Notices

Knowledge and best practice in this field are constantly changing. As new research and experience broaden our understanding, changes in research methods, professional practices, or medical treatment may become necessary.

Practitioners and researchers must always rely on their own experience and knowledge in evaluating and using any information, methods, compounds, or experiments described herein. In using such information or methods they should be mindful of their own safety and the safety of others, including parties for whom they have a professional responsibility.

To the fullest extent of the law, neither the Publisher nor the authors, contributors, or editors, assume any liability for any injury and/or damage to persons or property as a matter of products liability, negligence or otherwise, or from any use or operation of any methods, products, instructions, or ideas contained in the material herein.

Contents

List of contributors	xi
1 Introduction to the use of recycled plastics in eco-efficient concrete	1
<i>F. Pacheco-Torgal</i>	
1.1 The waste plastic problem	1
1.2 Outline of the book	4
References	7
2 Techniques for separation of plastic wastes	9
<i>Silvia Serranti and Giuseppe Bonifazi</i>	
2.1 Introduction	9
2.2 Plastic waste sources and typologies	10
2.3 The plastic recycling chain	13
2.4 Plastic waste separation technologies	15
2.5 Recycled plastics quality control	28
2.6 Technical challenges in plastic recycling	30
References	33
3 Hydraulic separation of plastic wastes	39
<i>Monica Moroni, Emanuela Lupo and Floriana La Marca</i>	
3.1 Introduction	39
3.2 Principles of the hydraulic separation process	40
3.3 Devices for the hydraulic separation within mechanical recycling plants	46
3.4 The hydraulic separator channel	48
3.5 Separation efficacy of the hydraulic separator channel	54
3.6 Conclusions	65
References	66
4 Production of recycled polypropylene (PP) fibers from industrial plastic waste through melt spinning process	69
<i>Rabin Tuladhar and Shi Yin</i>	
4.1 Introduction	69
4.2 Physical cutting of waste plastic	70
4.3 Mechanical recycling of plastic wastes	71
4.4 Production of recycled plastic fibers	75

4.5	Material characterization	77
4.6	Mechanical properties of recycled PP fibers	80
4.7	Conclusions	82
	Acknowledgments	83
	References	83
5	Fresh properties of concrete containing plastic aggregate	85
	<i>Sheelan M. Hama and Nahla N. Hilal</i>	
5.1	Introduction	85
5.2	Mix proportion and design	85
5.3	Workability of fresh concrete containing plastic aggregate	94
5.4	Fresh density of concrete containing plastic aggregate	101
5.5	Self-compacting plastic aggregate concrete	103
5.6	Conclusions	113
	References	113
	Further reading	114
6	Mechanical strength of concrete with PVC aggregates	115
	<i>A.A. Mohammed</i>	
6.1	Introduction	115
6.2	Properties of concrete with PVC waste aggregate	117
6.3	Summary	134
	References	134
7	Characteristics of concrete containing EPS	137
	<i>J.M. Khatib, B.A. Herki and A. Elkordi</i>	
7.1	Introduction	137
7.2	Preparation of EPS	139
7.3	Physical properties of EPS	140
7.4	Chemical properties of EPS	141
7.5	Substitution levels of EPS	141
7.6	Production and applications of EPS concrete	146
7.7	Density of concrete containing EPS	146
7.8	Fresh properties of concrete containing EPS	146
7.9	Mechanical properties	148
7.10	Thermal conductivity	153
7.11	Durability-related properties of concrete containing EPS	154
7.12	Structural performance of reinforced concrete beams	156
7.13	Conclusions and recommendations	156
	References	158
8	Lightweight concrete with polyolefins as aggregates	167
	<i>Francesco Colangelo and Ilenia Farina</i>	
8.1	Introduction	167
8.2	Production of expanded granules	168
8.3	Use of recycled polyolefins in different sectors	170

8.4	Use of polyolefins as recycled aggregates in lightweight concrete (case study)	170
8.5	Future trends	183
	References	183
	Further reading	186
9	Properties of concrete with plastic polypropylene aggregates	189
	<i>Z. Pavlík, M. Pavlíková and M. Záleská</i>	
9.1	Introduction	189
9.2	Waste polypropylene-based aggregates for concrete	191
9.3	Structural properties of concrete with PP aggregates	197
9.4	Mechanical properties of concrete with PP aggregates	199
9.5	Thermal properties of composites with PP aggregates	207
9.6	Hygric properties of composites with PP aggregates	210
9.7	Possible application of PP in concrete production and future trends	211
	Acknowledgments	211
	References	211
10	Virgin and waste polymer incorporated concrete mixes for enhanced neutron radiation shielding characteristics	215
	<i>Santhosh M. Malkapur and Mattur C. Narasimhan</i>	
10.1	Introduction	215
10.2	Neutron radiation and shielding	216
10.3	Use of hydrogenous aggregates and polymers in radiation shielding	223
10.4	Use of virgin HDPE powder as partial replacement to sand	227
10.5	Properties of PISCC mixes in their fresh states	231
10.6	Neutron radiation shielding properties of polymer incorporated concrete mixes	235
	References	245
11	Performance of dioctyl terephthalate concrete	249
	<i>B. Şimşek, T. Uygunoğlu, H. Korucu and M.M. Kocakerim</i>	
11.1	Introduction	249
11.2	Dioctyl terephthalate concrete	251
11.3	Comparison of the polyethylene terephthalate and dioctyl terephthalate concrete	257
11.4	Conclusions and recommendations	262
	References	264
12	Recycling of PET in asphalt concrete	269
	<i>I. Aghayan and R. Khafajeh</i>	
12.1	Introduction	269
12.2	Using PET waste as modifier in asphalt mixture	270
12.3	Conclusion	282
	References	283

13	Recycling of different plastics in asphalt concrete	287
	<i>M.A. Dalhat, Khaleel Al-Adham and M.A. Habib</i>	
13.1	Introduction	287
13.2	Polymer modification of asphalt and the need for plastic recycling in asphalt concrete	288
13.3	Materials and methods	289
13.4	Results	293
13.5	Future trends	302
13.6	Summary and conclusions	302
	Acknowledgments	303
	Conflict of interest	303
	References	303
14	Replacement of stabilizers by recycling plastic in asphalt concrete	307
	<i>Goutham Sarang</i>	
14.1	Introduction	307
14.2	Need for stabilization of asphalt concrete	308
14.3	Addition of plastic in asphalt concrete	314
14.4	Performance of asphalt concrete with plastics	315
14.5	Field investigations	317
14.6	Conclusion	318
	References	318
15	The use of recycled plastic as partial replacement of bitumen in asphalt concrete	327
	<i>Marta Vila-Cortavitarte, Pedro Lastra-González, Miguel Ángel Calzada-Pérez and I. Indacoechea-Vega</i>	
15.1	Introduction	327
15.2	Bitumen's role in asphalt	328
15.3	Modification of asphalt mixtures with polymers	329
15.4	Modification of asphalt mixtures with polystyrene	332
15.5	General Conclusions	344
15.6	Future lines of study	345
	References	346
16	Concrete reinforced with metalized plastic waste fibers	349
	<i>Ankur C. Bhogayata</i>	
16.1	Introduction	349
16.2	Metalized postconsumer plastic wastes: challenges and issues for management	349
16.3	Feasibility of MPW in concrete: outcomes from pilot studies	350
16.4	Role of MPW fibers in the workability and strength properties of conventional concrete	355
16.5	Effect of MPW fibers on the deformation due to the axial compression by modified concrete	360

16.6	Advantages and limitations of the usage of MPW in concrete	364
16.7	Important findings and concluding remarks	365
16.8	Future trends	366
16.9	Sources of further information and advice	366
	References	366
	Further reading	367
17	Performance of concrete with PVC fibres	369
	<i>Senthil Kumar Kaliyavaradhan and Tung-Chai Ling</i>	
17.1	Introduction	369
17.2	Performance of concrete with PVC fibres	370
17.3	Conclusions	383
17.4	Future research perspective	383
	Acknowledgments	383
	References	384
18	Recycled waste PET for sustainable fiber-reinforced concrete	387
	<i>Dora Foti</i>	
18.1	Introduction	387
18.2	Use of PET in concrete	389
18.3	Tests (summary) and results	398
18.4	Conclusions	408
	Acknowledgments	408
	References	408
	Further reading	410
19	Properties of recycled carpet fiber reinforced concrete	411
	<i>Hamid Reza Pakravan, Ali Asghar Asgharian Jeddi, Masoud Jamshidi, Farnaz Memarian and Amir Masoud Saghafi</i>	
19.1	Introduction	411
19.2	Carpet types and fiber recycling methods	412
19.3	Properties of recycled carpet fiber	415
19.4	Physical properties of concrete containing recycled carpet fiber	416
19.5	Durability-related properties of concrete containing recycled carpet fiber	418
19.6	Mechanical properties of concrete containing recycled carpet fiber	418
19.7	Future trends	422
	References	423
20	Performance of asphalt concrete with plastic fibres	427
	<i>Nura Usman and Mohd Idrus Mohd Masirin</i>	
20.1	Introduction	427
20.2	Polyethylene terephthalate	428
20.3	The use of polyethylene terephthalate in asphalt mixture	428

20.4	Recycled polyethylene terephthalate fiber	429
20.5	Characteristics of recycled PET fiber	430
20.6	Application of recycled PET fiber in asphalt mixture	431
20.7	Conclusion	437
	References	438
21	Sustainability of using recycled plastic fiber in concrete	441
	<i>Rabin Tuladhar and Shi Yin</i>	
21.1	Introduction	441
21.2	Sustainability in construction materials	442
21.3	Comprehensive LCA of recycled plastic fibers used for reinforcing concrete	448
21.4	Conclusions	458
	Acknowledgments	459
	References	459
	Index	461

List of contributors

I. Aghayan Shahrood University of Technology, Shahrood, Iran

Khaleel Al-Adham Civil & Environmental Engineering Department, King Fahd University of Petroleum and Minerals, Dhahran, Saudi Arabia

Ali Asghar Asgharian Jeddi Textile Engineering Department, Amirkabir University of Technology, Tehran, Iran

Ankur C. Bhogayata Department of Civil Engineering Marwadi Education Foundation's Group of Institutions, Rajkot, India

Giuseppe Bonifazi Department of Chemical Engineering, Materials & Environment, Sapienza University of Rome, Rome, Italy

Miguel Ángel Calzada-Pérez GCS Research Group, University of Cantabria, Av. de los Castros 44, Santander, Spain

Francesco Colangelo Department of Engineering, University Parthenope of Naples, Materials Science and Engineering Research Group—MASERG, Centro Direzionale, Is. C4, Naples, Italy

M.A. Dalhat Transportation and Traffic Engineering Department, College of Engineering, Imam Abdulrahman Bin Faisal University, Dammam, Saudi Arabia

A. Elkordi Faculty of Engineering, Beirut Arab University, Beirut, Lebanon

Ilenia Farina Department of Engineering, University Parthenope of Naples, Materials Science and Engineering Research Group—MASERG, Centro Direzionale, Is. C4, Naples, Italy

Dora Foti Department of Civil Engineering Sciences and Architecture, Polytechnic University of Bari, Bari, Italy

M.A. Habib Civil & Environmental Engineering Department, King Fahd University of Petroleum and Minerals, Dhahran, Saudi Arabia

Sheelan M. Hama Department of Civil Engineering, University of Anbar, Ramadi, Iraq

B.A. Herki Faculty of Engineering, Soran University, Erbil, Iraq

Nahla N. Hilal Department of Civil Engineering, University of Anbar, Ramadi, Iraq

I. Indacochea-Vega GITECO Research Group, University of Cantabria, Av. de los Castros 44, Santander, Spain

Masoud Jamshidi School of Chemical Engineering, Iran University of Science and Technology (IUST), Tehran, Iran

Senthil Kumar Kaliyavaradhan Key Laboratory for Green and Advanced Civil Engineering Materials and Application Technology of Hunan Province, College of Civil Engineering, Hunan University, Changsha, China

R. Khafajeh Shahrood University of Technology, Shahrood, Iran

J.M. Khatib Faculty of Engineering, Beirut Arab University, Beirut, Lebanon; Faculty of Science and Engineering, University of Wolverhampton, Wolverhampton, United Kingdom

M.M. Kocakerim Department of Chemical Engineering, Çankırı Karatekin University, UluYazı Campus, Çankırı, Turkey

H. Korucu Department of Chemical Engineering, Çankırı Karatekin University, UluYazı Campus, Çankırı, Turkey

Floriana La Marca DICMA-Sapienza University of Rome, Rome, Italy

Pedro Lastra-González GITECO Research Group, University of Cantabria, Av. de los Castros 44, Santander, Spain

Tung-Chai Ling Key Laboratory for Green and Advanced Civil Engineering Materials and Application Technology of Hunan Province, College of Civil Engineering, Hunan University, Changsha, China

Emanuela Lupo DICEA-Sapienza University of Rome, Rome, Italy

Santhosh M. Malkapur Department of Civil Engineering, Faculty of Engineering and Technology, M.S. Ramaiah University of Applied Sciences, Bengaluru, India

Mohd Idrus Mohd Masirin Faculty of Civil and Environmental Engineering, Universiti Tun Hussein Onn Malaysia, Rarit Raja Johor, Malaysia

Farnaz Memarian Textile Engineering Department, Amirkabir University of Technology, Tehran, Iran

A.A. Mohammed Department of Civil Engineering, College of Engineering, University of Sulaimani, Sulaimani, Iraq

Monica Moroni DICEA-Sapienza University of Rome, Rome, Italy

Mattur C. Narasimhan Department of Civil Engineering, National Institute of Technology Karnataka (NITK) Surathkal, Mangalore, India

F. Pacheco-Torgal C-TAC Research Centre, University of Minho, Guimarães, Portugal

Hamid Reza Pakravan Textile Engineering Department, Amirkabir University of Technology, Tehran, Iran

Z. Pavlík Department of Materials Engineering and Chemistry, Faculty of Civil Engineering, Czech Technical University in Prague, Prague, Czech Republic

M. Pavlíková Department of Materials Engineering and Chemistry, Faculty of Civil Engineering, Czech Technical University in Prague, Prague, Czech Republic

Amir Masoud Saghafi Technical and Production Director, Savin Carpet Company, Tehran, Iran

Goutham Sarang Assistant Professor (Senior), School of Mechanical and Building Sciences (SMBS), Vellore Institute of Technology - Chennai Campus, Chennai, Tamil Nadu, India

Silvia Serranti Department of Chemical Engineering, Materials & Environment, Sapienza University of Rome, Rome, Italy

B. Şimşek Department of Chemical Engineering, Çankırı Karatekin University, Uluyazı Campus, Çankırı, Turkey

Rabin Tuladhar Centre of Tropical Environmental and Sustainability Science, College of Science and Engineering, James Cook University, Townsville, QLD, Australia

Nura Usman Faculty of Civil and Environmental Engineering, Universiti Tun Hussein Onn Malaysia, Rarit Raja Johor, Malaysia; Department of Civil Engineering, Hassan Usman Katsina Polytechnic, Katsina, Nigeria

T. Uygunoğlu Department of Civil Engineering, Afyon Kocatepe University, Ahmet Necdet Sezer Campus, Afyon, Turkey

Marta Vila-Cortavitarte GITECO Research Group, University of Cantabria, Av. de los Castros 44, Santander, Spain

Shi Yin College of Science and Engineering, James Cook University, Townsville, QLD, Australia

M. Záleská Department of Materials Engineering and Chemistry, Faculty of Civil Engineering, Czech Technical University in Prague, Prague, Czech Republic
