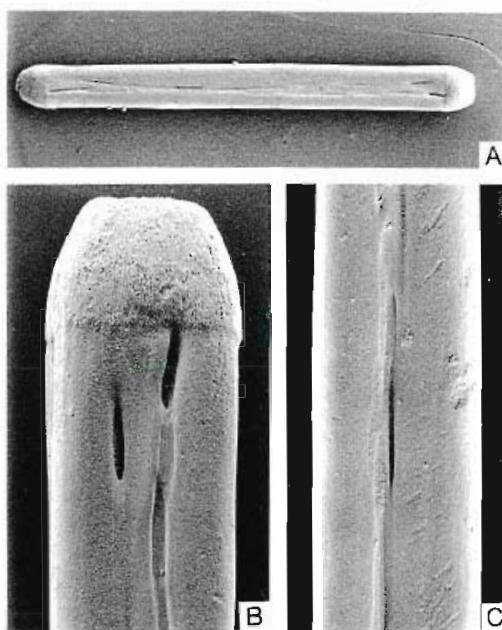

Fig. 193. *Lissopholidisis nuttingi* (Grant, 1976), holotype: A-C. Axial internodes.

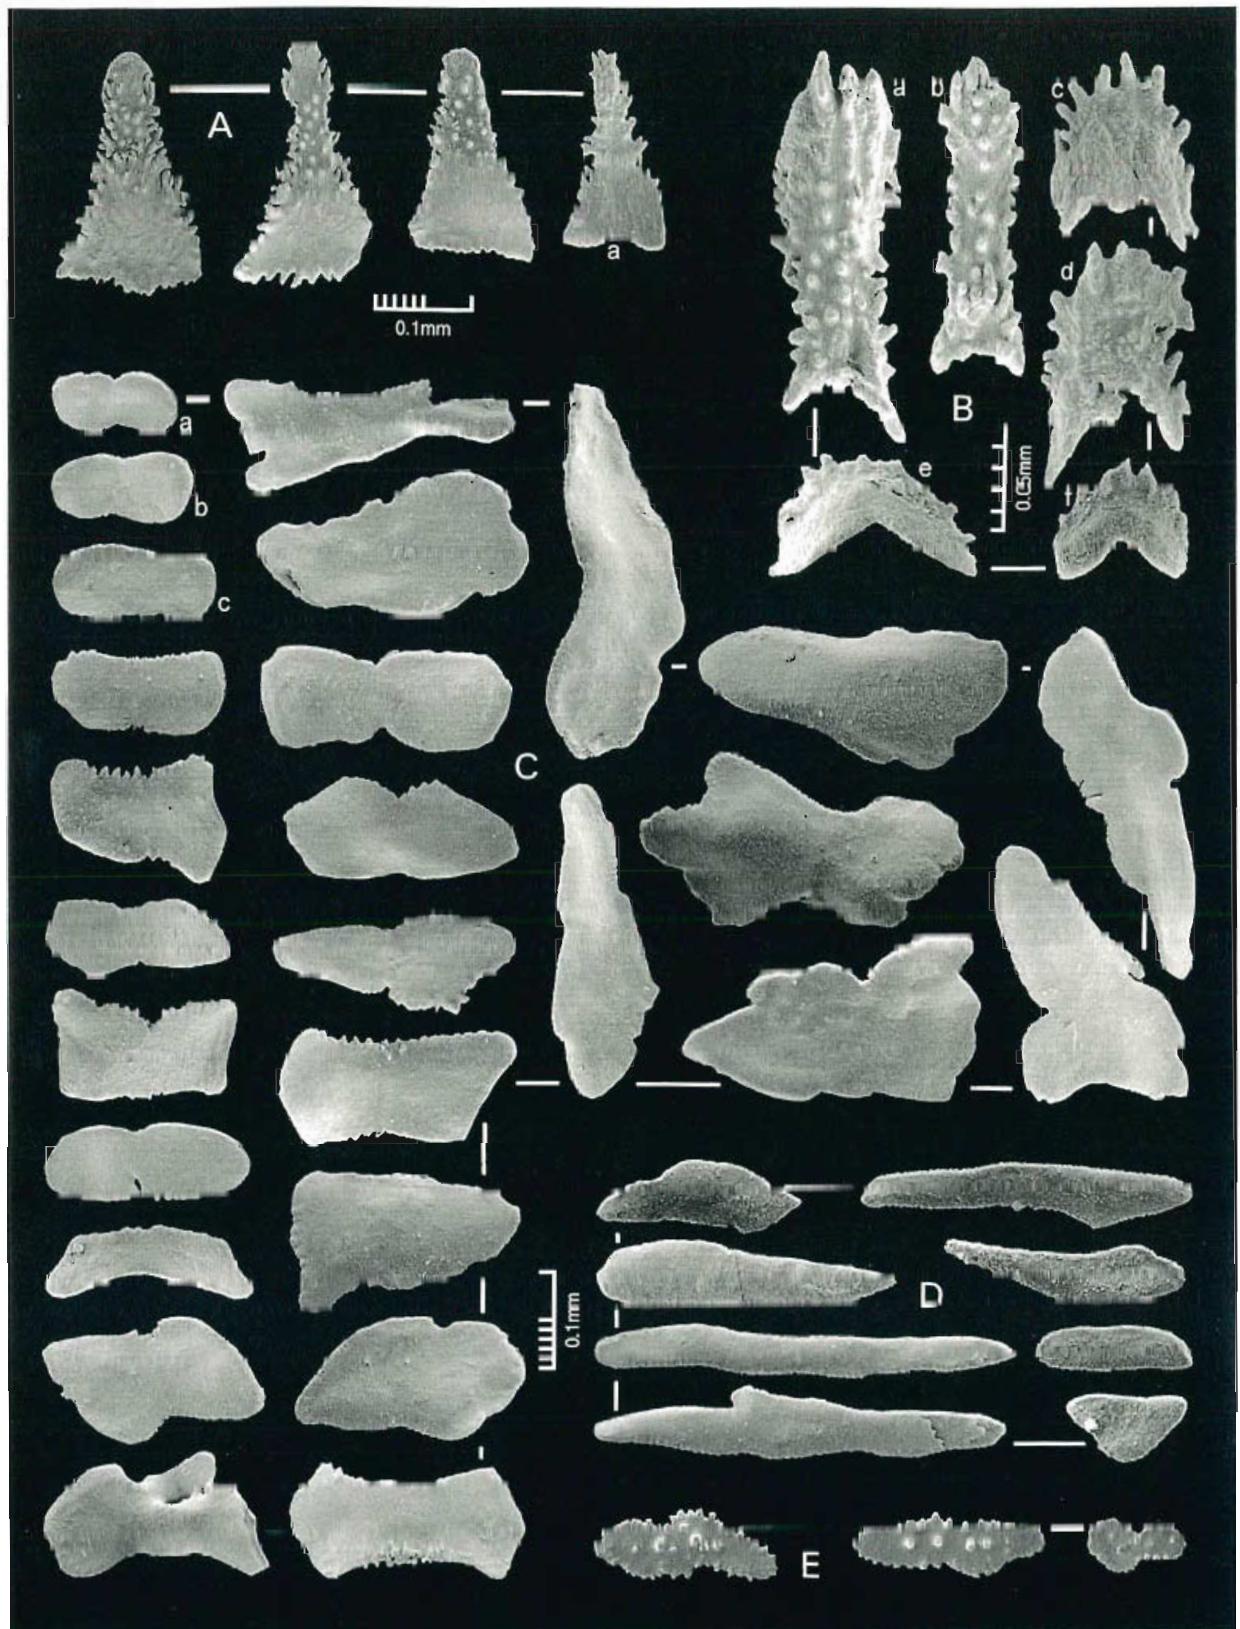

Fig. 194. *Lissopholidisis nuttingi* (Grant, 1976), holotype, sclerites: A. Anthopoma; B. Tentacles; C. Polyp body; D. Upper stem coenenchyme; E. Basal stem coenenchyme.

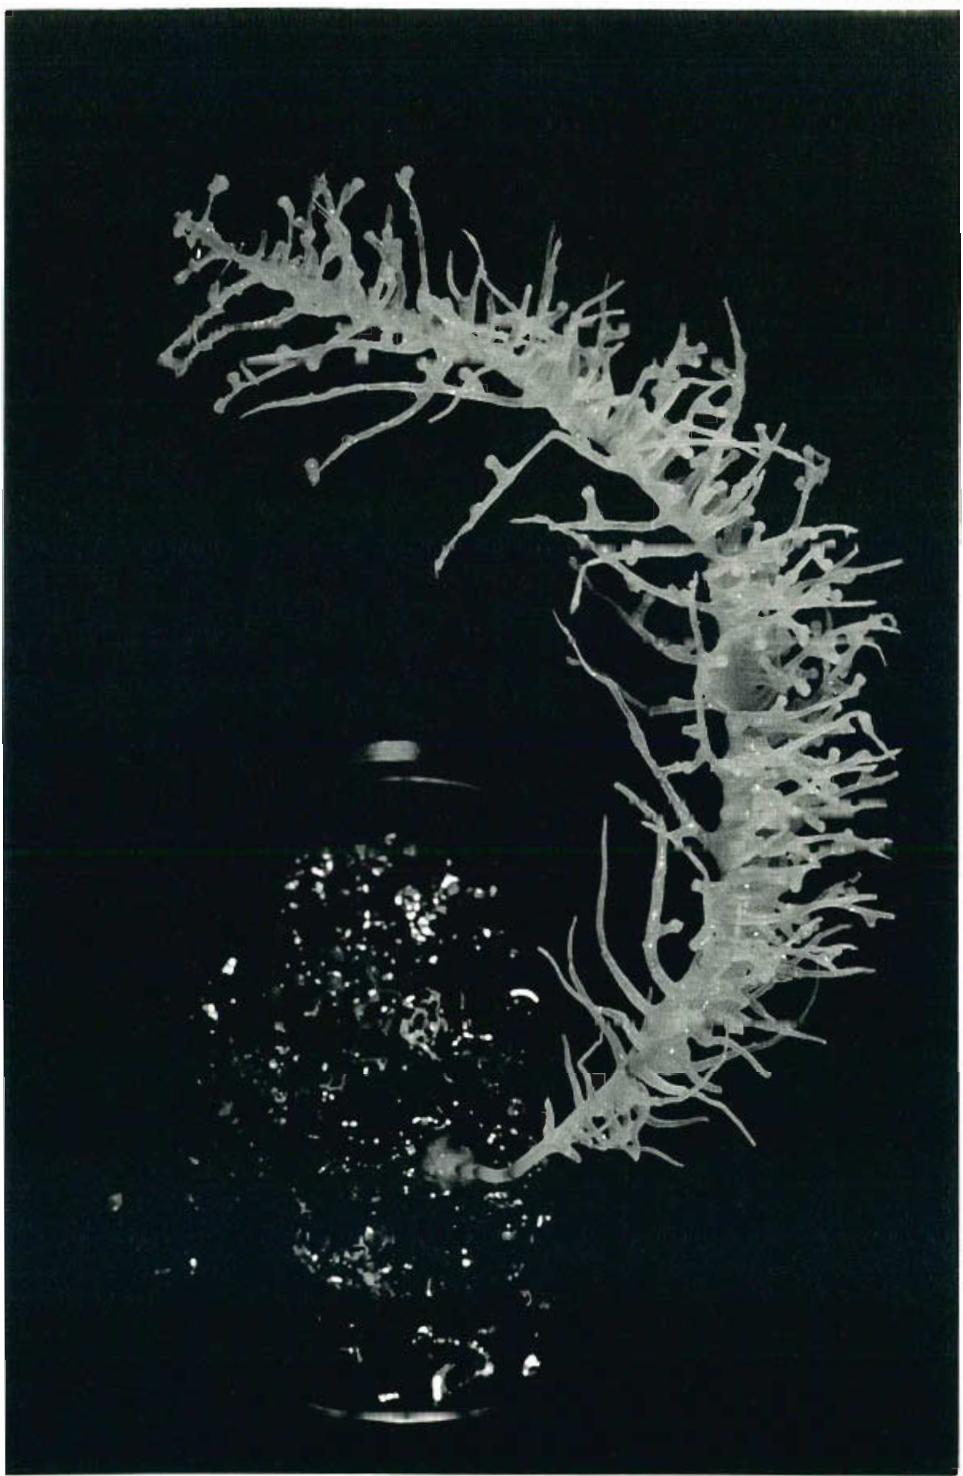

Fig. 195. *Minuisis pseudoplana* Grant, 1976, holotype, natural size x 3.

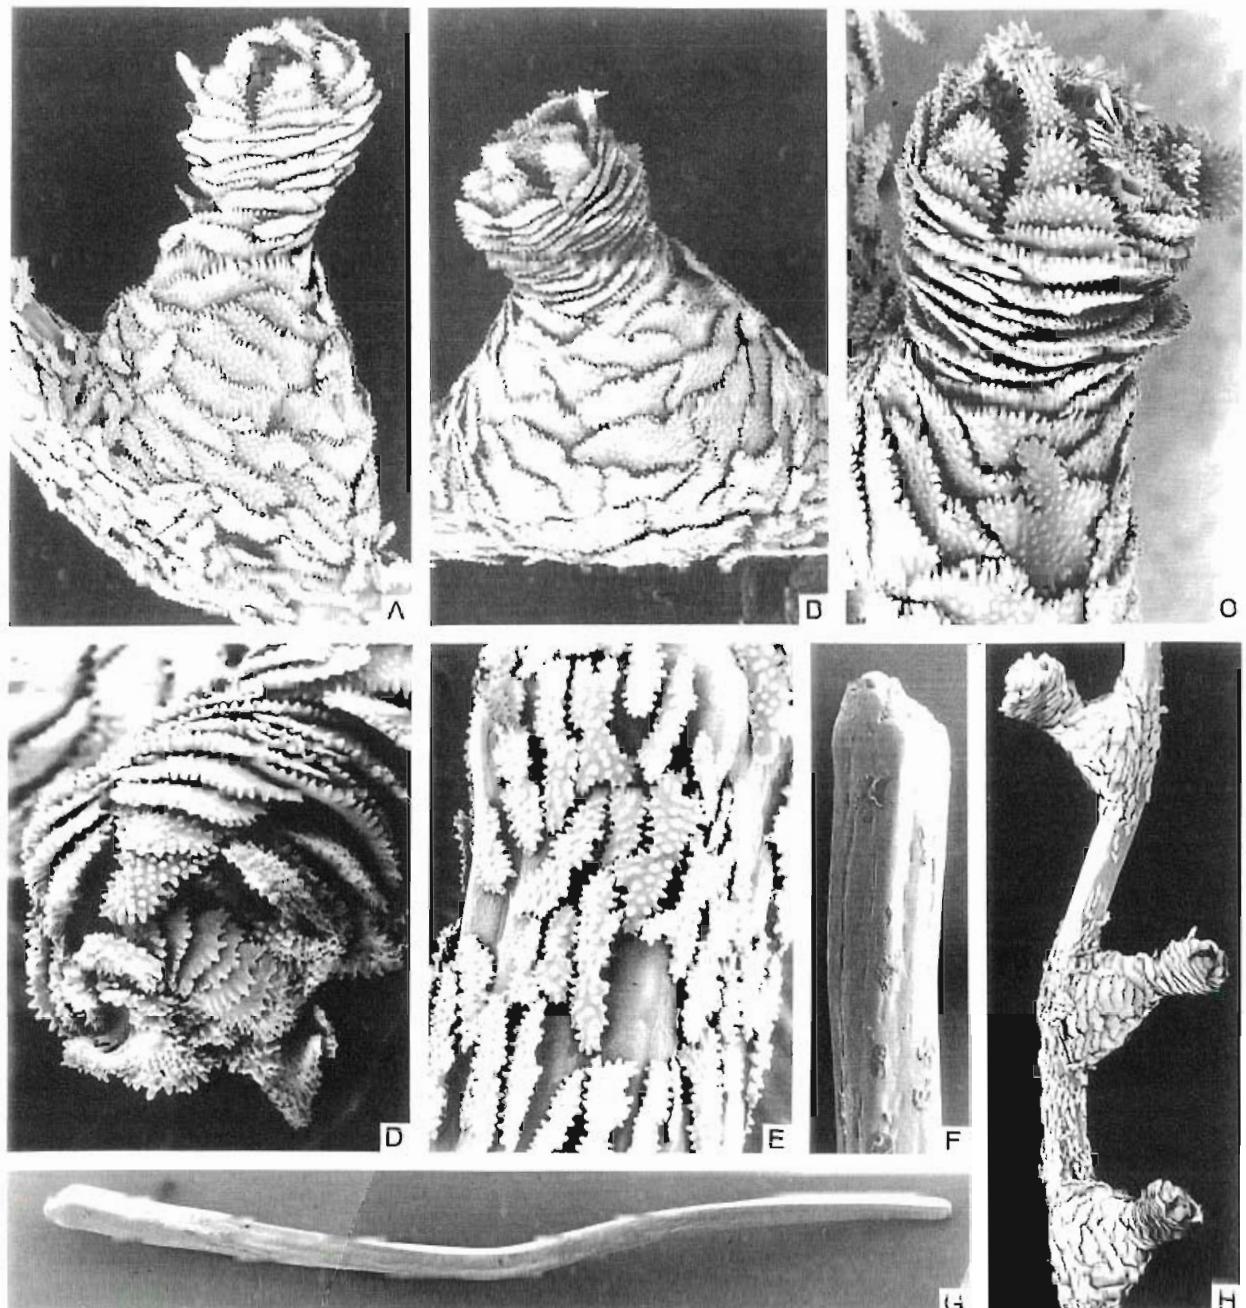

Fig. 196. *Minuisis pseudoplana* Grant, 1976, holotype: A-D. Polyps; E. Coenenchyme; F-G. Axial internodes; H. Twig fragment.

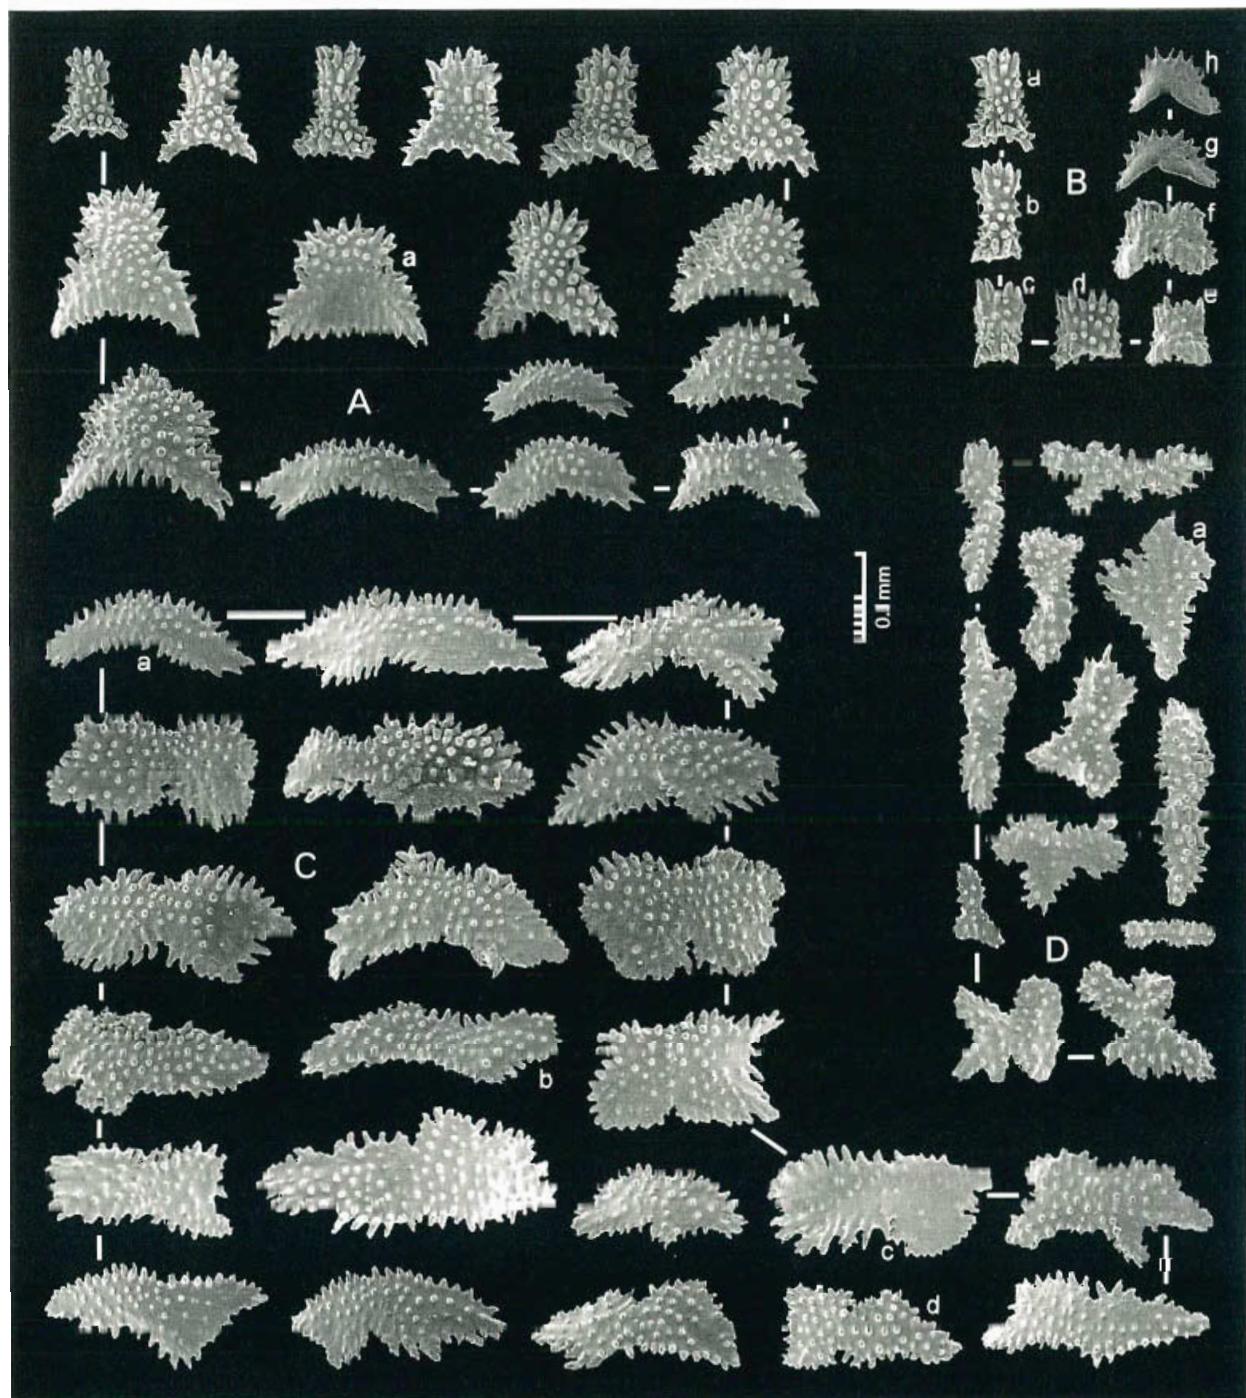

Fig. 197. *Minuisis pseudoplana* Grant, 1976, holotype, sclerites: A. Anthopoma; B. Tentacles; C. Polyp body; D. Branch coenenchyme.

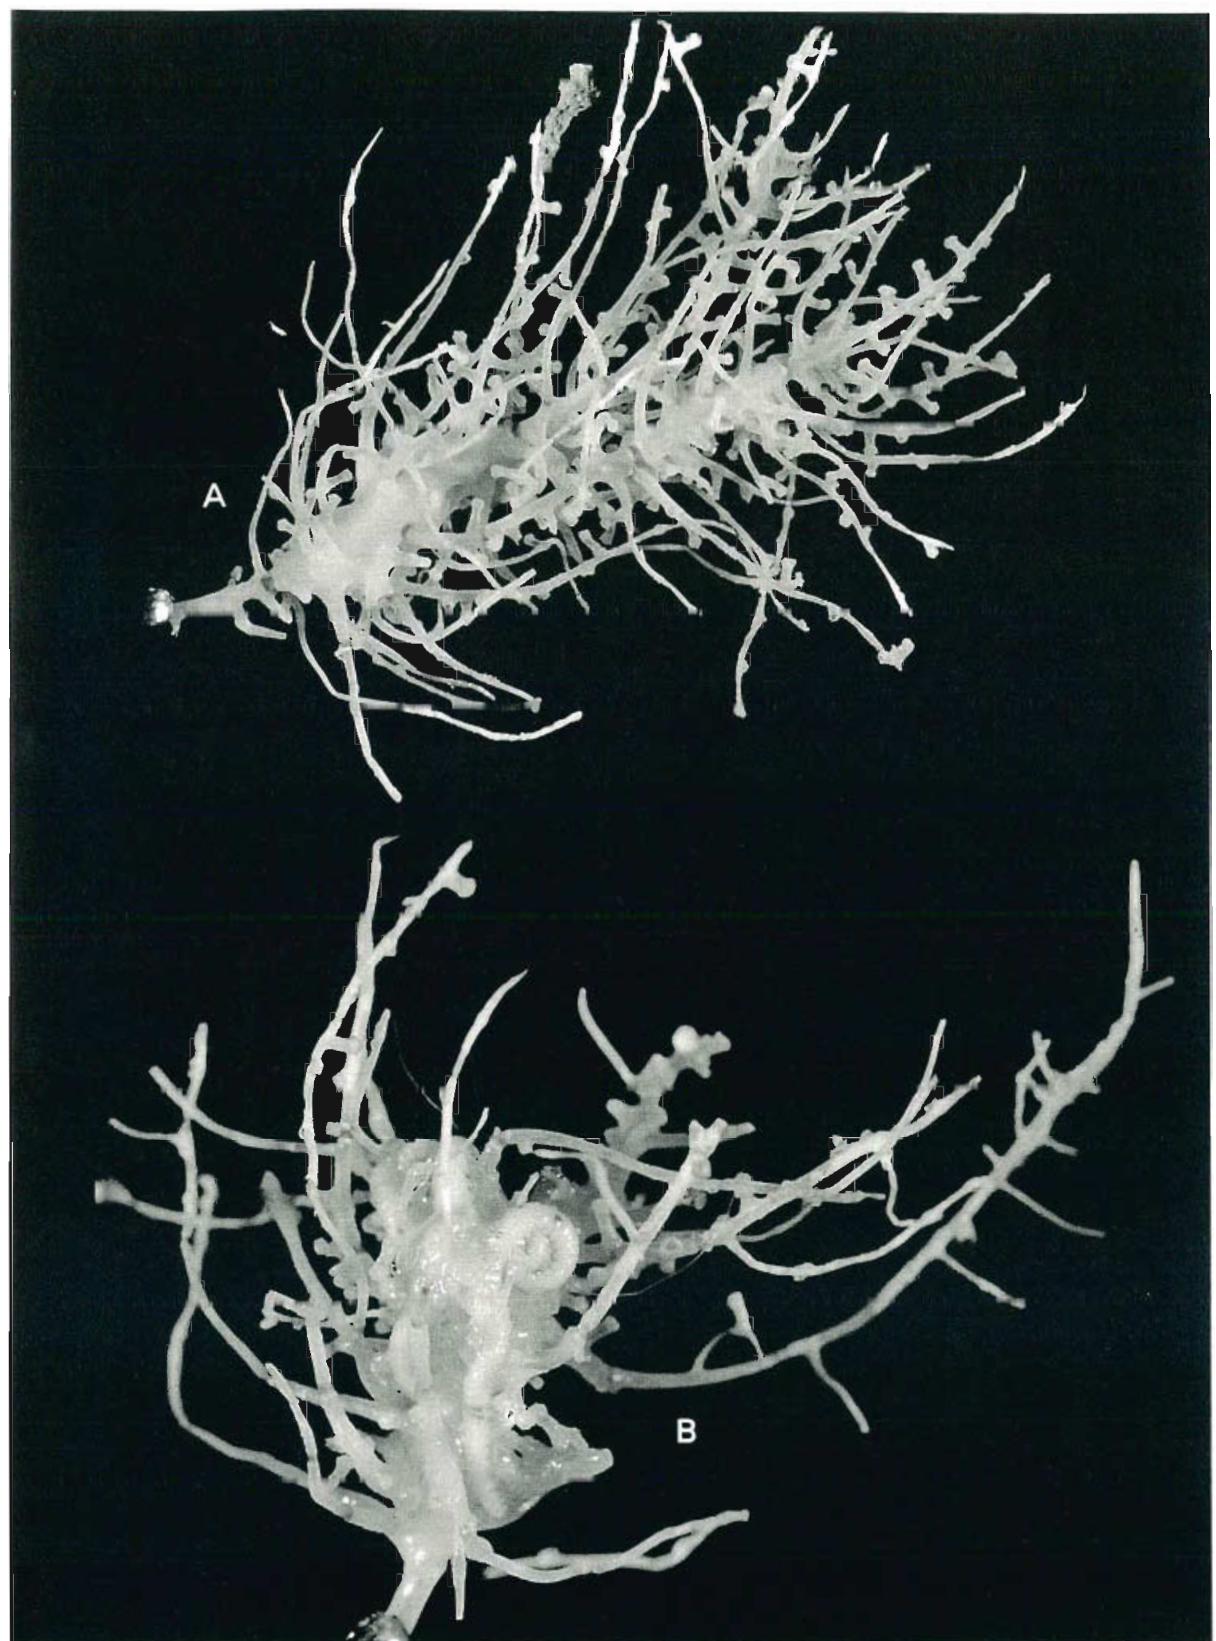

Fig. 198. *Minuisis granti* n.sp.: A. Holotype, natural size x 3; B. Paratype, NZOI P946, natural size x 5.

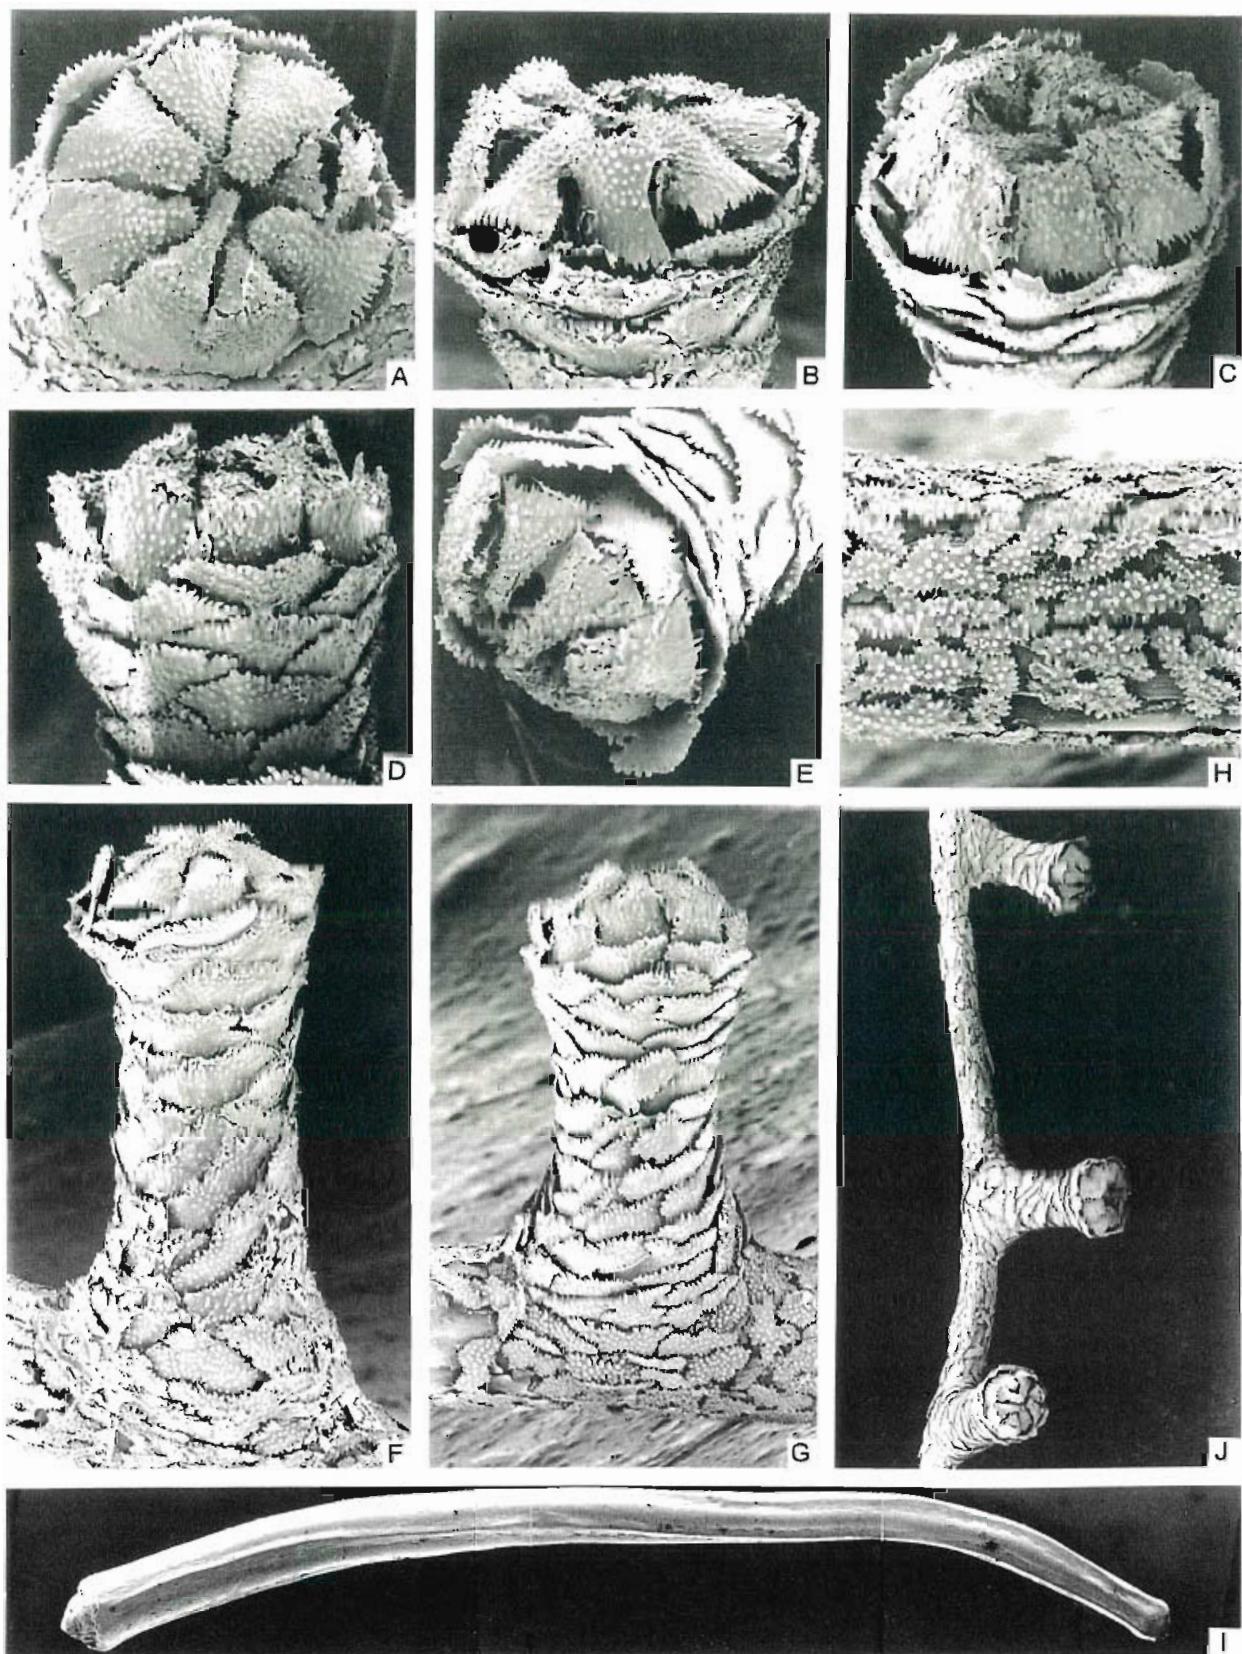

Fig. 199. *Minuisis granti* n.sp., 1976, holotype: A-G. Polyps; H. Coenenchyme; I. Axial internode; J. Twig fragment.

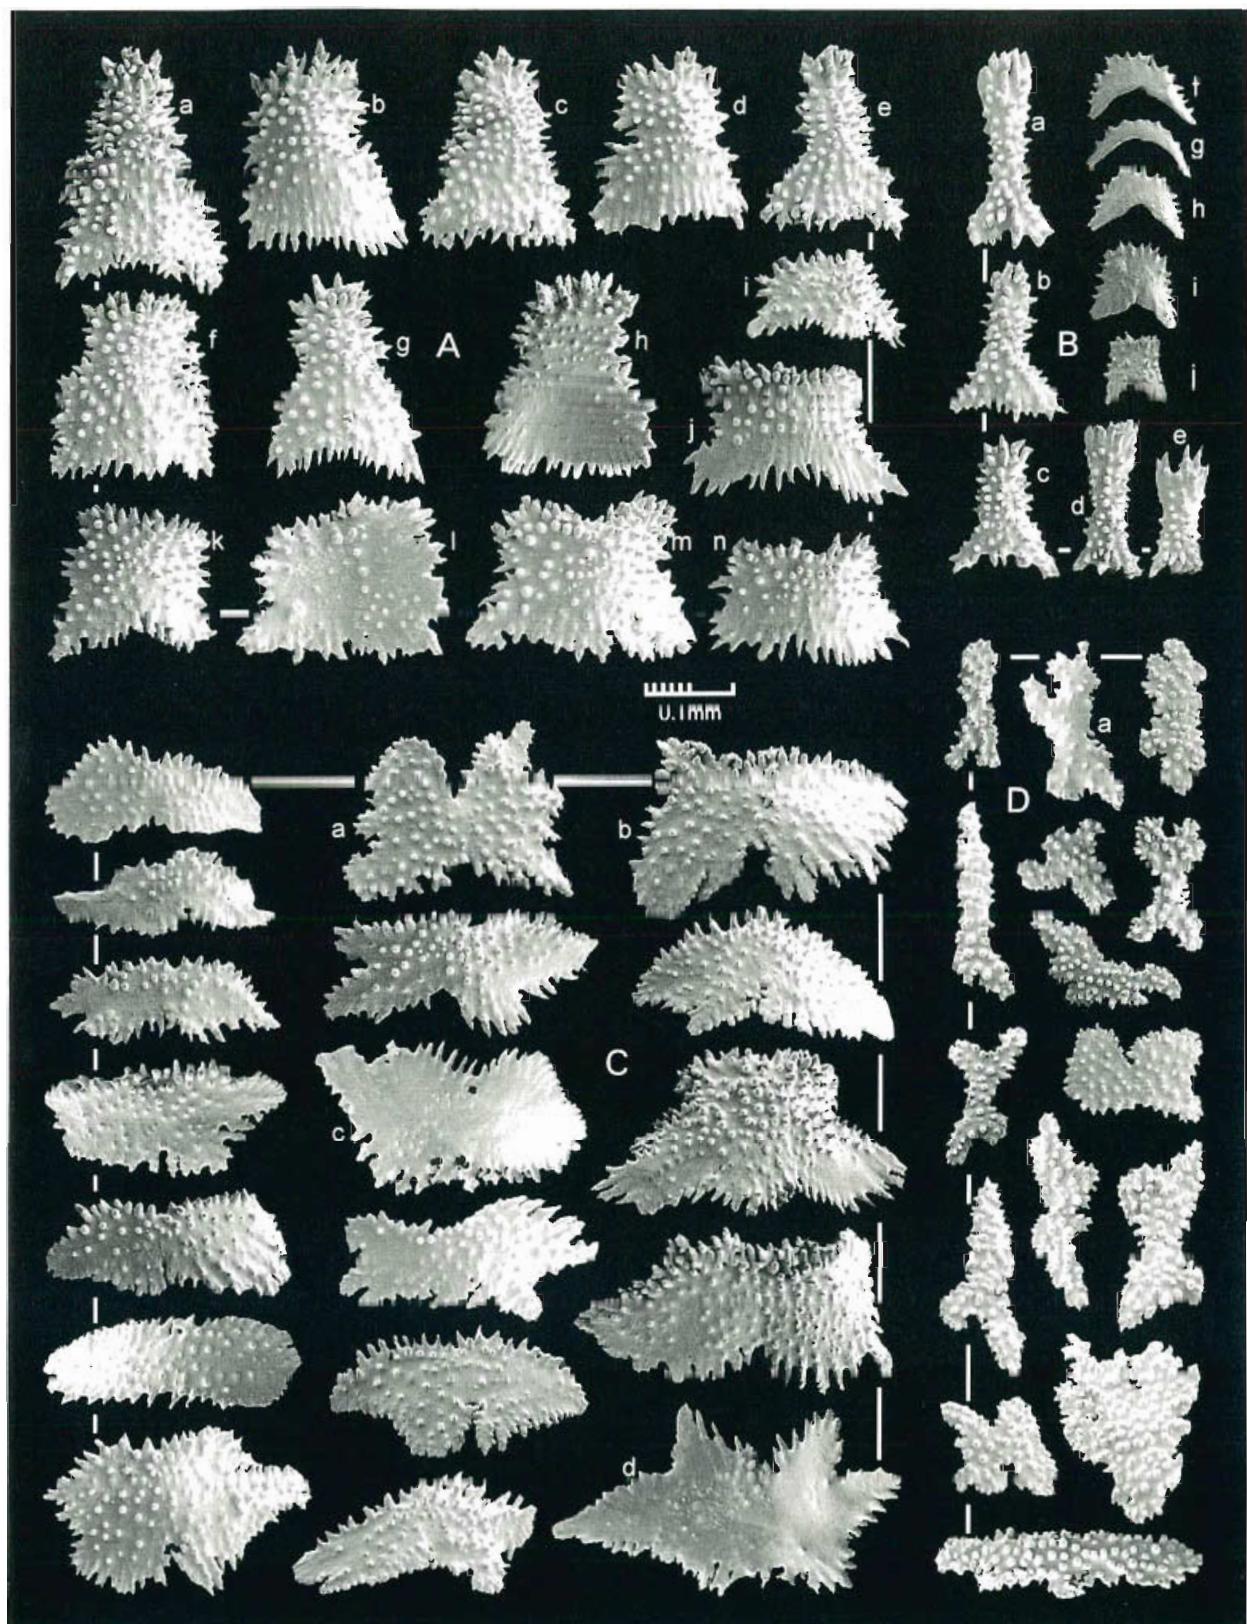

Fig. 200. *Minuisis granti* n.sp., holotype, sclerites: A. Anthopoma; B. Tentacles; C. Polyp body; D. Branch coenenchyme.

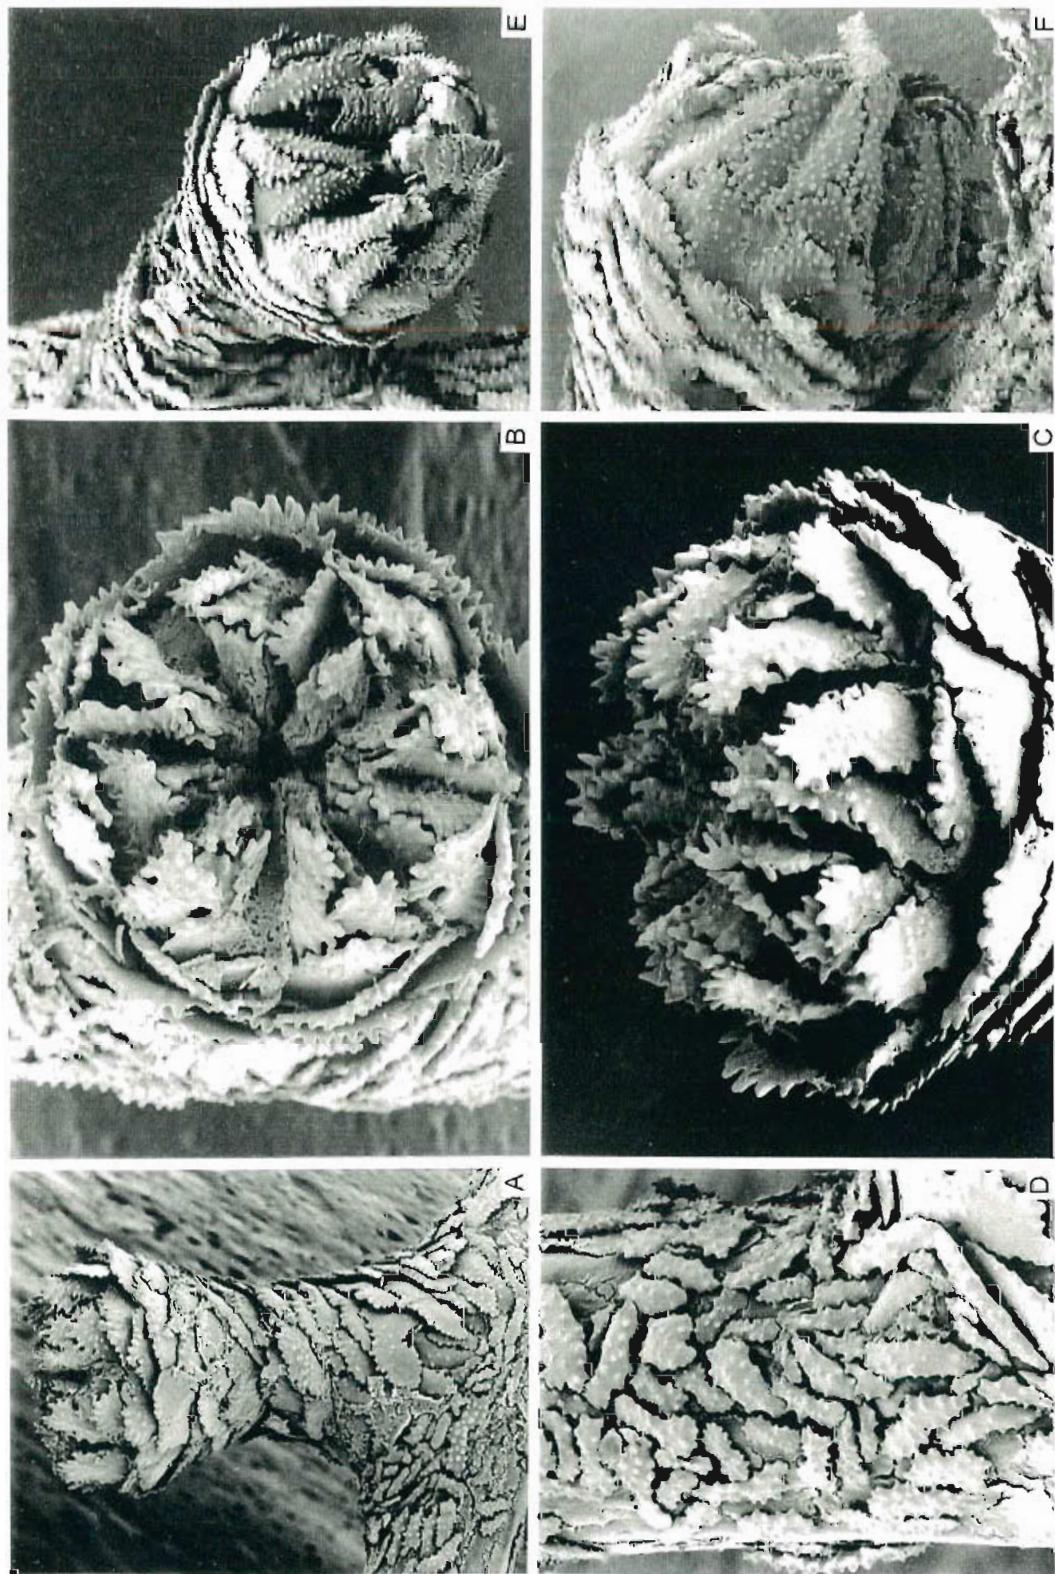

Fig. 201. A-D. *Primnois antarctica* (Studer, 1879), holotype: (A-C) Polyps; (D) Coerichyme. E-F. *Primnois ssp.* NT.J C12322. Fotops.

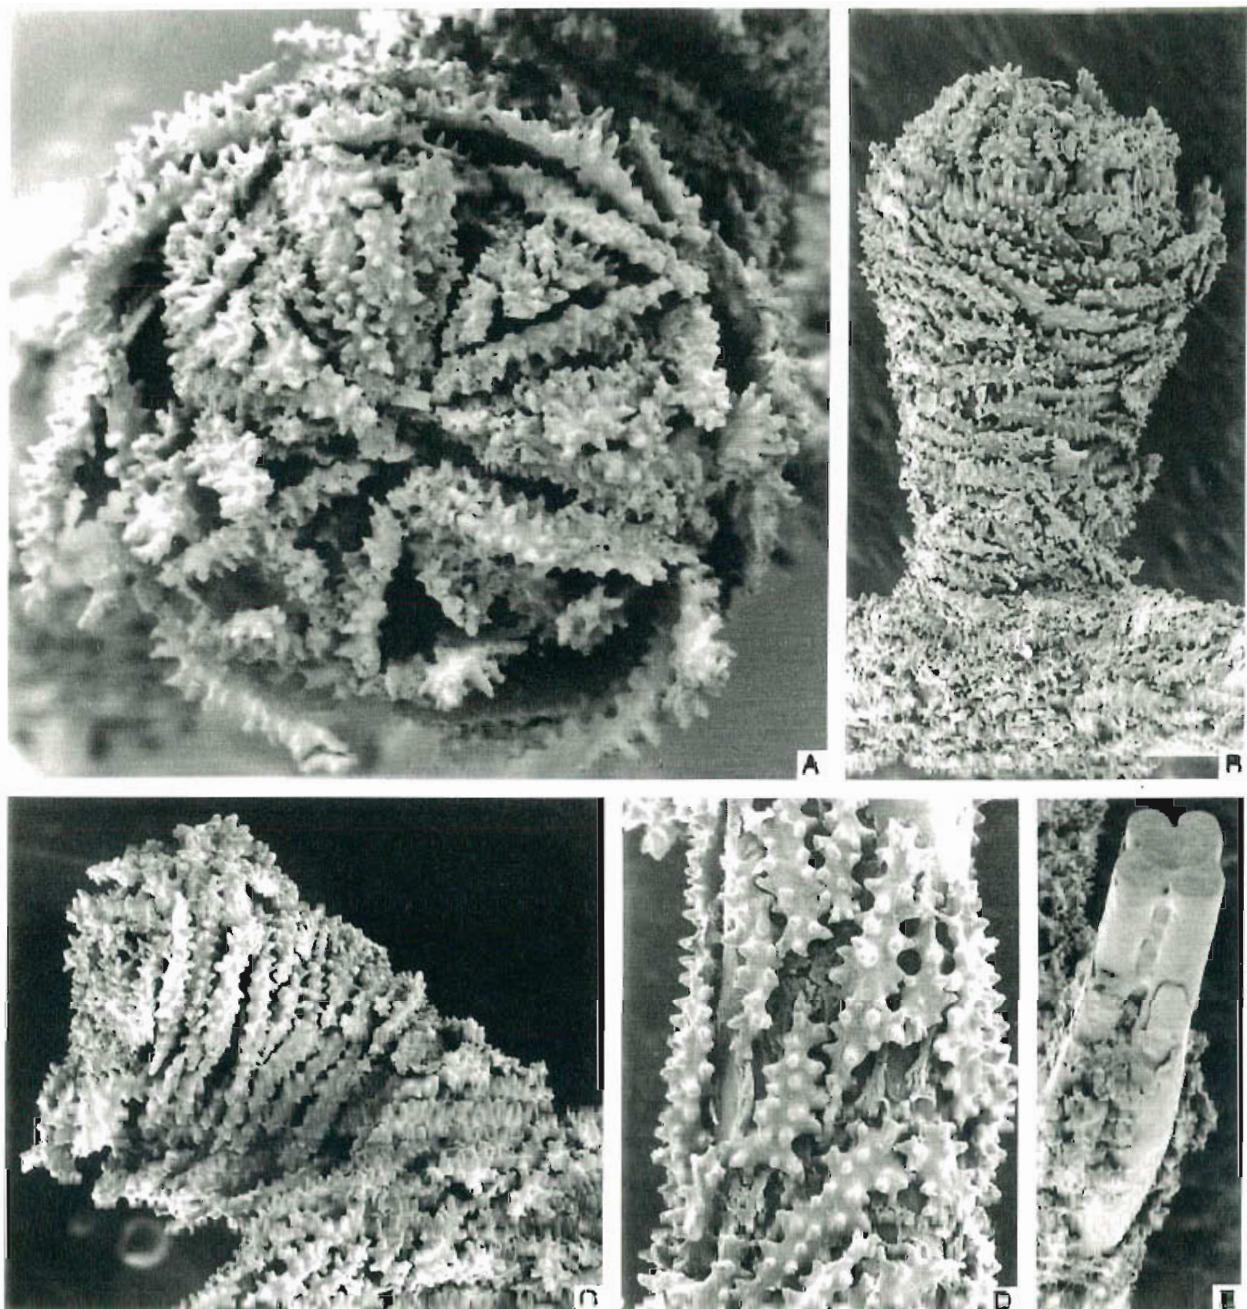

Fig. 202. *Primnoisis deliculata* (Hickson, 1907), syntype: A-C. Polyps; D. Coenenchyme; E. Axial internode.

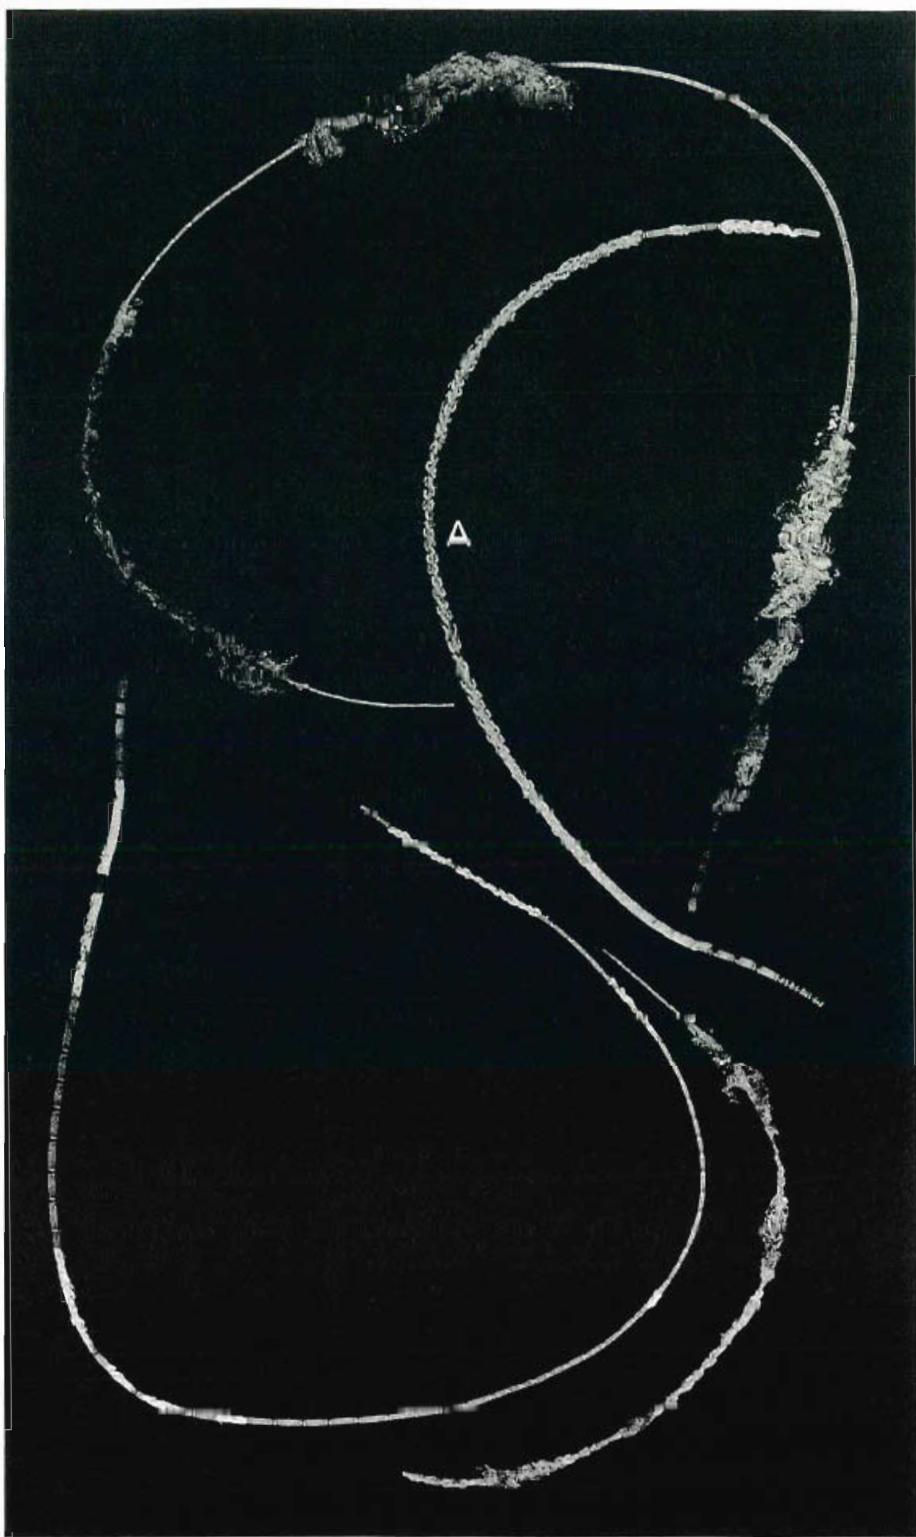

Fig. 203. *Circinisis circinata* Grant, 1976, type series: A. Holotype. All natural size.

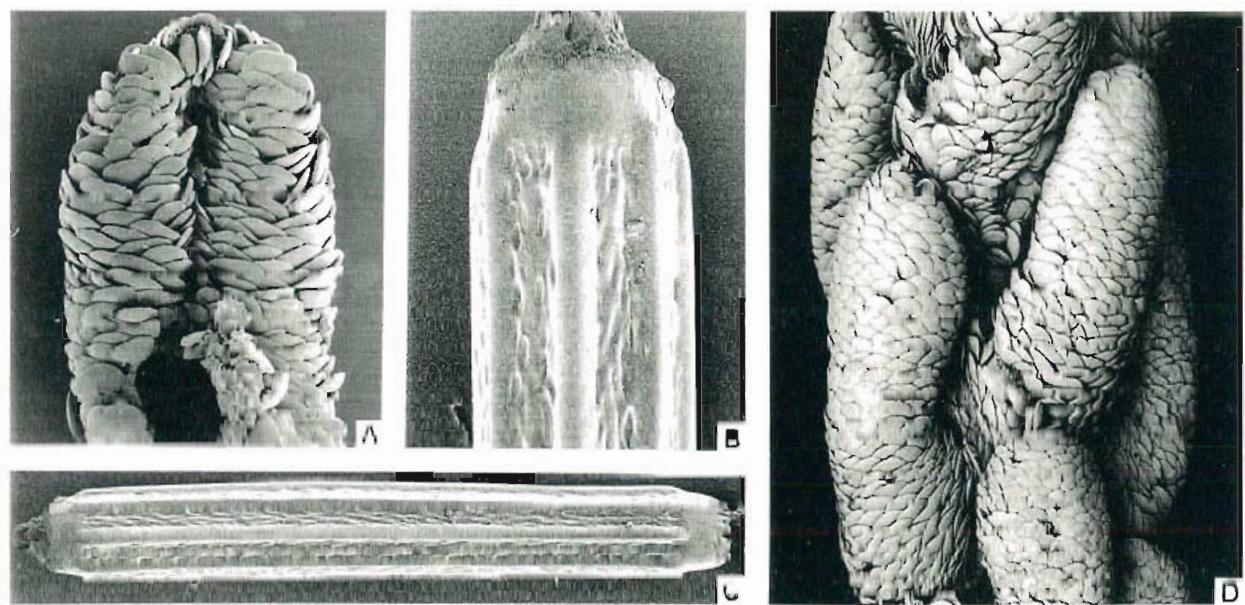

Fig. 204. *Circinisis circinata* Grant, 1976, holotype: A. Polyp; B-C. Axial internodes; D. Twig fragment.

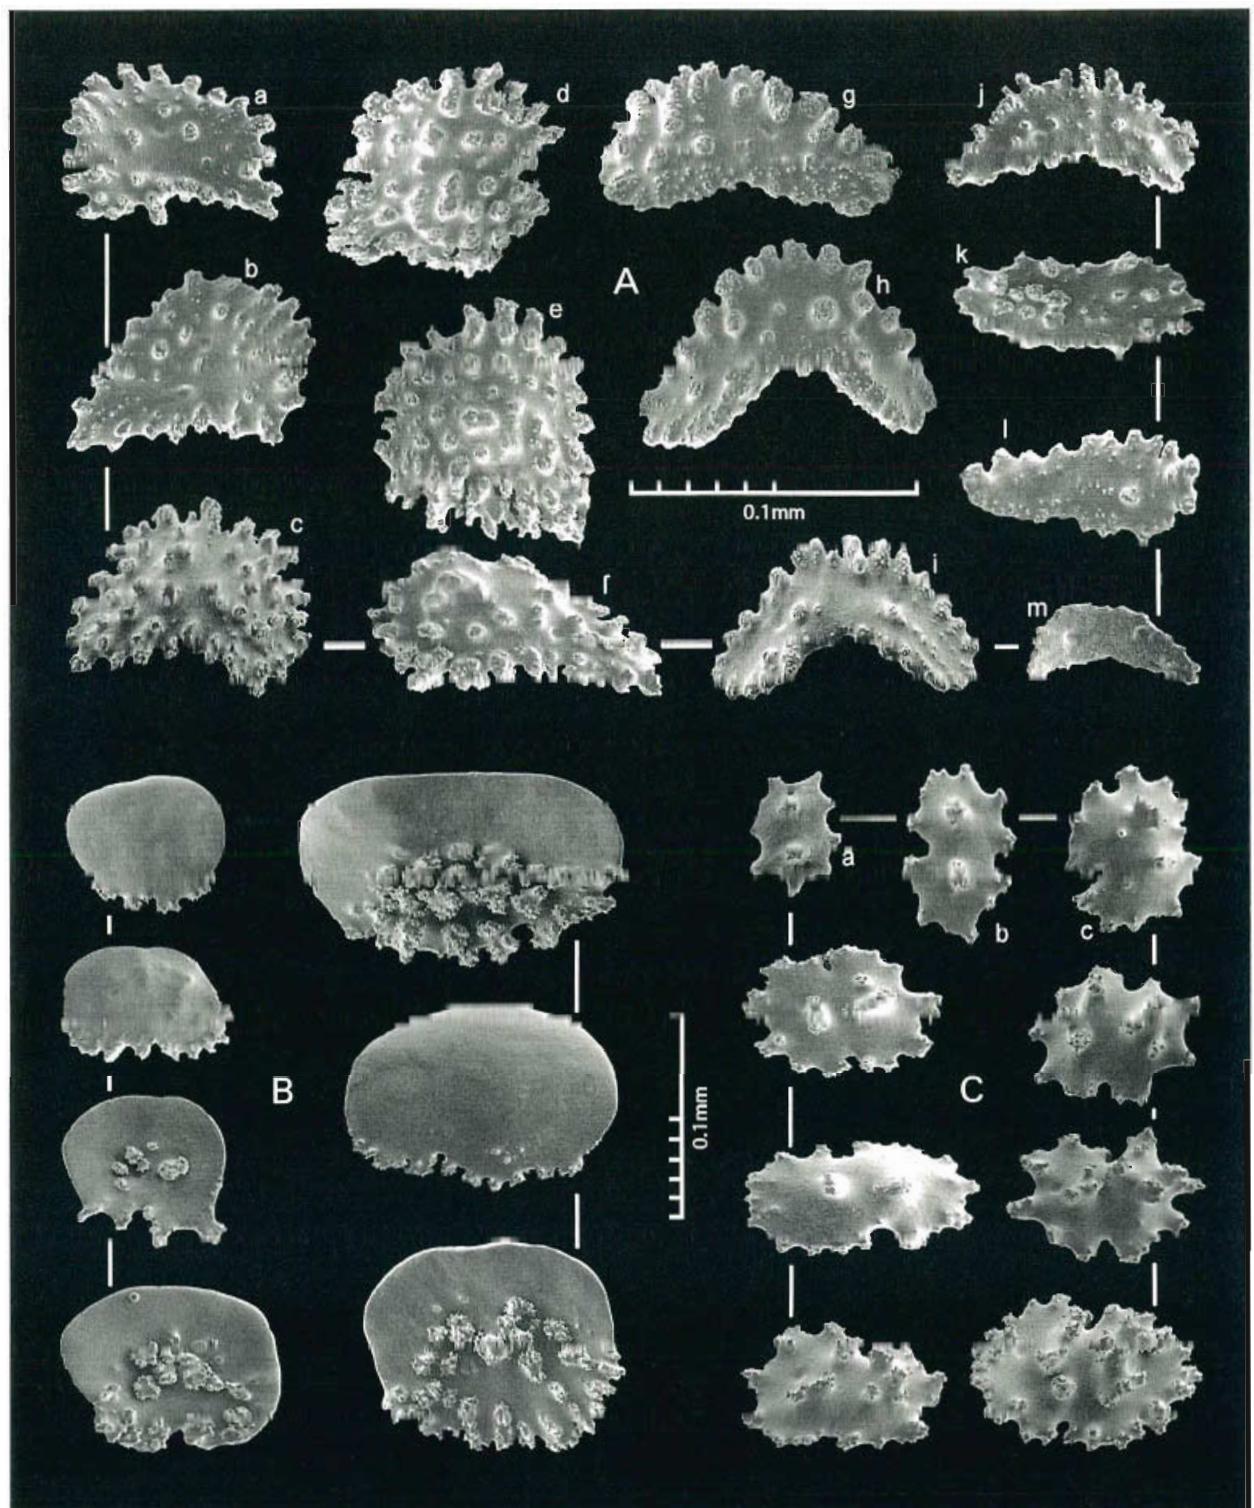

Fig. 205. *Circinisis circinata* Grant, 1976, holotype, sclerites: A. Anthopoma and tentacles; B. Polyp body; C. Sub-surface of the twig coenenchyme.

Fig. 206. *Gorgonisis elyakovi* n.sp., holotype, natural size x 0.75.

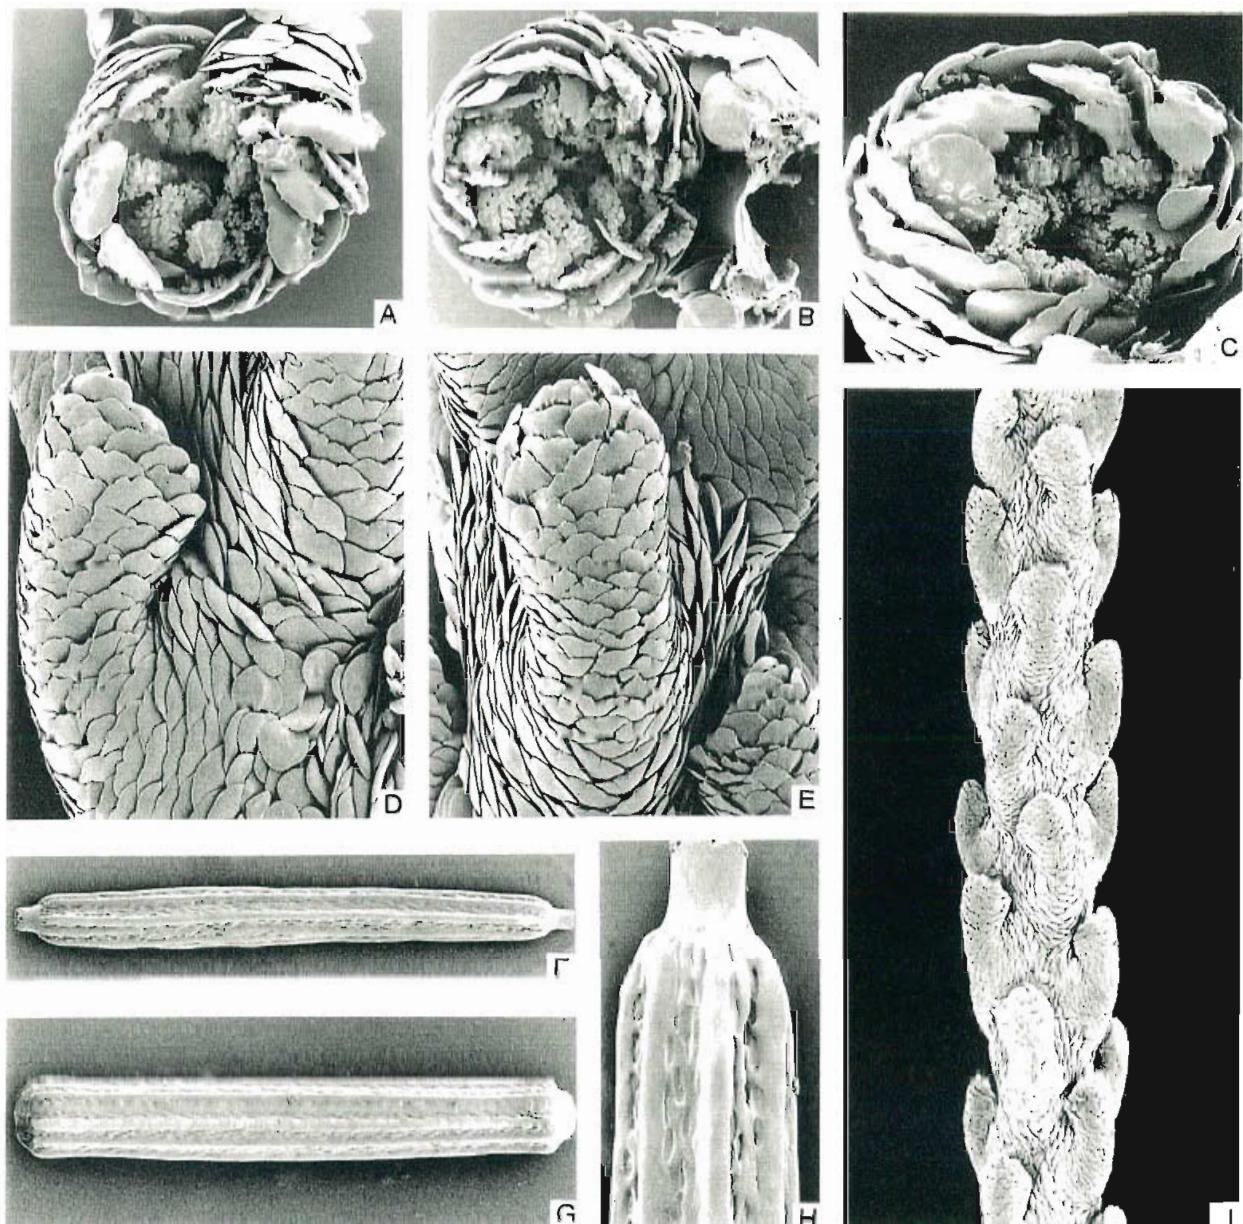

Fig. 207. *Gorgonisis elyakovi* n.sp., holotype: A-E. Polyps; F-H. Axial internodes; I. Twig fragment.

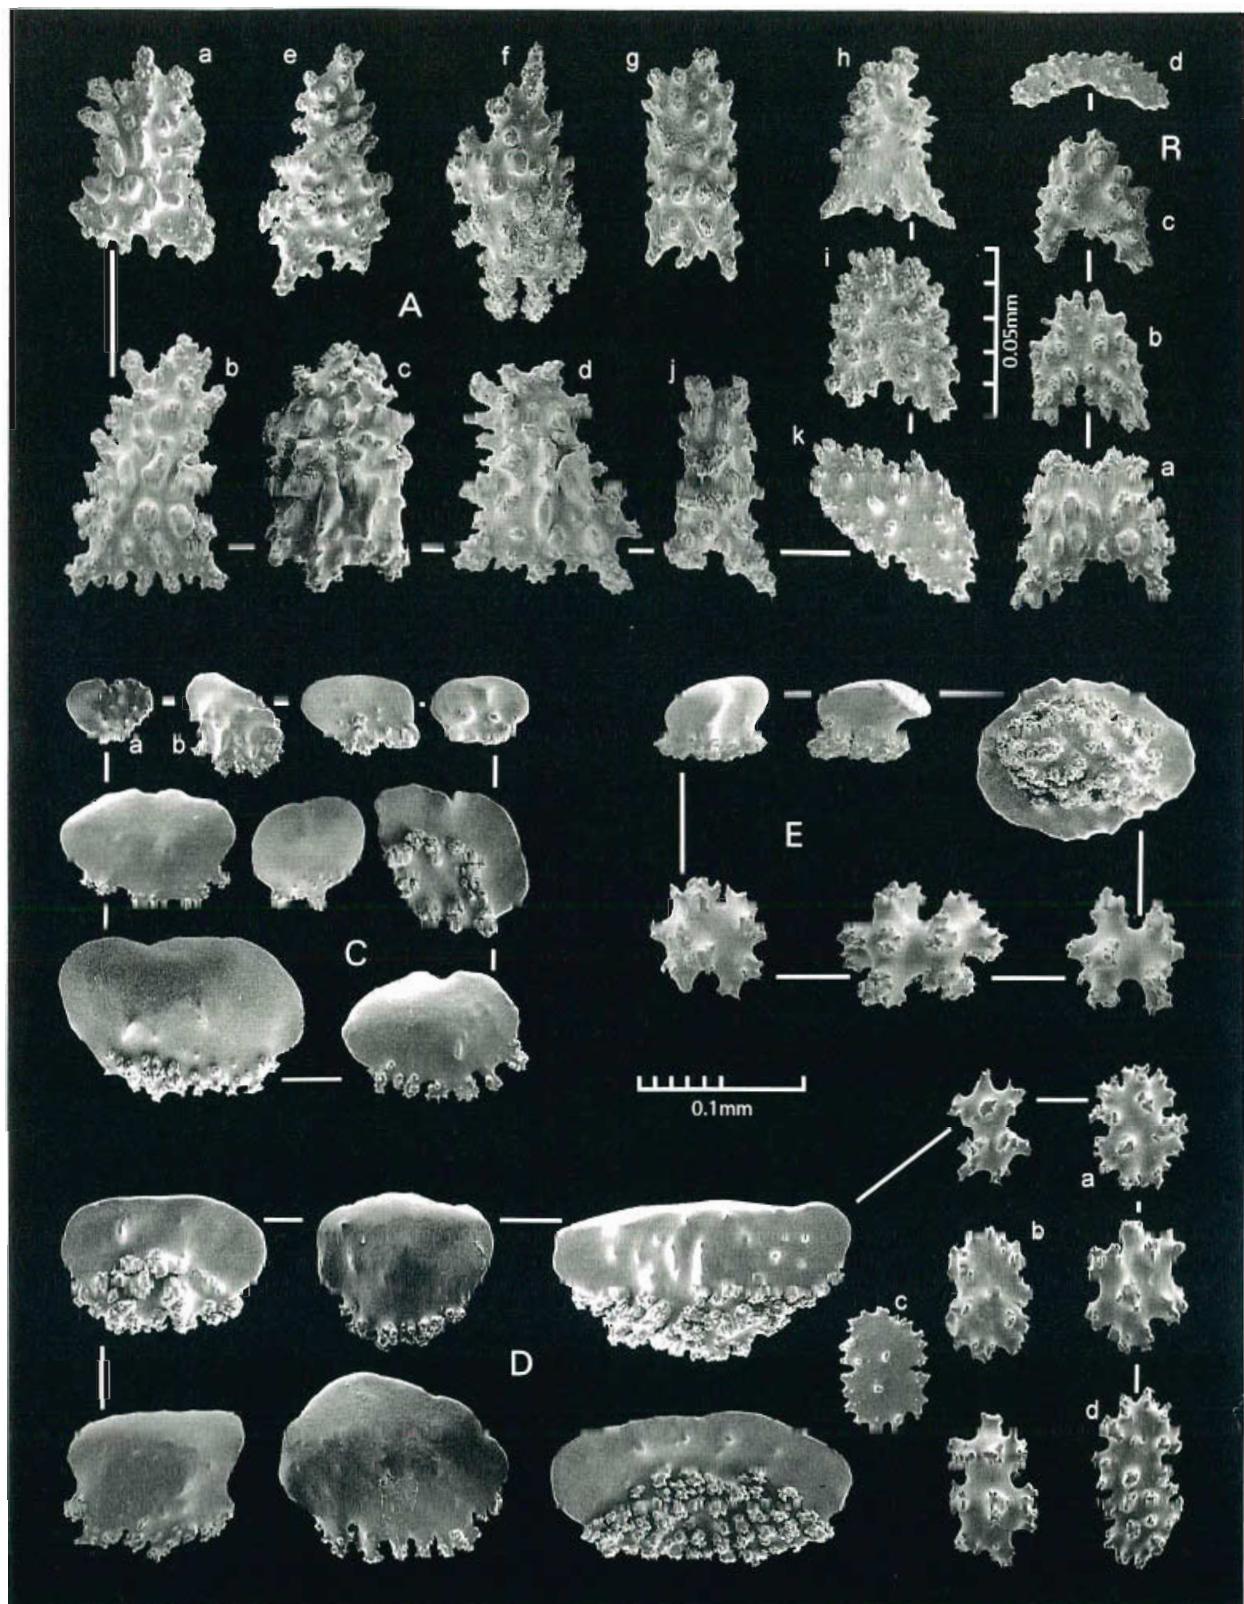

Fig. 208. *Gorgonisis elyakovi* n.sp., holotype, sclerites: A. Anthopoma; B. Tentacles; C. Polyp body; D. Twig coenenchyme; E. Main branch coenenchyme.

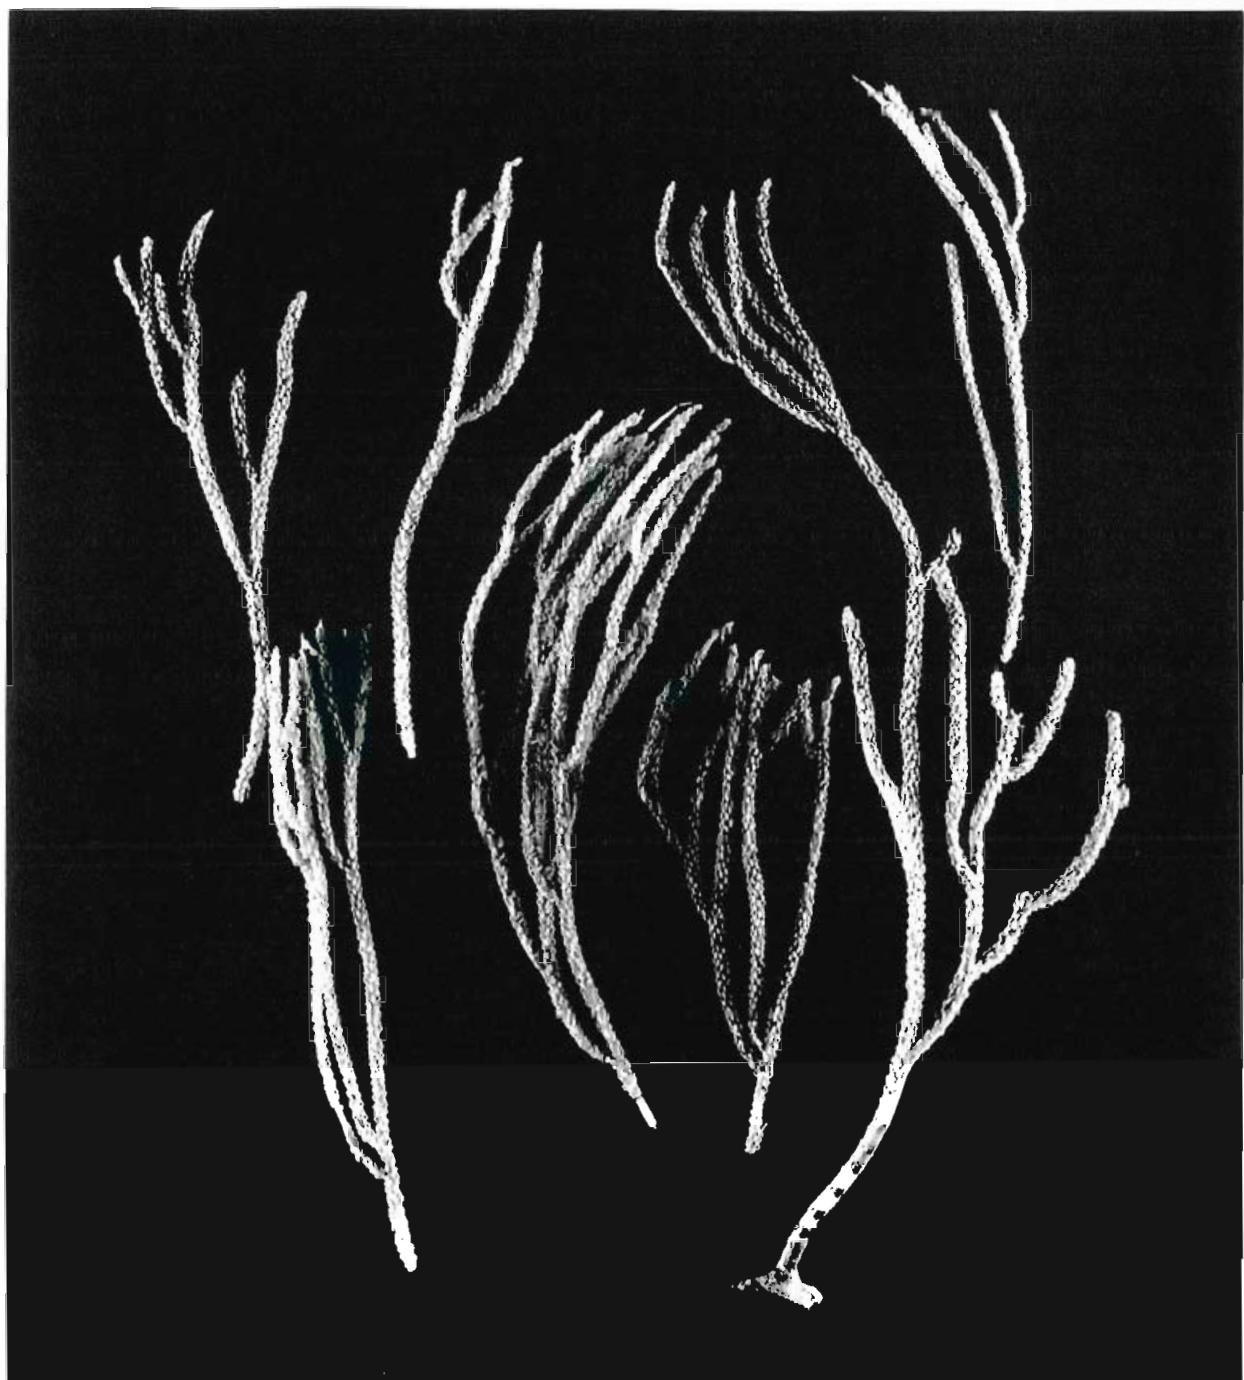

Fig. 209. *Pangolinisis cia* n.sp., holotype, natural size.

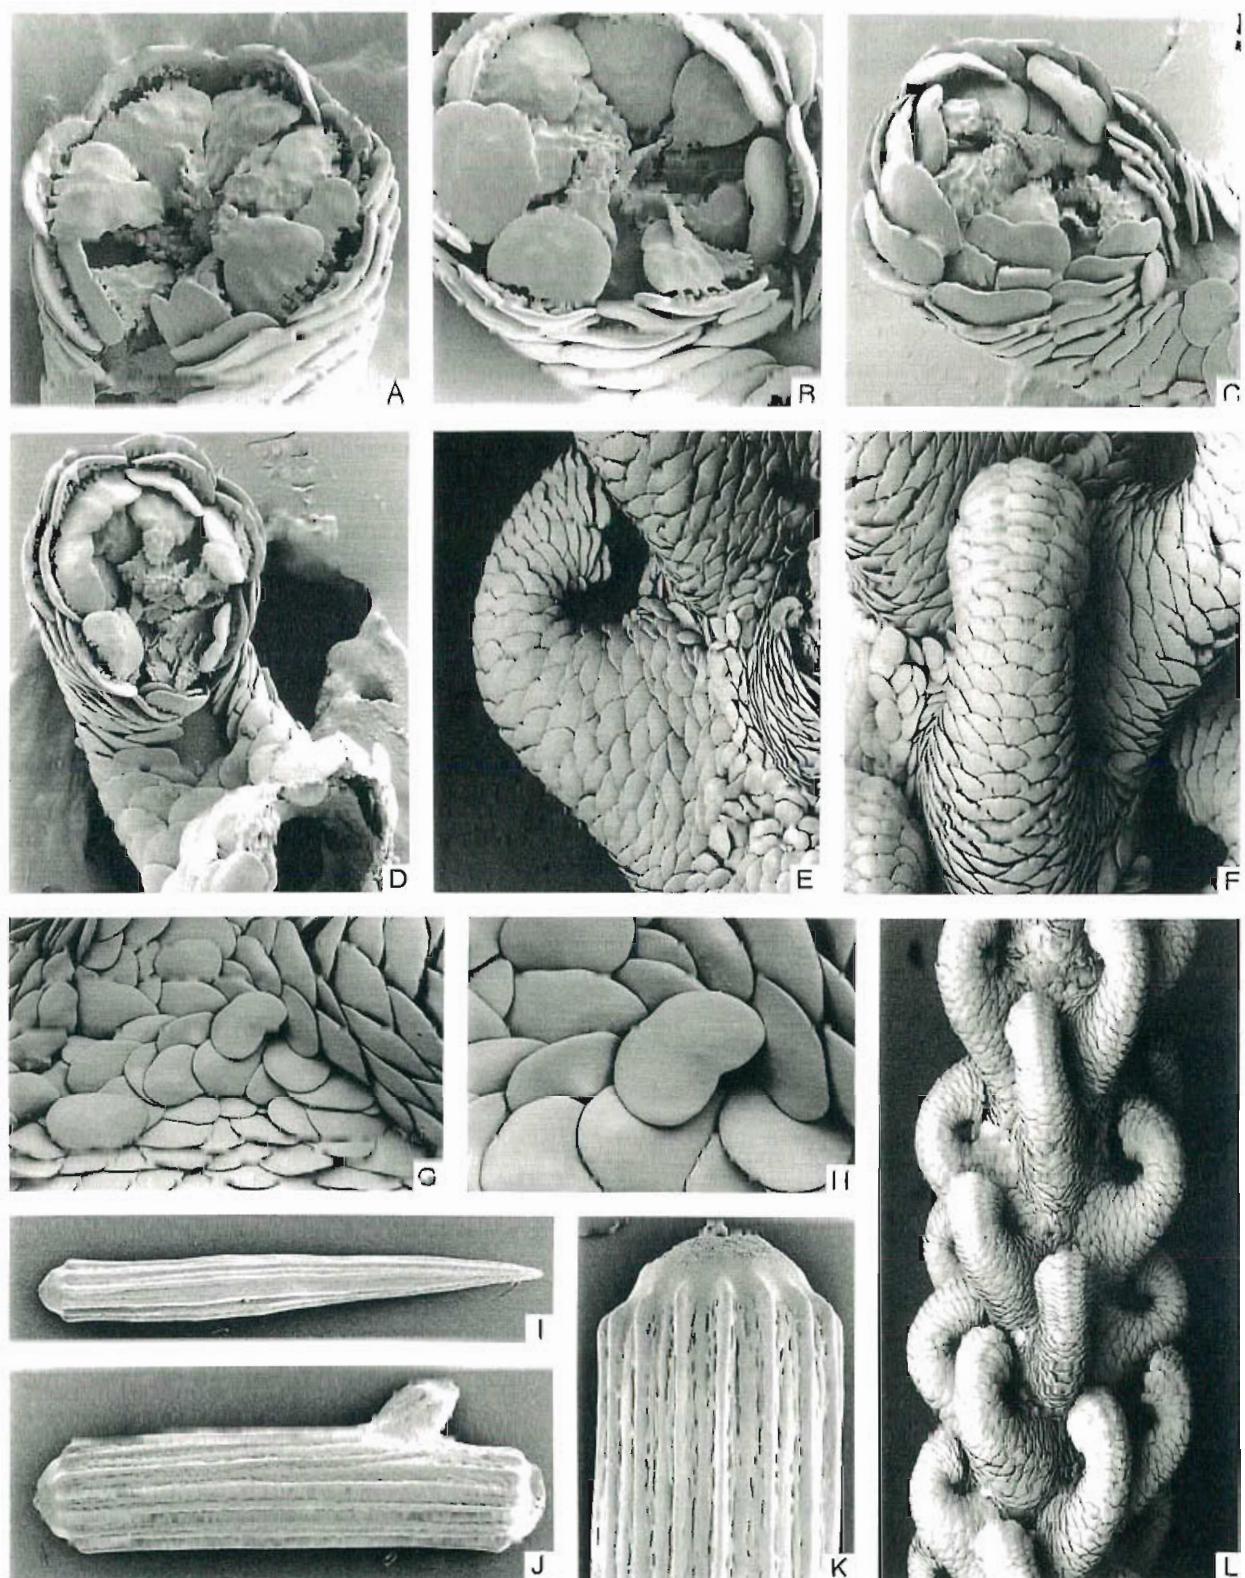

Fig. 210. *Pangolinisis cia* n.sp., holotype: A-F. Polyps; G-H. Coenenchyme; I-K. Axial internodes; L. Twig fragment.

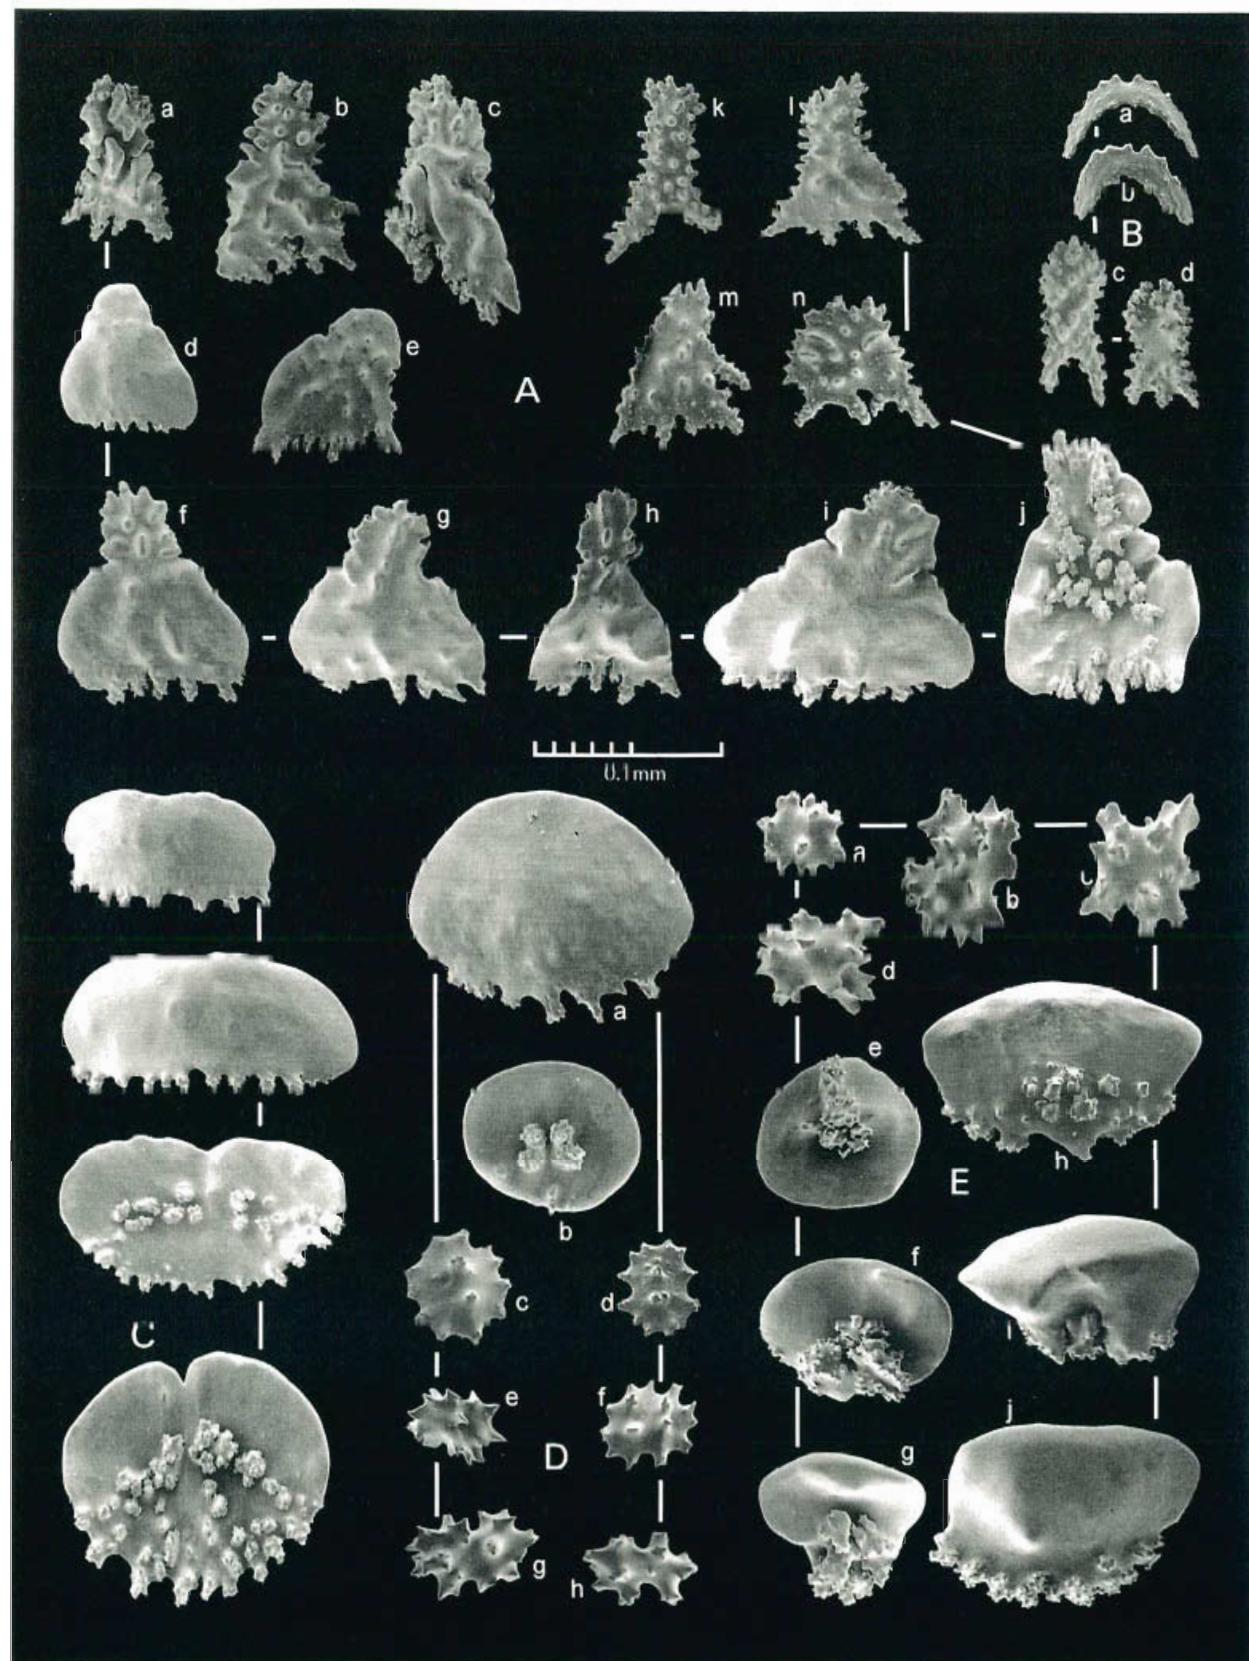

Fig. 211. *Pangolinisis cia* n.sp., holotype, sclerites: A. Anthopoma; B. Tentacles; C. Polyp body; D. Twig coenenchyme; E. Stem coenenchyme.

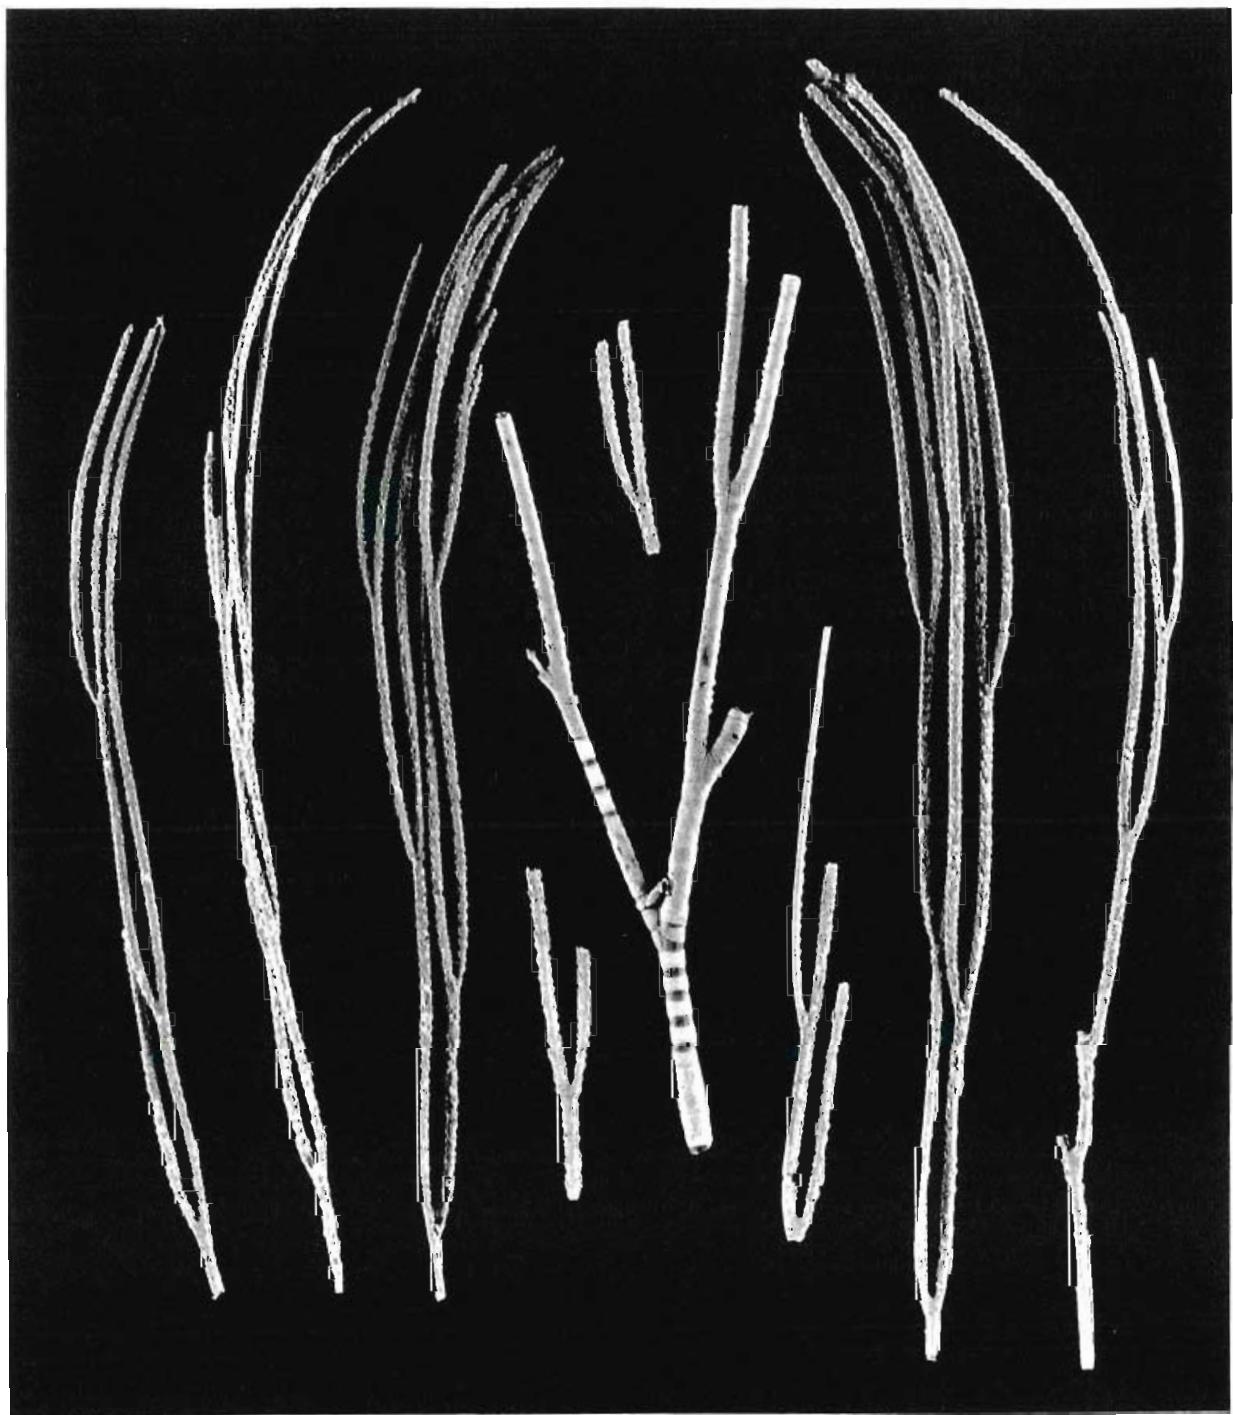

Fig. 212. *Plexipomisis thetis* n.sp., holotype, natural size.

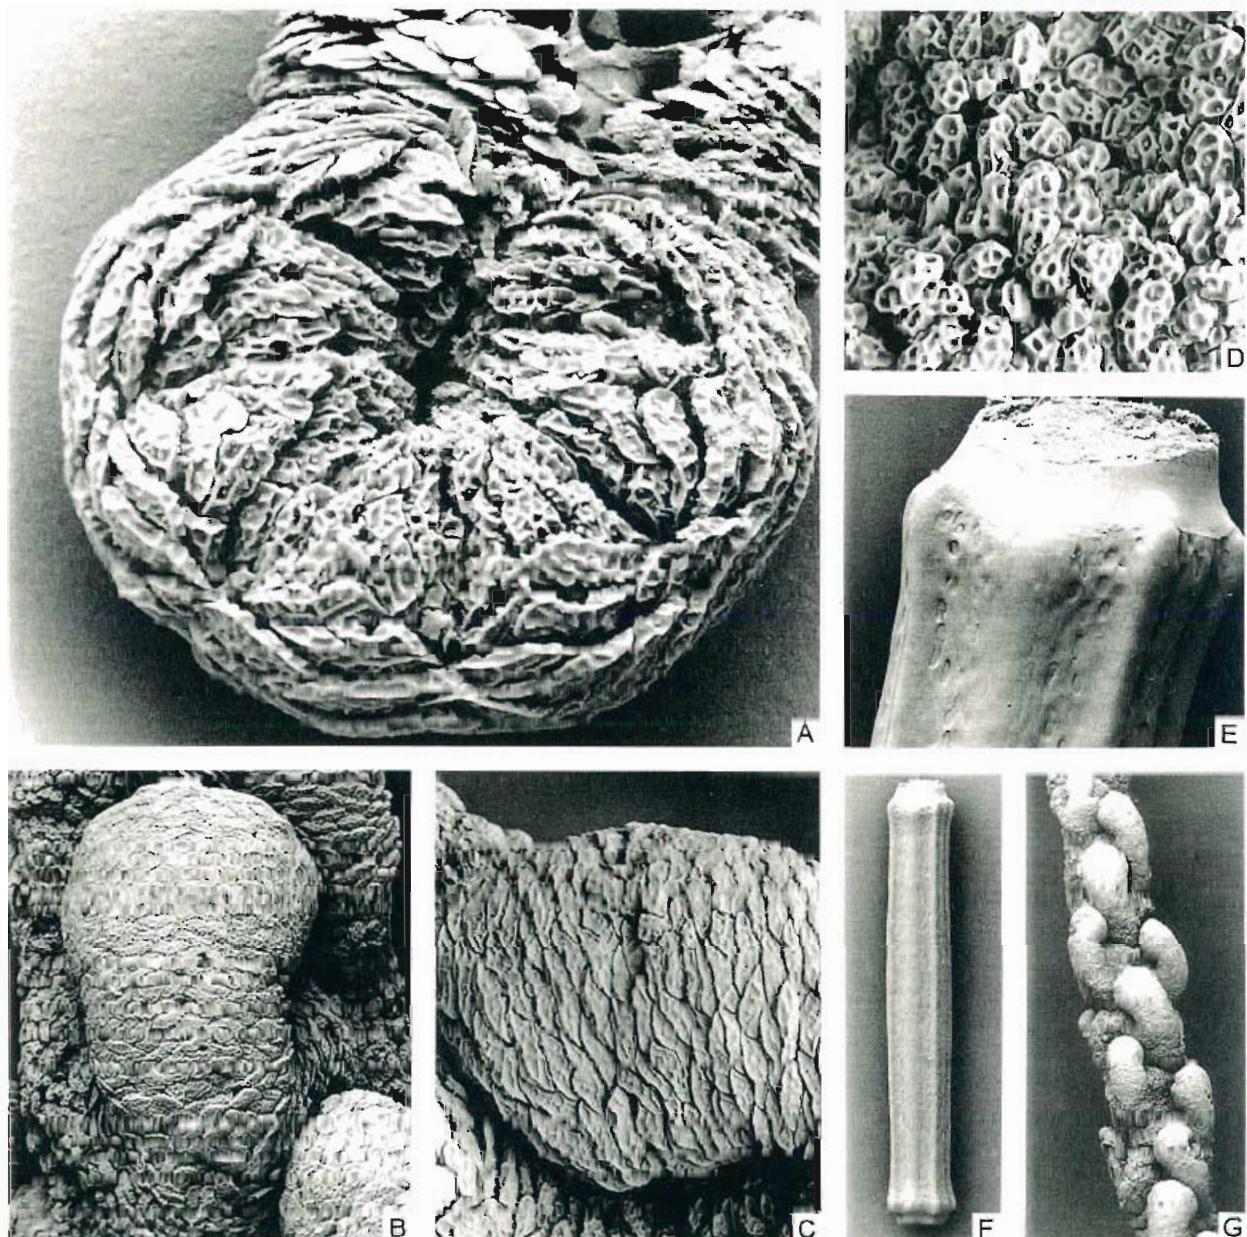

Fig. 213. *Plexipomisis thetis* n.sp., holotype: A-C. Polyps; D. Coenenchyme; E-F. Axial internodes; G. Twig fragment.

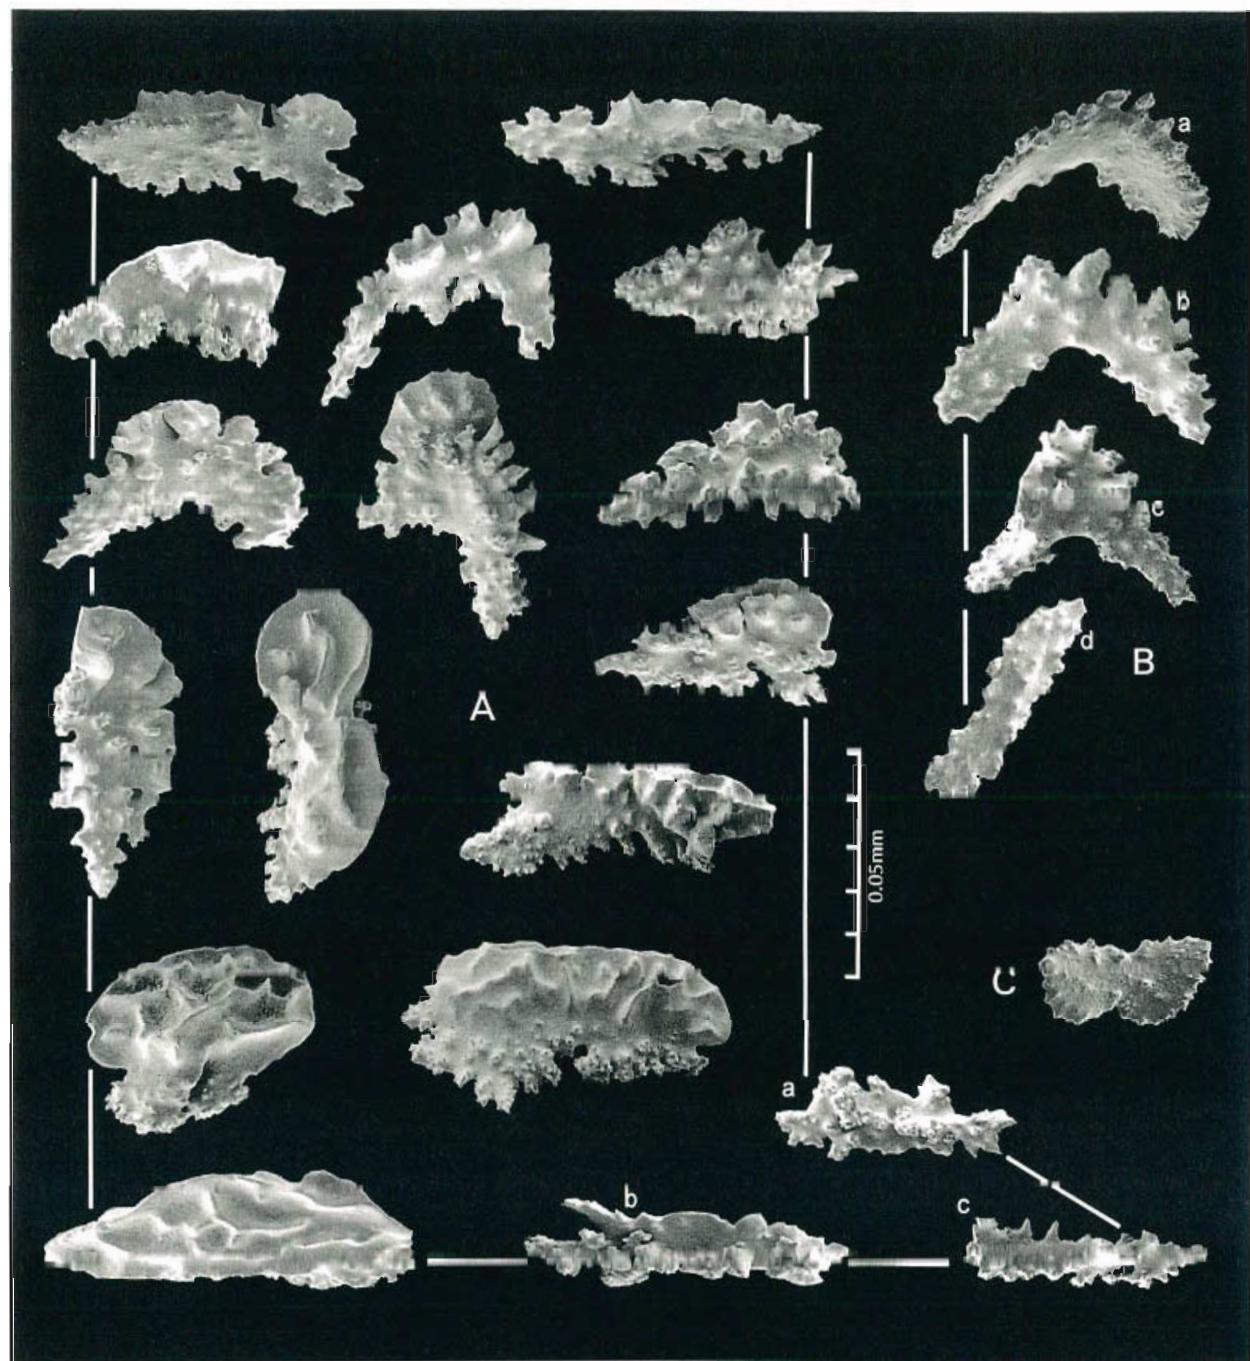

Fig. 214. *Plexipomisis theta* n.sp., holotype, sclerites: A. Anthopoma; B. Tentacles; C. Adaxial polyp margin.

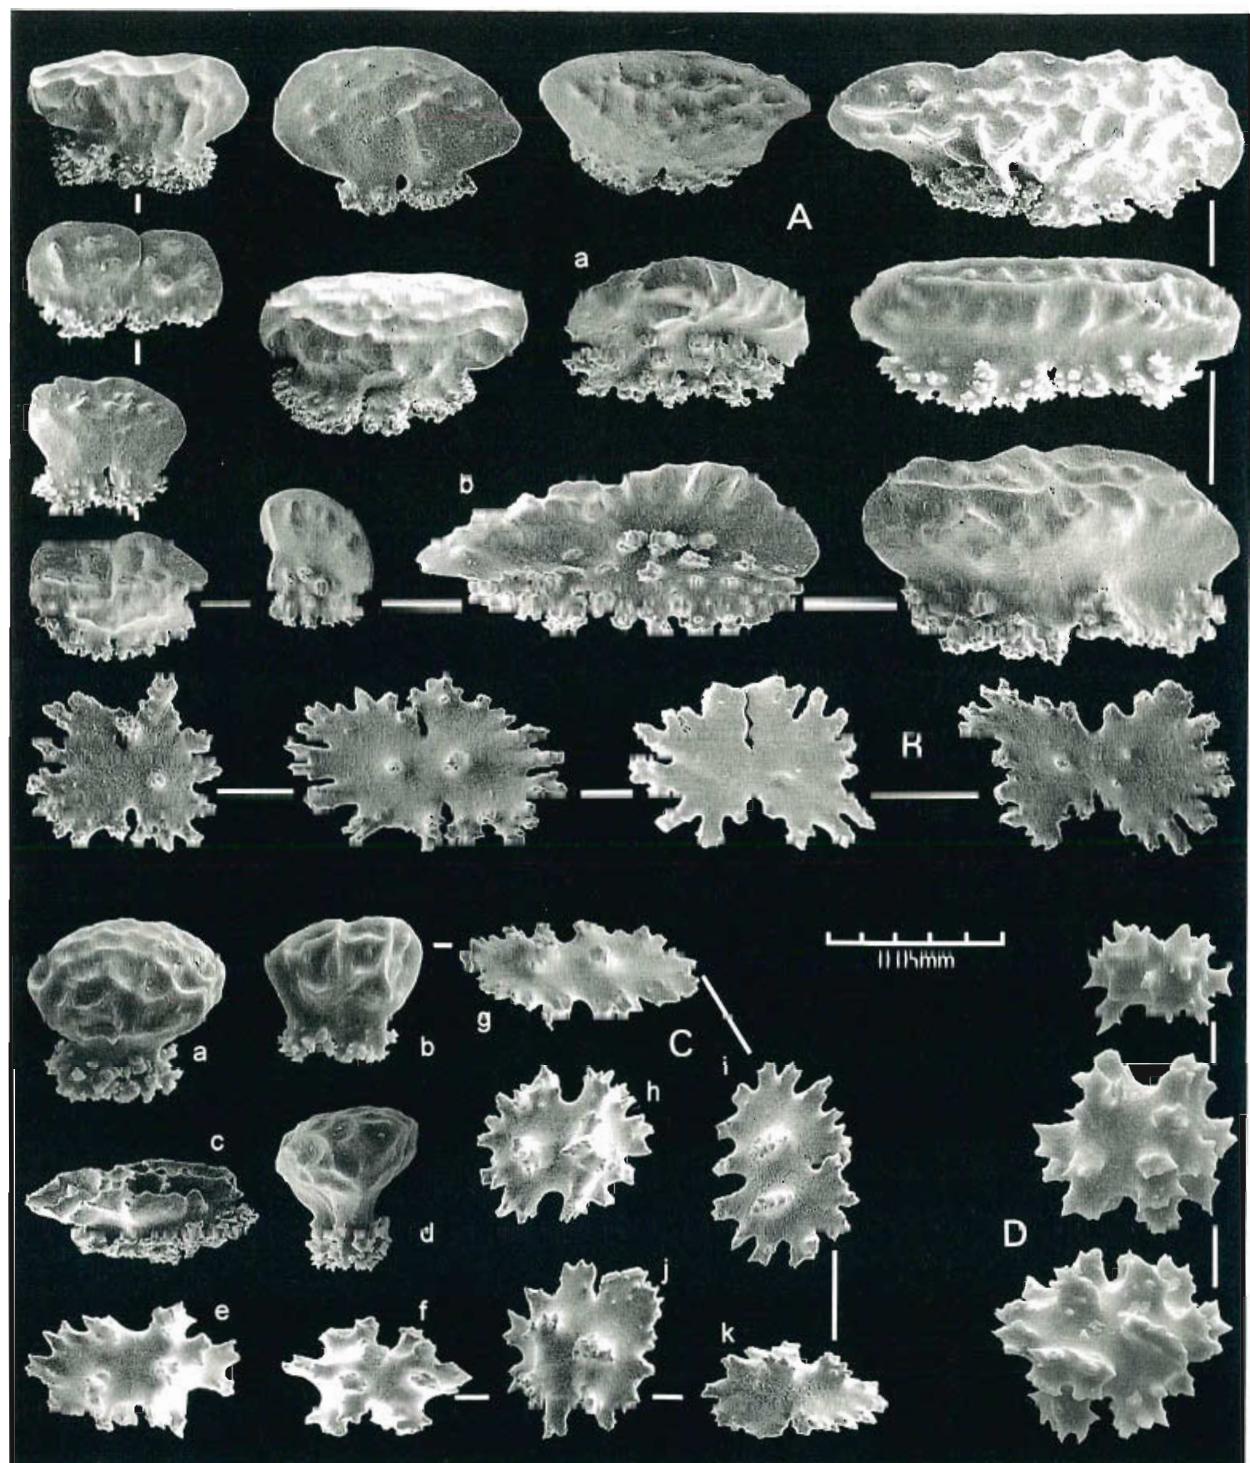

Fig. 215. *Plexipomisis theta* n.sp., holotype, sclerites: A. Polyp body; B. Sub-surface of polyp body, stellate plates; C. Twig coenenchyme; D. Sub-surface of stem coenenchyme.

Fig. 216. *Plexipomisis elegans* (Thomson & Mackinnon, 1911), lectotype, natural size.

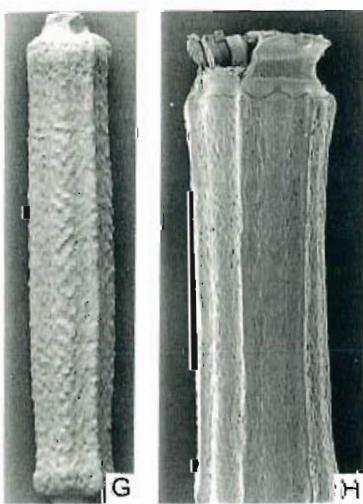

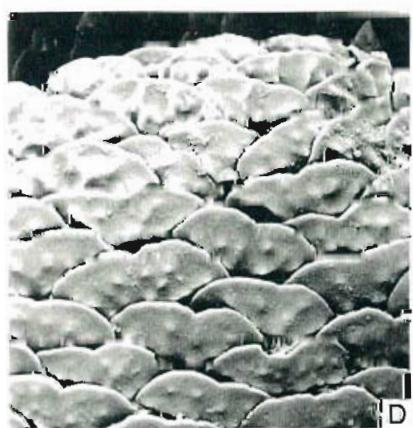

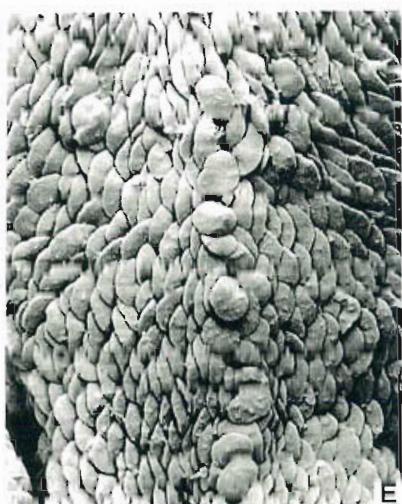

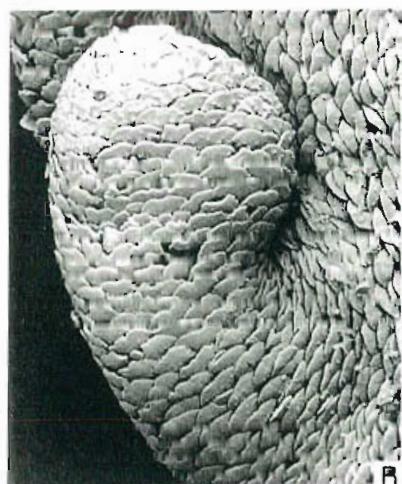

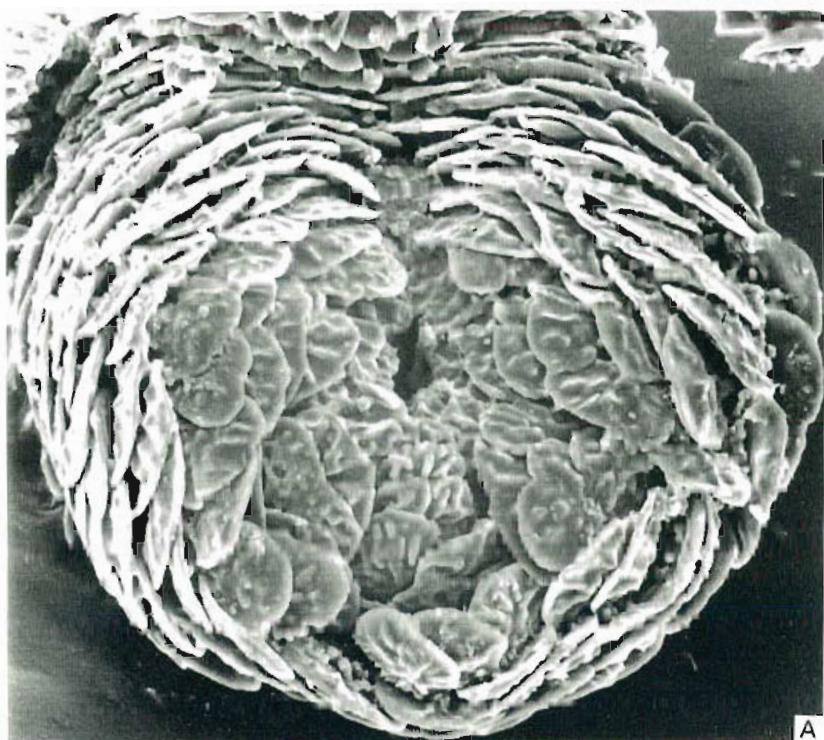

Fig. 217. *Plexipomisis elegans* (Thomson & Mackinnon, 1911), lectotype: A-D. Polyps; E. Coenenchyme; F-H. Axial internodes; I. Twig fragment.

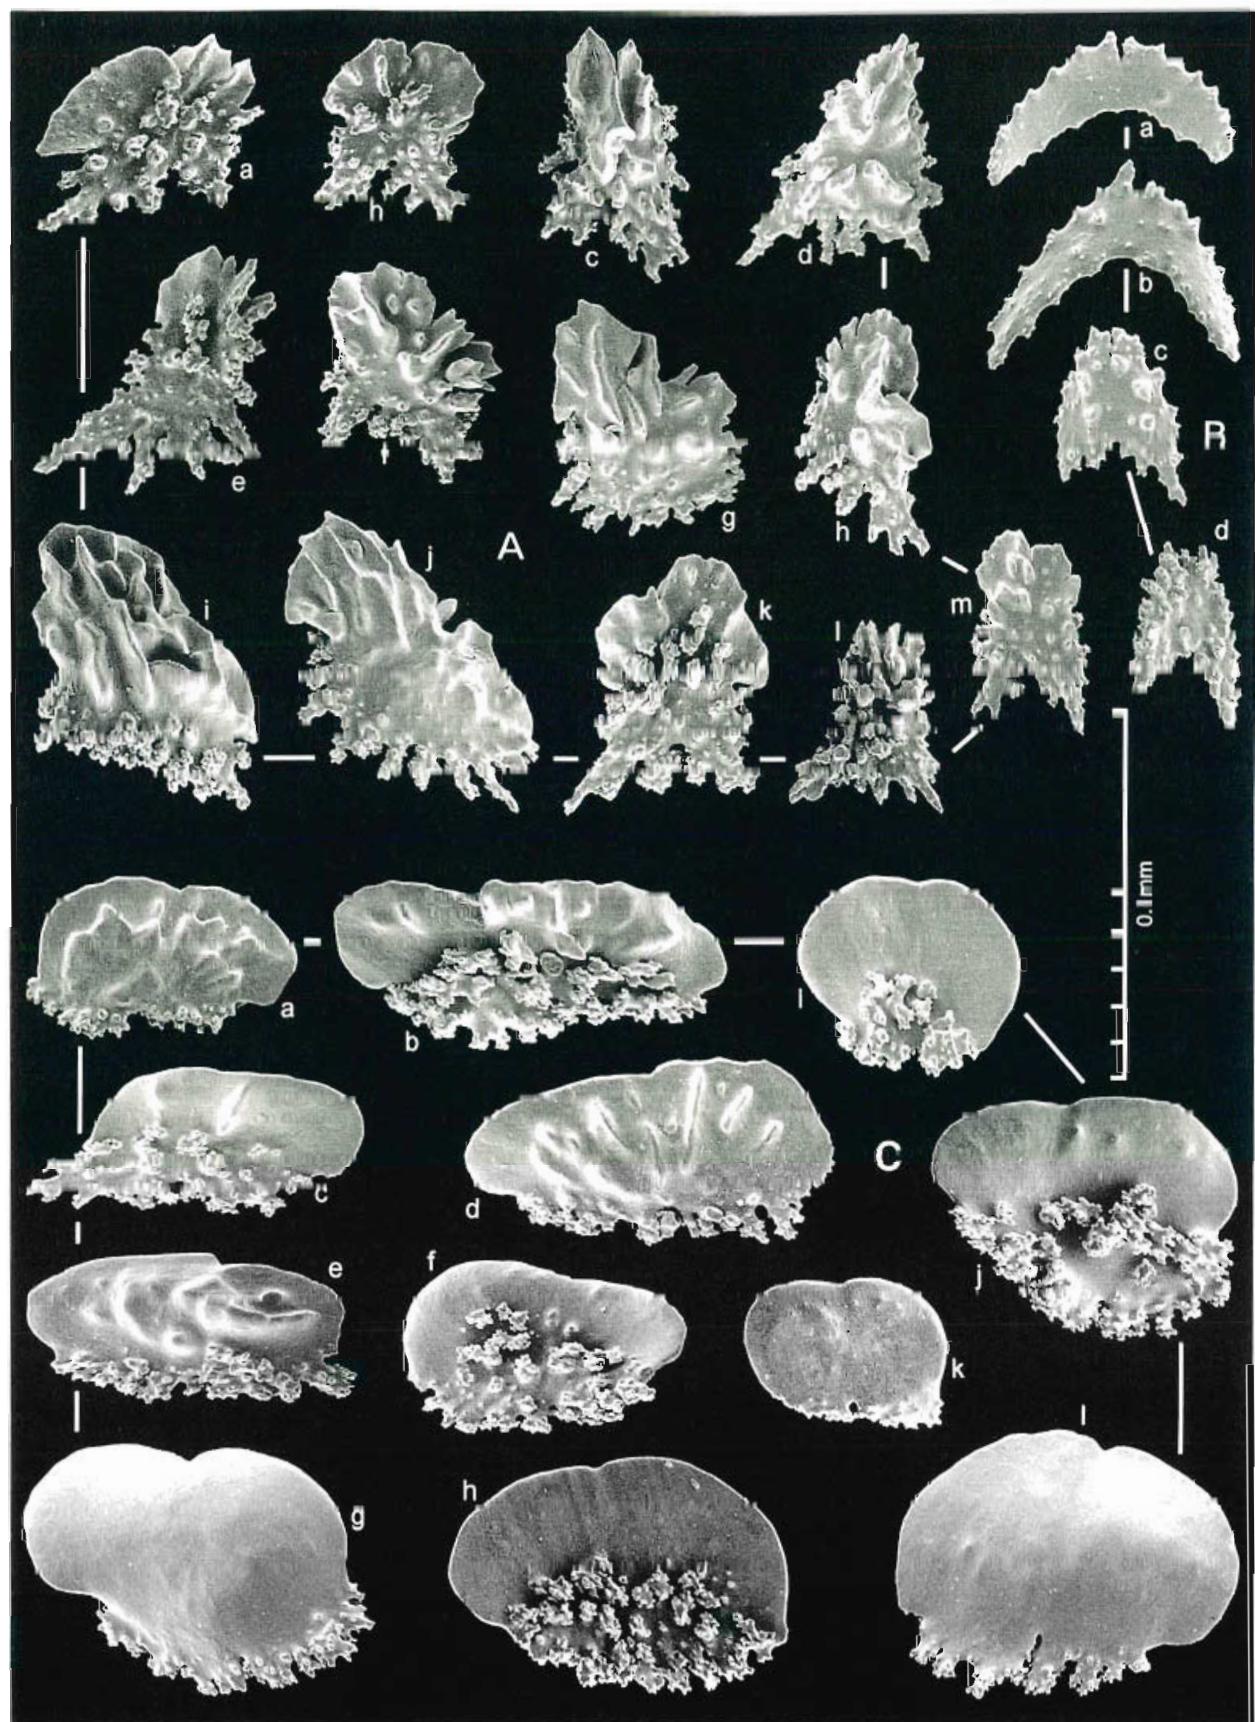

Fig. 218. *Plexipomisis elegans* (Thomson & Mackinnon, 1911), lectotype, sclerites: A. Anthopoma; B. Tentacles; C. Polyp body.
