MODALITIES OF CYBERBULLYING

Digital citizenship, social responsibility, digital literacy, and digital citizenship are some of the themes explored on this site.

Our multimedia library of academicians working in journalism, social responsibility, digital scholarship, and creative writing is focused on the intersection of students, students and community, and virtual reality. Our work with K-12 students in a classroom setting has involved them in developing research and producing video clips that imagined cyberbullying scenarios, some of which are uploaded on this site.

We welcome ongoing feedback and suggestions for improving our present cyberbullying site.

Thank you. Margot Anne
