# Acknowledgments

---

Our thanks go Chris Myers and colleagues at Peter Lang for the opportunity to put together a collection based on books published in our *New Literacies and Digital Epistemologies* series that samples the range of recent and current work within the loosely scribed field of “new literacies” research and scholarship. We would especially like to thank Bernie Shade for her unstinting good cheer and helpfulness in her role as production manager.

This collection represents the strong international mix that characterizes the books in the series and we wish to thank our authors for so willingly consenting to having their work republished in this collection.

We especially want to thank Jillian Walmach and Beverly Plein for their unstinting formatting and proof reading assistance. Both went above and beyond in helping us produce this Reader from a collection of files to a tight timeline.

Finally, we wish to convey our thanks to the many readers who have supported this series and helped us sustain it through a decade. We greatly appreciate your interest in the series and support for it. In this regard our thanks extend to the many librarians who order new books for their institutional stock and to colleagues who have found a place for various books in their course reading. Your support has been crucial to the series’ sustainability and we thank you very much.
